

MOTIVATION LETTER FOR UNIVERSITY

Dear Sir/Madam,

I am very much interested in applying for a Master's Degree in Philosophy. I have already graduated in 2013, from AA University, holding a Bachelor's Degree in Philosophy. That four year undergraduate program in Philosophy has ultimately formed the foundation of my perseverance in achieving a deep knowledge in the field of Philosophy. For this reason, I have also studied several subjects that are related to the various aspects of Philosophy.

During my four year bachelor studies, I went through the experience of creating a thesis under the supervision and guidance of Professor Art Main. This was also prepared together with my colleagues. While I was working on the assignment, our lecturer has observed the quality of our work, recommending our product for a local business.

After getting that acknowledgment at work, I am interested in carrying on with my studies. I believe that Philosophy plays a vital role in several aspects in our life. As a matter of fact, it also creates a significant impact in many industries, as well as in different areas in our society. I believe that with this subject, there is an ample scope that can work in proving the ability of one person, including intelligence and competence in this seemingly revolutionary, as well as potentially extremely beneficial field.

Aside from college academics, I also became involved actively in various extracurricular activities. The motivating force behind all of this was my personal goal of developing various aspects of my own personality. While doing so, I was not able to attain the grades that I wanted to have, especially during my first two years. However, soon I was able to have the skill of time management.

I am extremely confident that studying at your University will further expand my horizons, giving me the wonderful opportunity of getting the best education possible.

Respectfully Yours,
Xian Lee
