

**ACCELERATING THE NATIONAL
CLIMATE AND HEALTH MOVEMENT:**

ACTION SHOWCASE

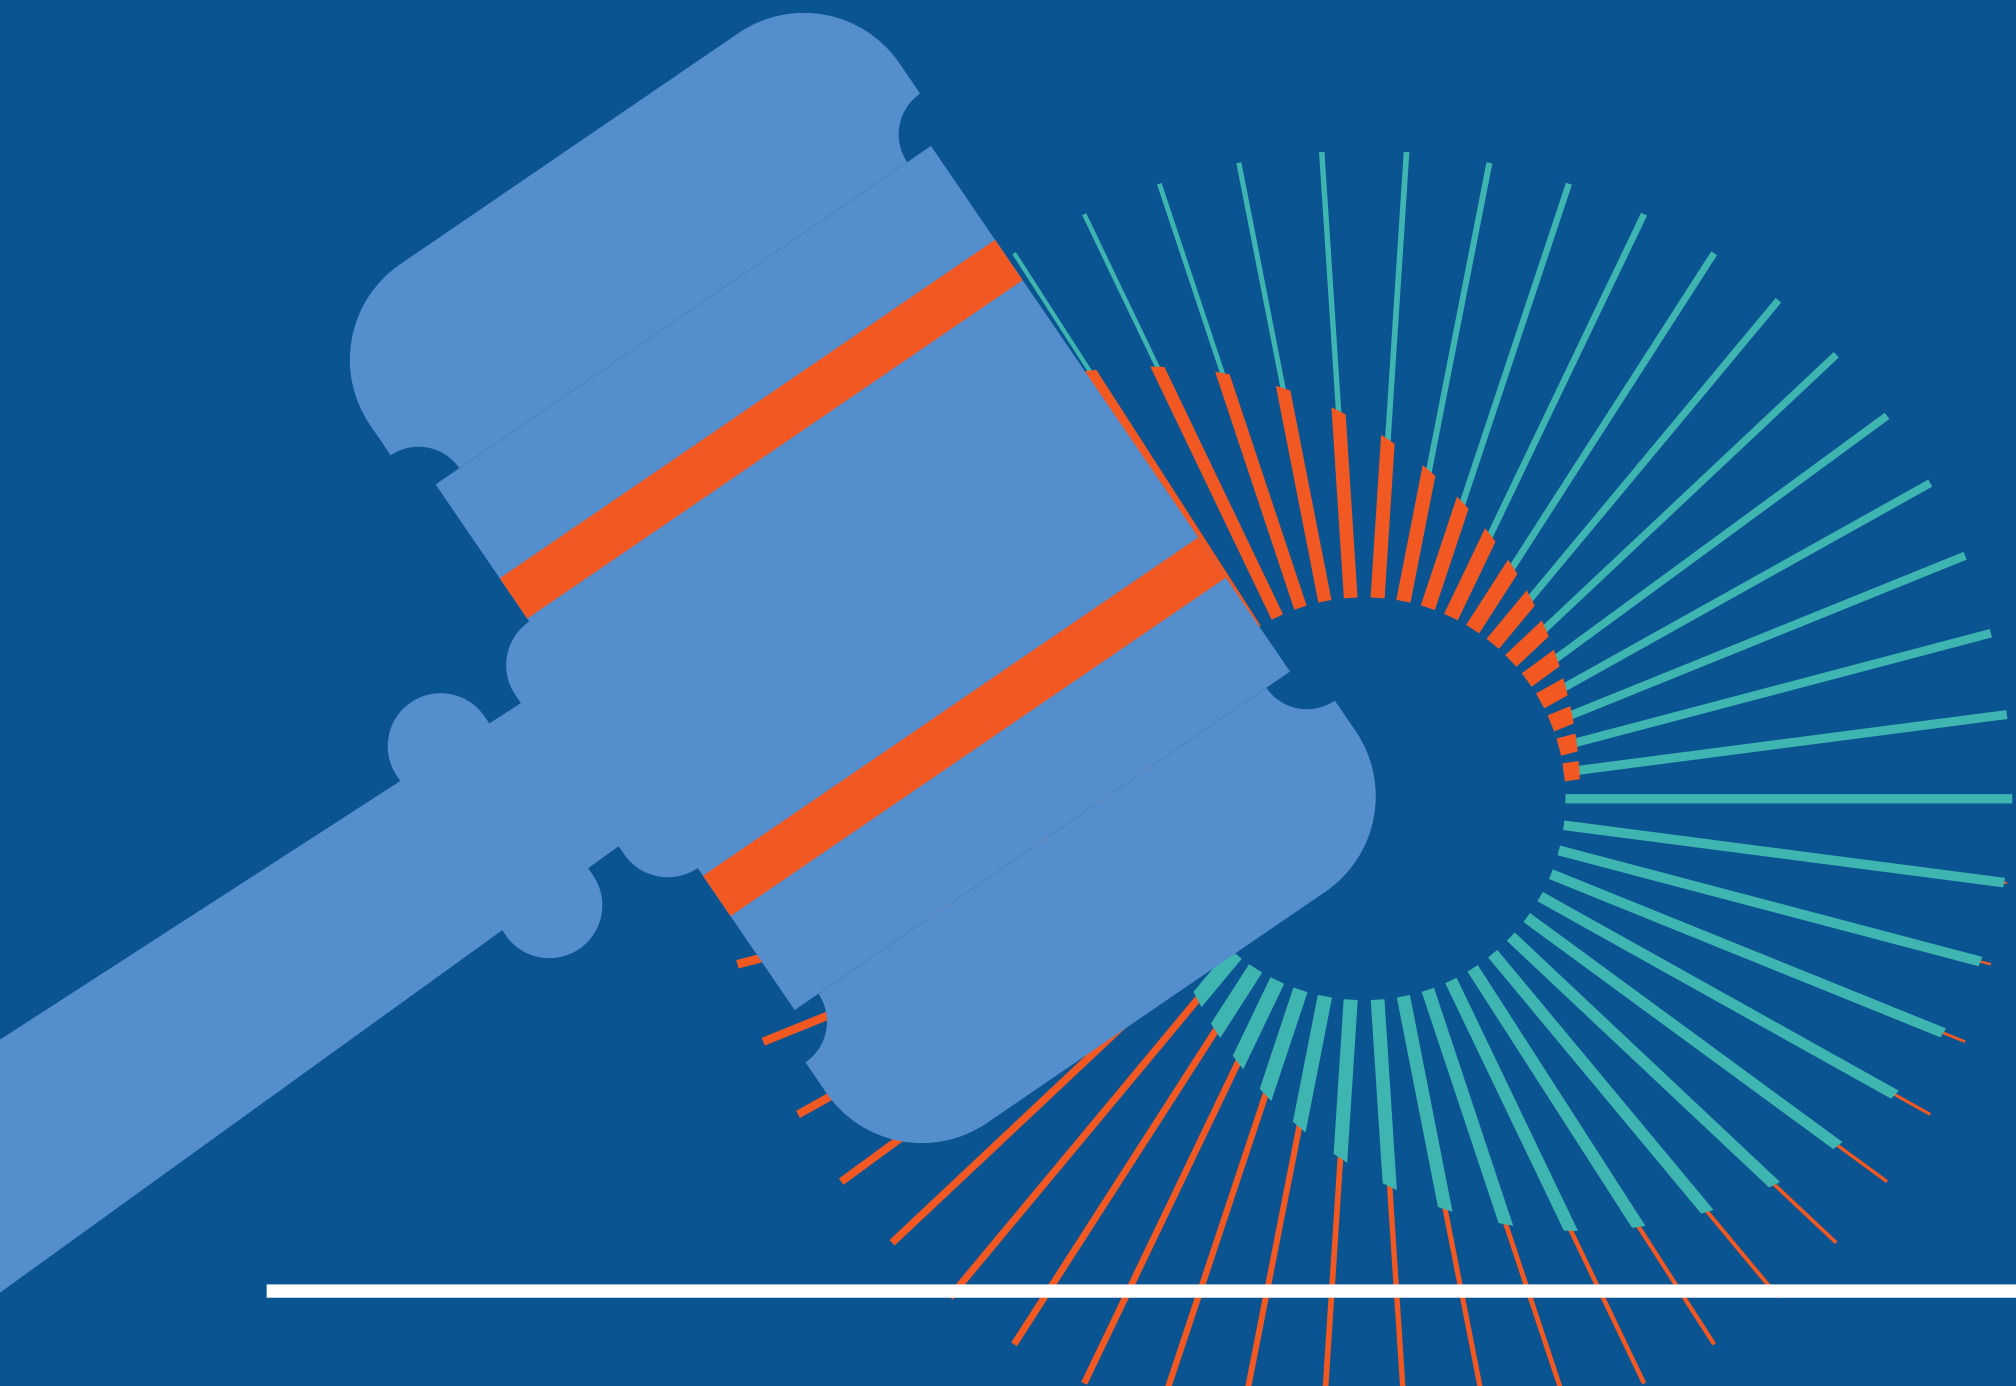

Across the country, health sector organizations—hospitals, educators, professional associations, pharmaceutical & supply chain companies, community organizations, and more—are driving exciting progress on addressing climate change and health.

REDUCING EMISSIONS

A graphic illustration on a dark blue background. On the left, a stylized sun with a dark blue center and radiating lines in shades of blue and green. On the right, two smokestacks with blue and dark blue segments emit plumes of smoke in shades of teal and orange. A white horizontal line is positioned below the smokestacks.

Organizations working to eliminate or reduce greenhouse gas emissions generated in the course of business.

ADVANCING POLICY

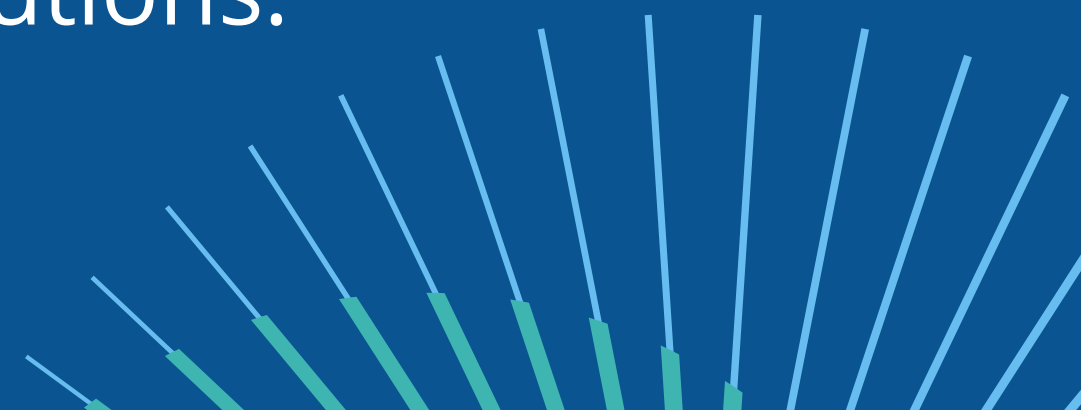

Organizations that contribute to public policy on climate change and health, including policies focused on mitigation, adaptation, and resilience.

ENGAGING COMMUNITIES

Organizations working directly with communities impacted by climate change to collaborate, support, and elevate community-driven solutions.

TEACHING & EDUCATING

Organizations that provide educational resources on climate change and health, including curriculum, fellowships, seminars, and training, and more.

MEASURING & REPORTING EMISSIONS

Organizations that measure and report their scope 1, 2, and/or 3 emissions.

FUNDING ACTION

Organizations funding climate-and-health-related programs, research, policy, community initiatives, and more.

RAISING AWARENESS

A hand holding a megaphone with sound waves radiating outwards, symbolizing raising awareness. The megaphone is dark blue with a grey rim, and the hand is teal. The background is a solid blue color with stylized clouds and radiating lines.

Organizations that share information about the impacts of climate change on human health and equity through advocacy, education, outreach, and beyond.

Stylized clouds at the bottom of the page.
