

OSPI's Digital Navigation Program works to provide students and their families with equitable access to technology.

**The program awarded
13 Digital Navigation
Grants during the
2023-24 school year.**

**One Digital Navigation Grant
went to the Burlington-Edison
School District, near Bellingham.**

The district used the grant funds to host events. During the events, staff met with families to answer questions and walk through different technology platforms.

Staff from the district's Migrant Education and Multilingual/English Learner programs worked to ensure the one-on-one sessions were available in both English and Spanish.

Connecting Families to Technology: Digital Tools for Student Success

Staff helped families download Skyward to their devices. Families also received assistance on how to use Google Classroom, Chromebooks, and hotspots.

The district encouraged participants to provide feedback. Families shared they were grateful for the support.
