Rapid Texture

Faux Wood

Hand-Carving

Precision Board HDU is a versatile, cost-effective and eco-friendly urethane sign material that is particularly effective for making professional-looking dimensional signs. It is a closed-cell rigid substrate that does not rot, warp or crack.

Precision Board HDU has a uniform surface with no knots and is easily cut with a CNC, laser, waterjet or carving tools. It lasts indefinitely. It can be coated or textured to resemble a variety of materials, including wood, metal, stucco, brick or stone.

Ask for Precision Board by name to assure the following:

- Fast turnaround of **DAYS**, not weeks
- Sheet sizes from 20"x60" up to 5'x10'
- Thicknesses from 1/2" up to 24" (available in ANY increment)
- Custom cutting & bonding available
- Free tech support available for your questions

Coastal Enterprises offers a full line of products specifically designed for use with Precision Board, including adhesives, primers and fillers. More information available on reverse side.

To request a sample, get a quote, download product data sheets, view instructional videos and more, visit us at www.precisionboard.com or call 800-845-0745.

Great Pricing • Fast Shipments • Made in USA

- Certified Green
- Fastest shipping turn around times

*PCF = pounds per cubic foot

Precision Board High Density Urethane (HDU) Companion Products

We offer a full line of specially formulated Companion Products for bonding, priming, repair and texturing your Precision Board HDU Sign.

TSF-45 Texture Surface Finish

A water based, high solids, flexible coating for creating amazing texture.

PB Fast Set Urethane Adhesive

A single component urethane adhesive for laminating and bonding that fully cures in 30 minutes.

FSC-88 WB Primer/Filler

A water based, high solids acrylic primer for creating "paint ready" smooth surfaces. (check out our application videos at www.precisionboard.com)

PB Hard Coat Texture Surface Coating

A two part hard acrylic coating for creating texture that dries to a "rock hard", protective finish.

PB Bond-240 Urethane Adhesive

A single component urethane adhesive for laminating and bonding with a longer working time.

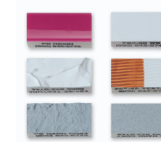

FSC-360 WB Putty

A thicker version of FSC-88 WB for filling larger cracks and surface damage.

PB Resin Epoxy Resin

A two part, self leveling, doming resin to create ultra smooth surfaces without sanding or priming.

Free Companion Products Sample Kit
