

Plan Your Storage Space – Don't Just Fill It!

Over 70% of healthcare inventory items do not fit well on Flat shelves! Gain a minimum of 30% additional storage space in your current area with shelving that FITS your inventory and completely eliminates dirty plastic bins.

Increase your current storage space by 30% - 50%

DESIGN your storage space to FIT YOUR INVENTORY and still use ALL your existing shelving. By using the proper storage product Mix you can:

Gain 30% - 50% additional space in your existing storage area

Completely eliminate dirty plastic bins

Contain products properly and easily - no more products on the floor

Increase efficiencies and inventory turns

Decrease expired and damaged products

Provide easy color coding of product types

Improve overall staff satisfaction

How can you investigate these possibilities **AT NO INVESTMENT TO YOUR FACILITY?** Contact **QC STORAGE** for an **onsite professional assessment** of your storage area, **completely free of charge or obligation**

We are confident we will EARN your business through Excellence and producing Quality Results for your healthcare storage areas. We ask only that you agree to keep our NO CHARGE designs, drawings and NO-COMMITMENT quotation information completely confidential. That is the only commitment you make!
