

Downpipes

Downpipes are designed to protect your home from rainfall by ensuring that the build-up of water is directed away from the important parts of your home such as walkways, windows, doors and electrical fixtures. Queensland Sheet Metal manufactures both square and round downpipes in a range of sizes. Our downpipes are available in Zinalume®, Colorbond® or Galvanised materials as well as specialty metals such as Copper or Stainless Steel for those special projects. We carry stock lengths of 100 x 75mm square downpipes in 1.8m and 2.4m lengths. We also cut downpipes to length and manufacture them any length up to 5m.

Square Downpipes

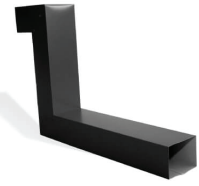

100x50mm 100x75mm 100x100mm 150x100mm

Other sizes available upon request. Speak to our sales team for more information.
