WE BUILD RIDERS' CONFIDENCE.

INTRODUCTION

Incorporated in 1998, Meng Kah Auto Parts Trading Sdn Bhd was in the business of importing and distributing motorcycle parts and accessories. As a result of their success, the brand 'Racing Boy' was born. Its purpose was to provide consumers with high precision and quality products. All of Racing Boy's products are meticulously designed, tested and manufactured in-house by our dedicated team of engineers.

In 2013, 'Racing boy' was rebranded to 'RCB' to further venture out into the global market. Today, RCB has expanded its product range to Wheels, Suspensions, Braking systems as well as CNC parts.

A Leading International Brand.

MISSION

From the beginning, our mission has been to provide our stakeholders with quality products and professional services. We aspire to be innovative in all business aspects in providing a platform for financial stability while maximizing returns. We strive to constantly grow our business with the same honesty and integrity we use to craft our products. Our reward, simply the satisfaction we receive from our partners and customers around the world.

VISION

Professional

To provide the best services and solutions.

Brand Perception

To be a visionary leader in the industry.

Excellence

To constantly innovate and improve product quality and range.

Partnership

To uphold integrity with partners and customer in all aspects.

ACHIEVEMENT

Through decades of brand building and constant innovation, in 2011, Racing Boy won its first award in the 2nd Annual Asia Success Award organized by the International Organising Committee, Asia Success Ltd. Racing Boy was awarded the 'Super Golden Product' achievement in the 'Motorcycle Rims' category. In 2012, Racing Boy was presented with an award once again as the 11th Asia Pacific Top Excellence Brand by the Asia Pacific Entrepreneur Alliance, published in the top leading international publication, Global Business Magazine

Precision machining from 6000 series aluminium alloy.

FG525

FULLY INTERGRATED HUB

ANODISED ALUMINIUM PARTS

Corrosion and abrasion resistant

FORGED FOR TOUGHNESS

WHEELS & ACCESSORIES

FEATURES

The FG525 is designed for its structural strength with a reduced overall weight. 'Less weight' provides a quicker acceleration response while providing less strain on the suspension components. In extreme riding temperatures, the FG525 is designed to dissipate heat away from the braking system to ensure optimum breaking response.

Forged from 6000 series aluminium alloy, the FG525 is designed to adapt to any road conditions while maximizing your bike's looks and performance.
