

Index

Chapter 1 Introduction	16
1.1. Severe accident SGTR sequences background	17
1.1.1. The steam generators of a PWR nuclear power plant	17
1.1.2. Severe accident steam generator tube rupture sequences	20
1.2. State of art on aerosol retention in the secondary side of a vertical steam generator during SGTR sequences	22
1.3. Thesis setting out: motivation, objectives and scope	27
1.3.1. Motivation	27
1.3.2. Objectives	28
1.3.3. Scope	28
1.3.4. PhD approach	29
Chapter 2 Ciemat Artist Hydrodynamic Tests	31
2.1. Introduction	32
2.2. State of art on the aerodynamics of jets from a tube breach across a tube bundle.	32
2.3. Fundamentals of the PIV measurement technique	34
2.4. CAHT facility	36
2.4.1. Motivation	36
2.4.2. Technical design criteria	37
2.4.3. Facility description	37
2.4.3.1. Central Body	37
2.4.3.2. Upper Nozzle	39
2.5. Guillotine experiments	41
2.5.1. Experimental set-up and measurement procedure	41
2.5.1.1. Facilities set-up	41
2.5.1.2. Experimental test matrix and test procedure	44
2.5.1.3. Post-processing script.	46
2.5.2. Results and discussion	47
2.5.2.1. The radial free guillotine jet	47
2.5.2.2. The guillotine “in-bundle” jet	51
2.5.2.2.1. Global jet behavior	51
2.5.2.2.2. Jet behavior close to the breach	54
2.6. Fish-mouth experiments	65
2.6.1. Experimental set-up and measurement procedure	65
2.6.1.1. Test matrix	66
2.6.2. Results and discussion	66
2.6.2.1. The fish-mouth “in-bundle” jet	66
2.6.2.2. Comparison to guillotine “in-bundle” jet	72
2.7. PIV measurement technique discussion	75
2.7.1. Pitot tube measurements	77
2.7.1.1. Pitot tube principle	77
2.7.1.1. Pitot tube results	78
2.8. Experimental measurements uncertainty analysis	80

2.8.1. PIV Uncertainty analysis	80
2.8.2. Pitot tube uncertainty analysis	82
Chapter 3 Ciemat Artist Aerosol Tests	83
3.1. Introduction	84
3.2. State of art on aerosol retention across a tube bundle	84
3.3. Experimental facility and measurement procedure	85
3.3.1. Facility Description	85
3.3.2. Instrumentation and sampling	86
3.3.2.1. Aerosol measurement device fundamentals	90
3.3.2.1.1. Optical particle counter (OPC)	90
3.3.2.1.2. Aerodynamic particle sizer (APS)	91
3.3.2.1.3. Electrical Low Pressure Impactor (ELPI)	91
3.3.2.1.4. Mass cascade impactors and membrane filters	91
3.3.2.2. Sampling and instruments layout	93
3.3.3. Test matrix and test protocol	96
3.4. Calibration campaign	101
3.5. Uncertainty analysis	105
3.6. Results and discussion	108
3.6.1. General observations	108
3.6.2. Influence of matrix variables	113
3.6.3. Phenomena involved	118
3.6.3.1. Global discussion	118
3.6.3.2. Fragmentation	119
3.6.3.3. Resuspension	121
3.6.3.4. Bouncing	125
3.6.3.5. Tube vibration	126
3.7.1. Phenomena approach	126
3.7.2. Statistical approach	129
Chapter 4 Conclusions and Future Work	131
4.1. Conclusions	132
4.1.1. Experimental conclusions: lessons learnt form experiments	132
4.1.2. Aerodynamic investigation: CAHT conclusions	134
4.1.3. Aerosol investigation: CAAT conclusions	135
4.2. Future work	137
Nomenclature	140
References	145
Appendixes	152
Appendix I: CAHT facility detail plans	153
Appendix II: Description of main variables of PIV post-processing script	163
Appendix III: CAAT experimental measurements qualification	166
Appendix IV: CAAT experiments execution and measurements	168
