\* Indicates the recommended Light Source group for the light. Please see page 37 for more information.

Create pleasant shaded areas for relaxing in the great outdoors with our umbrellas. Choose from a side or central pole and square or round shape with a suitable base - for customised umbrellas. Our easy-open, heavy-duty options offer sizes of up to 3 M x 4 M which are available in several colour options for ease of customisation.

### TYPES OF UMBRELLA

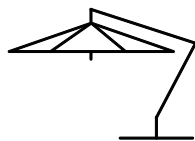

- **Centre Pole**

The most popular type of umbrella has a straight pole that is positioned in the centre of the umbrella and usually sits in a base on the ground, or through a table designed with an umbrella hole.

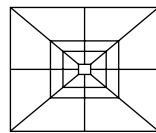

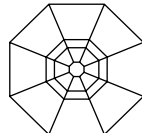

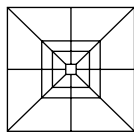

- **Side Pole**

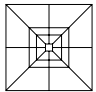

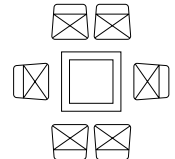

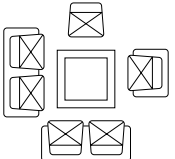

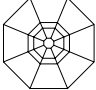

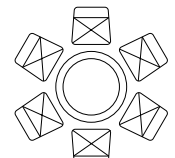

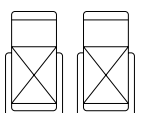

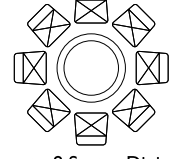

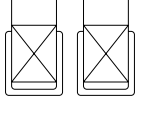

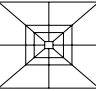

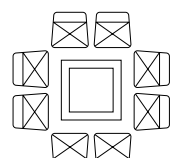

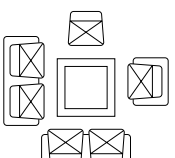

This umbrella features the pole off to one side rather than down the centre. Some side pole umbrellas have a shade that will pivot from side to side and may even rotate 360°.

### UMBRELLA SHAPE & SIZING

- Square
- Round
- Rectangle

| SHAPE   | SIZE    | DINING   | SEATING  |
|---|---------|--|--|
|  | 3 m     | <br>up to 6 Seater Dining | <br>up to 6 Sofa    |
|  | 3 m     | <br>up to 6 Seater Dining | <br>up to 2 Sunbeds |
|   | 4 -3.5m | <br>up to 8 Seater Dining | <br>up to 2 Sunbeds |
|  | 4 m     | <br>up to 8 Seater Dining | <br>up to 6 Sofa    |

### POLE MATERIAL

- **Wood**

Wood umbrellas have that classic umbrella appeal. They pair well with wooden furniture and are available in a range of sizes. Wood poles or frames generally lift via the A.L.S system, single or double pulley systems or gas struts.

- **Aluminium**

A very durable and versatile pole option, as aluminium is rust resistant and very strong. Many aluminium poled umbrellas feature the A.L.S system, single or double pulley systems or gas struts.

- **Struts**

Struts are the main supports for the umbrella canopy and can be either aluminium or wood. Both options function in the same way and offer similar durability (wood may need some treatment as part of the care and maintenance program), it is a personal choice to match the style of furniture.

### CARE & MAINTENANCE

- Do not force your umbrella open. It should open gently, if it does not it may be caught on something. Forcing it could damage the frame and/or the lifting mechanism.
- The umbrella **must** be closed when not in use, this will reduce the chance of damaging the frame in adverse conditions.
- Occasional/periodic rinsing with fresh water will keep your umbrella in good condition.

For a unique al fresco dining experience, our bespoke service enables you to curate your outdoor space to suit your individual style. For an ultra-stylish dining, coffee and side table, simply choose from a range of durable porcelain slab tops in different colour tones, textures and sizes, then opt for a matching frame in a teak, white or black aluminium finish: team timeless terrazzo to teak for an on-trend biophilic feel, white marble works with white aluminium for a sleek, monochrome look or, for an urban industrial edge, style grey concrete with black aluminium.

Under-the-sink filters are normally favoured by home users, where the filters are mounted under the sink and connected directly to the Kitchen Mixer with additional drinking water outlet (AQM-ECO-364-) giving access to fresh filtered water that is ideal for drinking, cooking, washing fruit and vegetables

Filters work by removing any contaminants that might be present in the water such as sediment particles, trihalomethanes (THM's) and also focuses on removing any metals, bacteria, chemical residues and other volatile organic compounds.

Water filters can help to reduce the risk of certain cancers by removing chlorine and chlorine byproducts from the drinking water. A solid block carbon water filter will also selectively remove contaminants from drinking water while retaining healthy mineral deposits that balance the pH of the drinking water.

FILTERS ARE TESTED AND ACCREDITED BY NSF (NATIONAL SANITATION FOUNDATION) AND ANSI (AMERICAN NATIONAL STANDARDS INSTITUTE) AND TESTED AGAINST WORLD HEALTH ORGANISATION AND MUNICIPALITY STANDARDS.

FINISHES:

## ANTI-SCALD DEVICE

The AQUAECO anti-scald device will maintain a safe temperature of hot water for appliances, a must for young children, the elderly and those requiring care.

By installing this device, the risk of scalding will greatly be reduced due to the automatic temperature detection, ensuring that when the water becomes too hot, the flow of water will stop.

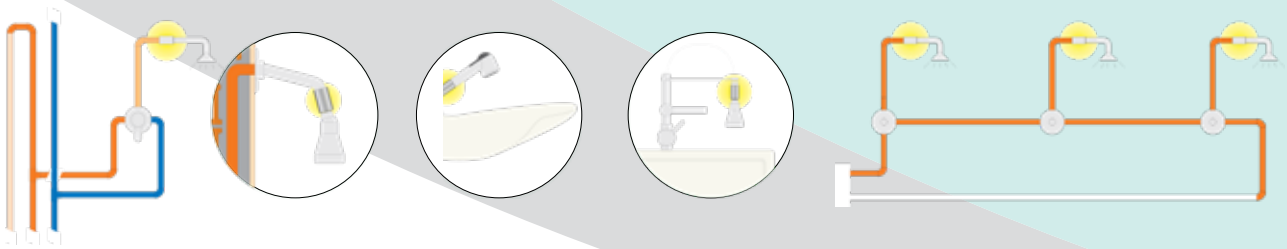

After reaching a safe temperature the device will re-activate.

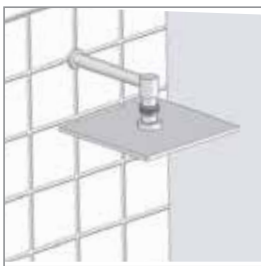

- Thermostatic temperature detector.
- Chrome brass body.
- Water flow is blocked if temperature goes above 48°C.
- Self reactivation when the temperature decreases.

### APPLICATIONS:

In Home Showers, Kitchen Mixers, Hospitals etc.

## PRESSURE LIMITER APPLICATIONS

### Shower heads/handles

- Protection against excess pressure load due to clogged nozzles or high line pressure

### Bidet Sprays

- Protection against overpressure and water hammer
- May ease operation

### Other Applications

#### Anti-Scald Device for Shower

**Thermostatic** Temperature Detector  
Automatically Closes when Water Temperature Exceeds 48°C
