SANIPEXGROUP

The revolutionary MILK treatment system, made to pamper your skin, leaving it feeling fresh, clean, and moisturised.

Consisting of 100 percent pure water and zero additives, the MILK system is designed to deliver an unparalleled wellness treatment. Miniscule oxygen-rich microbubbles cover your skin like a silk blanket for a truly rejuvenating experience, boosting the skin's absorption of oxygen, while an infusion of negative charged ions, which research indicates can increase serotonin levels in the brain, provides a crucial boost to overall wellbeing.

Outdoor Whirlpool

Features:
- White Panelling
- LED Chromotherapy Lights
- Outdoor Thermal Cover
- Ozone Disinfection
- Hydro Digital Controller
- Polyurethane Headrest Cushion
- Water Treatment Kit
- Temperature Stabilizer
- Integrated Filling System
- Integrated Overflow System
- 2 Seater

Dimensions:
2600 x 2400 x 1000 mm

Talent System 2.0™ With Infinity

This model is equipped with **Infinity**, an automatic loading and overflow water filtration system that allows the whirlpool to be filled up to the upper edge, for a scenographic effect of continuity with the surrounding environment and an experience of total immersion.

Finish:
◯ White

Water Capacity:
1830 Litres

Product Code:
BDW-ELS-260240-WH

SANIPEXGROUP

Why Use A Whirlpool?

Health Through Water

Spa & Wellness is on the increase across both hospitality & residential sectors with many people keen to create a spa-at-home for a reviving retreat on tap. The word spa actually comes from the Latin phrase, "Salus Per Aqua," or "Health Through Water" as it has been known for centuries that hydrotherapy is a powerful natural remedy.

Whirlpools offer many hydrotherapy benefits:
- Relieve tension in muscles and joints
- Temporary relief of aches and pains
- Decrease in stress
- Improve blood flow & circulation
- Brighter looking skin thanks to detoxification

How is it we receive these benefits? Three factors work in whirlpools: **Water, Heat & Air**

Water
When we float pressure is relieved from our joints and the sensation instantly creates a feeling of relaxation. Water jets, as opposed to air jets, also deliver a high-pressure massage to help repair tired muscles.
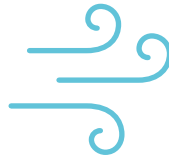

Air
Air jets deliver a gentle stream in lower pressure, for a full body massage and overall relaxing experience. We offer you three types of air jets to aid with smaller muscle groups which allows for a reflexology effect foot massage.

Heat
A hot bath will raise your body temperature, which increases blood flow for rejuvenation. Heat and steam also open the pores for detoxing, which allows for specialised bath salts and essential oils to penetrate the skin. A drop in body temperature before sleep is also proven to lead to a deeper more restful sleep; a 15 minute whirlpool soak 90 minutes for going to bed eases the body into a naturally restful state.

Combining The Benefits

Relax, unwind and re-charge your body!

The combination of water, heat and air helps achieve maximum benefits with a customised whirlpool bath. There are 6 types of water jets and 3 types of air jets that can be designed and placed in our selection of bathtubs depending on client requirements and budgets. We offer a comprehensive range of sizes and shapes for one, two or three users with the manufacturing process both regulated in accordance with ISO 9001 standard and implemented on site in our own Jebel Ali manufacturing area.

Spa and Whirlpool Baths have three ways to massage. Whirl Jets, which use water and air through a pump. Whirl Jets are on the side and end of the baths. Air Jets, which use air through a blower are on the bottom of the baths. Milk Spa, which uses air through a specialist blower, are uniquely, on the side of the baths.

Spa and Whirlpool baths are operated by one of two systems. The Standard Systems have Pneumatic Control Switches with Plated ABS Jets. The Luxury Electronic Systems have Plated Brass Super Flat Jets.

All Whirlpool baths have Dry Run Protection, meaning that the system can not be activated unless there is enough water in the bath. If the bathtub water is drained without switching the jets off, the jets will stop once the water in the bath goes below a certain level. This avoids water splashing out of the bath and protects the pump.

All bathtubs with the Air Spa System have a method to clear the air jets of water once the bath has been emptied.

Jets

BAGNODESIGN SPA & WELLNESS collection is equipped with the latest technology of jets that are produced to the highest European manufacturing standards. There are 9 types of jets in our portfolio that can be combined into over 40 permutations to suit every requirement – commercial or residential. Water jets help stimulate circulation while air jets help you relax – a combination of both helps get the maximum benefits from the customized product. There are 6 types of water jets and 3 types of air jets that can be designed and placed in our selection of bathtubs depending on client requirements and budgets.

Air Jets

Air Jet

Jet focuses on smaller muscle groups with a kneading effect to stimulate surrounding tissue.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- **Legs**
- **Feet**

Micromulti Air Jet

Offers a very high ratio of air to water for a softer, soothing effect across your calves.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- **Legs**
- **Feet**

Micromulti Air Jet

Perfect for focused massage on key pressure point areas such as your feet. The jets are adjustable, making it easy for a perfect foot massage.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- **Legs**
- **Feet**

Water Jets

MicroJet Click in A

Effectively relieves tension & strain in the sensitive (and hard to reach) neck area with a highly focused stream of water.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- Legs
- Feet

Midi Jet

Provides a gentle pulsating massage that can be adjusted in strength. It is perfect for small muscle groups like hands & wrists.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- Legs
- Feet

MicroJet Click in B

Produces a fine, single jet of water that provides persistent but gentle pressure. Ideal for a calming, soothing effect.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- Legs
- Feet

MidiJet Click in

A wide swath that provides an exceptional massage for large muscles. A stainless steel centre shaft ensures non-corrosive and long term performance.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- Legs
- Feet

MicroJet Click in C

Carefully working away at knots and cramps, this focused jet is firm and relaxing. Helps to unwind tired muscles.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- Legs
- Feet

Nano Jet

Designed to direct the flow of air & water to alleviate muscular tension & improve blood circulation. The spiral action of the directional jets performs an energetic massage.

Stimulates:
- Neck Area
- Shoulders and back
- Lower back
- Hips
- Hands and wrists
- Legs
- Feet

SAUNA

HEALING WITH HEAT

Sauna's heat is good for the heart
Taking 2–3 sauna baths per week is enough to lower the risk of cardiovascular disease by 20% compared to those sauna bathing only once a week. The risks may decrease by up to 65% the more one sauna bathes.
Laukkanen, Khan, Zaccardi & Laukkanen 2015

Sauna bathing improves sleep quality
A study investigating the connection between sauna bathing and sleep saw a 70% increase in deep sleep during the first two hours and 45% increase in six hours. There was a statistically significant decrease in the participants' staying-up time after sauna bathing.
Putkonen & Elomaa 1976

Sauna bathing is exercise
The heat of the sauna makes the heart pump blood faster, expanding the blood vessels and relieving the heart.
Brunt, Howard, Francisco, Ely, Minston 2016

Sauna bathing improves memory
Sauna bathing twice a week decreases the risk of dementia by one fifth compared to those sauna bathing only once a week. The risk is up to 60% less for people sauna bathing 4–7 times a week.
Laukkanen, Kunutsor, Kauhanen & Laukkanen 2016

Sauna bathing cherishes the skin
The heat of the sauna multiplies the amount of blood pumping through superficial veins, which boosts the skin's metabolism. The skin feels nourished, maintains moisture and stays soft and elastic.
Viinikka 2020

Sauna bathing treats muscles
Sauna is a great place for relaxing tense muscles and sauna bathing before exercise prevents muscle pain and increases muscle mobility afterwards.
Khamwong, Paungmali, Pirunsan & Joseph 2015

Fuji Small

Sauna

Features:
- Glass/Wood
- Inside and Outside Wall Cladding in Oak
- Headrest, Ventilation Slit, Floor Grid
- Door can be Hinged on Left and Right
- 2 LEDs Integrated into Bench
- Sauna Heater 7.5 kW
- Control Panel

Dimensions:
2005 x 1600 x 2100 mm

Finish:
Oak

Product Code:
HRV-1-053-724

Lindea View Small

Sauna

Features:
- Glass/Wood
- Inside Wall Cladding in Lime Wood or Thermo-Lime Wood
- Outside Wall Cladding in Thermo-Lime Wood
- Headrest, Ventilation Slit, Floor Grid

Custom Solutions

Unique Sauna Designs

Let your imagination soar and visualise your ideal sauna. We offer sauna design models which can be customised uniquely to the client's needs. The designs cover a wide range of different styles.

Contact our sales team for more details.

Product Code:
HRV-CUST-SAUNA

Discover the right option for the atmosphere and style you want from our range of different designs:

Wood Finishes

Panels make an impact on the atmosphere of your sauna. The colour, grain, and cut of wood chosen for the walls and ceiling sets the backdrop for your sauna design. Medium and darker toned panels evoke traditional and natural feelings, whereas lighter panels allow dark interior elements to pop from the backdrop.

| Solid Spruce | Abachi | Alder | Aspen | Heat-treated Aspen |

Door/Glass Finishes

All sauna glass doors and glass walls have been specifically designed for sauna use. The glass used is tempered 8 mm safety glass. The sealant of the door frame keeps the heat in the sauna room and makes sure that the door closes smoothly. Available in many colour combinations, and are easy to install.
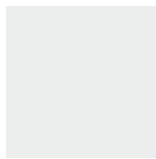

| Clear | Bronze | Gray | Satin |

MyHarvia: Remote control your sauna

Harvia Wi-Fi solutions, combined with the MyHarvia mobile app, have been designed to allow the safe and easy remote control of your sauna. These solutions allow you to switch on the sauna heater remotely and control other features that will save energy, as your sauna will be ready exactly when you are. The door sensor, a safety device included in the Harvia Xenio Wi-Fi accessory package, keeps the sauna safe as it can be controlled remotely.

You can control the features of the Harvia Xenio Wi-Fi control panel from your mobile device from anywhere and at any time using the MyHarvia mobile app.
