

SANIPEXGROUP

# AFFORDABLE TILES GUIDE

QATAR

2024

# TRANSFORM YOUR SPACE.

From bathrooms, kitchens and living areas to entrance halls, patios and pools, adding carefully selected tiles to both indoor and outdoor spaces can elevate your home from being merely ordinary to simply extraordinary.

Created for price-conscious individuals who are not prepared to compromise on style or quality, the Affordable Tile Collection allows you to create beautiful interior and outdoor spaces without blowing the budget.

Sourced from leading European suppliers, our collection is curated in line with global design trends and created to work with different design aesthetics. With numerous options to choose from in a variety of stunning materials and finishes, from cement, marble and stone to wood and terrazzo in different shapes and sizes, you can be guaranteed to find the perfect complement to your individual sense of style.

Be inspired by on-trend room sets, design-led mood boards and our well-stocked tile galleries at the SANIPEX GROUP showrooms located across the UAE or take a virtual tour of the SANIPEX GALLERY in Dubai at [www.sanipexgroup.com](http://www.sanipexgroup.com).

# SLAB FABRICATION FACILITY

**Our Slab Fabrication Facility contains state of the art equipment including three, 5 Axis water jet cutting machines, a skirting and profiling machine and several multi-blade cutting devices.**

Additionally, it houses a full-service technical laboratory, installation workshop, research & development center for bathrooms and a dedicated customer showroom for manufactured slab products. Without a doubt, it is a unique facility in the market and takes the company's capabilities and potential future opportunities to an exciting new level.

The facility will allow SANIPEX GROUP to accelerate the development of its slab product portfolio, offering new finishes, product types, categories and styles along with the ability to design and engineer customized solutions. In addition, SANIPEX will be able to offer a variety of value-added cutting services for tiles such as skirting, grooving, profiling and resizing.

**Advice on laying, grouting and maintenance**

IMPORTANT NOTE: TILES SHOULD BE LAID AND GROUTED ONLY BY PROFESSIONAL TILE LAYERS.

**Tiling**

Follow the simple rules below to guarantee perfect tiling results:

- 1) Check the floor slab is flat where the tiles are to be fitted.
- 2) Ensure that the tiles are correct as per its intended use before laying.
- 3) Dry lay the tiles, ensure intended lay-out will be achieved, mix if necessary by taking them from several boxes to achieve best results, before actual installation.
- 4) Use the correct adhesive and application tools, apply as per its manufacturer’s recommendation.
- 5) For installing wall tiles, it is highly recommended to use class C2 adhesives, in compliance with the European standard EN 12004. Specifically, recommended is a white glue for non-slip ceramic covering materials.
- 6) For top-class results, add an elasticator, taking care to follow the manufacturer’s instructions to the letter, and apply an even layer of glue on the underside of the tile. The thickness of the glue can be adjusted using the toothed side of the trowel.
- 7) Do not leave air pocket between substrate and the tiles.
- 8) Follow recommended joint for tiles.
- 9) Handle the tiles with care before and during tiling.

**Grouting**

Use matching grouts – follow recommended joint space. The tiler should strictly follow the grout manufacturer’s instructions on application and cleaning.

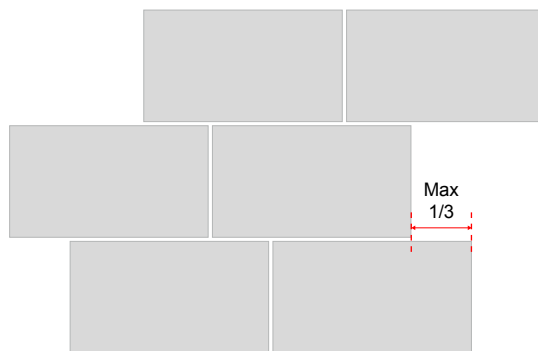

**Cleaning**

Use cleaning tools that are perfectly clean themselves. Always rinse off surfaces. Use clean water alone if the surface is washed frequently.

**Recommended Joints:**

Outdoor	5-6 mm approx.
Rectified (Indoor)	Minimum 2 mm
Non-Rectified (Indoor)	3-4 mm approx.
Hexagon or similar shapes	3-5 mm approx.
Modular pattern (Mix of sizes)	3-5 mm approx.

For tiles more than 30 cm width, with a lengthwise tiling layout, maximum 1/3 offset between panels.

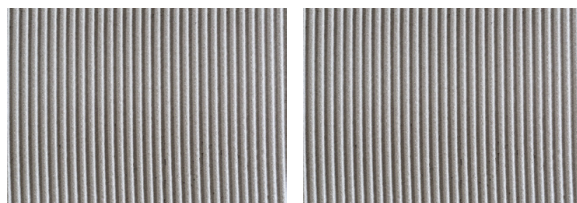

**Applying the adhesive**

The adhesive needs to be spread in straight lines, parallel to the short side of the tile to make it easier to push the air out. The direction in which the adhesive is spread onto the substrate must be the same as the direction of the spreading on the back of the tile.

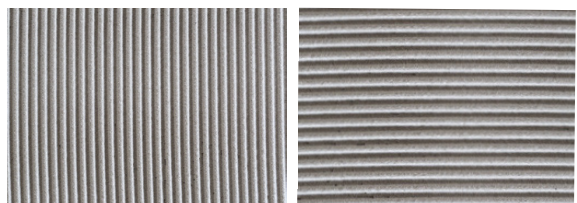

**OK** Correct application

**OK** Spreading on substrate and tile in same direction

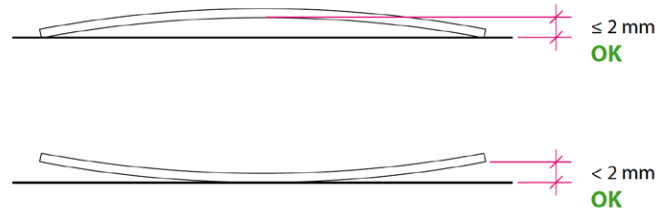

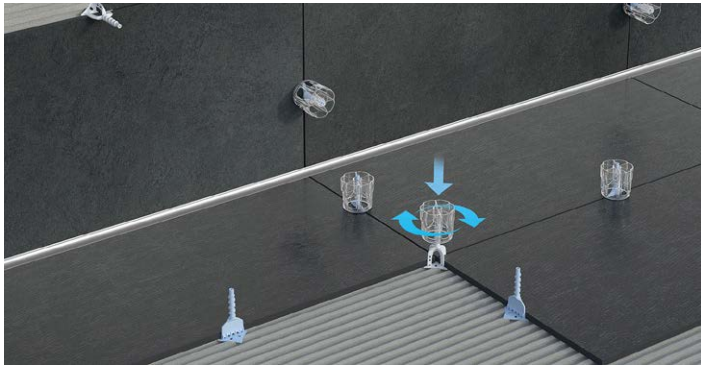

**NO** Incorrect application

**NO** Spreading on substrate perpendicular to spreading on tile

**Levelling**

An explanation on assessing surface flatness, checking flatness cannot be done with the tiles in vertical, inclined or cantilevered positions, but only as indicated by Standard EN 14411:2016: place a tile on a horizontal, stable surface, then place a straight-edge over the surface of the tile. If the maximum flatness deviation is equal to or less than 2 mm, the material is compliant with the standard. Levelling tools are also recommended to achieve great installation results.

**After Installation Cleaning Guide Details**

For washing after laying and for end-of-work cleaning: wet the surface well with water before washing. Then use Fila Deterdek Pro diluted at a ratio of 1:5 or 1:10 (1 litre of product in 5 or 10 litres of water). Apply the solution a few square metres at a time, then add, allow contact time of 5 minutes, then work with a single disc cleaner or large brush. Remove any residues using a cloth or liquid vacuum cleaner and rinse with abundant water. Should any stubborn dirt residues remain, repeat the wash with more concentrated solutions, and use the Fila Deterdek without any additional water.

Caution: Do not use Fila Deterdek Pro on polished marble or on any materials that are sensitive to acids. Before using on this material, carry out a test on a small surface area to check that it is actually resistant to the product. For items in aluminium, follow the instructions and use a soft sponge.

Dimensions Tolerance					
Porcelain - Technical Specifications			Standards	Values Required	
Sizes Dimensions		Length and Width	ISO 10545-2	Non-Rectified	Rectified

**TERMINOLOGY**

**Rectified**

Tiles with straight edges, allows tiling arrangements with very narrow joints.

**Calibre**

**Water Absorption**

Measurement of how much moisture a tile is likely to absorb on on-going basis.

**Stain Resistance**

Method applicable to all working surfaces of tiles to determine their resistance to stains after 24 hours of applying a staining agent.
