NATURE-INSPIRED ELEMENTS

There is a growing desire to transform bathroom spaces into tranquil and peaceful places to practice self-care and escape the frenetic pace of life, increasing the popularity of nature-inspired products and calming textures.

Many of our collections feature design elements like stone effects, organic fluted elements and nature-derived colour palettes that allow for mixing and matching. These seamlessly connect the indoors and the outdoors to promote a sense of wellbeing.

Our latest Beach House range defines the very essence of tropical luxury island living with a full portfolio of products that answers the call for bringing the indoors out. From taking a blissful shower in the open air to organic teak and travertine surfaces, the collection is designed to awaken the senses and harmonise with nature.

JAPANDI STYLE

A fusion of Japanese and Scandinavian minimalist and functional design, Japandi is an interior design style that has stood the test of time.

The fundamental design elements include clean lines, emphasising the beauty of simplicity and the removal of excess. Natural textures, such as wood, bamboo and stone are at the heart of the style, adding warmth and richness to any bathroom. Look to the newly-launched Nara collection for a full solution that encompasses the look for a clean, modern and timeless zen bathroom retreat you will love.

JEWELLERY INSPIRED LUXURY

Make a statement and add a touch of luxury to the bathroom with jewellery-inspired brassware textures and intricate details. We have incorporated this trend across both mixers and furniture handles for several of our ranges, including Orology, Nara, Revolution, Stereo FM, and Chiasso.

The full Orology range was inspired by watch bezels and designed to reflect a timeless aesthetic.

WARM BRASSWARE TONES

A design trend that is here to stay for 2024 is warm brassware tones that welcome a sumptuous shimmer of texture.

Our new PVD Oyster, PVD Soft Burgundy and Soft Bronze finishes work seamlessly with earthy, neutral tones and textures such as natural wood-effect furniture found in the Orology, Corsair and M-Line collections, as well as stone and marble-effect basins and countertops featured in the Alpine and Bristol ranges.

MALDIVIAN STYLE

Envision yourself in the Maldives, immersing in crystal-clear turquoise waters and strolling along breathtaking beaches. The subtle beach huts and villas offer a serene and idyllic escape, there is no wonder this is a prominent interior trend for 2024. The all-new Beach House range draws inspiration from this paradise to bring a captivating lifestyle look to your home or project. With a neutral colour palette that includes the warmth of Teak wood, the elegance of Terrazzo Stone, and the sophistication of Matt White finishes applied to luxurious bathrooms, exquisite outdoor furniture, and stunning tile solutions, you can pamper yourself with an indulgent slice of paradise right in your own space.

SUSTAINABILITY

As we all strive to make conscious decisions to reduce negative impacts on the environment, designers are increasingly seeking sustainable design choices, and the bathroom is no exception.

While we offer a variety of eco-friendly bathroom products, the Eco Touchless Mixer is the latest addition to the collection which focusses on the significant reduction of water usage with its built-in lithium battery that allows for up to 100,000 cycles of usage with no wires or plugs, ensuring hassle-free installation. A smart energy-saving sensor helps keep water usage low. Choose from seven contemporary finishes to suit: Chrome, Matt Grey, Brushed Nickel, Brushed Brass, Matt Black, PVD Oyster and the on-trend Soft Bronze.

BRASSWARE FINISHES

The appeal of coloured brassware is widespread. Designers look for new and innovative finishes in order to create distinctive looks in their designs. At BAGNODESIGN, finishes are the essence that make our products stand out. We create finishes that stay true to the overall sense of style.

We offer refreshing alternatives that help define the look of a bathroom and, in turn, the entire home. Our on-trend Soft Bronze and PVD Santiago finishes are popular for their subtle elegance.

Responding to this year's trend for warm metallic brassware, we have added the new **PVD Oyster** and **PVD Soft Burgundy** finishes that promise to add a dash of drama and opulence to the bathroom. Mix and match products and finishes to create a look that expresses a sense of style and personality.

* Soft Bronze is a semi-living finish and may change overtime with a slight finish variation.

TRENDING BRASSWARE

SOFT BURGUNDY

A modern and distinctive finish with a rich colour depth and soft brushed metallic texture, **PVD Soft Burgundy** caters to the increasing demand for warm-toned brassware, a current popular trend in the bathroom sector.

We introduce this finish in two of our most contemporary mixer ranges, Vitesse and Mezzanine, offering our customers more options to create their ideal bathrooms and washrooms.

OYSTER

A soft and luxurious finish that perfectly complements smoothly shaped mixer designs, **PVD Oyster** is highly sought after by bathroom designers and has become a growing trend in the luxury segment.

The **PVD Oyster** finish will be available across a comprehensive range of products, including ten mixer ranges, five accessory ranges, and complementary showering and plumbing options.

In addition, our 10-year guarantee ensures the lasting quality of this finish.

NARA

East meets West with the versatile Nara collection. Drawing inspiration from Japandi interior design, Nara embodies a tranquil and functional aesthetic for bathroom spaces.

Influenced by the ancient city of Nara, Japan – where Edo architecture, enchanting temples and immaculate gardens merge tradition, nature and spirituality – the range epitomises bathroom design at its most elegant and serene. Japanese simplicity and appreciation for nature pairs with Scandinavian practicality, beauty and comfort for a relaxing and beautiful scheme.

Integrated with clever storage space, Nara offers a complete solution; from brassware and accessories to basins, BAGNOQUARTZ bathtubs, furniture, mirrors, tiles, and lighting.

Clean lines provide the balance for a practical interior, while earthy tones and natural textures such as wood, bamboo, and stone infuse a richness that could be extracted from nature itself, fulfilling the desire for organic elements to channel a spa-like setting. Iconic Japanese wood slat detailing appears on freestanding basins and furniture, and ultra-modern wall and pendant lights make a Scandi-style statement.

Achieve a bright and light Scandinavian aesthetic with opulent PVD Oyster, chic Chrome or muted Brushed Nickel brassware to complement white sanitaryware and oak wood furniture. Or opt for Matt Black accents and walnut wood for a sultry, Japanese-inspired vibe.

THERMOSTATIC SHOWER MIXERS

An enjoyable, reliable and safe showering experience

BAGNODESIGN's thermostatic mixer valves regulate water temperatures to provide you and your family a safe and enjoyable showering experience. With predetermined settings, these mixers combine hot and cold water to maintain a consistent temperature and avoid scalding.

TYPES OF THERMOSTATIC SHOWER VALVE

Concealed valve

For a more sleek and discreet style, you can choose a concealed shower valve. All the workings sit behind a plate that is fitted flush to the wall, leaving just the control mechanisms exposed.

Bar valve

For use with a single outlet, the valve sits external to the wall. It is easy to fit and manufactured in ABS plastic and brass for durability. You can choose your own exposed column to go with it.

Exposed valve

If you're looking for something a little more stylised, the exposed thermostatic shower valve is great for single outlet showers. This is known as an exposed shower valve, as the workings sit external to the wall.

KEY FUNCTIONS OF THERMOSTATIC SHOWER MIXER

Default Flow Rate

Thermostatic shower systems allow you to adjust the flow rate to your liking. The flow rate is set by default and therefore eliminates the need to make any additional adjustments. This flexibility ensures a customized and enjoyable shower experience for every member of your household.

Temperature Control

The most prominent feature of a thermostatic shower system is its ability to maintain a constant water temperature. The thermostat regulates the temperature, ensuring it remains at the level you desire throughout your shower, regardless of external factors.

Anti-Scalding Protection

Safety is a primary concern in the bathroom, and thermostatic shower systems prioritize it. If for any reason your cold-water supply stops, the thermostatic mixer automatically shuts down, thus ensuring a reliable, convenient, and safe showering experience.

KEY FEATURES THAT MAKE THERMOSTATIC SHOWER MIXERS STAND OUT

1. Built-in Diverter

Many thermostatic shower systems come with a built-in diverter that allows you to switch between different shower functions, such as a handheld shower, rain shower, or body jets. This feature adds versatility and convenience to your shower experience.

2. Push-Button Activated

Operating our thermostatic mixers is simple and intuitive - On and Off! With a push of a button or twist of a knob, you can instantly adjust your water temperature to suit your comfort.

3. Luxury Finishes

These shower systems come in various finishes and designs, ranging from sleek and modern to classic and elegant. You can choose the finish that complements your bathroom's aesthetic and enhances its overall look.

4. Durability

Thermostatic shower systems are built to last. They are made with high-quality materials that resist corrosion and wear, ensuring they maintain their functionality and appearance over time.

5. Eco-Friendly

Many thermostatic shower systems are designed with water-saving features, like low-flow showerheads and the ability to set water temperature limits. This not only reduces water wastage but also helps save on your energy bills.

6. Easy Installation and Maintenance

Our thermostatic mixers are all supplied with the new 'Easy Install' installation box which offers:

- Solid wall or dry wall installations.
- Sealed installation box.
- Easy cleaning and maintenance without having to remove valve, which is pre-installed into box.
- Colour coded water entry points.
- Min-Max installation depth markings.

OPERATING SPECIFICATIONS

Controlled Cold water supply temperature:

Maximum: 25°C - Minimum: 5°C

Hot water supply temperature:

Maximum: 85°C - Minimum: 65°C

Minimum difference between Hot and Cold temperature is 10°C.

Operating Pressure:

Maximum: 5 Bar - Minimum: 0.5 Bar

Hot and Cold operating pressure should be kept as balanced as possible in order to maintain maximum efficiency.

When the supply pressure is higher than a 5 Bar, a pressure reducing valve should be fitted before the shower valve.

BATHING &
WELLNESS

100% internally waterproof, wedi® boards are the ideal base for plastering and tiling works. As they can be applied to practically any substrate, wedi® offers a quick, simple method of construction for new build or renovations in commercial or residential sectors.

The boards replace the need to build timely stud walls and substitute plasterboard needs for shower areas, concealing cisterns or preparing walls. They are waterproof, insulating, versatile, light and robust. Despite their size and durability, the lightweight boards can easily be cut on-site, for easy assembly and a near silent renovation – being directly tileable also speeds up installation time for projects.

Modular forms such as shower trays, seats & benches and recess niches can also be tiled directly and provide built in comfort and functionality – whilst adding sleek design aesthetics. Functional and safe, a wedi® system efficiently builds a waterproof, bespoke bathroom.

The revolutionary MILK treatment system, made to pamper your skin, leaving it feeling fresh, clean, and moisturised.

Consisting of 100 percent pure water and zero additives, the MILK system is designed to deliver an unparalleled wellness treatment. Miniscule oxygen-rich microbubbles cover your skin like a silk blanket for a truly rejuvenating experience, boosting the skin's absorption of oxygen, while an infusion of negative charged ions, which research indicates can increase serotonin levels in the brain, provides a crucial boost to overall wellbeing.

Designing the perfect walk-in shower is achieved through modern and sleek glass walk-in panels that define the area while shower and floor drains keep the look harmonious in a variety of styles, shapes and sizes.

Contributing to an open, light-filled space, shower panels offer flexibility in design, allowing for fully open enclosures or the option to install a door for added privacy. Complementing this design are shower and floor drains in various styles, shapes and sizes, ensuring a coordinating look with matching brassware. Alternatively, for a seamless pattern across the floor, we have options that maintain continuity.

Crafted from durable Grade 316 or Grade 304 stainless steel using advanced laser welding technology, our shower channels and floor drains are quick and easy to install, resistant to bacteria, easy to clean and anti-corrosive.

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Basins on this page do not have tap holes.

ANTI-SCALD DEVICE

The anti-scald device will maintain a safe temperature of hot water for appliances, a must for young children, the elderly and those requiring care.

By installing this device, the risk of scalding will greatly be reduced due to the automatic temperature detection, ensuring that when the water becomes too hot, the flow of water will stop.

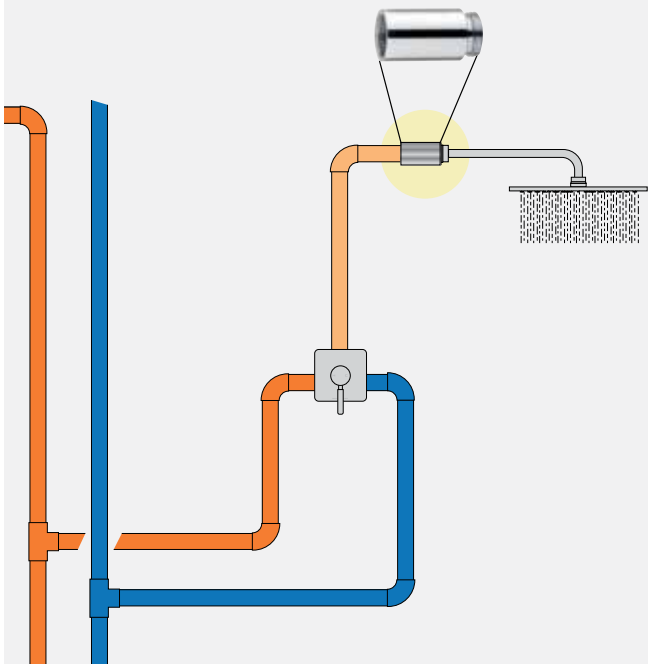

After reaching a safe temperature the device will re-activate and water flow will continue.

APPLICATIONS:

For Showers, Kitchen Mixers, Hospitals etc.

- Thermostatic temperature detector.
- Electroplated brass body.
- Water flow is blocked if temperature goes above 48°C.
- Self reactivation when the temperature decreases.

HONEYCOMB Clinic Aerators

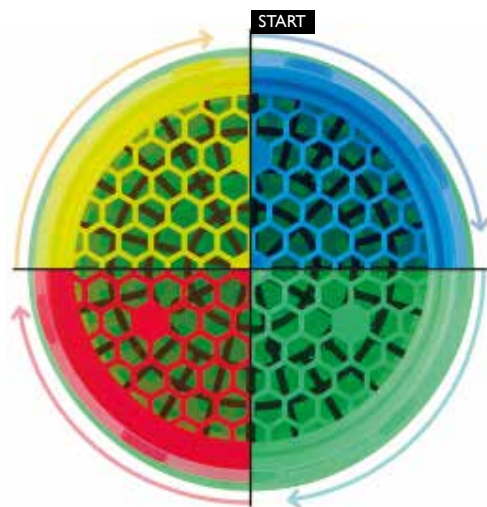

- The integrated flow limiter (Flow Class Z) ensures a constant water flow: 7.5-9 l/min @ 3 bar. This type of flow restriction makes a significant contribution to preventing unnecessary contamination as a result of water spray
- laminar stream
- only drinking water compliant materials used, as certified according to KTW (UBA), DVGW 270, etc.
- improved safety and hygiene thanks to an effective four-colour concept – each colour symbolises a replacement cycle. This means it is easy to recognise and monitor whether replacement is taking place regularly and correctly
- minimal spray and aerosol formation, therefore minimised risk of infection with waterborne legionella or pseudomonas bacteria

FOUR COLORS, MORE SAFETY

- More safety and hygiene thanks to an effective four colour- concept; every colour represents an exchange cycle which makes it easy to recognise and monitor whether the replacement has taken place as scheduled.
- The exchange cycle needs to be set by the facility itself since the water and operating conditions have a huge effect on the microbiological potential contamination of the aerator.

FLUSHING SOLUTIONS

- **More Space:** Since concealed cisterns are built into the wall, they free up a considerable amount of bathroom space that would otherwise have been taken up by the cistern.
- **State-of-the-art technology and durability:** The range of concealed cisterns boasts high-tech working parts to ensure trouble-free operation.
- **Design freedom:** Homeowners and designers can pair their choice of actuator or flush plate and wall-hung or floor-standing toilet pan to perfectly complement their bathroom's particular style and design.
- **Easy to clean and hygienic:** Concealed cisterns and wall-hung WC pans provide the ideal easy-to-clean and optimum hygiene solution – no obstacles to clean around or cisterns to clean under.
- **Good for the environment:** All cisterns contain a dual-flush mechanism, helping to reduce running costs by saving water – using as little as two litres of water for a half flush.
- **Noise reduction:** Since the cistern is built into the wall, any noise created by the process of flushing is significantly reduced, making this an ideal solution for en-suite bathrooms. This is also a key in any hospitality requirement.
- **Strength:** All cistern frames are designed and built to support up to 400 kg in weight.
- **Warranty:** All cisterns come with an impressive 10 year warranty.
