SANIPEXGROUP

OUR STORY

For almost 30 years, SANIPEX GROUP has built a prestigious product portfolio, extended its client base and developed its business to service Middle East, Africa, Europe, Asia & Oceania through Retail, Trade, Project and Digital channels. Combining the highest quality bathroom, kitchen, tile, lighting and outdoor living solutions with exceptional customer service, SANIPEX GROUP always delivers.

Established in Dubai, UAE in 1995, SANIPEX GROUP has grown to encompass flagship showrooms in key locations including Dubai, Abu Dhabi and London, alongside an established presence with partner retailers worldwide.

From commercial projects to residential developments, we assist our client base of architects, designers, developers, retailers and consumers to create beautiful spaces.

Working with many market-leading brands and supported by its own strong portfolio of products ensures SANIPEX GROUP is ready to deliver for your next project with strategically placed logistics centres in key locations.

Offering consistently high service levels, at SANIPEX GROUP, the customer always comes first.

PROJECTS

To be the supplier of choice for project clients - from design concept through to project delivery and after-sales service. Offering our unique lifestyle proposition throughout the Middle East, Africa, Europe, Asia & Oceania.

Our SANIPEX GROUP project division is the premier choice for industry professionals working across a variety of projects.

Our core strength is the ability to work with our clients through every stage of each project; from the design concept stages to ensure product compatibility and compliance, through to project delivery, site-visits and robust after-sales support. We offer you a wealth of experience and expert knowledge from our specialist project support team.

We support all sectors including:

- Commercial
- Hospitality & Leisure
- Residential
- Institutional
- Entertainment

With robust logistics capabilities, large volume of stock and excellent after-sales support, SANIPEX GROUP is the premier choice for industry professionals across the globe.

Dedicated project supply offices around the world:

- London
- Leeds
- Riyadh
- Jeddah
- Doha
- Dubai
- Abu Dhabi
- Cape Town
- Muscat

RETAIL

Lead the market with product innovation, inspirational showrooms and world-class customer service. We provide aspirational clients with the toolkit to create dream luxury interiors while delivering outstanding quality service and choice.

SANIPEX GALLERY

Displaying carefully selected design-led products from our own brands and those of over 100 of the world's best designers and manufacturers, SANIPEX GALLERY showrooms follow a unique 'Live Well' concept. Representing the ultimate blend of directional designed aesthetics with superb quality and craftsmanship, we showcase the latest in kitchen appliances, lighting, tiles and slabs & outdoor living options.

BAGNODESIGN

For beautiful bathrooms that stand the test of time, BAGNODESIGN delivers outstanding luxury solutions. BAGNODESIGN showrooms feature inspirational displays showcasing the latest global design trends for every area of the bathroom. Our highly trained team are also on hand to give the support required. For a complete interior solution, BAGNODESIGN showrooms also feature an extensive tile and slab library, with a complimentary sample service to make final selection quick, easy, and intuitive.

The source of bathroom inspiration.

What will the bathroom of the future look like?

It will be smarter. It will include appliances that reduce water usage and save time. It will be space saving and eco minded, with multimedia functions. It will feature a mix of both high tech and economical design. But above all, it will not look like the bathroom of the past.

Welcome to AXENT.

The AXENT Group is wholly committed to creating a future where beautifully crafted products bring an unimagined level of quality to our lives. With 530 engineers in the research and development centre, alongside 3200 employees, the AXENT Group is well positioned to achieve its vision to become the world's most innovative and reliable provider of sanitary technology.

Our award-winning products are designed to bring style to your bathroom. We believe, good design goes beyond an optical appearance. Design needs to perform, convert, astonish, and fulfil its purpose. It can be innovative, or it might just get the job done.

Our designers Matteo Thun and Antonio Rodriguez are an extraordinary team with over thirty years of experience in architecture, interior and product design. Their creative approach to product design is characterized by simplified forms and the use of warm and natural materials. At the root of each project is an in-depth study of materials, technologies, the market and the client with a view to combining a minimal aesthetic with direct functionality.

Quality accepts no compromises which is why our testing knows no limits: Load testing, endurance testing, stress testing, performance testing and fatigue testing are all part of the on-going quality control process that every new product must undergo before it is introduced.

Matteo Thun was a student of Oskar Kokoschka and Emilio Vedova at the Salzburg Academy before completing his architecture studies in Florence. Matteo's formative professional years were spent under the guardianship of Ettore Sottsass - together, they co-founded the globally renowned Memphis Group in 1981. Several years a professor in ceramic design at the Vienna University of Applied Arts and creator of era-defining pieces, Matteo founded his eponymous design studio in 1984 where he would establish himself as one of his generation's most influential voices and talents.

In partnership with Matteo Thun since 2003, Spanish designer Antonio Rodriguez follows the principle of "remove rather than add" and pairs sophisticated aesthetics with intuitive functionality and innovation. Matteo's and Antonio's work stands for timeless simplicity, mindfulness and a clear design language shaping iconic products and architectural projects to ensure everyday enhancement.

Designed by Matteo Thun & Antonio Rodriguez. Water is a source of life and as a stimulus of cultivation and refinement. The use of water is a ritual that is not carried out unconsciously - it means pleasure and joy, hygiene and purification. The clean lines and the simplicity of this faucet hide its special technology: a round button contains all electrical parts and moving it changes the temperature - visible in the lower part of the button. AXENT.Zero is modular and designed in different heights, with different handles and different surfaces such as chrome, nickel, gold, white or black. It's all about silent luxury.

AXENT.ZERO

Less is most definitely more, as demonstrated by the sleek minimal beauty of the new modular AXENT.Zero collection by renowned designers Matteo Thun and Antonio Rodriguez. Blending clean lines and innovation to striking effect, this stunning brassware collection feature round buttons integrated into the design that operates the flow of water and controls the temperature. Available in different heights in Chrome and Matt Black finishes, the AXENT.Zero collection brings understated style to any bathroom aesthetic.

AXENT

The multiple award-winning design of AXENT.ONE is now even more transcendent. With its elegantly curved lines and seamless surface, it is as much a design item as a functional object. AXENT.ONE turns functionality into user comfort. With the easy-to-use magnetic remote control, you can operate all of AXENT.ONE's exceptional features.

AXENT.ONE has the perfect solution to dealing with dirt, toilet paper and urine – using what is probably the world's most powerful water vortex. The accelerated centrifugal force whisks all waste material away, swiftly and reliably, leaving nothing behind but a sparkling clean toilet. A toilet flushing can be as loud as a vacuum cleaner. Unless it's an AXENT.ONE toilet. The powerful water vortex rinses out the whole toilet bowl at a noise level that's lower than conversational speech.

It's quite simple, really: if there's no rim, then there's nowhere for limescale and bacteria to hide. That's why AXENT.ONE doesn't have an inner rim. As a result, the toilet is easier to clean and therefore more hygienic than conventional models. The powerful flush rinses the whole bowl swiftly and effectively. Bacteria and limescale don't even get a look-in. This clever design means all you need is a cloth to keep your toilet clean. And because you'll be using fewer cleaning products, you'll be helping the environment, too.

AXENT.ONE has the AXENT.Infinity Guard coating, which ensures ultimate protection for your toilet against germs and bacteria. This special ceramic glaze contains silver ions, which reduce microbial growth to an absolute minimum. The bowl, toilet seat and lid all boast excellent antibacterial properties and reduce bacterial load by up to 99.9%. The bowl is also coated with AXENT Easy Clean to make cleaning a cinch. Stylish hygiene meets state-of-the-art control. All functions and positions can be adjusted with just a small twist using one hand.

Matteo Thun

Designed by
MATTEO THUN &
ANTONIO RODRIGUEZ

| Gallia

Thanks to the passion and the great insight of Mr. Mario Bongio, a small manufacturing firm was born in 1936 in the heart of the Novara province, namely in Alzo di Pella, on the shores of Lake Orta, just a few kilometers from Milan.

Mario Bongio skillfully managed to conduct his business through hard problems and demanding times, with his courageous choices and his top-quality production, favouring from the very beginning in an unmistakable style made up of innovation and creativity. Using brass and Murano glass manufactured by master glassmakers, the crystal has endowed the firm with a unique, distinctive feature.

Bongio has always considered taps and bathroom fittings in a more comprehensive manner, approaching the subject in its entirety rather than dealing with it as a collection of distinct pieces, quite separate from one another. In more recent years the manufacturing technique has kept up with the research work, aimed exclusively at the top quality of the products with the ever-present unmistakable style.

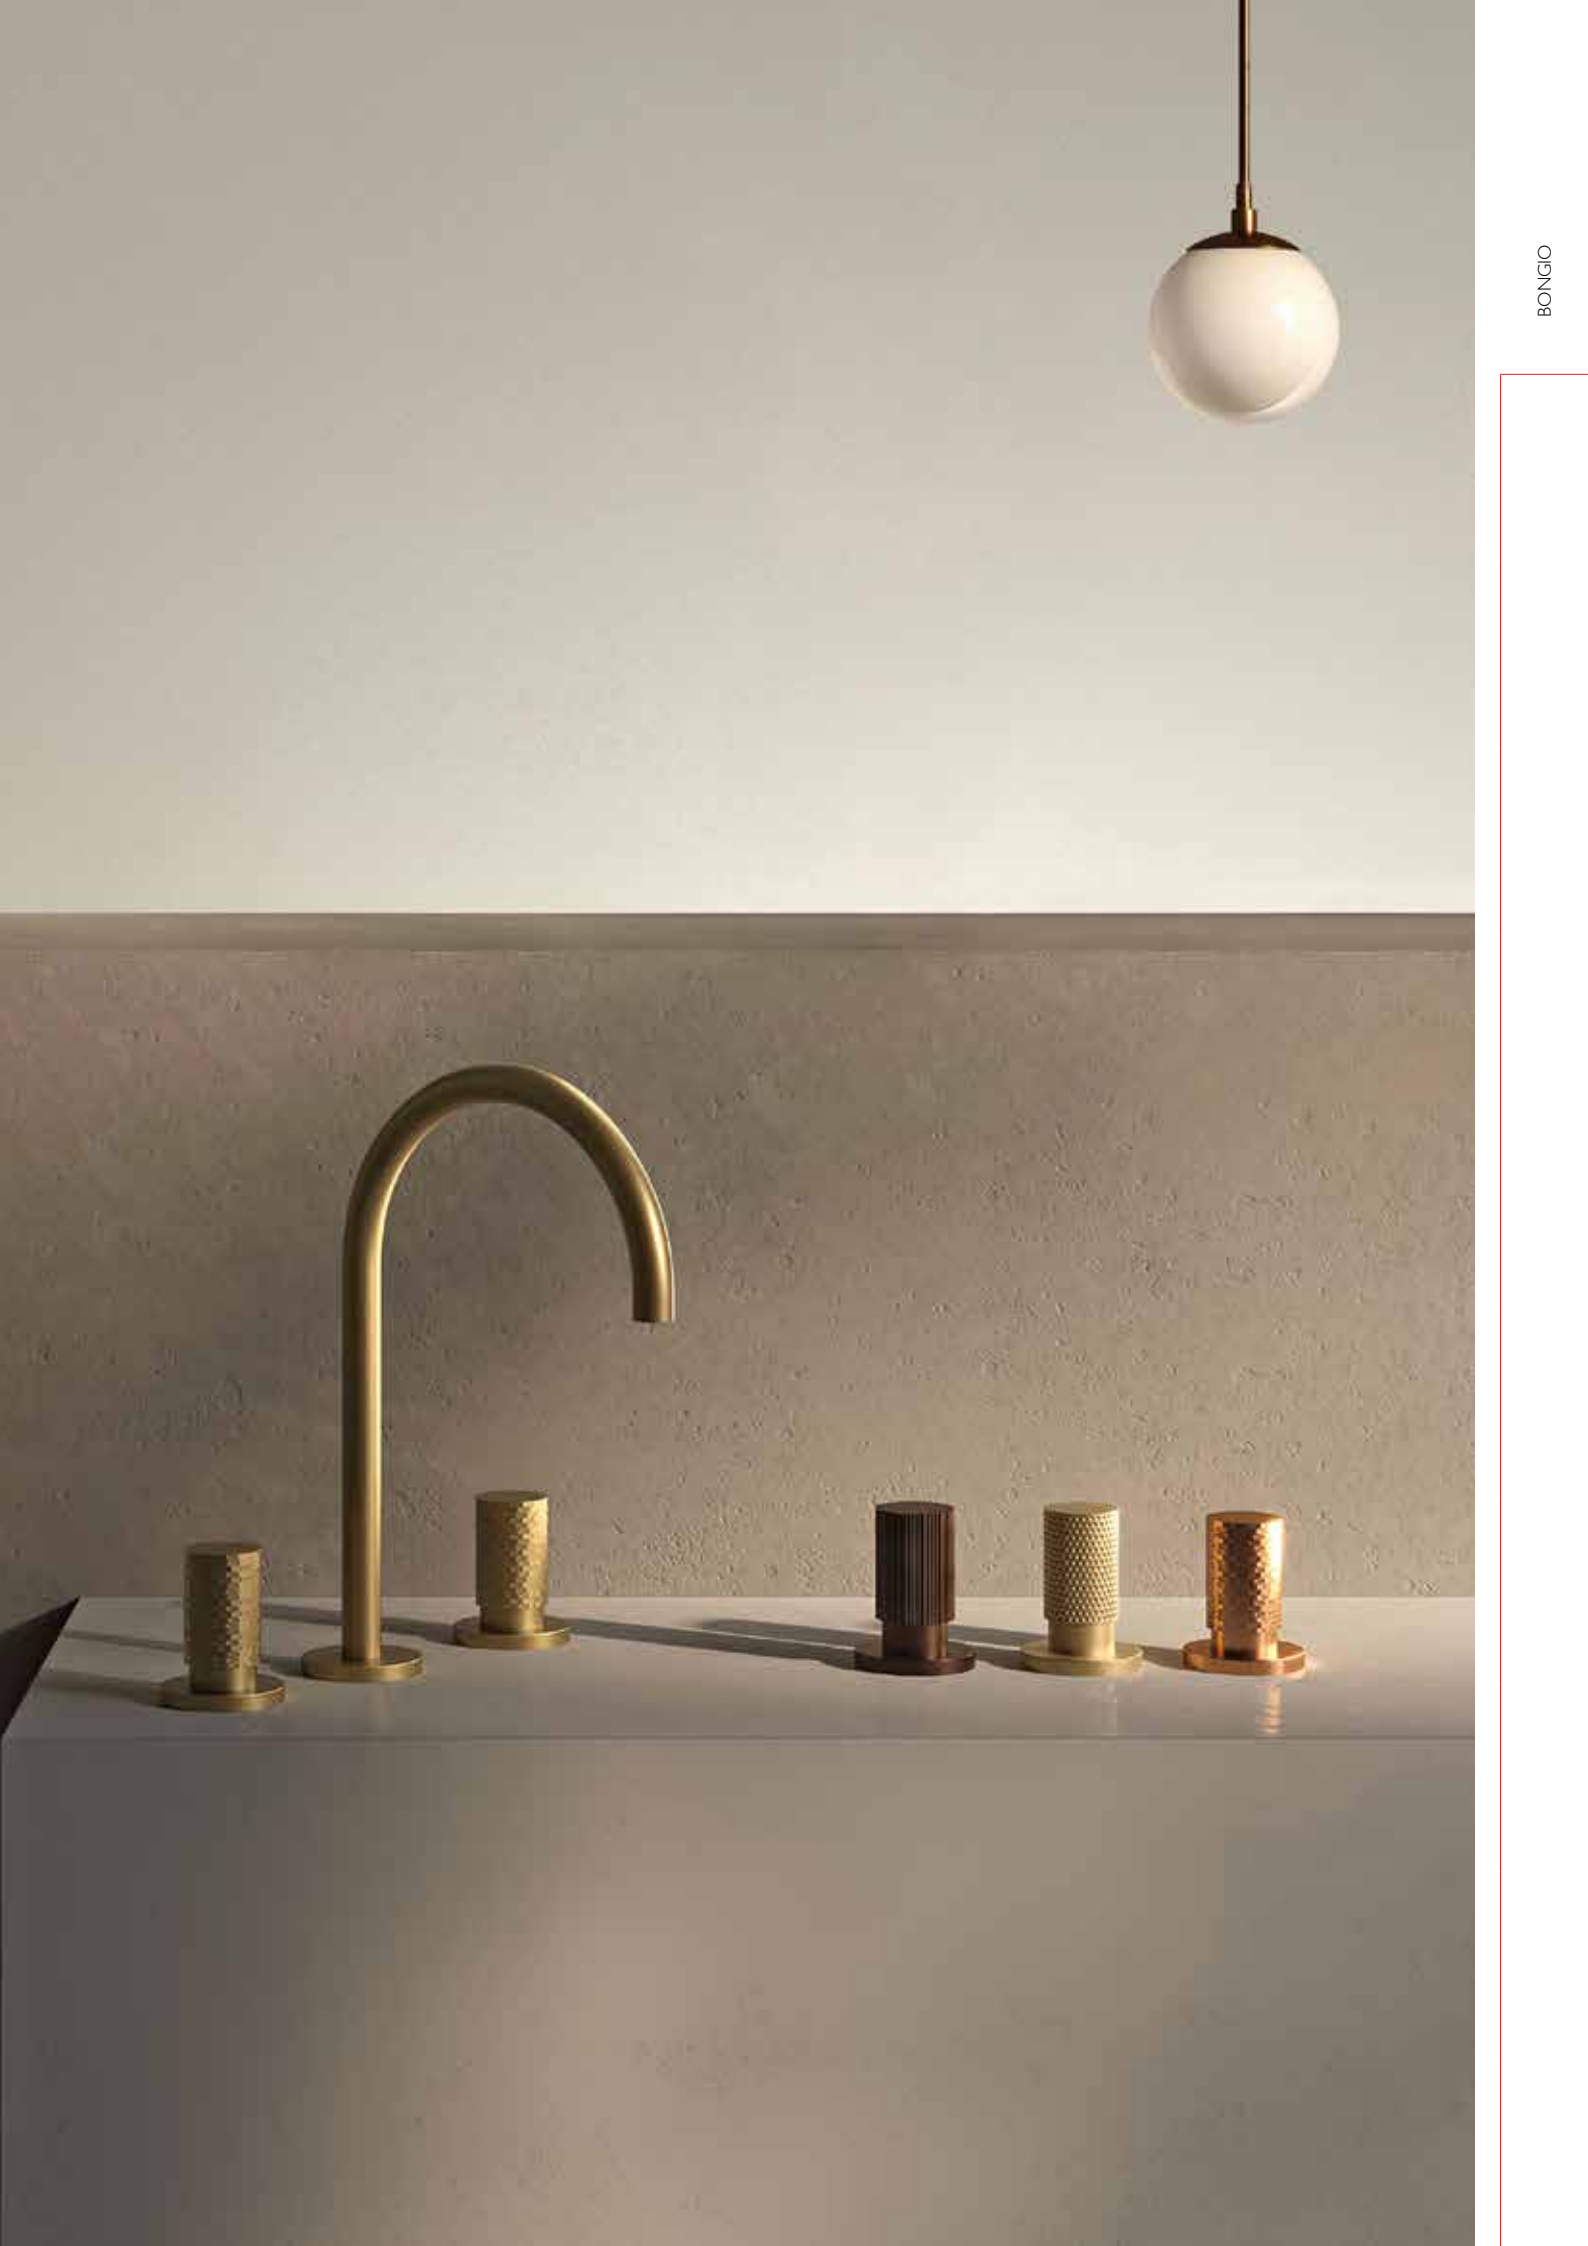

The products are genuinely "Made in Italy", the outcome of authentic and outstanding Italian craftsmanship, and not just publicity. Everyone knows many of the "pieces" created by Bongio, now: they've become the icons both of design and of unlimited feeling and passion.

BOSSINI

Founded in 1960, Bossini is an Italian national leader in the bathroom sector specialized in the production of showers, mixers and accessories for taps.

Innovation, Quality, and Design is a fundamental element in the manufacture of Bossini products, which are not only high tech, but also elements conceived to

be combined harmoniously with any style of interior. Bossini offers a rich and versatile range of products in which the search for innovative lines and shapes meets the most cutting-edge functional solutions, enabling customers to truly personalize the environment and transform the traditional bathroom into an authentic 'made-to-measure' wellness space.

Bossini continues its extraordinary path of technological evolution, directed with precision towards smart manufacturing, the result of constant innovation, a deep knowledge of industrial processes and the incessant investments to implement it.

In terms of environmental sustainability, Bossini has recently activated the innovative trivalent chromium plating process, totally free of the hexavalent Chromium VI. International symbol of quality and aesthetics Made in Italy, Bossini is distributed in over 60 countries all over the world and appreciated for the attention to detail, the possibility to develop tailor-made solutions and for the strong attention to the customer : plus distinctive that make unique brand.

Aquahalo, a 'sculptural experience' shower modelled on a classic crystal chandelier. The vision of designer Michael Neumayr, the product features three effective flow modes, including a spot for light and water integrated into the ceiling, and aims to provide meditative and invigorating shower performance.

Additional mixers and finishes available upon request.

JEE-O bathroom concepts, based on minimalistic, industrial, durable and timeless designs, are part of our customers' lifestyle and give them an energising experience.

The creative brain behind JEE-O, concept and product designer Lammert Moerman, only has one wish in mind; enable the world to feel the JEE-O DNA. Let bon vivants worldwide experience the ultimate JEE-O feeling and get acquainted with the experience of showering and bathing in endless atmospheres. Lammert Moerman creates products with tranquillity, peacefulness and space for body and mind, always within an atmosphere of functional luxury.

The JEE-O collection offers a complete bathroom concept, with showers, faucets, basins, baths and matching accessories. Each line of products has its' own characteristics. Designed as unique free-standing objects, the JEE-O products give you full freedom in creating your own bathroom experience. All showers and faucets are made from high quality stainless steel. Products come with a brushed, black, bronze or gold look finish. All JEE-O showers are designed with a contemporary styled mixer. Eye catching features such as the JEE-O original ring, combine bith a sense of artistic design and functionality. All baths and basins are made from high grade DADOquartz, a combination of quartz rock and resin. All baths are equipped with an integrated overflow system and are colourfast. This young, twenty year old brand JEE-O, has rapidly gained recognition across the globe. Available in over forty countries and winner of the German Design Award and Red Dot Award, that was awarded for the soho design.

NOBILI

Nobili offers pure design and incomparable technological efficiency. Innovating the industry since 1954 Nobili is not only the largest brassware manufacturer in Italy, but a pioneer in sustainability and standardising the industry - resulting in the iconic company winning numerous awards.

In the 1980's Nobili developed the ceramic disc cartridge, invested in technological water-saving research and thus propelled their pioneer status in 87 countries across the industry. When the lever is in the central position, the Nobili Widd® cartridge allows the flow to be opened to cold water (instead of mixed water), preventing boiler activation, leading to less consumption of hot water, greater economic savings, high respect for the environment (no combustion fumes are released into the atmosphere).

In 1960, Nobili innovated crafting technologies in order to utilise higher quality brass for their mixers, which elevated the quality available in the industry at that time, whilst reducing wastefulness. Having to deal with the strict rules of these foreign markets also ensures high attention to tiny details - guaranteed by important international certifications.

Today, ecosustainability is at it's height. The Suno 100,000 square metre production plant, with three hundred machining work centres is classified as a "Zero Emission Company". Because a product designed to improve quality of life cannot be born if it is destined to destroy the world in which we live.

FINISHES:

The original since 1968

VOLA created the modern tap in 1968. Following the original designs by the renowned Danish architect Arne Jacobsen, VOLA combine exceptional Danish design with the traditions of craftsmanship and responsible manufacturing. Since the beginning, VOLA products have been acclaimed for their timeless design and high quality. The iconic KVI kitchen mixer was admitted into MOMA's permanent design collection in 1974 and is displayed in Copenhagen's Designmuseum Denmark.

Made in Denmark

In the factory in Denmark, VOLA manufacture every product to order, using only the highest quality materials and the continued commitment to craftsmanship and attention to detail that is central to the VOLA ethos. The results are beautiful, hand-finished products that not only look and feel extraordinary, but also ensure the seamless integration of water into architecture for generations to come.

The modular system

Part of what makes VOLA truly different is our unique modular system. Built on Arne Jacobsen's original proportions of the III, HVI and KVI built-in mixers, the VOLA modular system's family of parts, including levers, handles, spouts and plates, are all interchangeable. All VOLA products are available in 15 painted colours and 12 finishes. Architects and interior designers worldwide acknowledge VOLA as a true stamp of quality; the original, not an imitation.

VOLA The Original, celebrating 50 years and Beyond.
Often imitated but never matched. VOLA is The Original

TUBES

THE WARM SIDE OF DESIGN

Tubes is an Italian brand famous at international level for its designer radiators and heated towel rails, which symbolize its position at the cutting edge of its industry. The inspiring family-run brand has stood out from the rest from the very onset thirty years ago, having revolutionized the appearance of traditional radiators, turning them into genuine iconic pieces.

Tubes company headquarters are situated near Venice and all production takes place in-house. Made in Italy is one of the key values of the corporate philosophy, along with innovation, experimenting in shapes and technology, fine craftsmanship and superior quality.

FINISHES:

alice

Alice is part of the ceramic district of Civita Castellana. The contribution of ideas and creativity from partners allows us to daily produce products of great value with originality and passion. Alice's know-how derives from a long standing tradition in ceramic processing which represents the cultural heritage of their region. Quality, innovation and a little bit of pride make their creations unique.

Alice has an environment in which workers, technicians and designers work side by side, with an artisanal method which also benefits from the most advanced technologies such as the tunnel oven or a high level of mechanization typical to industry 4.0. The production unit spans over 20,000 square meters and an extension is planned with a new "Alice 2" plant for an additional 10,000 square meters. The production capacity is around 180.000 pieces produced per year.

They have always believed that company growth also passes through particular attention to green topics, which is why in their factories the consumable raw materials are all recyclable and a 500KW photovoltaic system has been installed with the goal of expanding it in the near future.

Alice is committed to designing, manufacturing and bringing to market innovative products and solutions. The innovation cycle is a mission that they carry out with the aim of keeping up with times by introducing modern and functional collections on a regular basis.

Balducci design

Handcrafted in Tuscany, Italy, Balducci Design creates exclusive lifestyle pieces carved from natural marble. Born from experience and a passion for furniture, each crafted piece meets the modern needs of functionality, comfort and beauty.

The Balducci Design brand was born from the experience of Balducci Marmi and the passion for furniture. Here you will find exceptional washbasins for the bathroom and home, designed to last and to amaze, always thinking about their functionality. All the items in this catalog are crafted in our factory in Camporgiano in Tuscany

With the ability to create custom designs upon request from an extraordinary selection of natural solid marble, we collaborate with Balducci to ensure your bathtub perfectly suits your requirements. Choose your look from angular, curved or smooth shapes, each offering a unique aesthetic appeal that works with the natural beauty of marble.

For further details, please contact our sales team.

Custom Marble Bathtub offering available on request.

SHAPES FOR ARCHITECTURE

Founded in 1980 in Corchiano, Italy in the Civita Castellana district, well known for ceramic tradition, today Galassia is an active player in the production and marketing of ceramic sanitaryware. The company focuses on creating high-end products for the home interior and represents a brand with heritage and recognition as proven by 40 years of history in the bathroom furniture sector.

Galassia is characterized by a flexible, customer driven business model. The company controls all key phases of the value chain from raw materials to final products. All manufacturing processes are carried out in Italy through the use of cutting-edge manufacturing systems and manual operations in which the know-how of expert craftsmen makes all the difference.

Galassia established a long-lasting collaboration with architects and designers and today are able to offer more than 300 different ceramic products of different colours, sizes and installation method. Galassia's mission is to create and produce ever new shapes, thicknesses, colours and styles through the unique and immense ability to work the ceramic and provide high-end quality and timeless products and ideas.

GEBERIT

Geberit's long history started in 1874 with the opening a plumbing business in Rapperswil, Switzerland, by Mr. Caspar Gebert. Since these very early days our history has been lined with many innovations which have not only set new industry standards, but also have played an important role in setting the stage for the products that are found in today's modern bathrooms. The innovation to place the cistern inside the wall changed the look of bathrooms around the world. Geberit pioneered the innovative concealed cistern back in 1964. Geberit is still setting trends with comprehensive sanitary systems and solutions. From the strength of our Know-How in installation and flushing systems. Through constant research and development Geberit makes sure that their technology and design not only meets standards but is state-of-the-art.

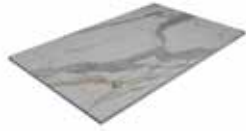

Our product lines include ceramics and bathroom furniture & sanitary systems but Geberit also has a lot more to offer than only products. Besides the product range Geberit offers numerous services: centralised logistics, support material, training, specification and design service and a specifier tool, technical support and our reknowned after sales service. Geberit stands for innovation, durability and ecological efficiency.

Designing and manufacturing elegant, stylish bathroom furniture and accessories for the modern bathroom since 1987, Idea Group brings a balanced combination of functionality, comfort, and beauty.

By creating architectural bathrooms, the company underscores its brand mission: to redefine bathrooms into areas for wellbeing, with products characterised by sleek, architectural lines.

Preserving the local traditions of its local province of Treviso, Italy, the Group utilises local expertise to handcraft various materials and finishes which are then merged with the use of new materials and innovations. Its own established Idea Production System (IPS) enables the company to stay ahead of the curve with the latest technologies and manufacturing processes.

Windisch

Shaping the history of brass since 1934

It all began in Barcelona in 1934, when Hans Windisch founds a company for handcrafted decorative articles made from brass. In the 1950s, Fernando Giménez joins as a partner, and they set out to make the company a benchmark in bathroom articles made with brass and hand - blown crystal glass. They have one goal: to make everyday life a unique experience. In 1967, the company changed its name from Hans Windisch to Windisch, S.A. They changed the name, but the vision remains the same.

Ten years later, Isabel Giménez Cots arrived at Windisch, bringing with her the decision to export their products to more than 80 countries. Nowadays, it is already the fourth generation of the same family that continues to handcraft brass and crystal glass into innovative bathroom articles.

Our essence is the perfect fusion of tradition, quality and experience. The dedication to handcrafted production that distinguishes us and translates into the unequalled quality of our products, turning each bathroom into an elegant and unique space. We are a company that not only offers products but a heritage of excellence that is reflected in every piece we create.

Items designed to endure over time and in memory. Items that turn your everyday moments into something extraordinary.

Driven by its mission to deliver quality products that offer an optimal massage and relaxation experience at a competitive price, Wellis is Europe's leading quality spa manufacturer. Wellis' range of hot tubs and swim spas offer a persuasive combination of a user-friendly experience powered by the latest in technological innovation and a stylish aesthetic.

Wellis started as a small family business in 2003. Since then, the company has grown to gain recognition as a global brand with an innovative mindset and a commitment to developing new technologies to enhance its products' comfort, aesthetic appeal and sustainability credentials. Featuring a unique 6.3 mm thick polyurethane-reinforced acrylic material from Plascolite and Aristech to shape the hot tub body, every Wellis product comes with extra peace of mind in the form of a ten-year warranty on the shell, seven years on the acrylic surface, and three years on the engineering.

With three factory facilities in Europe and an expert workforce of 1,600 people dedicated to the shared goal of bringing the Wellis wellness experience to homes all around the world, the company holds several patents and has been recognised with a number of awards, including the What Spa 2022 Best Buy award.

Custom Solutions

Unique Sauna Designs

Let your imagination soar and visualise your ideal sauna. We offer sauna design models which can be customised uniquely to the client's needs. The designs cover a wide range of different styles:

Product Code:

HRV-CUST-SAUNA

Discover the right option for the atmosphere and style you want from our range of different designs:

Wood Finishes

Panels make an impact on the atmosphere of your sauna. The colour, grain, and cut of wood chosen for the walls and ceiling sets the backdrop for your sauna design. Medium and darker toned panels evoke traditional and natural feelings, whereas lighter panels allow dark interior elements to pop from the backdrop.

Door/Glass Finishes

All sauna glass doors and glass walls have been specifically designed for sauna use. The glass used is tempered 8 mm safety glass. The sealant of the door frame keeps the heat in the sauna room and makes sure that the door closes smoothly. Available in many colour combinations, and are easy to install.

MyHarvia: Remote control your sauna

Harvia Wi-Fi solutions, combined with the MyHarvia mobile app, have been designed to allow the safe and easy remote control of your sauna. These solutions allow you to switch on the sauna heater remotely and control other features that will save energy, as your sauna will be ready exactly when you are. The door sensor, a safety device included in the Harvia Xenio Wi-Fi accessory package, keeps the sauna safe as it can be controlled remotely.

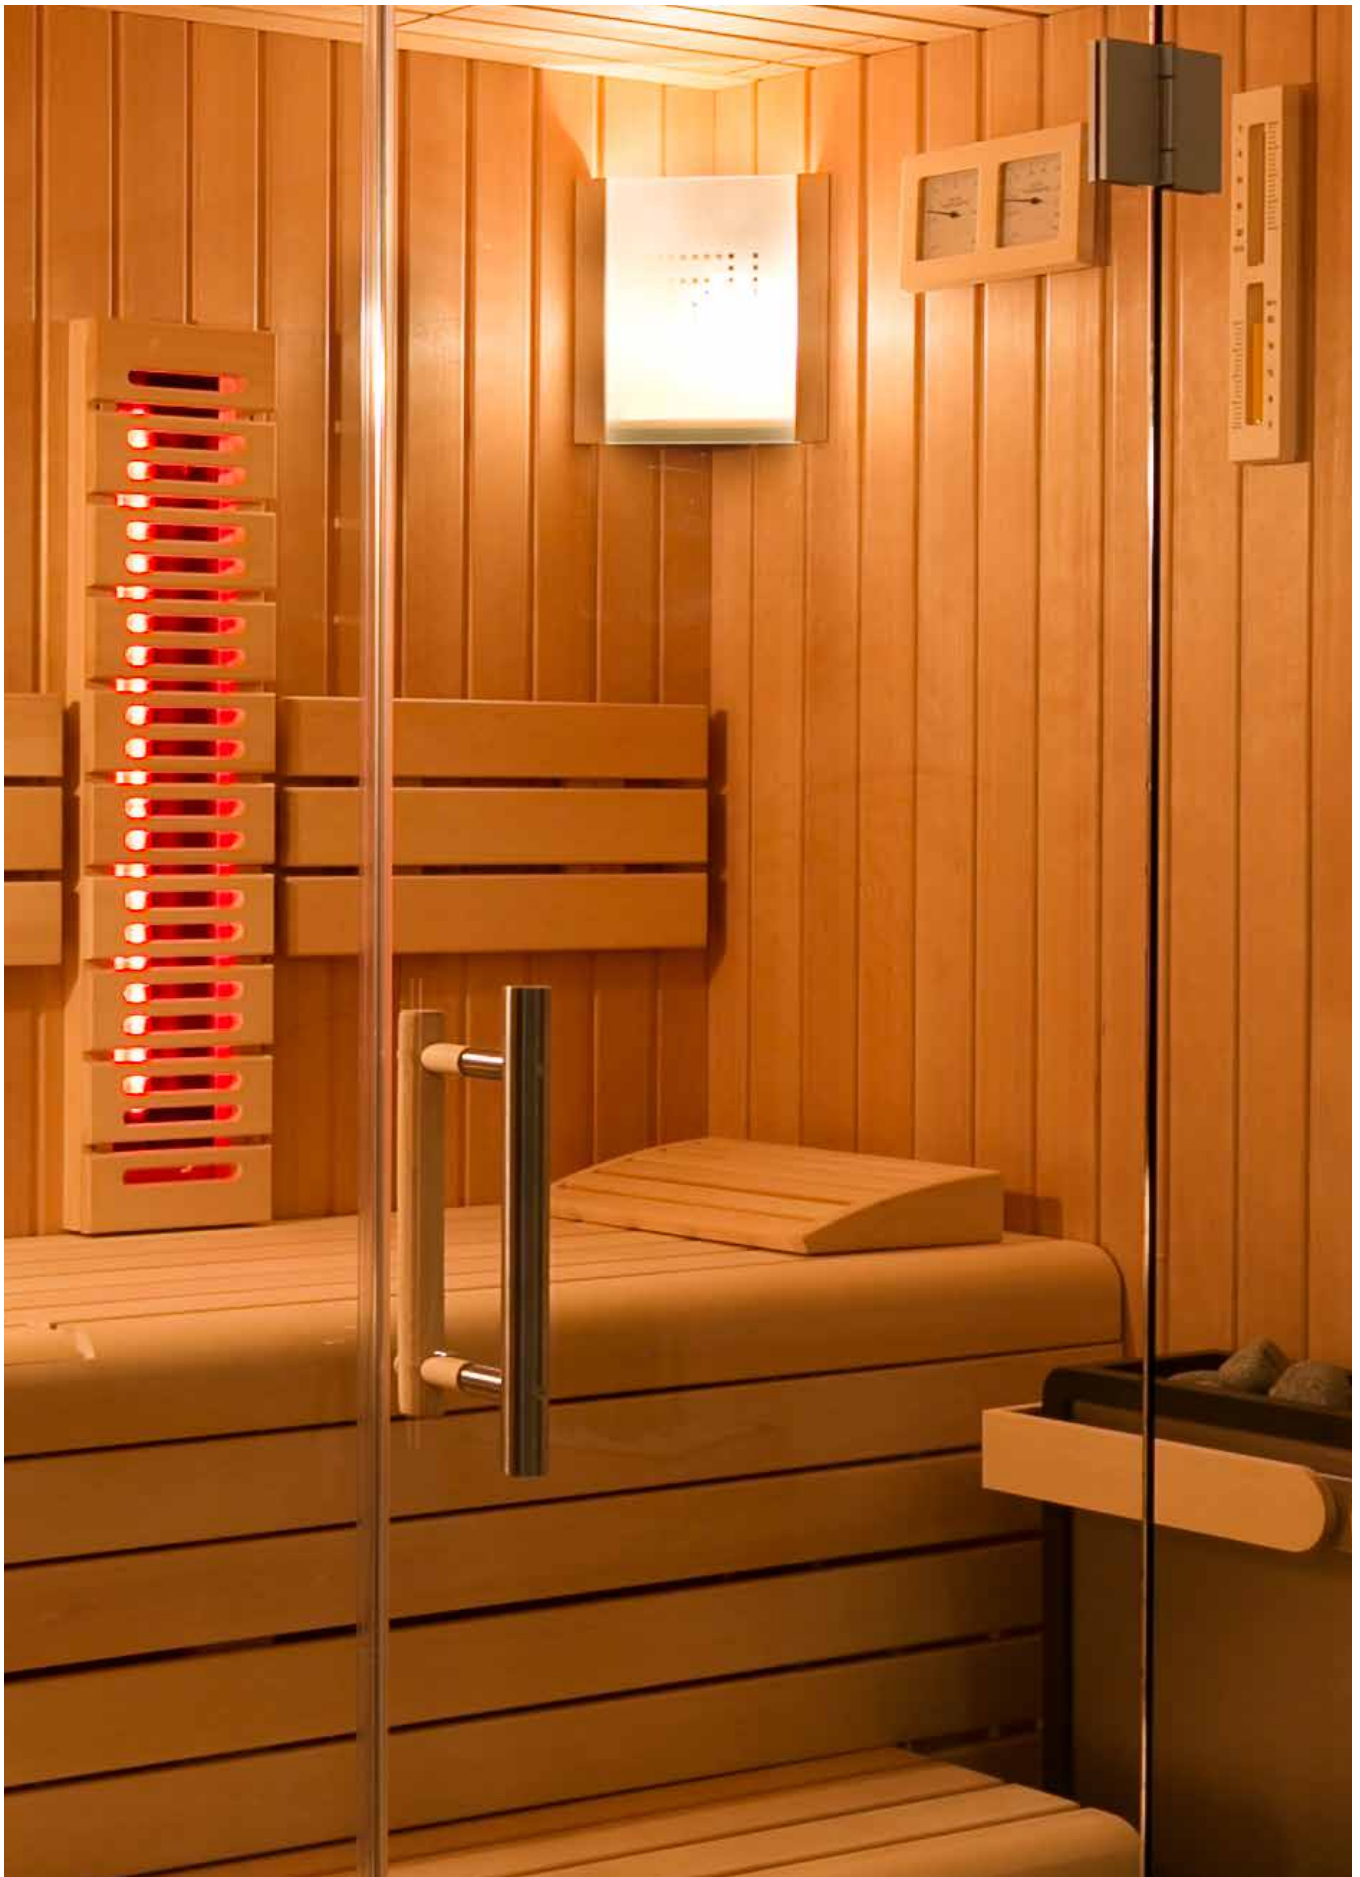

You can control the features of the Harvia Xenio Wi-Fi control panel from your mobile device from anywhere and at any time using the MyHarvia mobile app.

The wedi system allows unlimited possibilities in your bathroom design. Whether it's a new build or a renovation project, the design of any bathroom can easily be tailored to individual requirements.

Since 1983 when Helmut Wedi founded the company, wedi turned into a premium brand for the realisation of bathroom and wellness areas.

The innovation leader wedi is now active in over 50 countries and works closely with architects, specialist dealers and tilers on all of its new developments. Building, renovating and designing with the modular wedi system today is much more than just the well-known wedi building board. It stands for complete solutions in the ever changing wet room environment as well as for numerous services in the areas of sales support and application technology.

With wedi you get a large range of different components - from simple building boards to numerous shower and bath elements through to the various complete system solutions and appropriate sealing and installation accessories – to form your individual and comfortable bathroom or wet area.

In the end you won't even see the wedi products in the finished room, but the secrets under the tile are the features which come with wedi. wedi products are 100% waterproof, extremely robust, protect against mould and fungus and are suitable for individual tiling or plastering; certified by numerous institutes and guarantee system safety for the whole floor to wall system: signed and sealed by wedi.

RICHMOND

Designed with luxury and comfort in mind, RICHMOND is a hand-selected range of hotel amenities to make your guests' stay memorable.

From mini bars and safes to hair dryers, RICHMOND combines ease of use with the latest technology, taking care of even the smallest details.

With silent thermos absorption, multi-functional features and a range of capacities, RICHMOND mini bars cater for guest refreshment in style.

Hair styling needs are taken care of with CARA, CLAUDIA & NAOMI, a range of compact, elegant and functional wall-mounted hair dryers. Providing excellent drying performance while maintaining a very low energy consumption, the hair dryers are also designed to keep noise levels to a minimum too.

Offering guests peace of mind, the RICHMOND collection is rounded off with a selection of front-opening and top-loading safes. The elegant design and smooth surfaces are matched with a digital keypad and auto electronic lock for ease of operation.

BYSTRO

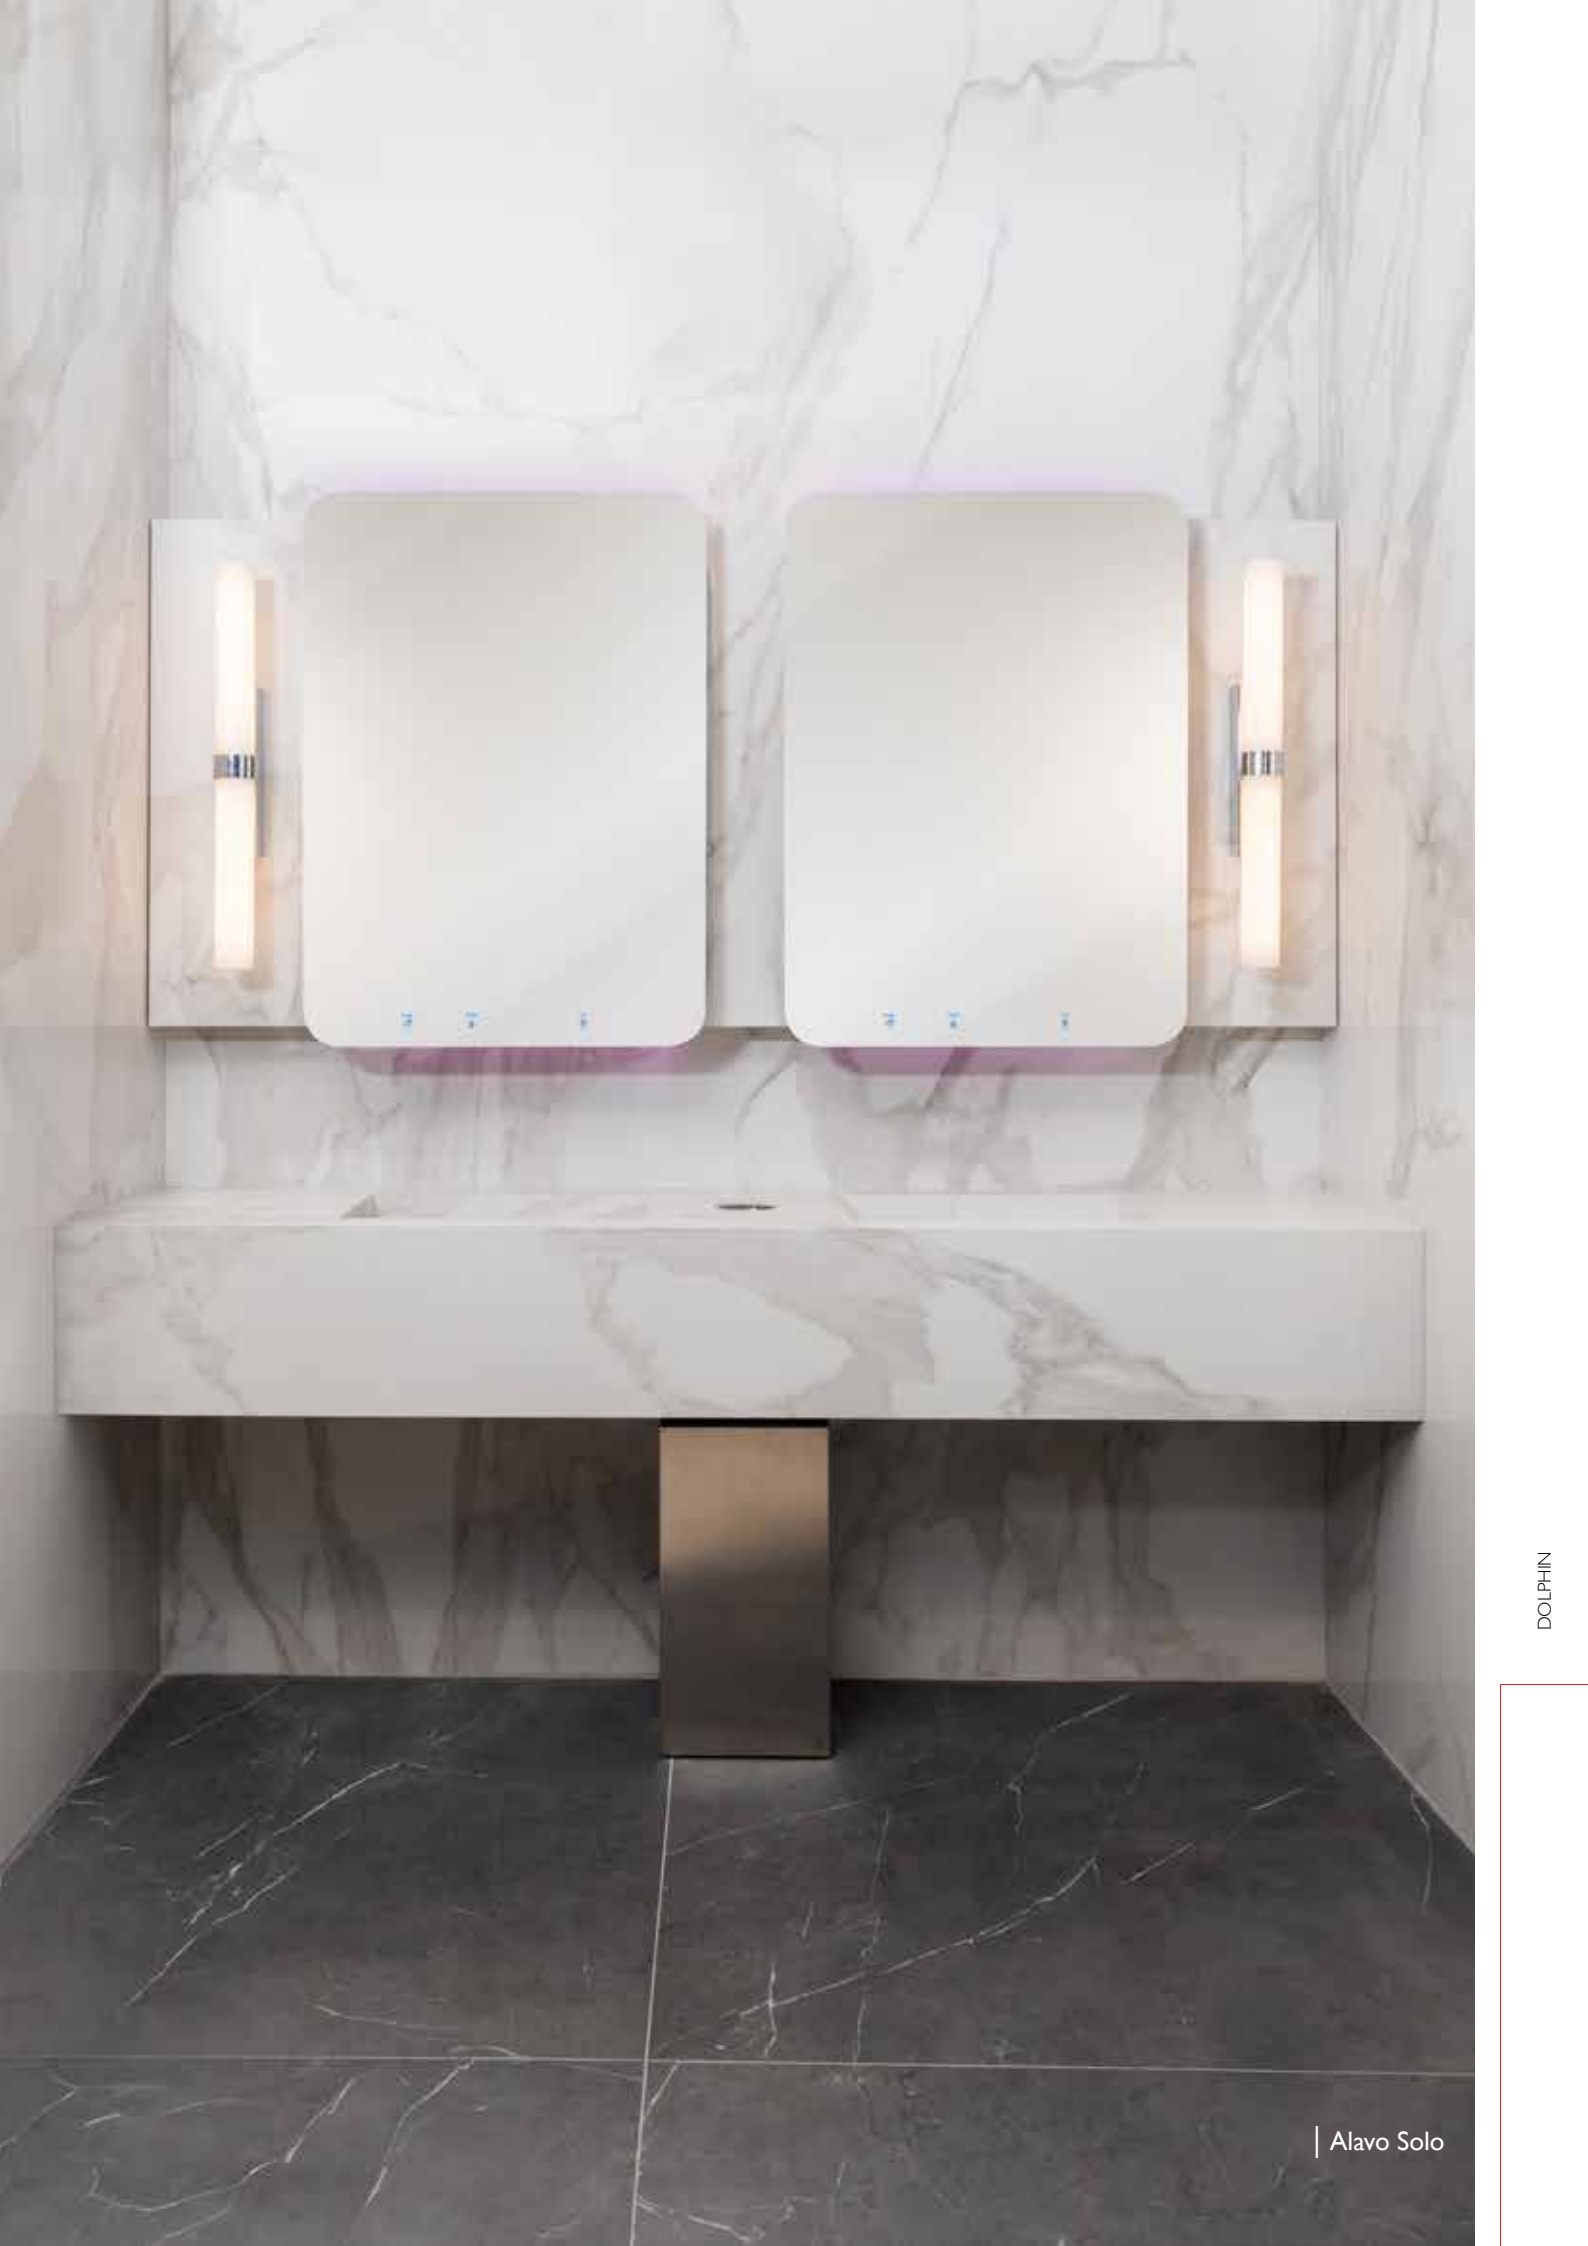

Dolphin Solutions is dedicated to creating the finest commercial washroom experience with total confidence and to helping commercial developers, architects, and contractors achieve their vision by offering an innovative washroom product range and world-class service.

Dolphin offers a complete washroom consultancy service, from analysing washroom designs to providing unique solutions to help their clients achieve their sustainability goals, desired building accreditations, and testing the functionality of their washroom products after installation.

Clients gain a return on investment like no other with Dolphin's beautifully designed washroom products, built for durability and quality. Choose from a wide variety of washroom products in touch free and traditional options and add that wow factor to your project with Dolphin's special finishes and coatings.

D DOLPHIN

ALAVO MIRROR SYSTEMS
FULLY CUSTOMISABLE TO YOUR REQUIREMENTS

DOLPHIN

COMPLETE, CONVENIENT, CLUTTER FREE

Expertly engineered by our elite team of designers using innovative technology, the Dolphin Alavo mirror system is a fully customisable behind-mirror washwall system, complete with infrared sensor taps, foam soap systems with concealed cartridges, and high-speed, low-energy dryers all in one wash station.

There are no design restrictions with Alavo, meaning you have the freedom to customise the behind mirror system to suit any washroom in any environment, be it traditional or superloo style. The touch free compact wash station solution is ideal in commercial buildings, public buildings such as airports and shopping centres, hotels, and restaurants due to its high specification properties combined with SMART washroom technology.

DOLPHIN

Introducing the latest innovation in infrared technology - the Dolphin touch-free taps. With hands-free operation, these taps eliminate the need for manual operation, ensuring less wear and tear and improved hygiene.

The unique Self Monitoring Analysis and Recording Technology (SMART) allows facilities managers to easily connect to Building Management Systems (when used with the optional Bluetooth Adaptor) to analyse washroom data such as water usage. The washroom system can also be used to modify settings such as flow rates to save water and to set a hygiene flush to prevent waste traps from drying out.

All Dolphin SMART taps are hand-crafted and built for long-term performance and can be elegantly coated in a stylish finish such as PPC, PVD, and Ceramic Coating. We provide a choice of two PVD finish options, each featuring seven exquisite colours, available for select Dolphin washroom products. One features a satin brushed style, while the other features a mirror polished style.

Available in both wall-mounted and deck-mounted options.

FINISHES:

Fast, hygienic and energy efficient, Airblade™ technology is found in many of the world's leading airports and hospitality environments. From compact to quiet, and one that washes and dries hands at the sink, there's a Dyson Airblade™ hand dryer to suit your washroom.

At Dyson we believe hand drying should be fast, hygienic and responsible in its energy use. In 2006 the invention of Dyson Airblade™ technology meant that, for the first time, water was scraped off hands using high velocity unheated air, thus reducing the energy consumption.

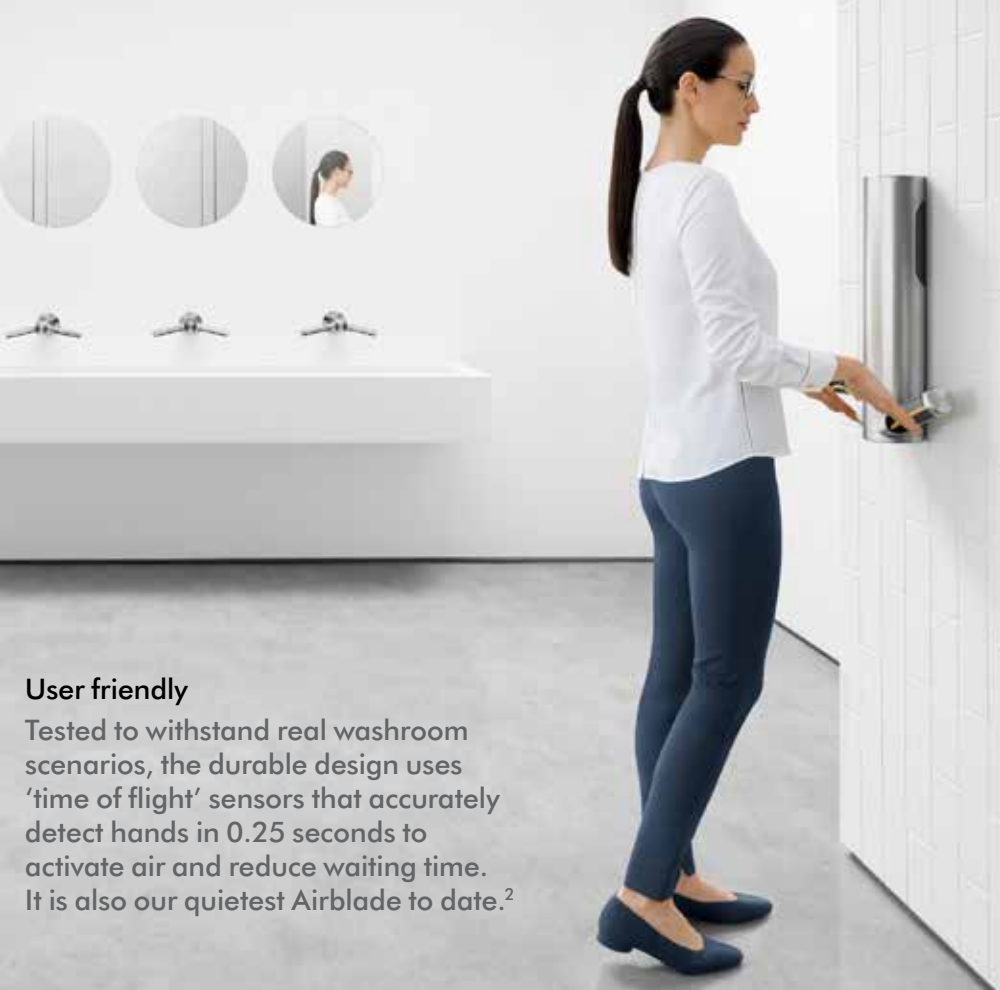

Dry with HEPA purified air. Not dirty air: All Dyson Airblade™ hand dryers feature HEPA filters. Proven to capture 99.95% of particles, 3 including bacteria and viruses, from the washroom air that pass through the filter.

To dry your carefully washed hand, the Dyson Airblade 9kj hand dryer is the fastest most energy efficient HEPA-filtered hand dryer and is no.1 in the market. With a Curved Blade™ design and cutting-edge technology, the machine enables people to dry their hands quickly and hygienically, while using low energy and offering an alternative to single-use paper towels.

Dyson Professional aims to bring Dyson technology to every building in the world. We provide our business owners with machines that solve problems others ignore in environments such as offices, airports and hotels. Dyson Airblade can be found in some of the world's most iconic commercial properties, including the Shard in London, Wellington Airport, Mall of the Emirates and Etihad Museum.

Give good hygiene a hand

The fastest most energy efficient HEPA-filtered hand dryer¹

User friendly

Tested to withstand real washroom scenarios, the durable design uses 'time of flight' sensors that accurately detect hands in 0.25 seconds to activate air and reduce waiting time. It is also our quietest Airblade to date.²

Sustainable design

Straight line configuration allows for simpler air flow paths, meaning less energy consumption³. And efficient aerodynamics means the Dyson digital motor draws up to 87% less energy⁴ than a warm air hand dryer. Lowering costs to just \$19/year to run in Eco mode.⁵

HEPA filter
Fleece-lined glass fiber HEPA filter captures 99.95% of particles,⁶ including bacteria and viruses, from the washroom air.

10 second dry time⁷
Ergonomic drying angle and Curved Blade™ design follow the curves of your hands to remove water quickly, for fast, comfortable hand drying.

Dyson digital motor V4
Using digital pulse technology, the Dyson digital motor V4 spins up to 75,000 times a minute in Max mode.

¹Dry time and energy consumption calculated for Max mode. Dry time was determined using Dyson test method 769 based on NSF P335 to a measurement of 0.1g residual moisture.
²Average loudness (measured in sones) compared to Dyson Airblade™ hand dryers.
³Compared with other Dyson airblade models.
⁴Measured in Eco mode.
⁵Average electricity price US\$ 0.1/kWh for the US market, as of May 2019. For calculations visit www.dyson.ae/calcs.
⁶HEPA filter tested to EN1822-5, by an independent testing laboratory, under prescribed test conditions.
⁷Dry time determined for Max mode using Dyson test method 769 based on NSF P335 to a measurement of 0.1g residual moisture.
