

Use this information to identify the origin of ANY Tire Changer Valve that has this style VALVE BODY. The Valve Body is the darker part of the valve pictured. This information applies to these valves regardless of part number or valve configuration.

www.ShopEquipmentParts.com sells and supports only the valves made in the USA. If you have a USA made valve, you can buy any parts needed to repair your valve (o-rings, spools, etc.). If you have a valve made in China, we recommend you replace the entire valve with one of our valves made in the USA.

Valves made in the USA have "AAA" here in the casting.

Valve made in China.
