

# Simulated Datasets

## E2 (Summary)

The value ranges 0 to 1 (the closer to 1, the better)

# E5 (Summary)

The value ranges 0 to 1 (the closer to 1, the better)

# E10 (Summary)

The value ranges 0 to 1 (the closer to 1, the better)

## E2 (Details)

The value ranges 0 to 1 (the closer to 1, the better)

These may only work in certain cases  
but overall these do not work well.

Stable in both 1 vs 1  
and many vs many

# E5 (Details)

The value ranges 0 to 1 (the closer to 1, the better)

These may only work in certain cases  
but overall these do not work well.

Stable in both 1 vs 1  
and many vs many

# E10 (Details)

The value ranges 0 to 1 (the closer to 1, the better)

These may only work in certain cases  
but overall these do not work well.

Stable in both 1 vs 1  
and many vs many

# Real Datasets
