

# WHEEL PROS

## WHEEL PACKAGE

Purchase a set of Wheels and Tires from the Wheel Pros family of brands and you have the option to get the set delivered to you mounted and balanced. You can now install the wheels on your vehicle as soon as they arrive. That means avoiding an extra trip to the shop for installation. We take care of all mounting and shipping fees as well as lug nuts so you can enjoy the new set of wheels immediately upon delivery. TPMS sensors are not included in the package so make sure to include those with your wheel and tire purchase.

The process is simple: reach out to one of our off-road specialists with the specific tires and wheels, and they will set everything up. This is a call-in only special.

Due to the size and weight of these wheel and tire packages, they will be shipped via LTL freight trucks. You will be notified by the freight carrier and receive a delivery date and time. If a lift gate is required a charge may be administered at time of delivery. Due to the nature of wheel warranties, returns of mounted products will not be accepted. If an item is deemed to have been damaged in shipping, please notify us so a claim can be filed
