HOW TO USE

Overnight
Apply the mask at the end of your skincare routine and leave it on overnight. Remove the mask the next morning after a good night's sleep.

Daytime
After prepare the skin with toner or serum, apply the mask and leave it on for 2-3 hours or until it becomes transparent.

INGREDIENTS

Oligo Hyaluronic Acid
Penetrate deeper layers of skin providing deep hydration

Low-molecular Weight Collagen
Minimize pore size and increase skin elasticity

Niacinamide
Brighten the skin and improve lines and wrinkles

Galactomyces
Improve skin tone and texture

Low Molecular Weight HA (LMW-HA) Hyaluronic Acid

The smaller, more agile molecules.

LMW-HA can navigate deeper into the skin layers, hydrating and replenishing from within. It's like sending microscopic scouts to the lower fortresses of your skin.

There, they can stimulate the production of collagen, fortify skin barriers, and even help in reducing the appearance of wrinkles. Their deeper penetration offers lasting hydration, ensuring skin remains supple and youthful.

Skin Health on Hydrolyzed Collagen

Hydrolyzed collagen is broken down into smaller amino acid chains (peptides) that are easier to absorb. Studies show this type of collagen can be absorbed into the outermost layer of your skin (the epidermis) when applied to the skin. This limited absorption helps moisturize the skin and prevent water loss.

Collagen makes up around 70% to 75% of our skin. The largest organ in the body, the skin does the following:

As we age, collagen in the skin's inner layer is depleted, leading to dryness, loss of elasticity, and lines and wrinkles.5
HC increases the production of collagen, elastin, and hyaluronic acid in the skin.

Collagen

Type of ingredient: Protein.

Main benefits: Moisturizes the skin.

Who should use it: Everyone interested in increasing moisture and harnessing anti-aging powers can use collagen skincare.

How often can you use it: on a daily basis. When applied to the skin, collagen can be used morning, night, or both as it's not sun-sensitizing.

Works well with: Retinoids, Retinol, Peptides, Vitamin C.

Collagen is used with most ingredients and is best to apply first in your skin care routine, it penetrates rapidly.

Galactomyces ferment filtrate gained popularity when Korean skincare started getting its well-deserved global recognition. This special yeast can do miracles for the skin— namely in rejuvenating tired skin. Scientist concluded that the secret must lie in the yeast that the brewers' hands were in constant contact with during the sake fermentation process.

So Pitera - obtained by a fermentation process of a certain yeast belonging to the genus Galactomyces - was discovered as an anti-aging, skin-nourishing magic liquid. The clear, water-like liquid is loaded with good-for-the-skin stuff and is rich in vitamins, amino acids, minerals and organic acids.

Adenosine is a skin care ingredient that may help with anti-aging, soothing, and repairing the skin:

Anti-aging: Adenosine can help reduce the appearance of fine lines and improve skin elasticity.

Soothing: Adenosine can help soothe the skin and may help treat inflammatory skin conditions like eczema, seborrheic dermatitis, and psoriasis.

Repairing: Adenosine can help with wound healing and tissue repair.

Adenosine is a natural component of the body and is found in every cell of our bodies. It's a white, odorless, crystalline powder in its raw form. It's non-irritating and non-sensitizing to animal skin, and is considered safe for all skin types.

Adenosine is often added to eye serums and anti-aging creams, but can also be found in facial moisturizers, treatments, essences, masks, and daily use SPF. The Expert Panel for Cosmetic Ingredient Safety concluded that adenosine was safe in concentrations of up to 1% in leave on skin care products.

Occlude Your Treatment:

Apply any or all of the following products, Deep Wrinkle Martixyl 3000 Cream, Stop Aging Peptide Cream., Retinol+ Hyaluronic Acid Cream, or Niacinimide B-3 Cream Lipid Repair
