

Presenting a point of view with...

## TOWER OPTICAL BINOCULAR VIEWERS

### Features

#### Binocular

The prism design of our 10x42 binocular produces sharp, well-defined images by virtually eliminating internal light scattering. A focus knob allows manual adjustment to meet individual vision needs. UV protection is provided.

#### Weatherproof Components

Durable materials used in our viewers withstand the most severe weather conditions.

#### Safe, Accessible Design

Textured stationary step-ups help to provide sure footing and easy viewer access. The compact head design allows 360° turns with little risk of injury.

#### Recording Meter

This meter provides an effective way to verify viewer receipts by accurately tracking viewer usage.

#### Viewing Guide

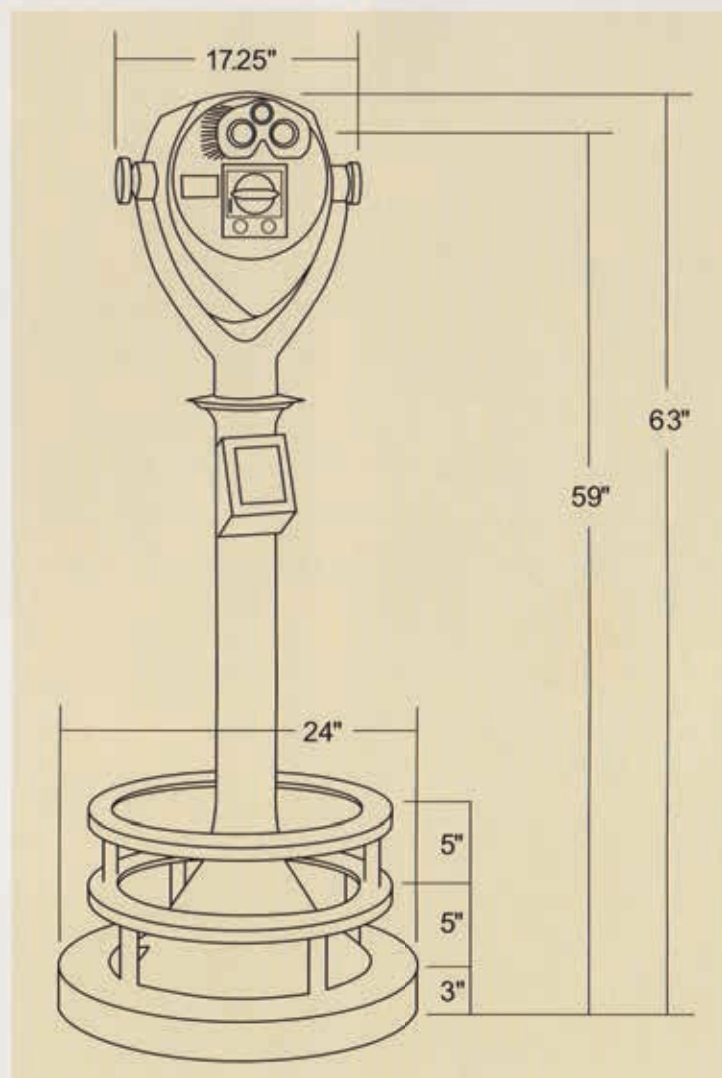

Interesting points of view are easily located and identified with the use of our unique direction disk and legend card.

#### Coin Mechanisms

Our manually-operated coin mechanisms eliminate the need for batteries or power source.

#### Coin Activation

Each viewer is factory preset for activation by either one or two quarters.

## An Industry Leader Since 1932

Since 1932, Tower Optical has been committed to the manufacture, distribution, service and maintenance of exceptional quality coin-operated viewers. As a pioneer in the industry, we set the standard for viewing equipment and service. The Company has been family-owned and managed throughout its years of operation.

Today, Tower Optical continues as an industry leader, producing attractive, reliable, easy-to-use viewers at our plant in Norwalk, CT. Our product is well recognized, used and enjoyed by millions of people throughout the United States and Canada.

## Installation Recommendations

Our coin-operated binocular viewer is typically installed on a commission basis at popular scenic areas throughout the United States and Canada. At some locations, the lease of our coin-operated or free-use units may be preferable. Please contact us to discuss your specific viewer needs.

## A Full Service Company

Tower Optical has a well established track record for providing quality products, service and maintenance. Our knowledgeable service team is responsible for the attractive appearance and efficient operation of each unit. The team, which averages over 25 years of experience in the viewing service business, provides technical support, replacement parts, and an annual onsite maintenance overhaul of each unit.
