PREFACE

THOSE engaged in classical teaching in this country have long felt the need of an Atlas which is good and at the same time inexpensive.

The defects of those hitherto obtainable are (1) failure to show, with the requisite prominence, the natural features of the countries, (2) lack of clearness, owing to the congestion of names in important sections of the maps, and the confusion created by the engraving of names across *hachured* mountains.

Both these defects the Editor of this Atlas has sought to avoid:—on the one hand, by adopting the system of *coloured contours* which he has already used in Mr. Murray's "Classical Hand Maps"; on the other, by having all the names necessary for the purposes of ordinary classical study printed in a peculiarly *clear and legible type*.

The unanimous approval with which the system of coloured contours was welcomed in the earlier publication has induced the Editor to use the same method in an Atlas which will be largely used for historical purposes. The configuration of a country must necessarily be the most important factor in its history, since it exercises an influence not merely on events but also on the character of its population. This fact has become much more widely recognised in recent years, and no expense has been spared to emphasise it in this publication.

It will be noticed that owing to the mountain ranges being no longer engraved it is possible to read any name with ease. Amongst other new features in the Atlas is a sheet containing fourteen plans of famous battlefields of Ancient History; these will be of interest both to teachers and students. A very full index contributes its share to the completeness of the volume.

Its small price will bring it within the reach not merely of students at the Universities, but also of boys at school.

MURRAY'S HANDY CLASSICAL MAPS.

A NEW SYSTEM.

Edited by G. B. GRUNDY, M.A., Litt.D.,
Fellow of Corpus Christi College, Oxford.

These Maps have now been recognized as the best and most convenient now in existence for the use of scholars and students at the universities and upper classes of schools.

The old method of engraving and hatching the mountain ranges has been supplemented by colouring the contours with flat brown and green tints, which is now acknowledged by teachers to be the best way of denoting the configuration of the land. A SEPARATE INDEX IS INCLUDED WITH EACH MAP.

GRAECIA	{	NORTHERN GREECE	{	Two sheets in one case, 3s. cloth ;
		SOUTH AND PELOPONNESUS		1s. 6d. net, paper. An entirely
				new Map; engraved for this series.
GALLIA	-	-	-	One sheet, 2s. cloth ; 1s. net, paper.
BRITANNIA	-	-	-	One sheet, 2s. cloth ; 1s. net, paper.
HISPANIA	-	-	-	One sheet, 2s. cloth ; 1s. net, paper.
ITALIA	{	NORTHERN ITALY	-	Two sheets in one case, 3s. cloth ;
		SOUTH AND SICILY	-	1s. 6d. net, paper.
GERMANIA, RHAETIA, ILLYRIA, MOESIA, ETC.				One sheet, 2s. cloth ; 1s. net, paper.
PALESTINE, SYRIA, AND PART OF MESOPOTAMIA, AND A MAP SHOWING ST. PAUL'S VOYAGES				Three Maps on one sheet, 2s. cloth ; 1s. net, paper.
THE ROMAN EMPIRE	-	-	-	Two Maps on one sheet, 2s. cloth ;
(at different epochs)				1s. net, paper.
THE EASTERN EMPIRES				Two Maps on one sheet, 2s. cloth ;
INCLUDING EGYPT				1s. net, paper.
*ASIA MINOR	-	-	-	One sheet, 2s. cloth ; 1s. net, paper.
MARE AEGAEUM	-	-	-	One sheet, 2s. cloth ; 1s. net, paper.
				[IN PROGRESS.]

These Maps are distinct from those in Murray's Small Classical Atlas, and are considerably larger.

By *cloth* is meant that the Map is mounted on linen and bound in a cloth case; by *paper* that the Maps are on paper in paper cover.

"These maps of Mr. Murray's are far better than anything which has yet been attempted in the direction of teaching the physical features of ancient geography, and they deserve all attention from students and schoolmasters."—*Athenaeum*.

"... are admirable, and will prove of great assistance to students of ancient history. We have before warmly praised the colour-scheme of the maps and we need only say of this one (Graecia) that it will help those who use it to realize the relations and circumstances of the Ancient Greek States far better than any other map with which we are acquainted."—*Educational Times*.

REVUE DES ÉTUDES ANCIENNES.—J. G. C. ANDERSON. *Asia Minor* (Murray's Handy Classical Maps), Londres, 1903.

"M. Anderson a eu l'excellente idée d'éditer, dans un format commode, une carte de la péninsule qu'il connaît si bien. Cette carte lui vaudra la reconnaissance de tous ceux qui s'intéressent à l'Antiquité. Autant M. Anderson a été attentif dans l'élaboration scientifique de sa carte, autant son éditeur en a soigné l'exécution d'un coup d'œil la gamme hypsométrique. Les divisions administratives sont claires et apparentes. Enfin, la gravure est nette, fine, lisible. Il y a richesse sans empatement. L'*Asia Minor* de la collection Murray est donc à tous égards une publication excellente, qu'on ne saurait trop recommander."—Prof. GEORGES RADET (Bordeaux).
