Work confidently with built-in security

26% faster security updates[2]

Some businesses think they'll never experience a cyberattack—even though research suggests ransomware payments reached over $1.1B in 2023.[1] But with ChromeOS, built-in security automatically keeps you, your employees, and your data safe. So you can work confidently knowing your business is protected, no matter its size.

ChromeOS has had **Zero** reported ransomware attacks. Ever.[*]

What does this mean?

Ransomware files are automatically blocked by ChromeOS, which means your data is protected even if someone tries to open an infected file. As of 2024, there has never been a reported attack.[*]

✓ **Automatically block the bad stuff** with built-in security that updates automatically every four weeks, keeping you safe against the latest viruses and threats. Gmail also blocks more than 99.9% of attacks before they reach inboxes, and Chrome browser only allows employees to use safe apps and extensions.

[*]As of 2024 there has been no evidence of any documented, successful virus attack or ransomware attack on ChromeOS. Data based on ChromeOS monitoring of various national and internal databases.

Leave IT to ChromeOS

Work confidently with the most secure OS out of the box—ChromeOS[3]

24% fewer security attacks [2]

✓ **Feel secure from the start** with ChromeOS laptops and tablets that check for issues every time they boot up. If a problem is detected, it's fixed automatically with no action required from you.

✓ **Remotely disable lost or stolen devices** with the click of a button via the familiar Google Admin console. You can even wipe all the data if you need to.

✓ **Use Managed Guest Sessions** to auto-wipe all data and settings every time a user signs out, so your employees and customers can safely share devices.

✓ **Get help when you need it** with ChromeOS device management. Whether you need assistance remotely restarting a device or choosing the extensions employees can use, Google support is here for you 24/7.

? **What about my existing tech?**
ChromeOS Flex allows you to install ChromeOS on your PCs or Macs so you know every device has the most up-to-date protection. Try it now at no cost.
