Engagement With State Policymakers

Our **members** request that we advocate for the value of business education to key stakeholders

Policymakers can be **gatekeepers** to positive societal impact. When we engage, we create opportunities for scale.

During the **budget** development process; we inform policymakers of the value of business education in society's advancement.

Looking Forward

Be the Voice of Business Education

- Amplify and advocate collective impact of business education
- Support the U.S Business Education Coalition initiatives led by AACSB
