

Arizona Flagstone

Experience Arizona's elegance and beauty in natural stone. Arizona Flagstone is recognized for its beauty expressing the colors of the Great Southwest. We carry a large selection of pre-weighted full pallets from private quarries for patios and walkways.

Large Single sheets or smaller Patio pieces are sold individually by the piece for your smaller installs. You choose from our open pallets and we will weigh them for you. Delivery is available for your convenience.

Sandstone is a sedimentary rock consisting of quartz cemented with silica, iron oxide or calcium carbonate. Natural stone is an amazing product of nature, not a manufactured item. The size, texture and colors of flagstone can vary from vendors and pallets.

Select Standard Colors

Yellow Buck – Horner Rust – Buff – Classic Oak - Roeder – Peach – Rose
Buckskin - Sedona Red - Buckskin Rose

| Grade - Type | Thickness | Coverage - Per Ton | Price - Lb. | Pallet Weight |
|------------------|----------------------|--------------------|-------------|------------------|
| Thin - Pallet | 1 ¼" - | 150 sq ft | .23 | 2500 – 3500 Lbs. |
| Regular - Pallet | 1 - 2" | 120 sq ft | .20 | 3000 – 4000 Lbs. |
| Patio - Pallet | 1 ½ - 3" | 100 sq ft | .17 | 4000 – 4500 Lbs. |
| Single Sheet | Thin or Regular | 4 – 12 sq ft | .23 | |
| Single Patio | 1 ½ - 3" | 2 – 4 sq ft varies | .17 | |
| Remnants | 6" x 6" various dia. | varies | .12 | |

Select Premium Colors

Quartzite – Chocolate - Chocolate Mint - Moss

| Grade - Type | Thickness | Coverage – Per Ton | Price Lb. | Pallet Weight |
|------------------|-----------------|--------------------|-----------|------------------|
| Thin - Pallet | 1 ¼" - | 150 sq ft | .30 | 2500 – 3500 Lbs. |
| Regular - Pallet | 1 - 2" | 120 sq ft | .29 | 3000 – 4000 Lbs. |
| Patio - Pallet | 1 ½ - 3" | 100 sq ft | .27 | 4000 – 4500 Lbs. |
| Single Sheet | Thin or Regular | 4 - 12 sq ft | .30 | |
| Single Patio | 1 ½ - 3" | 2 – 4 sq ft varies | .27 | |

Flagstone - Thickness - Coverage

Select Thin 1¼" Minus

Select Stone Thin 1¼" minus flagging is palletized vertically, this helps reduce breakage during shipment and makes it easier to select pieces during installation. The average thickness variance on a pallet is ¾" to 1¼" and an average pallet weighs about 3,500 pounds. The approximate coverage per ton is 140 - 160 sq. ft. and approximately 4 - 12 sq. ft. in size.

Select Regular 1" – 2"

Select Stone Regular 1" - 2" flagging is palletized vertically, this helps reduce breakage during shipment and makes it easier to select pieces during installation. The average thickness variance on a pallet is 1" to 1¾" and an average pallet weighs about 3,500 pounds. The approximate coverage per ton is 115 - 125 sq. ft. and approximately 4 - 12 sq. ft. in size.

Patio 1½" - 3"

Patio Stone is palletized horizontally. The average thickness on a pallet will vary depending on the color 1" to 3" and an average pallet weighs about 4,000 pounds. The coverage per ton can vary 70 - 140 sq. ft. depending on the average thickness of the pieces. Flagstone pieces range approximately 2 - 4 sq. ft. in size.

Q: How would I estimate the amount of Flagstone needed?

A: First decide on the thickness of the Flagstone you want to install. If you choose to Sand Set your flagstone it is suggested to use a thicker 1" – 2" stone for strength which has an average coverage of 120 sq. ft. per ton. Now multiply width x length the area you want to cover and divide that number by 120. This equals the quantity of tons needed.

If you choose to install your Flagstone in a Cement Base this will give more support and you may use 1¼" thick stone with coverage of 150 sq. ft. per ton. Now multiply width x length the area you want to cover and divide that number by 150. This equals the quantity of tons needed.

Example: Multiply 15 ft. x 15 ft. = 225 sq. ft. Divide 225 by 120 = Equals 1.88 tons of Select Regular flagstone needed.

Q: What is the cost per square foot of Flagstone?

A: The cost per square is basically the same on either Select Thin or Select Regular Flagstone in Standard colors. However, additional cost of the installation process can vary on the foundation you use to support the stone. At the current price, a full pallet of standard color is \$2.67 per square foot picked up at Acme.

Q: What is the quantity of Flagstone that is contained on one pallet and how is it priced?

A: There is usually 1.5 tons on the stand-up pallet, and about 2 tons on a patio pallet. Both are sold by the pound.

Q: What is the difference between Patio Flagstone and Select Flagstone?

A: Patio Flagstone are smaller step stone sized pieces 2 to 4 square feet in size and vary in thickness, and Select Flagstone are larger path sized sheets 4 to 12 square feet.

Q: What is the difference between Sandstone and Flagstone?

A: Sandstone (sometimes known as arenite) is a clastic sedimentary rock composed mainly of sand-sized minerals or rock grains. Flagstone is just a generic word for materials that are laid flat for flagging. Flagging Stone is any type of flat stone that will typically be used for a walkway, patio or path. These stones can range anywhere from 1" to 3" in thickness.
