Reduce surface temperature
by 4 to 5 degree Celsius

01 SRI (Solar Reflective Index) measure a roof's ability to reject solar heat (reflectance) and the ability to emit heat out (emitances).

02 Eco white reflects and emit the sun heat instead of absorbing it.

03 Eco white is one that reflects the sun's heat and emits absorbed radiation back in to the atmosphere. This will keep the inside building cooler.

04 The U.S green building councils LEED 2.2 user SRI as a way to evaluate a eco white. To get LEED accreditation, building should use a roof with minimum SRI value of 78.

05 Eco white tile on the roof of a building can reduce inside building temperature by low degree centigrade.
