Paddington

Children's Centre

Altro proves to be the perfect partner for early childhood.

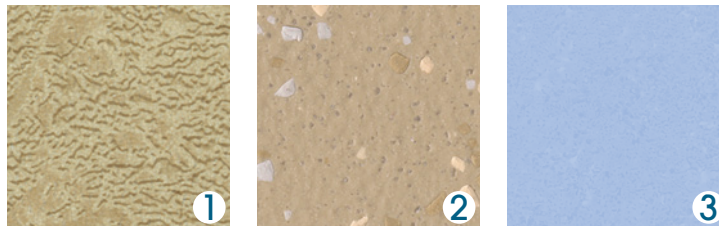

Paddington, Australia

Paddington Children's Centre has established themselves as a pillar in early child development through their commitment to providing education and meaningful learning experiences to today's youth. When the center began looking for floor and wall finishes, Altro were more than happy to help.

Altro provided a thorough overview of their product portfolio as well as sample options and onsite visits to ensure the right options were chosen to meet the needs of the center. The installer used Altro Whiterock over the old tiles, resulting in a professional and neat appearance, while saving time in renovations.

The playrooms were transformed with Altro Wood. This flooring is easy to clean and provides a homey look for the historic listed building, creating a welcoming appearance for children and parents.

Altro Whiterock wall panels and Altro Stronghold 30 were used in the kitchen. "We love our new kitchen. The surface is easy to wipe clean and is a lot more hygienic than the old tiles with grout" stated Paddington representative Natalie Cordukes. Altro Whiterock Chameleon Whiteboard was used as a feature wall, adding not only an aesthetic element to the space but also serving as a whiteboard to record notes and weekly menus that can be easily wiped off.
