### IMPACT

Here are some stories from the ME on the impact the SOTS Training is having.

- "We all experienced a spiritual growth within ourselves of a proportion we never imagined, we ate and ate and drunk and drunk and drunk that spiritual food it was like sitting at Jesus' feet we didn't want to sleep, eat or do anything, we cannot wait to share this revolutionary teaching from Pastor Colin with our people".
- "For the first time we understood clearly and we are able to relate to the rule and the Kingdom of God, the difficult concepts of the sermon on the mount and the Lord's prayer, at this conference pastor Colin gave us the tools and empowered us by training and imparting an anointing enabling us to reach out fearlessly to the most radicals fellow Muslims in our towns and cities."
- "We the converts have no spiritual home, as no church would allow us even to attend as visitors, fearing reprisals from the local Muslim community, yet Pastor Colin comes all the way from London risking his life being with us in his Allah territory, to ground us in the word of God, enabling us to witness effectively to our people."

- "No amount of thanks would ever express our love and gratitude for pastor Colin. To us he is an apostle. Only with two visits the Muslims feel unsafe and insecure, with some more visits and learning from Dr Colin, this region will not be the same ever again."
- "I didn't realise the healing power of what I was taught until, having been equipped, I began to reach out with what I had learnt from pastor Colin and see the life that it imparts."
