ROG SAGA IS THE NAME

Meet Our G.A.M.E.R.s

ROG LOGO WALLPAPERS

Visual art is key for ROG. West and East, retro and futuristic, real and virtual, human and mechanic, comic and manga, pixel art, concept art, graffiti, and even motion graphics – there are infinite possible links between ROG and visual art. We are dedicated to constantly creating new ROG logo wallpapers.

Download them as soon as they're available by scanning the QR codes on the bottom right corner, and stay tuned for even more upcoming creations!

<https://rog.gg/2023ROGWallpaper>

ROG SAGA is an extension of ROG's core philosophy, a fictional universe that reflects our brand voice. It's packed with artwork, animations, origin stories, and lore from an ever-expanding universe. Discover how the ROG SAGA is built: (QR code)

Say Hello to #TeamROG

DEDICATED TO EVERY PLAYER, EVERYWHERE

ROG is dedicated to bringing better gaming experiences to players of all stripes. That means that not only do we have a wide variety of gaming laptops for every kind of gamer, but also for creators who have a passion for gaming.

Every member of Team ROG was meticulously recruited, and each brings their own distinct personality, passion, and skills to showcase just how capable our products are, regardless of how you choose to use them.

Official Weapon of Pro Gamers

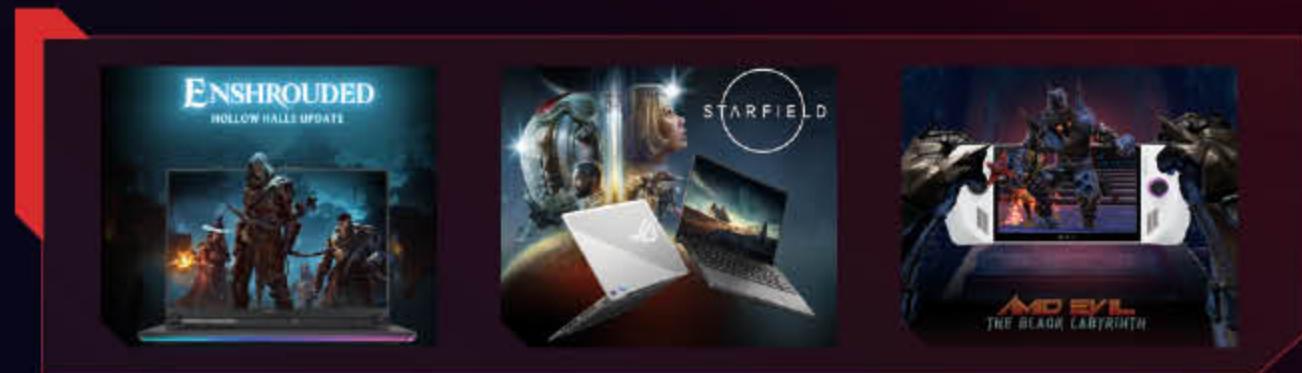

Call of Duty

The Miami Heretics Call of Duty team is here to continue the legacy that began in 2016 with Team Heretics. Now ready to leave their mark on the Call of Duty League, a history of passion and Spanish pride fuel this roster. The players work hard and strive to push the Heretics name to the top, and to represent the Spanish-speaking community in the best way possible. The team wants nothing more than to win and to make their fans proud. #TakeMyVamos!

GAME-CHANGING PARTNERSHIPS

We work closely with leading game studios to ensure that our products are meticulously optimized for the latest titles.

Thanks to these strong partnerships, we can truly deliver the winning edge for your gaming experience.

NEXT-LEVEL PERFORMANCE

Intel® Core™ Processors
HX-Series (14th gen)

Power through any game or project with up to Intel® Core™ i9 Processor 14900HX, featuring up to a 65W TDP and a hybrid architecture built from the ground up for Windows 11 Pro. With up to 8 Performance-cores and 16 Efficient-cores and Intel's latest Application Optimization technology increasing frames rates to up to 40%* in supported titles, AAA gaming is flawless and streaming is effortless.

*The performance is tested in a laboratory, actual FPS performance may vary by device and configuration.

Intel® AI Boost

NEW AI EXPERIENCES

Intel® Core™ Ultra Processors

Accelerate your workflow with up to an Intel® Core™ Ultra 9 processor 185H. Not only a blazing fast gaming CPU in traditional titles, this processor features built-in AI accelerators to take advantage of the latest technologies. Dedicated NPU cores are ideal for sustained AI workloads and allow that AI to reduce power consumption for longer battery life.

AMD RYZEN™ 8000 SERIES PROCESSORS

With 8 cores and 16 threads, the AMD Ryzen™ 9 8945HS processor is ready to power all of your games and creative applications with ease. Built on the Zen 4 architecture, this cutting-edge chip is the perfect blend of performance and power efficiency that make it ideal for an ultra-portable laptop like the Zephyrus G14.

Up to
12 CORES

AMD Ryzen AI 300 Series processors are the next step in modern computing, delivering next-generation improvements in performance, AI experiences, and graphics. With up to 12 cores built on the groundbreaking new AMD “Zen 5” architecture – a cutting-edge 4nm technology node now on mobile devices for the first time – and accompanied by AMD RDNA™ 3.5 graphics and 50% more on-chip memory than previous generation products, these new processors deliver best-in-class CPU, GPU and NPU performance with exceptional responsiveness and swift multitasking across productivity, entertainment, and content creation.

AMD Ryzen AI

AUTOMATIC FRAMING
Automatically pans and zooms the video to focus on you as you move.

EYE CONTACT CORRECTION
An effect to compensate for eyes looking away from the center of the camera.

ADVANCED BACKGROUND EFFECTS
New, high quality background blur enabled by AI.

GEFORCE
RTX

AI FOR GAMING AI ENHANCED, RTX ON

Level up your gaming experience with RTX. An AI-powered boost gives you maximum performance in over 300 games and apps thanks to DLSS. Plus, enjoy portable, powerful laptops with AI-powered Max-Q technologies that optimize your laptop's performance, power, acoustics, and more for peak efficiency.

NVIDIA® GEFORCE RTX™ 40 SERIES LAPTOP GPU

ROG's entire 2024 lineup also come equipped NVIDIA® GeForce RTX™ 40 Series Laptop GPUs, with next-level cooling that unleashes the full potential of this incredible silicon. Built-in AI features like DLSS Super Resolution, Frame Generation, and Ray Reconstruction seamlessly level up the graphics quality of your games.

NVIDIA ADVANCED OPTIMUS

With NVIDIA® Advanced Optimus, the laptop can automatically route frames from the discrete GPU directly to the display using a MUX switch, bypassing the integrated GPU. This results in up to 10% better performance compared to machines without a MUX Switch, making sure you get the absolute best gaming experience—all without needing to touch a single button. This automatic switching also preserves your machine's battery life, as it can dynamically transition between the high-power discrete GPU and the lower power integrated GPU. No matter what you're doing, your machine will switch to the most optimized mode without you having to lift a finger.

UNREAL PERFORMANCE

Because the Strix lineup is built to dominate the leaderboards of every game you play, we equip them with the latest NVIDIA® GeForce RTX™ 40 Series graphics chips. This new silicon offers up to a 45.9% performance jump compared to the previous flagship 2022 Strix SCAR at the same max TGP. Paired with an ROG Nebula Display, every game will be vibrant and buttery smooth.

Benchmark score numbers (higher is better)

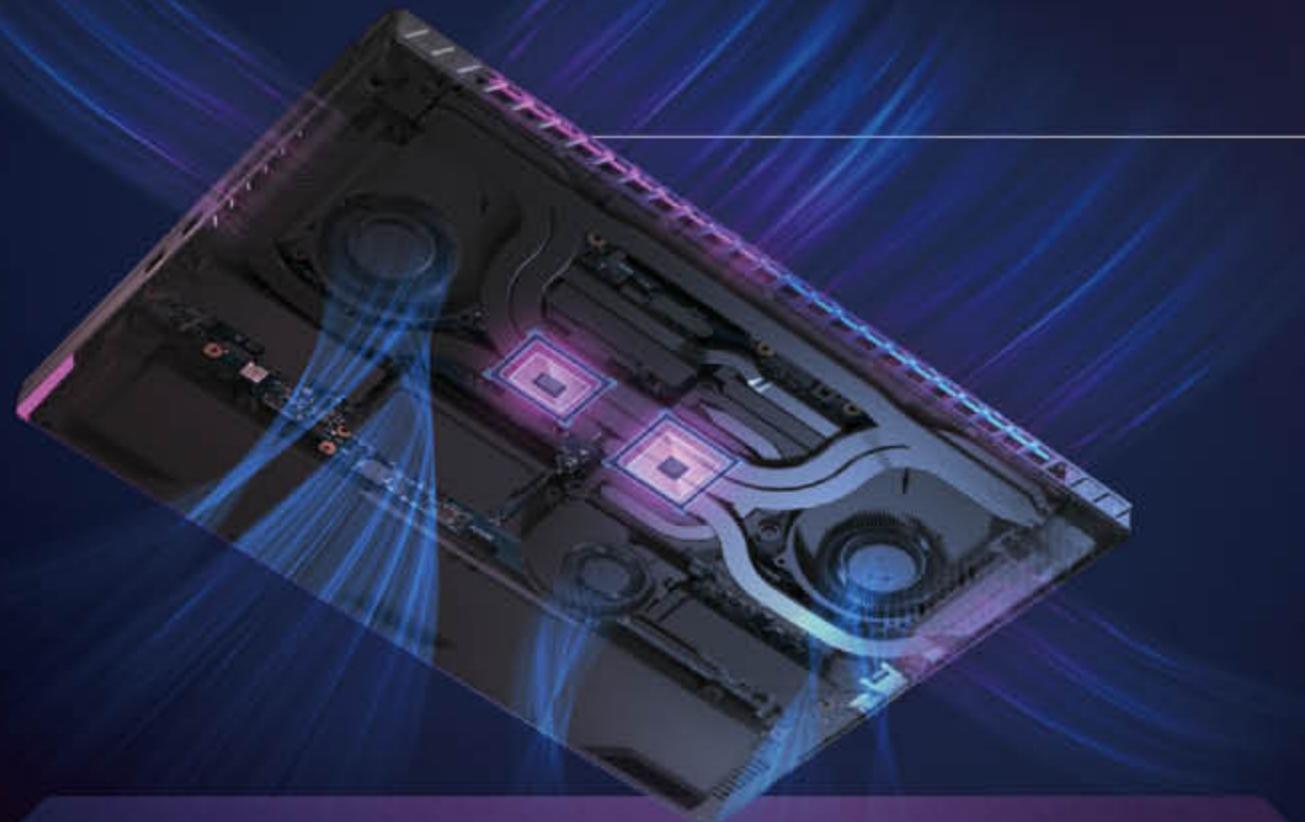

Performance is tested in a laboratory. Actual speed may vary by device.

Tested on an ROG Strix SCAR 18 G834JY (RTX 4090), Strix SCAR 16 G634JZ (RTX 4080), Strix SCAR 17 G733CX (RTX 3080Ti), Strix SCAR 15 G533S (RTX 3080), Strix G18 G814JI (RTX 4070), Strix SCAR 17 G739QR (RTX 3070), Strix G16 G614JV (RTX 4060) and a Strix G17 G713RM (RTX 3060).

AI FOR CREATING IMAGINATION MADE REAL

Supercharge your content creation with over 100 AI-enabled and RTX-accelerated creative apps—including the Adobe Creative Cloud suite, Blender, Blackmagic DaVinci Resolve, OBS Studio, and more. Transform your workflows with the NVIDIA Studio suite of AI tools, and fast-track your creativity with next-gen tech including DLSS and NVIDIA OptiX™.

ROG INTELLIGENT COOLING™

COOL. QUIET. POWERFUL.

ROG Intelligent Cooling is the culmination of more than a decade of research and design to curate the perfect combination of cooling technologies for each individual machine. From liquid metal thermal compound, advanced heatpipes, vapor chambers, high density copper fin heatsinks, or tri-fan designs, ROG Intelligent Cooling has the tools to keep laptops of every form factor running cool and quiet during intense gaming sessions. Whether you have an ultra-thin Flow device, an ultra-powerful Strix SCAR laptop, or the incredibly portable ROG Ally handheld, our engineers have custom-tailored cooling solutions to keep you gaming at your very best.

LIQUID METAL CONDUCTONAUT EXTREME

MINI LED TECHNOLOGY

New for 2022, select ROG models now feature Thermal Grizzly's cutting-edge Conductonaut Extreme, which improves liquid metal's heat transfer even further. Compared to traditional thermal pastes, this indium- and gallium-based compound offers 17X higher conductivity and CPU/GPU temperatures up to 15 degrees cooler. Used exclusively by ROG, this material offers the highest thermal transfer available on a laptop.

Up to
15°C Cooler
CPU/GPU Temperature

Up to
17X Better
Thermal Conductivity

FULL-WIDTH HEATSINK

DISSIPATES MORE HEAT

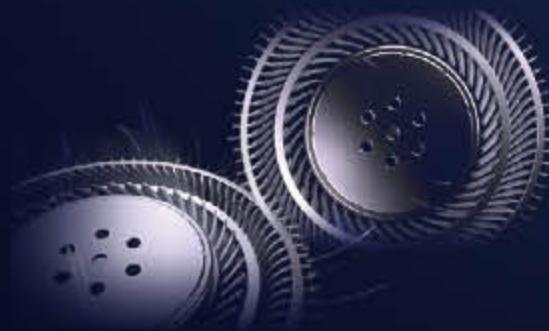

The X16 features 330 heatsink fins, with each stack lined with ultra-thin copper fins as slim as 0.1mm. This allows for higher density and lower air resistance, with a total of 110,902mm² of surface area. This all-copper construction continues to the full-width heatsink, which is double the size of a normal heatsink and covers the entire rear of the machine.

2ND GEN ARC FLOW FAN

MOVE MORE AIR WITH LESS NOISE

Inspired by airplane winglets, our 2nd gen Arc Flow fans add a small bend at the tip of each fin, reducing energy waste, and the lower turbulence produces less fan noise. We also took inspiration from multiple layers of blades inside airplane turbines. Our 84-blade Arc Flow fan already produces strong airflow, but we've added a second layer inside with 42 separate inner blades, allowing more air to be sucked through.

TRI-FAN TECHNOLOGY

BOOSTS UP COOLING EFFICIENCY

At the heart of every great laptop is a great cooling solution. Our new Tri-Fan Technology directs air though precisely calculated cutouts in the chassis, sending airflow directly towards internal components to keep them cool in all conditions. A third auxiliary fan also helps to send additional heat from the GPU directly to the heatsinks, keeping the machine cool during long video renders or gaming sessions.

FULL-SURROUND VENTS

MAXIMIZE AIRFLOW

Hot air needs somewhere to go, so we redesigned the Strix 16/18 series' exhaust vents to give it the best flow possible. In addition to making the entire rear of the machine an exhaust vent, the Strix 16/18 retains its side vents, giving it ample opportunity to move hot air out of the system. The chassis itself was also moved even closer to the heatsinks, giving hot air a straight-line path out of the machine and avoid any recirculation.

ANTI-DUST FILTER

KEEPS DUST AND FIBER OUT

First introduced on the Zephyrus G14, the ROG Flow X16 features a dust filter on its intake vents. Dust and fibers can collect inside the machine, trapping heat and causing degraded performance over time. A filter helps keep dust out, allowing the CPU and GPU to breathe easier for years of smooth and stable operation.

TRI-FAN TECHNOLOGY

BOOSTS UP COOLING EFFICIENCY

At the heart of every great laptop is a great cooling solution. Our new Tri-Fan Technology directs air though precisely calculated cutouts in the chassis, sending airflow directly towards internal components to keep them cool in all conditions. A third auxiliary fan also helps to send additional heat from the GPU directly to the heatsinks, keeping the machine cool during long video renders or gaming sessions.

0dB AMBIENT COOLING

ZERO DISTRACTION

Enjoy truly silent cooling under light workloads with 0dB Technology. In the Silent operating mode, the cooling system switches off all fans during everyday tasks to dissipate heat passively. This lets you concentrate on your work and immerse yourself in movies with less distraction. If CPU or GPU temperatures increase, the fans automatically switch on again.

7 HEATPIPES

AAS PLUS 2.0

INCREASE AIR INTAKE

Active Aerodynamic System Plus (AAS Plus) pushes the AAS concept further on select models, opening a massive 28.5mm air intake behind the tilted secondary display that increases airflow by up to 30%. Instead of drawing in air from below the laptop, where components can warm incoming air, this top-facing vent draws cooler air from above. The larger space also helps keep noise levels below 43dB in performance mode, enabling a quieter gaming experience.

Wide 7 heatpipes	Up to 25%	Up to 252 fins
On CPU/GPU/CRM/VRAM	Thermal coverage	Quad heatsinks

0.1MM ULTRA THIN FINS

INCREASE HEAT DISSIPATION / LOWER AIR RESISTANCE

Thermal energy is dissipated by four heatsinks, each lined with ultrathin copper fins as slim as 0.1mm. These fins are half the size of typical solutions, allowing for higher density for heat dissipation and lower air resistance to allow for smoother flow.

Wide 13%	Up to 7%	Up to 69%
Better heat dissipation	Less air resistance	Faster thermal conductivity

ROG NEBULA

FAST. BRIGHT. VIVID

N ROG NEBULA HDR

Mini LED

MINI LED TECHNOLOGY

Mini LEDs are much smaller than typical LEDs, with diodes smaller than 0.2mm. Display engineers can pack these diodes in much more densely than on typical displays, allowing for 2000+ separate zones of Mini LEDs that can dim themselves individually. This creates darker blacks and brighter highlights, for a truly stunning image.

N ROG NEBULA HDR

ROG NEBULA HDR ENGINE

The Nebula HDR engine is a purpose-built local dimming algorithm that produces stunning highlights with unparalleled depth. Trained on an instruction set of more than 150 videos and over 2000 still photos, the algorithm can dynamically adjust the HDR lighting needed to minimize blooming around individual dimming zones by 25%.

N ROG NEBULA DISPLAY

OLED TECHNOLOGY

For the first time on an ROG laptop, enjoy the ultra-fast response times and incredible contrast ratios that are only possible with OLED technology. OLED displays have millions of light-emitting diodes (LED), and unlike traditional display technologies, they can turn each pixel on and off individually. Because of this, OLED panels can achieve pixel-perfect black levels, resulting in extreme contrast ratios like 1,000,000:1. This true black allows for images that appear bright and punchy without feeling washed out, ensuring you never miss an enemy hiding in the shadows. HDR has never looked this good.

IMMERSE YOURSELF IN TOP-TIER GAMING VISUALS

Every Nebula display must meet a strict set of requirements that guarantee fast, bright, vivid images. If an ROG laptop carries the Nebula name, you know it's one of the world's ultimate gaming displays.

Audio

DUAL FORCE-CANCELING WOOFERS

Dual force-canceling offsets speaker vibration to produce clearer, more natural sound and add a half-octave lower range to the bass.

**Up to
3dB
Less Noise**

By combining one upward-facing and one downward-facing speaker, sound vibrations can be offset so that the speaker can stably generate lower frequencies in a smaller space.

HIGH-RESOLUTION AUDIO

High-Resolution Audio refers to a collection of digital processes and formats that allow the encoding and playback of music using higher sampling rates than the standards used in CDs.

Microphone

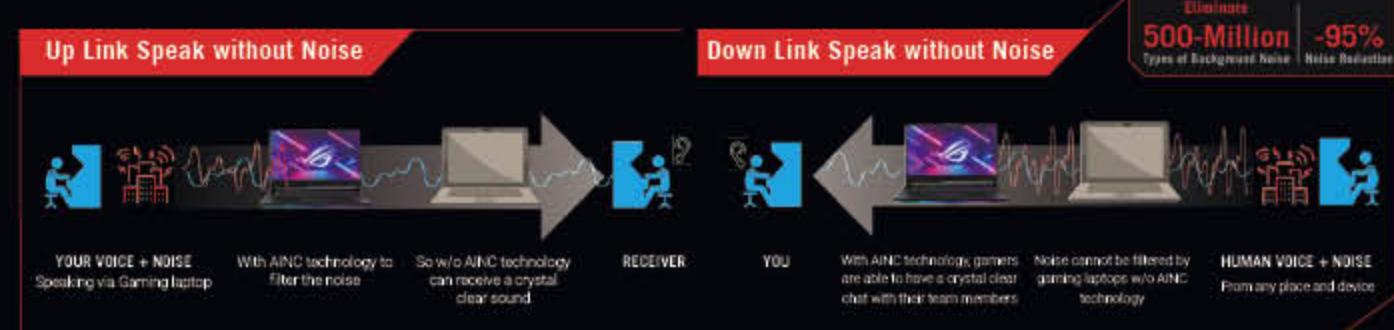

3D MIC ARRAY

Three microphones are positioned to catch sound from multiple directions. This setup lets you record sound in three modes optimized for different scenarios, from solo voice recording to capturing a room full of voices in a conference call.

TWO-WAY AI NOISE CANCELLATION

Our noise-cancelling technology removes unwanted sound from upstream and downstream feeds, clarifying audio from both your mic and your teammates' mics. Settings can be customized on a per-app basis to filter specific apps like voice chat without touching game audio. Since our technology runs on the CPU, your GPU is freed up to maximize frame rates.

Microphone

SILENT KEYBOARD & TOUCHPAD

To ensure a quiet environment for you and those around you, the silent keyboard and touchpad will help reduce noise levels.

<30 dB

Noise on keyboard

-20%

Noise reduction on touchpad

Aura

3DNR CAMERA

By analyzing each frame the 3DNR technology in our integrated webcams help improve the overall camera image quality and reduce noise.

Armoury Crate & Aura Sync

UNIFIED SYSTEM CONTROL WITH ARMOURY CRATE

The ROG Armoury Crate software integrates software, hardware, and lighting controls, giving you centralized access. Its intuitive interface facilitates effortless system updates and enables management of up to four distinct gaming profiles. These profiles automatically apply your preferred settings upon launching your favorite titles, ensuring seamless gaming experiences tailored to your preferences.

UNLIMITED RGB CREATIVITY WITH AURA SYNC

Unleash your creativity with ASUS Aura Sync, which enables you to synchronize all the RGB lighting on your Aura Sync compatible ASUS products. With the help of Aura Creator in Armoury Crate, you can directly customize all the colors and lighting effects to make your gaming setup uniquely yours.

ROG ALLY X

LEVEL UP

#playALLYourgames

The ROG Ally X is the ultimate Windows gaming handheld, with double the battery capacity and storage of the original Ally, plus more RAM and improved controls. Featuring a new version of Armoury Crate SE with an even more customizable game library, the ROG Ally X was built with community feedback to be your perfect handheld. Play all your games, anywhere you go.

Multiple libraries, one device

The ROG Ally is fully compatible with Steam, Xbox Game Pass, Epic, GOG, and more, ensuring that no matter where you buy your games, you can play them on the Ally. With the power of cloud saves and robust online game libraries, you can spend a few spare minutes catching up on your epic adventures when away from home, then jump right back into the action where you left off with your main battlestation.

Born for Handheld Gaming

Powered by the AMD Ryzen™ Extreme processor and up to 24GB of LPDDR5X RAM, the ROG Ally X now features up to 1TB of M.2 2280 storage. Play more games for faster than ever. The ROG Ally X is built to play all your favorite games while far away from a power outlet. With that in mind, we upgraded the battery to a massive 80Wh capacity, extending it to a longer battery life. Game on.

ASUS TUF GAMING A14

PORTABLE POWER, MAXIMUM IMPACT.

Lightweight All-Around Powerhouse

Up to an AMD Ryzen™ AI 9 HX 370 processor

Up to an NVIDIA® GeForce RTX 4060 Laptop GPU

1.46kg light and 1.69cm thin

100W Type-C Charging

100W 3ms response time

Refined cooling with 99-blade fans

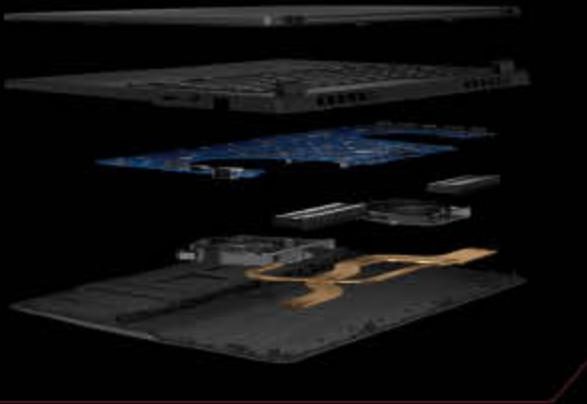

Designed to Move

At only 1.46kg, the TUF Gaming A14 is ready to travel anywhere – and built-in WiFi 6E will keep you connected at lightning-fast speeds wherever you go. Its 73Wh battery provides plenty of juice even without an outlet nearby, and it can fast charge to 50% in only 30 minutes when you need a quick top-off.

1.46kg 1.69cm

Light thin

Stay Frosty

Powerful components require powerful cooling, and the TUF Gaming A14 is capable of 110W in Turbo mode. So we equipped the machine with a whole suite of technology to keep it running at peak performance. The keyboard has been redesigned to increase airflow and reduce surface temperatures, and when paired with ultra-thin heatink fins and 99-blade fans, the A14 will be running at peak performance for years to come.

110W
in Turbo Mode

Expandable Storage

Games and apps load faster than ever on the nimble NVM Express® (NVMe®) SSD. Snappier load times for all your programs means you can spend less time waiting and more time gaming. Take your games on the go with up to 4TB of PCIe® storage, with easy access to both drives for upgrading if your library expands in the future.

*Stock configuration is 1x PCIe Gen 4x4 SSD, up to 2TB.

BRAND NEW DESIGN

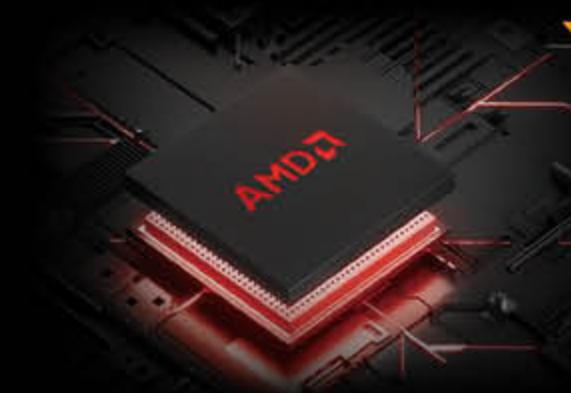

The two color options each have a different logo location, with the Jaeger Gray edition featuring a large laser-sculpted design, and the Mecha Gray edition showing off an embossed logo on the lid. The four-way indicators can be seen even while the clamshell is closed, and the touchpad features a mech-inspired TUF logo in the corner.

THE WORLD AT YOUR FINGERTIPS

Arm yourself with a desktop-style keyboard optimized for gaming. Uniform Mini LED RGB backlighting lets you brilliantly express your own unique style, while highlighted WASD accents give you a visual shortcut to key movement commands, with select models offering a new smoked look. Overstroke technology triggers higher in each keystroke for faster responsiveness and effortless control. In true TUF form, each key is durable enough to withstand over 20 million presses for superb long-term reliability and precision.

READY FOR ANYTHING

Jump right into the action with the TUF Gaming A15. Running Windows 11 out of the box with up to an AMD Ryzen™ 9 8945H and up to 32GB of blisteringly fast 5600MHz DDR5 RAM, your streaming and multitasking are handled with ease. Leverage the full gaming performance of up to an NVIDIA® GeForce RTX™ 4070 Laptop GPU with a dedicated MUX Switch. When your game library gets full, an empty M.2 NVMe SSD slot makes upgrading storage capacity a breeze.

Every gaming laptop needs powerful graphics, so the TUF Gaming A16 comes equipped with up to an NVIDIA® GeForce RTX™ 4070 Laptop GPU. With a 140W max TGP with Dynamic Boost, equipped with AI-accelerated technologies like DLSS 3.5 with Frame Generation and Ray Reconstruction, the A16 can easily power the latest and most graphically intense games. The TUF Gaming A16 also supports NVIDIA® Advanced Optimus for maximum performance in games, and better battery life in lighter workloads.

140W
Max TGP

Never Miss A Moment

Keep up with the pros thanks to a 2.5K 165Hz display. G-SYNC synchronizes the display's refresh rate with the GPU's output to reduce lag, minimize stuttering, and eliminate visual tearing for ultra-smooth and lifelike gameplay. The up to 2.5K panel hits 100% of the sRGB color space, reproducing colors exactly as the creator intended. On a 16-inch laptop chassis, this resolution packs an incredible pixel density, ensuring your videos and games are as immersive as possible without sacrificing portability.

UP TO 2.5K 165HZ DISPLAY

ASUS TUF Gaming A16 (FA608)

Model	ASUS TUF Gaming A16 (FA608)
CPU	• AMD Ryzen™ 9 HX 370 (12 cores, 24 threads, and a built-in NPU capable of 50 TOPS of AI performance)

ROG G22CH

Condensed size. Concentrated power.

Power your Windows 11 Pro gaming without a large footprint. Introducing the ROG G22CH, a small form factor chassis housing top-tier components. Featuring up to a 14th Gen Intel® Core™ i9-14900KF processor and up to an NVIDIA® GeForce RTX™ 4070S graphics card, the G22CH keeps its cool with a custom liquid cooling solution for the processor, packing incredible performance into a 10L chassis.

DO MORE WITH LESS

At ROG, we're never afraid to push the boundaries of PC design or performance, and the G22 is the latest example of our pursuit of excellence. The G22 is nearly 40% smaller by volume than our previous small form factor PC the G21 Huracan, despite packing much more powerful hardware. Innovation never rests, and neither does ROG.

323x115x286mm

LOW VOLUME. HIGH EFFICIENCY

Cooling is key in any small form factor case, so the ROG G22CH has two optimized options. You can either opt for a more traditional air-cooled solution, or choose a custom liquid cooler for the CPU. Both variants keep the processor running smoothly, without excessive fan noise, despite the 10L.

Liquid or **Air**
Cooling Cooling

EASY ACCESS DESIGN

Proper maintenance is key to the smooth running of any equipment, so we made sure to give the G22CH a tool-free design. When you need to get in and dust out the chassis, or customize and upgrade the components, you're able to get into the internals quickly without turning a single screw.

Model: ROG G22CH

Processor	+ Intel® Core™ i9-14900KF Processor 3.0GHz (30M Cache, up to 5.6GHz, 24 cores)

ROG STRIX G16

Storm the Battlefield.

Dominate the battlefield with this Windows 11 Pro gaming monster. Powered by up to an Intel® Core™ i7-14700KF processor and up to an NVIDIA® GeForce RTX™ 4080 GPU, the Strix G16 delivers consistently high framerates in all of the latest games. With a new airflow focused front panel that allows for either air cooling or liquid cooling on the CPU with familiar ROG Strix styling, the Strix G16 is a welcome addition to any gaming setup.

Up to Intel® Core™

Strix Styling

The ROG Strix G16CH is designed for high performance gameplay, and looks good doing it. With a mesh front panel, a double D-ring handle, headset holder, and subtle RGB lighting accents, the G16CH is a perfect blend of form and function.

Double D-ring handle Headset Holder

Airflow Optimized

With high-powered components, excellent cooling is a must to ensure your hardware is running as efficiently as possible. Whether you opt for an air or liquid cooling solution, the ROG Strix G16CH delivers cool and quiet operation during even the most intense gaming sessions.

Liquid Cooling or Air Cooling

Light 'em up

Light up your life with Aura Sync. ROG's RGB control software, Aura Sync, allows you to tweak the front panel, interior, and peripheral lighting on your machine. Keep your mouse, keyboard, monitor, and headphones all in perfect harmony with Armoury Crate.

ROG Strix G16

ROG STRIX G13

Join our battle, chill the competition.

Take your Windows 11 Pro gaming to the next level thanks to the all-new ROG Strix G13. With a redesigned airflow focused chassis that retains the same signature ROG Strix styling, and upgraded internals, the Strix G13 can game with confidence in all the latest titles. Featuring up to an Intel® Core™ i7-14700F processor and up to an NVIDIA® GeForce RTX™ 4070 graphics card, this gaming desktop is ready to power you to victory.

Choose Your Side

ROG design elements adorn the Strix G13CH, melding seamlessly with the aerodynamic exterior styling. Inspired by futuristic robots that might inhabit the ROG SAGA universe, the machine has an armored and mechanical presence. Make the ROG Strix G13CH uniquely yours with two side panel options. Opt for either a sleek metal side panel or choose the transparent side panel to sneak a peek at the inside of your machine.

Airflow Focused

The ROG Strix G13CH has been redesigned for 2023, with additional venting on the front and top panels. With distinct zones for the CPU and GPU, this airflow-optimized chassis lets the powerful components breathe easily, letting them boost higher and longer. Less fan noise, less heat, more gaming.

Perfect Harmony

Light up your life with Aura Sync. ROG's RGB control interface, Aura Sync, allows you to tweak the front panel, interior, and peripheral lighting on your machine. Keep your mouse, keyboard, monitor, and headphones all in perfect harmony with Armoury Crate.
