

benefits of mineral & chemical sunscreens

Select the type of sunscreen that works best for you. Both offer great sun protection and benefits, so it all comes down to preference.

	MINERAL SUNSCREEN	CHEMICAL SUNSCREEN
Active ingredients	Minerals such as titanium dioxide or zinc oxide	UV filters such as avobenzone, homosalate or octisalate
Works by...	Blocking (forms protective barrier on skin), then reflecting UV rays away	Absorbing (by converting UV rays into non-damaging heat), then releasing it from skin
Texture	While some other brands may be thicker/heavier, ours is lightweight	Lightweight—great to layer over other skin care products and for daily use
Waiting time	Immediate protection upon application	Apply 30 minutes prior to sun exposure
Re-application	Yes	Yes
White cast	While some other brands may leave a white cast, ours does not!	No white cast
