BDRSuite v5.5.0 – Release Notes

BDRSuite is a comprehensive backup and disaster recovery software to protect data across Data Center/Private Cloud (VMware, Hyper-V, Windows, Linux, Applications & Databases), Public Cloud (AWS), SaaS Applications (Microsoft 365, Google Workspace), and Endpoints (Windows, Linux, Mac).

With BDRSuite, you can backup and recover all your workloads in diverse environments from a centralized, easy-to-use web console.

Download BDRSuite's latest version 5.5.0 and start protecting your data! If you are an existing BDRSuite customer, refer to the Software Update Guide to upgrade your BDRSuite Servers, Clients & Agents.

What's New in BDRSuite v5.5.0

New Features

Support for VMware vSphere v8.x

BDRSuite now supports Backup and Replication for virtual machines running on the latest version VMware vSphere v8.x.

Google Cloud as Backup Repository

Google Cloud Storage (Object Storage) is now supported in BDRSuite to store backup data, backup copy and offsite copy data. BDRSuite already supports other cloud storages such Amazon S3, Azure Blog, S3 Compatible storages such as Wasabi, MinIO, etc.

ConnectWise Integration

BDRSuite now supports ConnectWise Integration. This feature allows you to create service tickets automatically in ConnectWise Manage for BDRSuite activities. The tickets can be created for various tasks (Backup/Restore/Replication) and different task status (Success/Failed/Warning) on relevant service boards.

Backup and Recovery of VMware VM Templates

BDRSuite for VMware now supports backup for VMware VM Templates. Now, VM Templates will show up in the list of VMware ESXi/vCenter entities that can be selected for backup. You can configure backup for VM Templates and restore when required.

Backup and Recovery of Google Workspace Shared Drive

BDRSuite now supports backup and recovery of Shared Drives in Google Workspace Organization.

Backup and Recovery of Microsoft 365 Archive Mailbox

BDRSuite now supports backup and recovery of user mails in the Archive Mailbox (In-place Archive) of Microsoft 365.

Deduplication for Microsoft 365 User Mails

BDRSuite supports deduplication for backed up user mails from Microsoft 365.
