12.8 E- Library facilities

The Library uses Koha software system (an open-source integrated library system, used world-wide) with RFID scanning facility, puts it on par with the best modern libraries in keeping track of issues and returns in a foolproof manner. The Library follows the open access systems encouraging the user to browse freely in the stack area. A modern digital library with 96 computers with high speed internet access is housed on the first floor. The users can access online journals and video course materials with the help of head phones. Further, the students can access e-resources anywhere in the campus through the IP range earmarked for e-journal access. Further, REMOTE ACCESS for all the subscribed contents is also provided through Knimbus platform.

13. Teaching Learning Process

At Bannari Amman Institute of Technology, the emphasis on Experiential Learning is directed towards courses with laboratory components, facilitated through Layer-Learning, internships, skill training, one-credit courses, and project work. On average, 30 to 35% of the courses incorporate experiential learning methodologies. Participative Learning, on the other hand, places its focus on skill enhancement through training, active participation in labs, involvement in industry projects, internships, project contests, and project work, encouraging students to engage actively with the latest technologies. Approximately 25 to 30% of courses are designed with participative learning in mind.

Additionally, the curriculum incorporates Problem-Solving Practices, guiding students through the resolution of design, development, and analysis-related issues. Problem-solving methodologies are integrated into tutorial sessions, assignments, and open book tests, with approximately 75% of courses dedicated to this learning approach. These strategies aim to cultivate higher-order thinking skills among students through self-learning, group learning, and layer learning.

In the teaching-learning process at BIT, various tools such as animated videos, models, real-time examples, presentations, and activity-based experiments are utilized to enhance comprehension. Moreover, course materials, contents, and discussions are readily accessible on the institute's wiki page, enabling students to reference them at their convenience.
