

Wrecker Body LEDs Using BOOGIE LIGHTS[®]

LOW PROFILE (LP) LED STRIPS

Maximum length of a single **LOW PROFILE LED** strip is 16 feet. They can be ordered in one foot increments. They can also be cut in the field if needed. This kit can be provisioned to have up to FOUR Low Profile LED strips on each side of the truck (labeled as **LP1**, **LP2**, **LP3** and **LP4** in this diagram - sold in pairs). The body style of the wrecker in this diagram is for illustration only. They will work on any wrecker body style (light duty, heavy duty, roll back, rotator, etc) that has the built in channel common for many wrecker body styles including Miller Industries wreckers. See product description for complete specifications and installation details.
