

SHANGHAI STAR TREND ENTERPRISE CO., LTD.

Printed polyester lanyards attached on card holders and card pouches for displaying ID cards

Overview

Lanyard is a cord made from polyester or polyamide material which is worn around the neck to carry the access control card. It is applicable for displaying staff ID, identifying visitors and promoting events. So it is called custom polyester lanyards. It includes customised lanyard card holder and personalised lanyard card holder.

The strap of lanyard can be plain, preprinted and personalized type according to customized color and design. Printing options are silk screen process, thermal transfer process and woven process.

The standard size of a lanyard is 80cm to 100cm length and 1.0cm to 3.0cm width with a drop size of 45cm. The popular clips include hooks (egg hook, trigger hook, swivel hook and lobster hook) and buckles (release buckle, safety buckle, and ladder buckle) etc.

Packing: 10pcs per bunch, 100pcs per bag and 500/1000pcs per carton
