

Smart card with contact chip as public transportation and finance card

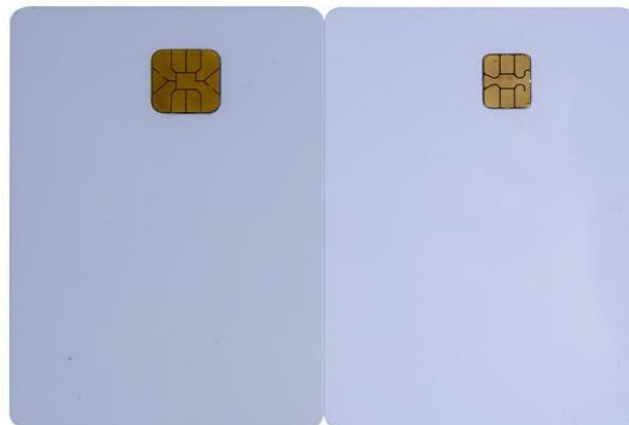

Overview

A **contact chip card** or **contact IC card** consists of a plastic card and a contact IC that is pasted in the slot on the card. It includes **PVC id card with chip**. The plastic card is produced according to ISO7810 and printed with customized design. All the card accessories, for example the magnetic strip and signature panel, for normal plastic cards can be added to a contact chip card.

The processing of the [contact IC card](#) is to punch the strip type module with a die cut and paste it on the slot which has been milled on the card base in advance. It is also possible to perform embossing, printing photos, writing personal data, etc. depending on the customer's different needs. They are presented in the market as [smart cards for sale](#).

Applications

- Bus card
- Taxi card
- Telecom card
- Bank card
- Access control card
- Shopping card
- Loyalty card

SHANGHAI STAR TREND ENTERPRISE CO., LTD.
