

**AT THE  
CUTTING EDGE  
FOR ALL YOUR  
CNC ROUTING  
NEEDS.**

# About CNC ROUTING

CNC Routing Limited are CNC routing specialists with over 25 years' experience in shaping and profiling MDF, chipboard, MFC, composite panels, solid surfaces, a full range of acrylics and many more. We operate from the Heart of England alongside a dedicated team with over 25 years' experience. Our primary goal is to provide CNC routing services at the most competitive rates possible. We have been working with a wide array of clients of all sizes with varying demands, carrying out design, routing and manufacturing.

# THE SERVICE WE CAN OFFER

CNC Routing Ltd hold an extensive range of materials in stock, which gives our clients the option of reducing the lead time and hassle of their products.

In addition to our CNC machines we have an edge-bander with pre-milling and all the stations to provide a finished product. We have a dedicated build team that manufacture components and put the finishing touches to your assembled product.

CNC Routing Ltd offers an extensive range of high-quality CNC routing services to clients both large and small throughout all industries. Offering simple or complex shaping, profiling, cutting and routing on a wide range of sheet materials. We are able to carry out one off productions or large batch runs.

CNC Routing Ltd is home to a dedicated design team where all members are highly skilled, not only in the design aspect but also in CNC router operation. This ensures each member can translate the design onto the routing machines, guaranteeing perfect results.

Based in the Midlands CNC Routing Ltd is at the heart of England with close links to the motorway network. Thus making it easier to deliver nationwide.

# WHY USE US?

We can offer same day quotation turn around on any of our services.

We have a dedicated design team who are able to liaise direct with the client and detail drawings ready for manufacture.

We are the only company in the UK that offers a working area of 4800mm x 2635mm making no job too large, or too small.

Our clients are guaranteed a quick turnaround due to us being able to supply materials from our extensive stock. In addition, all our machines are equipped with a minimum of two router heads halving cutting time.

We understand the value of each product therefore will provide prototypes to the client to show the quality that we can produce.

Alongside our CNC routing service, we also offer an edge-banding service whether it be bespoke (radius or rounded shapes) or straight edge production.

To compliment our other services we have a build team for fabrication and assembly to give our customers a one stop shop to develop their products from concept to completion.

CNC Routing Ltd continue to be the preferred suppliers of CNC routing services by XYZ Automation who are the leading CNC routing manufacturer in the UK.

# What we can cut:

CNC Routing Ltd are able to produce almost any cut shape from an extensive range of materials, available in today's market. With a wide range of machining capability combined with skills developed through many years experience. This enables CNC to offer a service of machining and fabricating many different types of material such as;

**Wood:**

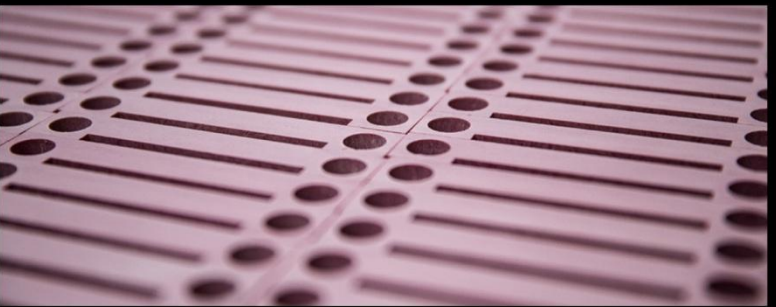

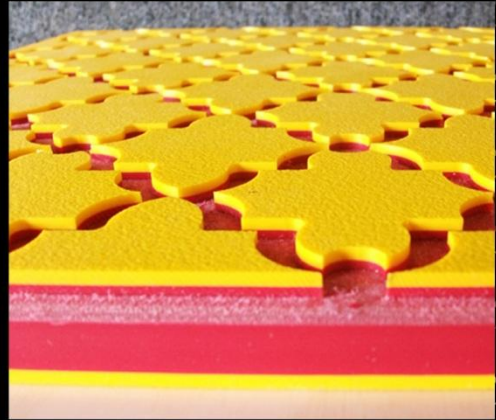

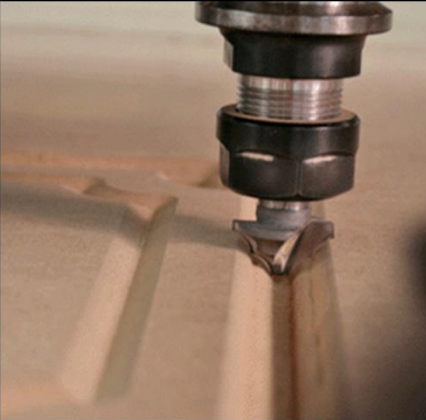

- MDF
- MF MDF
- Plywood
- Laminated Panels
- Chip Board
- MFC
- Hardwoods
- Densified Woods
- Softwoods

**Plastics:**

- Nylon
- Acrylics
- Polycarbonate
- PVC
- PETG
- ABS
- Polyester Glass
- Epoxy Glass
- PTFE
- Acetal

**Miscellaneous:**

- Solid/ Compact Laminate
- Aluminium
- Corinne
- Foamex
- Styrene
- Rubber
- Cork
- PVC Foam

# Case Studies:

## City Electrical Factors

Point of sale wall/ Tower sections

- Product Design
- Artwork
- CNC Routing
- Edge-banding
- Wiring of systems with retractable switches
- Vinyl's onto MF MDF
- Attaching Headers with light system

## Floors 2 Go

Wall Units, Center Units & Display Units

- Product Design
- Artwork
- CNC Routing
- Edge-banding
- Build side
- Packaging solutions
- Instructional video on assembly of product
- Palletizing for National Distribution

## Lush

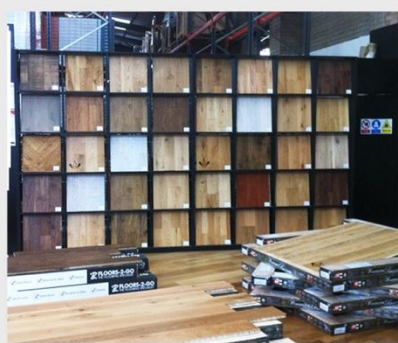

Perfume Boxes

- Printed Plywood
- AVS-XYZ vision system for accurate print to cut registration
- CNC Routing
- Assemble of the product
- World Wide Distribution

## Audi

A3 promotion "Boot Space"

- Working coherently with the client
- Outsourced materials
- CNC Routing
- Edge-Banding
- Build Side
- World Wide Distribution
