

At CNN Newsource, we strive to share compelling content through an easy-to-use platform. Aiming to make the affiliate experience as easy and efficient as possible, new portal enhancements launch this month. Check out the improved functionality!

### New Live Channels Added to CNN Newsource Website

Recently we launched the live channel pop-out window. This week, we've added four new channels from CNN Newsource International to the website: INTL Channels 1, 2, 3 and 4. These channels are currently only available on the CNN Grid via LiveU and TVU (e.g. not available via satellite). Be sure to check embargo and usage information for each live event in these channels, just as you would for domestic live channels.

### COMING SOON! Direct Links to Stories from Digital Desk Notes

Deep links to stories in the "Digital Download" desk emails will be available for embeddable videos and CNN Wire articles. This means hyperlinks in the notes will take you to specific content in the Newsource portal once you've logged in.

The team is also developing links for downloadable videos as a next step, so all content can be deep linked from our desk notes.
