

Worldwide, the need for hospital rooms and healthcare treatment spaces is escalating day by day. Schönox subfloor products can convert almost any floor space to healthcare use, quickly, and safely.

Hotels, offices, lobbies, storage areas, and other spaces can be retrofitted. Conversion of the floors to suitable healthcare surfaces is of paramount importance. Call 800-825-1221 for floor prep guidance; we're here to work with you.

Getting from Here to There Quickly and Safely:

The overall benefits of the Schönox Rapid Healthcare Conversion Initiative and the underlying subfloor products are:

- Dramatically condensed installation times – renovate in hours not days
- Addressing severe or unknown subfloor conditions without investigation or subfloor testing
- Immediate floor space access to healthcare providers, equipment and patients to the completed spaces

The condition and performance qualities of healthcare floors regarding stability, but also cleanliness, durability, sterility and hygiene requirements, and daily maintenance are critical. All Schönox products are high performance providing a pathway to meet essential needs when paired with healthcare-approved floor coverings and standards.

Subfloor situations without removing the existing subfloor materials:

Schönox has a product system designed for installation atop almost all subfloor situations. Call us. We'll guide you through any subfloor issue or project. The following are everyday subfloor situations where Schönox systems can address these issues, leaving the existing subfloor in place:

Asbestos tiles and adhesives
 Tiles including broken and damaged tiles
 Gypcrete
 Ceramic
 Concrete slabs in poor physical condition

Carpet
 Carpet cutback
 Wood
 Concrete slabs with moisture issues up to 100% RH
 Concrete slabs with contaminants

Schönox addresses all of these subfloor situations.

Pathway Forward for Most Floors:

The process and Schönox products for various subfloor conditions have been simplified to include the following for most subfloor situations:

1. Schönox EPA Rapid – Rapid drying moisture mitigation system. One coat to penetrate and fully seal substrates. Dries in 2 to 3 hours.
2. Schönox SHP – Ready-mixed acrylic primer. One coat over Schönox EPA. Dries in 1 to 2 hours.
3. Schönox AP Rapid or Schönox ZM Rapid – Rapid setting self-leveling compounds. Schönox ZM Rapid is ready for covering in 1.5 hours and Schönox AP Rapid is ready for covering in 5-6 hours.
4. Apply sheet vinyl or another healthcare-approved flooring.

Schönox products are engineered for ease of use and installation speed.

The Fine Points Still Matter:

Schönox is an environmentally responsible choice. All Schönox products contribute to USGBC LEED credits. Manufactured in our Germany-based facilities under ISO 9001 and ISO 14001 quality and environmental management standards, they have low to no VOC characteristics. Schönox AP, a self-leveling compound, has unique dust reduced properties, making it ideal for occupied spaces. Further, Schönox AP contains 50% pre-consumer recycled material. In short, Schönox is an excellent choice for all the right reasons.

Pour with confidence and air quality top of mind.

Getting Started:

We have mobilized our technical and support teams to work with you. The Schönox products are in stock, ready for shipment, and ideally suited to convert floor spaces to healthcare use. Call us to get started at 800-825-1221.
