Proficient in research methodologies, data analysis, and psychological assessment. Possess strong teamwork abilities and excel at contributing effectively to collaborative projects. Excellent communication, adept at fostering positive collaborative environment within interdisciplinary teams.

## Work experience

### Research Assistant

2022 - 2023

King's College London, London

Contributed to diverse psychology research, supporting data collection, participant recruitment, literature searches, and research proposal development. Assisted in experiment design, stimulus creation, and equipment setup, conducted statistical analyses, and made valuable contributions to research papers and presentations, showcasing meticulous attention to detail and proficient writing skills.

- Efficiently recruited and scheduled 50+ participants for experiments, maintaining a 95% attendance rate through effective communication and rapport-building.
- Conducted intricate statistical analyses utilising SPSS, deriving actionable insights from data and producing visual representations that contributed to a 20% increase in research outcome clarity.

### Psychology Intern

2021 - 2022

Mind Matters Clinic, London

Assisted senior psychologists in client assessments and treatment planning, gaining insights into therapeutic techniques by observing therapy sessions. Actively contributed to case conferences, offering observations and intervention suggestions. Administered psychological tests under supervision, ensuring precise data collection. Collaborated with interdisciplinary teams, conducting literature reviews and synthesising research findings to enhance holistic client care.

- Streamlined client assessments and treatment planning, contributing to a 15% reduction in assessment process duration.
- Shared impactful observations and suggestions during case conferences, resulting in the implementation of 80% of proposed interventions for improved client progress.
