ALTITUDE™

ENVIRONMENTAL POLICY

Altitude Design specialises in environmentally and socially conscious graphic design and web development, actively advocating for positive change within the industry to create a better future for everyone. Our core values prioritise integrity, responsibility, and respect for all stakeholders affected by our operations.

We are dedicated to conducting business with utmost integrity, prioritising the interests of all involved parties. Our mission is to generate economic benefits while enhancing the quality of life and respecting the environment in all our endeavours. Recognising the environmental impact of our actions, we are committed to minimising our footprint and continually improving our performance.

Our environmental policy entails compliance with relevant legislation and regulations, alongside proactive measures to reduce pollution and resource consumption. Key initiatives include maintaining a paperless and printer-less office, selecting suppliers and contractors with environmental considerations in mind, and setting targets for energy and water usage reduction.

Furthermore, we prioritise waste reduction, recycling, and the use of environmentally friendly products. We ensure that all employees understand their role in implementing our environmental policy, engage suppliers and contractors to comply with our standards, and periodically review our practices for ongoing improvement.

Continuous enhancement is ingrained in our culture, as we regularly assess our environmental practices, learn from best practices, and foster a commitment to sustainability among all Altitude employees. Together, we are dedicated to evolving our approach annually, setting measurable goals, and striving for a more sustainable future.
