

NEW !!!

The new d-i davit international-hische GmbH model **OLH.25 rescue boat off-load hook** is manufactured in accordance to the latest SOLAS and MED requirements. To be used with davit launched rescue/life boats, working boats or similar crafts. It can support a weight of up to 2.5t (25kN) and can be easily **handled by one person**. For maximum ease of maintenance the individual parts of the hook have been carefully chosen from the best marine environment resistant **non-corrosive materials**.

Made in Germany
