

# DURO DYNE

## Dyna-Tite

# SAFETY SNEEZE GUARDS

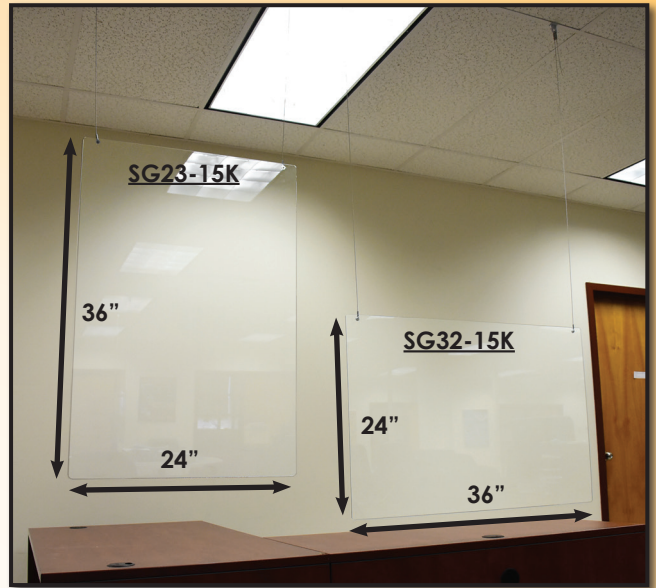

As our government has introduced measures to protect the public from COVID-19, many retailers are taking additional precautions to protect employees and customers by installing suspended protective shields in stores. These are installed at check-out locations and offer a transparent shield between the cashier and the customer. The Duro Dyne Dyna-Tite system is quick and easy to install in all retail environments and represent an ideal solution for this application.
