Latest Projects

New in 2023, the Orangery event structure blends indoor & outdoor space to leave a lasting impression.

The Fews Orangery event structure offers a beautiful and unique event space. This majestic black aluminium event structure is available in up to 25 metre widths, 3 metre or 4 metre leg height with clear or white PVC. The Orangery event structure is premium through and through and comes with a deck level cassette floor and sliding doors to wow your guests.

The 3 metre leg version of this premium event structure has a maximum width of 25 metres.

For the 4 metre leg version, the maximum width is 20 metres.

Expanding the versatility of this premium event structure, we also offer a winterised version, which can include double glazing, an insulated twin skin thermo roof and 40mm insulated sandwich panel walls.

The 4 metre version includes elaborate fretwork above the windows to add an extra layer of quality.

The whole concept of this structure makes it a very low maintenance and sustainable option, there is no need for linings that need constant cleaning or replacement, and the floor covering can be an easy to clean but attractive vinyl.

Available as an event structure

Orangery is an ideal event structure, the basic design is perfect as a canvas for a high-end dinner or party. With the options for clear or white PVC, this structure maximises available light.

Or as a permanent venue

Our Orangery structure provides perfect flexible spaces that can be used for many purposes and is fast to install, modular in design and have a long life span. With double glazed windows and doors, the potential of an insulated twin skinned thermo roof, the orangery makes a robust and attractive permanent venue. We can provide full turnkey solutions including these options:

- Double glazed walls & doors
- Low maintenance vinyl flooring and wipeable surfaces
- Full fit-out including power distribution, HVAC and lighting
- Insulated hard walling with sound reduction and thermal insulation
- Insulated thermo roofs
- Large suspended loading
- Opening windows

EXPECT DIFFERENT

Redefining event structures

The Igloo event structure is exclusive to Fews Marquees in the UK, and featuring cutting edge structural technology alongside excellent acoustics. The Igloo event structure allows event designers to create amazing event spaces with unparalleled levels of height and light at their disposal. It also serves a market specifically where height, width and suspended weight are critical. The Igloo event structure is suitable for large productions. The aluminium structure can be designed in modular widths with PVC coverings available in crystal clear, white opaque, and black out finishes.

Winterised options for Igloo

A redesign of the existing Igloo event structure with enhanced engineering and new materials has meant that it can withstand winds of up to 31 m/s or 77 miles per hour. This will significantly reduce the risk of events being cancelled due to adverse weather conditions, especially during the "off season".

The change in aluminium from 6005 T6 to 6082 T6, a much stronger material, and the addition of new bolted purlins when required and cross bracing means the winterised version can achieve the required wind speed.

Make an impact with the Wave event structure

Wave is the largest event structure we offer. Available in widths of 55 metres and 70 metres. The vast size and scope of the Wave event structure makes it a perfect candidate for hosting even the largest events.

Fews are always investing in the future, and transforming our traditional office space into a dynamic and creative environment was a bold and innovative step to significantly boost productivity, creativity, and employee satisfaction.

This office upgrade was more than just a facelift; it's a strategic move that aligned the workspace with the company's creative vision and values.

- Modern collaborative layout
- Standing desks, seated desks, meeting booth
- Large boardroom with latest video technology
- Wall murals & graphics
- Strategic use of brand colours

Volvo FH500 Trucks

One of our new Volvo FH500 Trucks with it's trailer. All nicely liveried and ready to roll. Fitted with a Euro 6 diesel engine, this has been specified to provide the most fuel-efficient service possible. All in line with Fews' sustainable approach to business.

The Volvo FH with Turbo Compound I-Save technology is known to be the most efficient power unit on the road achieving a world record 9.82mpg in a recent test.

Toyota HiLux

We rely a lot on 4x4's to get us into those less accessible places. We've invested in new Toyota HiLux's to make sure that we have the most efficient and reliable transport possible.

Moffett Vehicles

Our brand new Moffett vehicles that run on HVO giving us the most sustainable options we can find.

Project A Magical Wedding

Our most recent investment in Solar is the biggest yet.

Since we first installed panels in 2015, this is the second and largest upgrade. During summer months we are delivering electricity back to the grid. Where additional power is needed, our supply is from a guaranteed renewable source (as certified by EDF).

VISION 2025

Recently we became partners in the event industry scheme VISION 2025 aimed at providing a template and code of practice for sustainable events.

Fews have now adopted their pledge.

Award Winning

For the second year running, Fews picked up an award at the prestigious Event Production Awards. It was a hotly contested category, but Fews prevailed with an overall score of 19/20.

A Stunning Luxury Wedding Marquee

Some projects are just a dream to work on, and this wedding was one of those. Masterminded by Henry Bonas Events, this wedding at Ragley Hall was a truly collaborative build and an unforgettable experience.

The 15m Premium marquee was split across two levels to incorporate the stone steps already in-situ.

A link to Ragley Hall was built at one end which utilised bespoke tack off lining and guttering.

Above the link to Ragley we fitted a clear PVC roof, with a keder-fed Black Star lining covering the remainder of the marquee. Bespoke bathrooms were built with custom vacuum toilets and fittings.

All the decor was designed and co-ordinated by the team at Henry Bonas Events, who were a pleasure to work with.

Project A Special Celebration

Step into a world of elegance as our unique Igloo marquee structure was transformed into a realm of wonder for a special celebration like no other.

The curved arches and lighting created a unique atmosphere.

As music filled the air, guests found themselves immersed in the magic of the evening, a sanctuary of fun and oft remembered anecdotes. This celebration, held within an extraordinary marquee structure, became a cherished memory, a testament to the power of creative design to elevate special occasions into extraordinary experiences.

The Igloo marquee we built in the clients' garden was a 30 metre x 40 metre structure with clear PVC above the entrance and blackout PVC beyond. The whole structure was built on a cassette floor, raised 2 metres on scaffolding.

Project A Vertical Exhibition

Fews News, Issue 6

Vertical Days returned to Peterborough on Wednesday 10th and Thursday 11th May, just a few days after the King's Coronation – with a fully loaded display of the latest lifting equipment. The show displayed the largest and most diverse collection of cranes, access platforms and telehandlers as well as a myriad of associated equipment and services.

Fews provided a number of marquee structures for the exhibition at the East of England Showground including the main Market Place marquee, catering areas and bespoke display spaces for some of the manufacturers.
