## FROM THE PRESIDENT'S DESK

**Dr. Suchitra Pandit**  
President

Dear FOGSIans,

I am really privileged to be President of our esteemed Federation, FOGSI of which I have been a member since 1984. Believe me, I cherish every moment of the 30 years of this learning process as FOGSI has given me a platform for interaction with colleagues from all over India at an academic and personal level. FOGSI is one of the largest organizations of specialized professionals with over 29,310 members spread in 225 societies. FOGSI is a classical confluence of unity in diversity like the Indian nation.

The phenomenal growth, progress and spectacular achievements of the FOGSI speak volumes of the solid foundation laid as well as the vision, able guidance and leadership provided by the founder members. With this background I would like to share my vision for FOGSI.

**My theme** : Empower women... Empower India... Pledge for excellence!! Though women have progressed in a number of spheres yet much more needs to be done. FOGSIans should work along with health care policy makers to address women's health needs in a holistic way starting from conception to senescence as women's health is wealth of the nation. Maternal mortality is one of the basic health indicators of a society. Our vision 2020 is to have maternal mortality rate comparable to that of the developed countries. We can do this if every FOGSIan pledges for excellence, works in close liaison with the existing National Health programs in collaboration with FOGSI.

**We can't help everyone, but everyone can help someone... Ronald Reagan focussed workshops for training & capacity building of maternity care providers for management of postpartum hemorrhage and hypertensive disorders of pregnancy which will help in reduction of maternal mortality & improve perinatal outcome... it is the need of the hour !!**

**Workshops for achieving excellence in practice...** With the help of our team we have designed 18 workshops on various important clinical topics, to ensure that everyone gets empowered with the latest knowledge and enhances their skills. These include PCOS, Infertility & Ovulation Induction, Early & Recurrent Pregnancy Loss, Caesarean skills, Management of Fetal growth restriction, Preterm Labour, Neonatal resuscitation, Postpartum care and Contraception. New focused workshops are on PCPNDT issues, Safety First & Sexual health issues.

The **FOGSI FORCE** program for postgraduate doctors continues and also helps them to have an exam oriented training . **Speciality courses : FOGSI - GESTOSIS Certificate course in Standardized Management of Hypertensive Disorders of Pregnancy which will be will be launched soon. It will facilitate a systematic management of hypertension & prevent eclampsia across India and help reduce morbidity and mortality. This is a three year project which will train all our FOGSIans.**

**Youth Melas** for empowering the youth .. the future of tomorrow ! We have conceptualised the **YOUTH MELAS** for boys and girls (16-24 years) which is an awareness program addressing :

- Communication skills
- Know Your Body, Healthy Diet & Staying fit
- Prevention of unwanted pregnancy, HIV, Sexually Transmitted Infections and Cancer – Cervix
- Prevention from physical and sexual abuse
- Self defence & First Aid

Trained doctors have been conducting this interactive program which **has been immensely** appreciated by students. We

have done 35 youth melas so far and reached out to 10000 young people.

Prevention of Cervical Cancer awareness programs at various Medical colleges are being done Felicitation of women achievers in 2014 in many parts of India to promote them as role models for society.

**FOGSI Antiobesity Drive** as Obesity is now a national threat. With every kilo weight loss recorded by a gynecologist during treatment of their obese clients, one healthy meal will be given to a malnourished child.

**Good Clinical Practice Guidelines:** We have had intensive special interest group meetings with experts and have formed a evidence based good clinical practice guideline on Caesarean section, Hypertensive disorders of pregnancy Preventing PPH, Fetal growth restriction and Vaccinations in women. These will be uploaded on the website and will be very beneficial for our colleagues.

**Conferences in 2014** : Our National focused conferences were on important subjects Medicolegal Updates (West Bengal Society of OBGYN) in May, Harmony with Hormones (Mumbai Society) in June, Pelvic Floor – Unfolding the facts (Pune Society) in June 2014, Journey to Safer Pregnancy (Jaipur society) in July & Modern Technology Saves Lives at Trichy in October. We have a special program on [www. Empower.con](http://www.Empower.con) for (Womanhood Wisdom and Wellness) in October at Mumbai.

Our Yuva FOGSI (zonal conferences at Faridabad, Mysore, Bhubaneswar and Nashik have given a platform to our Young FOGSIANS to showcase their scientific activities.

International conferences 2014 : A grand congress in collaboration with RCOG World Congress 2014 at Hyderabad in March, SAFOG – FIGO conference with participation from FOGSI at Srilanka in October. We also have a FOGSI INDO – NEPAL summit to share ideas on Save the Mother and child in November.

FOGSI ICOG has achieved International collaboration of the FOGSI - MICOG exam with the Royal College of Obstetricians & Gynecologists for Part 1 exam from March 2014 and Royal College of Physicians of Ireland (RCPI) for part 2 MICOG – MRCPI exam, 2014. Initiation of a master class IGNITE & FOGSI – ICOG Travelling seminars in 5 cities with the European school of Perinatology in Oct. 2014

A landmark achievement for this year is procuring a grand new place which will be FOGSI's address in the future . It will have a computer-updated, web-enabled state-of-the-art office with a reception, a plush auditorium for our meetings and ICOG courses and a visitors area. With blessings from the Almighty, support from my family, and the entire TEAM 2014, I stand before you as President to take our vision forward and ask each of you to Pledge for excellence and help me in my endeavour to Empower the women ...thus empowering India. This Annual report is a true reflection of the hard work put in by the office bearers, chairpersons and members.

Together, we can achieve the goals set forth & also push beyond to frontiers that may test us, but in the process, I believe, make us stronger and closer to serve the women and make a difference.

'Growth is never by mere chance; it is the result of individuals working together in tandem!'

**Dr Suchitra N.Pandit**

The evolution of FOGSI into one of the largest organizations of specialist professionals was nurtured by a unique organizational structure conceived by visionary pioneers. As the present office bearers at the FOGSI office complete their tenure, it is our privilege to present to our membership, the 54th Annual report of our federation. We take this as an opportunity to present to you some of the important initiatives taken over the last three years.

### Organizational structure

FOGSI has a unique dual system of governance. A well-defined organogram with governance responsibilities with the President and Vice Presidents and administrative responsibilities with the Secretary General and the office bearers at the FOGSI office, has stood in good stead, combining change with continuity. The FOGSI office consists of a dedicated staff of 15 employees whose commitment to the federation is evident from the low attrition and long tenures.

### Organizational innovations

The three specialized cells on PNDDT, Anti violence against Doctors and Anti violence against Women have proved to be an important asset to FOGSI. These think-tanks meet twice a year and advise the managing committee regarding strategies to deal with these vital issues. Besides these, the Conference Conduct Committee comprising of the five immediate past presidents and the office bearers, has transformed the way official conferences are organized – starting with a thoughtful process regarding the selection of the venue, to assisting in the selection of the event manager from a panel short listed by FOGSI, to important practical advice regarding fee structure and programme content.

### Organizational developments

After having developed a comprehensive set of administrative guidelines over a decade, FOGSI is now in the process of developing standard operating procedures for all important activities. Under this, the process of judging the work done by Societies on issues important to the federation and eligible for awards has been completely revamped.

### Human resource issues

A process of appraisal has been introduced to evaluate and acknowledge staff working. Besides this, FOGSI has subscribed to a gratuity scheme for its staff, increased mediclaim cover, contributed to staff welfare activities and standardized overtime and leave policies.

### Office infrastructure issues

The FOGSI office conducted a massive exercise to clean up records collected over the years as per the documents retention or disposal policy defined in the administrative guidelines. Besides this, fire safety, audit and training and risk-reduction strategies have been adopted.

### Election process

Previous challenges have taught FOGSI the importance of electoral conduct. Mailing by registered post, tracking returned ballots and sharing the information with their member societies and third-party counting have ensured smoother, more representative elections.

### Members schemes

FOGSI has an excellent Indemnity insurance negotiated for its membership and the Social Security scheme fulfills the need and supports the families of colleagues in their time of crises. The FOGSI Health fund exists to help members with financial support in case of a debilitating health condition.

### Vision and ethics

FOGSI in keeping with its international and national stature and responsibility, has adopted a Mission and Vision Statement committing itself to the cause of maternal health as a cross-cutting issue. Last year, FOGSI adopted a code of conduct committing its membership and staff to the highest level of ethical behavior both within the organization and in their practice.

### Members communication

The FOGSI Journal carries clearly branded FOGSI pages through which the office communicates important information to the membership. Besides this, the FOGSI website, with a massive viewership, allows real-time communication regarding FOGSI events and policies.

### FOGSI policies

Recent compilation of FOGSI policies over the years as also a good clinical practice and recommendations – those existing and also those under development, clearly state the federation's position on many important issues.

### International collaborations

FOGSI has the unique privilege of a partnership with RCOG and RCPI to assist them in the training of their potential candidate for membership and also help conduct their examinations whenever they are held in India. The FOGSI office has played host to these training programmes and excellent results have been achieved by the young participants when they appeared for these examinations.

### Corporate social responsibility

During the tragic events that unfolded in Uttarakhand last year, FOGSI and AFOG contributed over Rs.12 Lakhs for rehabilitation work that has been conducted by the Vivekanand Mission. This was primarily used to offer medical relief and care.

The most exciting development this year was the acquisition of the new office premises which is almost three-fold larger than our present one at Kamla Mills in central Mumbai. The new FOGSI office is being planned with state-of-the-art facilities and connectivity to allow it to conduct the important work that FOGSI does for its membership and through them the women of our country.

With all this, we can never rest or be complacent because of the great challenges that remain before our profession.

We thank you for your belonging to our great federation and request you to be involved and participate in whatever way works best for you. We would like to place on record our thanks to our office staff, Dr. Parikshit Tank and Dr. Ameya Purandare for their assistance in compiling this Annual Report and to Spenta Publishers for preparing this document of archival value.

# REPORT OF THE YEAR'S ACTIVITIES FROM THE IMMEDIATE PAST PRESIDENT, DR. HEMA DIVAKAR

INNOVATION TO  
IMPLEMENTATION

## The theme of 2013 was 'Innovation to Implementation'

On January the 17th 2013, I was installed as the President of FOGSI; I anticipated that I will have a challenging and an exciting time to establish FOGSI as a leading advocate for all aspects of women's health, both at home and abroad. An opportunity to make a difference!

The Theme declared was **"Innovation to Implementation"**. The team had five Vice presidents –

Dr. Jayanth Rath from the East - committed to the cause of reducing Maternal mortality, Dr. Shantakumari from the south dreaming of showcasing the best in FOGSI to the rest of the world, Dr. Alpesh Gandhi focusing on establishing High dependency Units for critical care, Dr. Ashwini Bhalerao Gandhi, also from the west, with a keen interest on Adolescents and working relentlessly towards YUVA care and dr Maninder ahuja from the north, having the passion to promote Midlife care and wellness in women. We were all set to make an impact through implementing the innovative programmes with the supportive team Bengaluru and the rest of the chairmen and champions and officebearers and thought leaders. The brief report on the programmes rolled out during my tenure is presented.

**Objective :** to address the concerns in Women's healthcare – the Past, Present and future.

### (1) FOGSI-Jhpiego-Emcure FAST TRACK INITIATIVE for Helping Mothers Survive [HMS]

India is racing against time to achieve the MDG 5. Post Partum Haemorrhage (PPH) and Pre-eclampsia, eclampsia (PE/E) continue to remain the two major causes of maternal mortality. Major focus and priority was reduction in Maternal Mortality by adhering to protocols - doing whats needed and what is expected. – AMSTL for every delivery and Mag sulph for every woman with severe PE/ eclampsia. Something that should have been taken care of in the PAST - hence the move is on FAST TRACK – but organized in phases and scaled up to have an impact.

**"Helping Mothers Survive" (HMS)** - offered focused training and capacity building of Frontline Health care Providers to handle PPH and PE/E. with an Innovative simulator called **Mamanatalie**.

The conference featured a quiz on Reproductive Endocrinology and also an extravagant cultural bonanza.

### FOGSI MSD Key Programs

These programs were directed towards cervical cancer screening and prevention. The target audience was gynecologists and health workers and the main goal was to sensitize them towards the prevalence, prevention and early diagnosis of cervical cancer. The program was held in 40 centers including Faridabad, Guwahati, Jalandhar, Allahabad, Dehradun, Bengaluru and Mysore. It was also held in conjunction with the YUVA Conferences as a pre-congress workshop and received good feedback.

### Nu Life Clinics and Workshops

These Workshops and Clinics are designed with the aim of providing standardized quality care to all women at the mid-

life stage with appropriate risk assessment, early diagnosis, management and prevention with the long term goal of reducing morbidity, mortality and improving quality of life in the latter years. One of the initiatives is a MidLife OPD Card format which can be integrated into the existing practice of most gynaecologists. The Workshops were conducted in collaboration with the Indian Menopause Society (IMS) and about 25 persons were trained at Mumbai, Faridabad, Pune, Chandigarh, Bengaluru and Hyderabad. The clinics will be an ongoing project.

# FOGSI PROJECT REPORTS

## 1. FOGSI EmOC certification course report for April, 2013 to March 2014 by Dr. Sadhana Desai

ICOG/ FOGSI have trained 64 new govt. MBBS doctors for EmOC. The total no. of MBBS doctors trained in EmOC till date is 1489. This completes govt. of India's original requirement of training 1500 doctors. ICOG / FOGSI has already crossed the target of setting up tertiary training centres and district hospital training centres and currently, no new centres are being established. Following is EmOC human resource created by FOGSI ICOG till 15th April, 2014.

### Current Position

#### Creating the EmOC Human Resource

	Total Upto 15th April 2014
Nodel Centres	6
Tertiary training Centres	34
District Hospital training centres	246
Master Trainers in Medical Colleges	221
District Hospital Practical Trainers	372
MBBS Doctors enrolled for long course	1489
MBBS Doctors trained in short course	104

There is no written communication from GOI regarding continuation of EmOC programme from 1st April, 2014 onwards, may be due to forthcoming election. We have to wait and watch further to find out if govt. of India still wants us to continue the EmOC programme.

Dr. Prakash Bhatt has informed us that he has almost completed the formalities to start training private DGO / MD doctors interested in EmOC training at Smimmer hospital - Surat & the programme will hopefully start soon. We are in process of advertising for applications from private doctors.

## 2. Report of FOGSI-FIGO Bill and Melinda Gates MNH Initiative by Dr. C.N.Purandare

### FIGO – LOGIC (Leadership in Obstetrics & Gynaecology for Impact & Change) project

FIGO LOGIC began in 2009 and ended in October 2013. During this period we achieved major milestones here is a brief note.

International Federation of Gynecology and Obstetrics (FIGO) was awarded a grant by the Bill and Melinda Gates Foundation to implement a project on "Improving Maternal and Newborn Health in low resource countries through Strengthening the Roles of Obstetric and Gynaecological National Associations" as a major maternal and newborn health Initiative.

Eight Partner Organizations from Asia and Africa have been selected to participate in this initiative, and The Federation of Obstetric and Gynecological Societies of India (FOGSI) was selected to lead the initiative in India. The project goal was to improve policy and practice by strengthening FIGO member associations and using their position and knowledge to facilitate and contribute to such improvements, leading to better maternal and newborn health for underserved populations in low and middle resource countries.

As part of the project FOGSI in partnership with Government of India – Maternal Health Division, Ministry of Health and Family Welfare and our foundation worked and delivered the following initiatives.

### Emergency Obstetric Care Curriculum

We together with the Gol and other partners – revised the Emergency Obstetric Care (EmOC) training curriculum. The curriculum dovetails other Government Maternal and Child Health and Reproductive and Child Health programme guidelines into EmOC. The curriculum was released for implementation in 2013 and since then 25 medical officer batches have been completed using the new curriculum.

### Maternal Near Miss Reviews

We worked with Gol and six medical colleges in six States across India to develop contextual near miss definitions and tools with the aim to have these definitions and tools approved by the Gol and implemented across India. The definitions and tools assist health facilities with investigating causes of and circumstances surrounding maternal near misses, that is, when women survive obstetric complications. The formal documents have since been submitted to Gol and Gol has commenced its internal work to make this a policy for implementation across India.

### Maternal Death Review Programme

We implemented a maternal death review programme in two districts of Rajasthan (Sikar and Jhunjhunu). The maternal death review reports were analysed and the findings shared with the District and State authorities. The review programme in these two districts has identified that women die due to the following: delay in seeking care; death during transfer to a health facility with better facilities and in which health workers with necessary skills are present; and inability of the health facility to provide services due to lack of blood storage, skilled health professionals and/or availability of drugs.

### Maternal Death Review Software

We worked with Gol to develop a maternal death review software. This enables Gol and health facilities across the country to analyse the causes of maternal deaths and identify the delays that contribute to maternal deaths at various levels. Based on the findings, Gol can then initiate steps to help overcome the causes leading to a maternal death. The software has been launched on 25th November 13 and till date 1500 health personnel from AP, Telangana, MP, Bihar, and Assam, have been trained. A total of 700 facility and community based forms have been uploaded on the software for report generation by the States for planning actions to improve maternal health outcomes.

## Medical Disorders in Pregnancy Committee

Chairman : Dr. Girija Wagh

Vice President Incharge : Dr. Alpesh Gandhi

**‘Reaching the roots – Helping Mothers survive Workshop’** was conducted on Friday 23rd August to help Medical officers tackle difficult situations in labour. This is was the second session and we have received extremely good feedbacks so far. All the MOs in this batch are manning PHCs with more than 10 deliveries per month. We intend to train all the Pune Rural MOs through this program and I pray to god that we are able to do it.

The Curriculum consists of ideal antenatal care, risk assessment of Preeclampsia, management of anemia, transfer protocols in cases of severe hypertension and eclampsia, magnesium sulphate administration, antenatal steroids administration, dystocia, active management of third stage of labour and PPH management.

There are a few observations that we made

1. The DHO Pune Rural is very enthusiastic and his support is highly appreciated by all the medical officers. He has been instrumental in infusing confidence in the officers to be able to perform in the field  
2. The supplies at the PHCs are not adequate and the MO has to buy everything from folic acid to the oxytocin ampoules to intracaths and sometimes gloves. I feel that this is a wastage of their time and the limited funds that they now receive. I recollect being a part of the approval committee where we had finalised this list and I feel certainly mandatory supplies need to be provided from a common store. You can have an online indent and maintenance of record and dispersals for this.

3. There is a complete delink between the MOs and the RH and this is very detrimental to the system. Everyone needs to come together and as far as our district is concerned I feel we must have a strategy planned to be able to achieve the results we desire.

4. The Gynecologists who offer antenatal service need to be sensitized regarding the MMR issue as their protocols are not uniform. The belt of the district where we can reach out we are ready to support the antenatal care day by our faculty. This was suggested by the MOs so that we can have risk tagging and confinement linkages well developed.

### **A Visit to Nandupbar District with the MD NRHM to assess the government mother and child health care facilities.**

I also conducted a training session for the medical officers at Nandurbar for half a day.

### **Publications during this period as under**

1. Coauthored 2 chapters in the Jaypee Publication : Pregnancy with hypertension edited by Prof. Arulkumar
  1. Classification of hypertensive Disorders in Pregnancy with Dr. Sanjay Gupte
  2. Management of second and third stage of labour in preeclampsia eclampsia with Dr. Hema Divakar
2. Coauthored a review article In the FOGSI Journal on Preeclampsia and Eclampsia in December January 2013,14 volume with Dr. Sanjay Gupte.

### **International presentations**

Was invited as the Steering Committee Member and Faculty at the 6th Advanced Course of Ultrasound & 45th International meeting of Gestosis Organization at Athens on from 6-8th December where I delivered a talk on “Clinical predictions and prevention of preeclampsia” and ‘epigenetics in preeclampsia “.
