

Explain how the major groups of rocks are formed.

Explain how the major groups of rocks are formed.

Geology 3 Information Pieces

Igneous G-4
Sedimentary G-4
Metamorphic G-4
Formed by volcanoes G-4
Layers of rock are compressed together. They are often layered in water or mud. G-4
Partially melted and then remolded under the earth's crust. G-4

To Make Your MatchCard more durable:

- 1. Put the student MatchCard and instructor MatchCard back to back in a clear plastic page protector.*
- 2. Laminate the information pieces. Or you can make them sturdier by covering the paper with transparent tape prior to cutting the pieces out.*
- 3. For more ideas on how to use the MatchCards, and for keeping a notebook for review, see the Instructor's Guide.*
