ABOUT US

Welcome to our company, a leading supplier of non-woven products. We specialize in providing high-quality and eco-friendly non-woven products for various industries, including healthcare, hospitality, and retail.

**"UNLEASHING INNOVATION THROUGH
NON-WOVEN SOLUTIONS."**

Our company has a team of experienced professionals who are dedicated to providing top-notch products and excellent customer service. We take pride in our commitment to sustainable and responsible business practices and ensure that all of our products are manufactured using the latest technology and processes that minimize environmental impact.

Our extensive product range includes **non-woven fabrics, bags, aprons, surgical gowns, masks, and much more.** We offer customized solutions to meet the specific needs of our clients, ensuring that our products are tailored to their unique requirements.

At our company, we believe that quality is the key to customer satisfaction, and we strive to maintain the highest standards in everything we do. Our products undergo rigorous quality control checks to ensure that they meet our clients' expectations.

MISSION VISION

MISSION

To Build Long Term And Honest Association With The Customers And To Provide Superior Quality Product Through Revolution, Modern Technology And Good Manufacturing Practices.

VISION

By Utilizing newer technologies and staying committed to innovations that exceed client expectations, we are strongly working towards becoming the global leader in the Non-Woven segment. To be a responsible company committed to society and the environment. We wish to win respect and heart of all our clients.

WHY US ?

CUSTOMIZATION

We can customize our non-woven products as per customer requirements, including size, color, and design.

QUALITY CONTROL

We have a dedicated team of quality control experts who ensure that our products meet the highest standards of quality and safety.

ON-TIME DELIVERY

We have a strong logistics network and can deliver our products to customers anywhere in the world on time.

CUSTOMER SUPPORT

Our customer support team is available 24/7 to answer any questions or concerns that customers may have.

OUR PRODUCTS

NON WOVEN PACKAGING

W-CUT NON WOVEN BAGS

W-Cut non woven bags are reusable shopping bags made of fabric material. Their "W" shape handles provide added strength and durability, as they have been cut in a "W" pattern for added strength and durability.

D-CUT NON WOVEN BAGS

D-cut Non Woven Bags are eco-friendly products made of spunbonded polypropylene (PP) fibers. These bags feature an innovative D-cut handle design integrated into the top, creating two handles to carry with ease.

NON WOVEN SHOPPING BAGS

These are an attractive alternative to single-use plastic bags because they are durable, lightweight, and can be reused multiple times.

NON WOVEN PROMOTIONAL BAGS

Non-woven promotional bags are an environmentally friendly solution made of spunbonded polypropylene (PP) fibers. Heat-bonding these fibers together produces a strong, durable material that supports heavy loads.

NON WOVEN COTTON BALES COVER

A non-woven cotton bales cover is a protective cover made of non-woven materials used to cover and protect cotton bales during storage and transport.

NON WOVEN COMPUTER COVER

A non-woven computer cover is a protective cover made of non-woven materials used to cover and protect computers and other electronic devices from dust, dirt, and other contaminants.

SPUNBOND AND LAMINATED NON-WOVEN FABRICS

PRINTED NON WOVEN FABRICS

Our printed fabrics are made with the finest non-woven fabrics and are finished with a high degree of detail. Our innovative printing process can create custom-looking fabrics that will suit any respect.

COLORED NON WOVEN FABRICS

The non-woven fabric can be made in different colors by using pigments to dye the fibres before they are bonded together, producing a wide variety of colors and patterns.

ALUMINUM FOIL LAMINATED NON WOVEN FABRIC

Aluminum foil laminated non woven fabric contain of a non-woven layer that has been coated with or laminated using aluminum foil.

BOPP LAMINATED NON WOVEN FABRIC

BOPP Laminated Non woven Fabric provides strength and allows them to handle massive weight. BOPP Laminated Fabric can be used for packing. The fabrics are available in various colours, sizes, lengths, widths, and thicknesses based on the diverse requirements of customers.

PP LAMINATED NON WOVEN FABRIC

PP (Polypropylene) laminated non-woven fabrics are a type of composite material made by laminating a layer of polypropylene film to a layer of non-woven fabric.

METALLIC LAMINATED NON WOVEN FABRIC

We offer a broad range of Laminated Non-Woven Fabrics designed per the specific demands of various industries. Metallic Laminated non woven Fabrics are a material that is made by laminating a layer of the metal film to a non-woven.

NON-WOVEN AGRICULTURAL PRODUCTS

NON WOVEN WEED CONTROL FABRIC

Non woven weed control fabric is a type of fabric that is designed to suppress the growth of weeds in gardens, landscapes, and other outdoor spaces.

NON WOVEN CROP COVER

Non woven crop cover is a fabric used to protect crops from insects, wind, rain and burning sun and other environmental factors while allowing air, sunlight, and water to pass through.

NON WOVEN PLANT COVER

Non woven plant covers provide wind, frost and rain protection for plants. Furthermore, these barriers allow air, light and moisture to pass through so plants can grow healthy and strong.

FRUIT PROTECTION COVERS

Use a non-woven fruit protection cover to secure your fruit or plant and ensure it remains healthy and flourishes. These covers will help ensure your product remains vibrant and thrives.

NON WOVEN NURSERY BAGS

Root Control Non Woven Bags (Non Woven Nursery Bags) are specialized plant containers constructed of synthetic fabric that allows air and water to pass through while restricting root growth outside the container.

UV TREATED NON WOVEN FABRIC

Non woven UV treated ground cover is a landscaping fabric designed to prevent weed growth while allowing water and air passage.

SPECIALLY TREATED NON WOVEN FABRICS

NON WOVEN FLAME RETARDENT FABRIC

Non woven flame retardant fabric is a material that has been chemically treated to make it resistant to fire. Flame retardant fabric is one of the grades of nonwoven fabric.

OPTICAL BRIGHTENED FABRICS

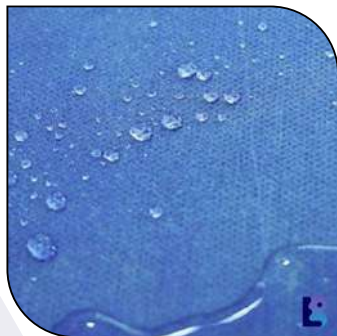

Optical brightened fabrics are textiles treated with optical brighteners to enhance their visual appearance. These chemicals absorb ultraviolet light and emit visible light, giving fabrics a brighter and whiter hue.

NON WOVEN HYDROPHILIC FABRIC

Non Woven Hydrophilic Fabric is a material designed to be highly absorbent and capable of holding moisture. This type of fabric finds application in diapers, feminine hygiene products, medical products, and cleaning wipes – all applications where absorbency is key.

NON WOVEN HYDROPHOBIC FABRIC

Non woven Hydrophobic fabric is a type of material that repels water and other liquids. Unlike hydrophilic nonwoven fabric, which attracts moisture, hydrophobic nonwoven fabric works to keep you dry by repelling liquids from contact.

NON WOVEN SCENTED FABRICS

Non Woven Scented Fabrics are materials treated with fragrances or essential oils to release a pleasant scent. The fragrances used can be synthetic or natural, and the process usually allows the scent to remain in the fabric for an extended period.

NON WOVEN UV RESISTANT FABRICS

Non Woven UV Resistant Fabrics are textiles made from fibers resistant to ultraviolet radiation. These fibers have been engineered with durability, so they can withstand exposure to sunlight and other UV sources without breaking down or degrading over time.

NON WOVEN HOME FURNISHING PRODUCTS

EMBROIDERY BACKING NON WOVEN FABRIC

Embroidery backing non woven fabric is a material used to support and stabilize embroidery designs during stitching. It can be composed of synthetic fibers or a blend of both chemically or thermally bonded together.

NON WOVEN LINING FABRIC

Non woven lining fabric is created by bonding or felting fibers together using heat, pressure or chemicals rather than weaving them together. The result has a soft and fluffy texture and is often used as a lining or backing material in various applications.

NON WOVEN INTERLINING FABRIC

Non woven interlining fabrics are used in textile and garment production as a layer between the outer fabric and lining. They're created by heat, pressure, or chemical processes rather than weaving or knitting them together.

NON WOVEN TABLE CLOTH / COVER

Non-woven table cloths and covers are soft to the touch yet strong enough to withstand regular usage. They're easy to clean; simply dampen them with a cloth or sponge.

DISPOSABLE NON WOVEN BED SHEET

Disposable Non Woven Bed Sheet are fabric created by bonding fibers together, rather than weaving them together, using heat, pressure or chemicals.

NON WOVEN PILLOW COVER

A non woven pillow cover is a type of cover for a pillow that is made from non-woven fabric. Non-wovens are created by bonding fibers together using heat, pressure or chemicals rather than weaving them together.

NON WOVEN MEDICAL DISPOSABLES

NON WOVEN SURGICAL CAPS

Non woven surgical caps are an integral part of personal protective equipment (PPE) worn by healthcare professionals during surgical procedures.

N95 DISPOSABLE FACE MASK

An N95 disposable face mask is personal protective equipment (PPE) designed to filter out at least 95% of airborne particles, such as bacteria and viruses.

NON WOVEN FABRICS FOR APRONS

Non-woven fabrics offer several advantages over traditional woven fabrics for aprons. For instance, they tend to be more cost-effective, making them an economical option for businesses and organizations that need many aprons.

NON WOVEN FABRICS FOR PPE KITS

Laminated non woven fabrics are used in PPE kits to offer additional protection against infectious agents. To create them, two or more layers of non-woven fabric are laminated together by either applying an adhesive layer or heat sealing them together.

NON WOVEN ISOLATION GOWN

Non woven isolation gowns are protective clothing designed to shield against infectious agents and hazardous substances. Made of lightweight non-woven fabric that resists fluid penetration, they can be worn over regular clothing to provide extra coverage when necessary.

NON WOVEN SURGICAL FACEMASK

A non woven surgical face mask is a disposable medical device designed to be worn by healthcare professionals during surgery and other medical procedures to protect the patient from potential infection or contamination by the wearer.

NON WOVEN FOR GARMENT, AIRLINE AND HYGIENE PRODUCTS

NON WOVEN SUIT COVER

Non woven suit covers are a type of protective cover used to store and safeguard suits from dust, moisture, and other environmental elements.

SAREE, SALWAR, AND DRESS COVERS

Non woven saree, salwar, and dress covers are lightweight yet durable material that offers excellent protection for these garments.

NON WOVEN HEADREST COVERS

Non woven headrest covers are lightweight, breathable and disposable coverings designed to shield car seats and upholstery from dirt and environmental elements.

DISPOSABLE PILLOW COVERS

Non woven disposable pillow covers are protective coverings designed to keep pillows clean and hygienic. Made of lightweight yet durable non-woven material that breathes, allowing air circulation and preventing moisture buildup.

NON WOVEN SANITARY NAPKINS

Non woven sanitary napkins are feminine hygiene items that absorb menstrual fluid during periods. These products are made of non-woven fabric composed of long fibers bonded together through heat, chemicals, or mechanical processes.

NON WOVEN WAXING STRIPS

Non woven waxing strips are a type of beauty product used for hair removal. It is Crafted from non-woven fabric consisting of long fibers bonded together through heat, chemicals, or mechanical processes.

NON WOVEN FOR AUTOMOBILE

APPLICATIONS

Non-woven materials have a wide range of applications in various industries due to their unique properties such as flexibility, durability, absorbency, and softness. Here are some common applications of non-woven materials:

MEDICAL & HYGIENE PRODUCTS

Non-woven fabrics are extensively used in the production of medical and hygiene products such as surgical gowns, face masks, wipes, diapers, and sanitary napkins due to their ability to provide a barrier against bacteria and other harmful particles.

AGRICULTURE

Non-woven fabrics are used in agriculture to control weed growth, protect crops from insects and other pests, and as a protective cover for greenhouses.

PACKAGING

Non-woven fabrics are used in packaging as a protective layer for delicate items during transport, as well as for making reusable shopping bags and other eco-friendly packaging solutions.

APPLICATIONS

AUTOMOTIVE INDUSTRY

Non-woven materials are used in the automotive industry for making headliners, door panels, carpets, and seat covers due to their resistance to wear and tear, insulation properties, and sound absorption.

CONSTRUCTION INDUSTRY

Non-woven fabrics are used in the construction industry for making roofing membranes, geotextiles, and insulation materials due to their water-resistant and fire-resistant properties.

FILTRATION

Non-woven fabrics are used in the production of air and liquid filters due to their ability to trap small particles and contaminants.

These are just a few examples of the many applications of non-woven materials. The versatility of non-woven fabrics has made them an essential component in various industries, and they continue to find new applications as technology advances.
