

How our alarm works

Step 1

If you need help, at any time of the day or night, simply press the big red button on your Pendant or on the alarm.

Step 2

Our Response Team will speak to you over the loudspeaker on the main alarm unit.

Don't worry if you can't hear our Response Team on the loudspeaker; help will still be sent to you.

Step 3

Our Response Team will call your nominated emergency contacts to come and assist you or the emergency services should you require any medical attention. They will reassure you when help is on the way.

Help when you need it

Our personal alarms and pendants have been specifically designed for the following users:

- The elderly or disabled.
- People living alone and at risk of falling or in need of reassurance.
- People suffering from long term illness such as dementia, epilepsy or heart disease.

If ever an accident were to occur, all the wearer needs to do is press the button on their pendant and our expert Response Team will take care of the rest.

In most cases one of your nominated emergency attend. These are usually friends, relatives, carers or neighbours who you have asked us to contact in this scenario.

If medical attention is required, paramedics will be sent urgently. Our Response Team will pass on any relevant medical conditions, allergies or medications so they have all the information they need to treat the patient as soon as they arrive.

“Thank you LifeConnect24 for helping me to set up my alarm service so quickly. I should have bought this years ago”
