

## Student handout 4.3

Applying the sustainability model to the fishing game:  
how do we "catch as many fish as possible"?

Goals of the sustainability model	What we should achieve in the fishing game
<b>Economy:</b> Economic growth, increase of welfare	
<b>Society:</b> Distribution of goods in the community	
<b>Environment:</b> Protection of the natural environment and resources	
<b>Long-term stability:</b> Achievement of sustainability goals today and in the future
