INTRODUCTORY SECTION

STATE OF MAINE
DEPARTMENT OF ADMINISTRATIVE AND FINANCIAL SERVICES
BUREAU OF ACCOUNTS AND CONTROL
14 STATE HOUSE STATION AUGUSTA, ME 04333-0014

CAROL F. WHITNEY
STATE CONTROLLER

TERRY E. BRANN, CPA
DEPUTY STATE CONTROLLER

June 1, 2002

**To the Honorable Angus S. King, Jr., Governor,
The Honorable Members of the Legislature, and
Citizens of the State of Maine**

We are pleased to submit the Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2001 in accordance with 5 M.R.S.A. § 1547. Published by the State Controller's Office, Bureau of Accounts and Control, this report is the primary informational source for State government's financial activities, and is compliant with generally accepted accounting principles (GAAP).

The CAFR is presented in three sections: introductory, financial and statistical. The introductory section, which is unaudited, includes this transmittal letter, the State's organizational chart and a list of principal elected and appointed officials. The financial section includes the State Auditor's report, the audited general purpose financial statements and notes thereto. It also includes the underlying combining and individual fund financial statements and supporting schedules. The statistical section shows selected economic, financial trend and demographic information for the State on a multi-year basis.

The State Auditor's Report does not qualify the General Fixed Assets Account Group (GFAAG). This means that for the first time an inventory of the State's fixed assets, fairly stated, in all material respects, is included in the CAFR. Without the cooperation and support of virtually all agencies and the State Department of Audit over the past few years, the inventory, automation and presentation of the GFAAG would not have been possible. We do not expect capital leases and the Changes in Pension Plan Net Assets to be qualifications in the fiscal year 2002 CAFR.

The Governmental Accounting Standards Board (GASB) has mandated certain changes to the CAFR by the year 2002. The new GASB reporting model, which resembles private sector annual reporting, provides a picture of the government as a single, unified entity. Changes include a significantly expanded Introductory Section that is to be known as the Management Discussion and Analysis section, and an expanded Statistical section. Although this is a challenge for virtually all states to meet, we are preparing the CAFR for fiscal year 2002 according to the new GASB model.

The financial reporting section includes all the funds and account groups of the primary government, along with all component units. Generally, component units are legally separate organizations for which the primary government is financially accountable in accordance with criteria established by GASB. Note 1A elaborates on the component unit criteria and lists organizations, agencies, boards, commissions and authorities that the State includes as component units.

We believe that the information in the CAFR presents fairly and accurately in all material aspects the financial position and affairs of the State with the exception of certain issues for which the State Auditor qualified the Independent Auditor's Opinion. Responsibility for the accuracy and the completeness of this report, including all disclosure, rests with the State.

ECONOMIC CONDITION AND OUTLOOK

Maine is an exciting place to live and conduct business. Our business environment is stronger than ever, our communities are thriving and tourism continues to grow. All evidence points to the fact that Maine is on the move!

As a result, there has been a revival of business activity and community investment in Maine. Our entrepreneurial spirit is attracting today's most innovative companies and cutting-edge industries – semiconductors, biotechnology, and call centers. These companies are finding a productivity level and work ethic that are the envy of the world. They're also finding communities that are ready and able to meet their business needs.

Investments in its cities and towns, development of its infrastructure, and improvement in its tax structure and regulatory environments has changed the business landscape of Maine.

But Maine has something else unique to offer: a quality of life that's second to none. Our close-knit communities, rich cultural heritage and unspoiled natural beauty make Maine an ideal place to live, work and raise a family. And, as our flourishing tourism industry demonstrates, Maine is a spectacular place to visit.

Despite the national recession, there were over 50 business expansion projects of one-half million dollars or more this year. The sum of these investments totaled \$300 million.

After enjoying a record breaking 10-year expansion, the US economy slipped silently into recession in March 2001. In fact, so quietly did we begin our descent, the whole downturn might have gone unnoticed absent the events of September 11th, which shone spotlights on the underlying performance. While recession is never a beast to be taken lightly, this downturn need not strike fear in the heart, as it is surely an animal of a different kind. As with this recession, this recovery will be mild and uneventful. Oil prices are already well behaved and will not need further taming. The large up-tick in consumer spending which usually accompanies a recovery will be muted by the fact that consumers never dramatically slowed purchases. Consumer spending, particularly for autos and houses, didn't plummet as it did in other recessions, thus the rebound will be less pronounced.

Retail sales continued to grow in 2001, albeit slowly, and seasonally adjusted job losses during the year were only 3,600 or 0.6% of the total jobs. While it is no comfort to those who have lost jobs over the past year, the current recession's effects in Maine are but a pale shadow of the devastating losses suffered during the recession of 1990-91. In fact, if this recession is not over by the time you read this, it probably will be over within another quarter or two.

MAJOR INITIATIVES

Transportation

Maine roadways were improved at a pace not seen for years. Maine's Department of Transportation Urban and Arterial Highway Program advertised twenty-two projects for bids, a production level that set the stage to bring all of Maine's arterial highways up to modern design standards within ten years. Extraordinary bridge improvements were also either under construction or set in motion, continuing remarkable progress in the reduction of Maine's major bridge deficiencies. Infrastructure for freight transport was also greatly improved, including the next phase of the Intermodal Freight Facility. The 30-mile widening project on the Maine Turnpike continued through its second year. The project's goal involves both modernizing the roadway and converting the capacity to three lanes of traffic in each direction between York and Scarborough. The project is on course for overall completion of its five-year schedule in 2005.

After a thirty-six year hiatus, track improvements were completed that would allow resumption of passenger train service between Portland and Boston. The “Downeaster” is now running from Portland to Boston’s North Station four times daily, and passenger levels are high. There are already signs of collaboration amongst travel industry firms who are taking advantage of the investment in the new service by offering package deals that give better value and convenience to consumers, by melding together lodging and entertainment options for the passengers. The spin-off economic effects are expected to continue growing as more visitors to New England realize they do not need a car to access the vast natural and cultural amenities of Maine

Augusta State Facilities Master Plan

The state has embarked on a plan to improve the management of state owned buildings and sites in the greater Augusta area. The major goals associated with the plan include: improving the work environment of Maine State employees, improving the management and stewardship of State-owned facilities, creating appropriate space for customers of Maine State Government to transact business, consolidating state agencies that are currently fragmented in several Augusta area locations, restoring and preserving significant historic buildings, reducing the amount of leased space buildings, protecting and enhancing the existing green spaces, developing infrastructure to support alternative transportation. In addition, the state is implementing this plan with the input from Augusta area communities. One of the most significant accomplishments to date has been the completion of the Burton M. Cross building which now provides appropriate space for employees, citizens and customers of Maine to transact business.

Health Care Issues

Recent news articles have suggested health care costs are escalating rapidly. Estimates and projections prepared by the Federal Government’s National Health Statistics Group, on the other hand, indicate likely increases in costs over the next decade that will challenge businesses, individuals, and governments, but do not suggest run-away growth. Concern has been expressed that small businesses will be unable to afford health insurance for their employees. However, a survey of employers, health care executives and insurance brokers and consultants in twelve U.S. cities found no overall movement of small businesses to drop insurance coverage, even though they have absorbed larger than average cost increases. The survey did find employers were dropping or considering dropping retirement coverage for new hires.

Computers for Kids

The State of Maine and Apple Computer, Inc. have signed an agreement to implement a laptop program giving all 7th and 8th grade students in Maine (whose schools choose to participate in the program) a laptop computer by the end of 2003. With this innovative initiative the State of Maine is making an investment in the future of its workforce, which is likely to make Maine more competitive in both attracting and retaining the knowledge-based workforce that the new economy demands.

Research and Development

Studies by Maine’s State Planning Office (SPO) have led to the conclusion that the percentage of adults with Bachelor’s degrees or higher and the dollars per worker spent on research and development are major drivers of per capita income. SPO determined that increasing the percentage of adults with 4-year degrees or more to 30% and increasing R&D investment to \$1,000 per worker would raise Maine per capita income to the national average or above from about \$25,400 to \$29,450. The “30 and 1,000” initiative could lead in ten years to an expanded knowledge based economy in Maine, with a low to moderate population growth, good per capita income, and innovation in traditional and new industries, amidst a spectacular natural environment that is attractive to knowledgeable workers.

FINANCIAL INFORMATION

Internal Control

State management is responsible for establishing and maintaining internal control to ensure that government assets are protected from loss, theft or misuse and to ensure that adequate accounting data are compiled to allow preparation of financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived, and that evaluation of costs and benefits requires estimates and judgments by management.

As a recipient of federal financial assistance for federal programs, the State is also responsible for ensuring that an adequate internal control structure is in place to ensure and document compliance with applicable laws and regulations related to these federal programs. The internal control structure is subject to periodic evaluation by management and by the State Department of Audit as part of the annual single audit.

Budgetary Control

The Governor presents a biennial budget for the General Fund and the Special Revenue Funds to the Legislature for enactment or revision. The State Constitution provides the Governor a “line item” veto, which allows an Executive dollar substitution for those amounts disapproved, as long as an appropriation or allocation is not increased (or a deappropriation or deallocation decreased) either in the specified line or in any other line in the legislative document.

Once passed and signed, the budget becomes the financial plan for the State for the next biennium. It includes proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also includes anticipated revenues and any other means of financing expenditures. In accordance with statute, the State Budget Officer must use the projections of the Revenue Forecasting Committee to prepare the General Fund and Highway Fund budgets.

The State maintains budgetary control at the account and line category levels. The head of each department and agency of State government must submit a work program to the Bureau of the Budget for the ensuing fiscal year. The work program is classified to show allotments requested for specific amounts for personal services, capital expenditures, and all other departmental expenses. These are the levels at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Controller authorizes all expenditures to be made from the amounts available on the basis of these allotments and not otherwise.

Budget revisions during the year, reflecting program changes or intradepartmental administrative transfers, require the approval of the State Budget Officer and the Governor. Except in specific instances, only the Legislature may transfer appropriations between departments. Agency requests for increases in appropriations, allocations, or funding for new programs are presented to the Legislature as a supplemental budget.

The State uses encumbrance accounting as an extension of formal budgetary control. This requires that purchase orders, contracts, and other commitments be recorded to reserve a portion of an appropriation or allocation for expenditure. Appropriated and allocated balances are available for subsequent expenditure to the extent that there are approved encumbrances at the end of a fiscal year. The State reports encumbrances outstanding at year-end as reservations of fund balances to identify those portions of fund balances that are not available for allocation or expenditure, or that are legally segregated for specific future uses. Unencumbered appropriations in the General Fund and in the Highway Fund are carried forward to a subsequent year only when authorized by law, otherwise the balances lapse at year-end.

General Government Functions

Financial resources for the principal operations of State government and jointly financed State-federal programs are accounted for in the general and special revenue funds. Revenues from various sources for fiscal years 2001 and 2000, which are used to finance general government functions, are compared in the following table (**dollars expressed in thousands**):

Revenues By Source			As Percent of Total		\$	%
	2001	2000	2001	2000	Incr (Decr) from 2000	Incr (Decr)
Total Taxes	\$2,522,131	\$2,632,465	55.2 %	57.2 %	(\$110,334)	(4.2) %
Assessments and Other Rev.	208,904	189,213	4.6	4.1	19,691	10.4
Federal Government	1,610,209	1,555,970	35.2	33.8	54,239	3.5
Service Charges	69,350	71,398	1.5	1.6	(2,048)	(2.9)
Income from Investments	50,369	37,094	1.1	0.8	13,275	35.8
Other Sources	110,182	113,705	2.4	2.5	(3,523)	(3.1)
Total Revenues	\$4,571,145	\$4,599,845	100.0 %	100.0 %	(\$28,700)	(0.6) %

The following chart depicts the composition of general government revenue sources for fiscal year 2001:

The State provides a full range of services, including: economic development, education, health and social services, recreation and natural resource management, public safety, transportation, public improvement and financial assistance. The costs of providing these services are also accounted for in the general and special revenue funds. Expenditures for general government functions for fiscal years 2001 and 2000 are compared in the following table (**dollars expressed in thousands**):

Expenditures By Policy Area			As Percent of Total		\$	%
	2001	2000	2001	2000	Incr (Decr) from 2000	Incr (Decr)
General Government	\$555,264	\$431,959	12.2 %	10.2 %	\$123,305	28.5 %
Economic Development	110,304	112,079	2.4	2.7	(1,775)	(1.6)
Education & Cultural Services	993,992	966,947	21.8	23.0	27,045	2.8
Human Services	2,077,991	1,934,243	45.6	46.1	143,748	7.4
Labor	76,389	79,690	1.7	1.9	(3,301)	(4.1)
Natural Resources	132,041	119,783	2.9	2.9	12,258	10.2
Public Protection	92,947	82,641	2.0	2.0	10,306	12.5
Transportation	397,588	355,801	8.7	8.5	41,787	11.7
Debt Service	123,407	112,980	2.7	2.7	10,427	9.2
Total Expenditures	\$4,559,923	\$4,196,123	100.0 %	100.0 %	\$363,800	8.7 %

The following chart depicts the composition of general government expenditures for fiscal year 2001:

General Fund Balance

The unreserved and undesignated portion of General Fund GAAP fund balance decreased by \$277,539,000. However, the overall fund balance of \$311,571,000 at June 30, 2001, including more than \$143 million reserved in the State's Rainy Day Fund, demonstrates fiscal strength resulting from prudent fiscal practices.

Included in the General Fund's fund balance, the *Rainy Day Fund* was created to fund potential operating deficits or other emergencies. Each year, the State transfers fifty percent of the excess of total General Fund revenues received, over accepted estimates, from the unappropriated surplus of the General Fund to the Rainy Day Fund. Upon recommendation by the Governor, and a 2/3 vote of the Legislature, appropriations from the fund may be made for prepayment of outstanding General Fund bonds or for major construction projects exceeding \$500,000. The maximum amount that this fund may carry, by law, is six percent of the total General Fund revenues received in the immediately preceding fiscal year.

The chart to the right depicts the balance in the Rainy Day Fund, in millions of dollars, at the close of each of the last ten fiscal years.

Debt Administration

When issuing General Obligation Bonds, the State of Maine pledges its full faith and credit to repay the financial obligation. Unless certain tax revenue streams are specifically restricted, states typically pledge all of their tax-raising powers to secure the obligations. The major bond rating agencies regularly assess the capacity and willingness of the State to repay its general obligation debt. Moody’s Investors Service, Standard & Poor’s, and Fitch IBCA, Inc., make their assessments, in large part, by examining four basic analytical areas:

- Economy
- Financial Performance and Flexibility
- Debt Burden
- Administration

The economic base is the most critical element in determining the rating. Growth and diversity in the demographics, tax base, and employment base of the State over the last decade are indicators of future growth prospects and debt repayment capabilities. Generally, states with higher income levels and diverse economic bases have superior debt repayment capabilities and are better protected from sudden shocks or unexpected volatility in the economy. Because a strong economy does not always ensure a state’s ability to meet debt payments, the state’s financial management and performance are also key factors.

Financial analysis involves several factors, including: accounting and reporting methods; revenue and expenditure patterns; annual operating and budgetary performance; leverage and equity positions; budget and financial planning; and contingency obligations. These factors present a clear indication of the financial strengths and weaknesses of the State. The rating agencies’ analyses of these factors provide the framework for judging Maine’s capacity to manage economic, political, and financial uncertainties. Following is a history of Maine’s credit ratings from three of the major rating agencies, and a brief explanation of their meanings:

Standard & Poor’s

“AAA” is the highest Issuer Credit Rating assigned by Standard & Poor’s. An obligor rated “AAA” has EXTREMELY strong capacity to meet its financial commitments. An obligor rated “AA” has VERY strong capacity to meet its financial commitments. It differs from the highest rated obligors only in small degree. Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

<u>Year</u>	<u>Rating</u>
1992	AA+
1993	AA+
1994	AA+
1995	AA+
1996	AA+
1997	AA+
1998	AA+
1999	AA+
2000	AA+
2001	AA+

Moody's Investors Service

Moody's is one of the few major rating agencies that measures total expected credit loss over the life of the security, assessing both the likelihood that the issuer will default and the amount of loss after a default occurs. "Aaa"rated bonds are judged to be of the best quality. Generally referred to as "gilt edge," they carry the smallest degree of risk. "Aa"rated bonds are judged to be of high quality by all standards and together with the "Aaa" group they comprise what is generally known as high grade bonds. Moody's applies one of three numerical modifiers to each generic rating classification from "Aa" to "Caa." The modifier 1 indicates that the issue ranks at the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks at the lower end of its generic category.

<u>Year</u>	<u>Rating</u>
1992	Aa1
1993	Aa
1994	Aa
1995	Aa
1996	Aa
1997	Aa3*
1998	Aa2
1999	Aa2
2000	Aa2
2001	Aa2

* Refinement of Aa rating, not a downgrade

Fitch IBCA, Inc.

"AAA" indicates obligations that have the highest rating assigned by Fitch, IBCA on its national rating scale. The capacity for timely repayment of principal and interest is considered extremely strong. "AA" indicates obligations for which capacity for timely repayment of principal and interest is very strong. Obligations rated "A" indicate that the capacity for timely repayment of principal and interest is strong relative to other obligors. However, adverse changes in business, economic or financial conditions are more likely to affect the capacity for timely repayment than for obligations in higher rated categories.

<u>Year</u>	<u>Rating</u>
1996	AA**
1997	AA
1998	AA
1999	AA
2000	AA+
2001	AA+

** Initial rating in 1996, not previously rated

Cash Management

The State pools cash for a variety of State agencies and public sector entities. Interest earned on pooled cash is allocated to the various funds, generally based on their average equity balances. In accordance with statute, the Treasurer of State may deposit State funds in any of the banking institutions organized under the laws of this State, and any national bank or federal savings and loan association located in the State. The Treasurer of State may invest funds that exceed current obligations, with the concurrence of the State Controller or the Commissioner of Administrative and Financial Services, and the consent of the Governor. The list of approved pool investments includes: U.S. Treasury Bills, Notes, Bonds and Agency Securities, certain secured repurchase agreements, prime commercial paper, tax-exempt obligations, banker's acceptances, and certain secured shares of an investment company registered under the federal Investment Company Act of 1940.

The chart to the right depicts the General Fund's share of the Treasurer's pooled cash and investment fund, in millions of dollars, at the close of each of the last ten fiscal years.

OTHER INFORMATION

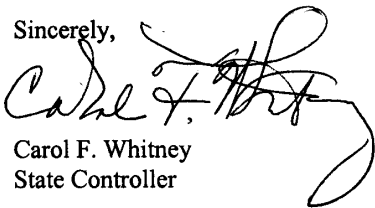

Independent Audit

Pursuant to 5 M.R.S.A. § 243, the State Auditor has performed an examination of the State's general purpose financial statements in accordance with auditing standards generally accepted in the United States of America. The auditor's opinion is presented in the financial section of this report. Also, pursuant to § 243, the State Auditor has undertaken a single audit of the State as a whole, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, as required by federal law, which will include internal control and legal compliance reports on all federal funds received and expended by State government. This statewide federal single audit report, including the auditor's opinion in accordance with generally accepted auditing standards is published separately.

Acknowledgements

Preparation of this CAFR was made possible by the dedicated staffs within the Office of the State Controller and the Department of Audit, with the assistance of fiscal staff from all agencies, including component units.

Sincerely,

Carol F. Whitney
State Controller

Terry E. Brann, CPA

RICHARD H. FOOTE, CPA
DEPUTY STATE AUDITOR
CAROL A. LEHTO CPA, CIA
DIRECTOR OF AUDITS
MICHAEL J. POULIN, CIA
DIRECTOR OF AUDITS

Independent Auditor's Report

To the President of the Senate and the
Speaker of the House of Representatives

We have audited the accompanying general purpose financial statements of the State of Maine, as of and for the year ended June 30, 2001, as listed in the table of contents. These general purpose financial statements are the responsibility of the State of Maine's management. Our responsibility is to express an opinion on these general purpose financial statements based on our audit. We did not audit the financial statements of the discretely presented component units listed in Note 1, which represent 100 percent of the total assets and 100 percent of the total revenues of the component unit column, 100 percent of the changes in pension plan net assets and 100 percent of the assets and 100 percent of the revenues of the college and university component unit funds. We did not audit the financial statements of the Maine Governmental Facilities Authority, which represents 5.08 percent of the assets and .24 percent of the total revenues of the Special Revenue Fund Type. Those financial statements were audited by other auditors whose reports have been furnished to us and our opinion, insofar as it relates to the amounts included for the discretely presented component units and for the Maine Governmental Facilities Authority, is based solely on the reports of the other auditors.

Except as discussed in the first succeeding paragraph, we conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general purpose financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinion.

Because the State of Maine does not maintain adequate systems to classify and report capital leases in conformity with generally accepted accounting principles, we were unable to satisfy ourselves regarding the amounts at which fixed assets (stated at \$76.9 million), and obligations under capital leases (stated at \$26.7 million) are recorded in the Internal Service Fund and disclosed in the operating and capital lease portions of Note 11 to the financial statements.

The State's financial statements include pension information as audited by other auditors. The Statement of Changes in Pension Plan Net Assets is presented as if the Maine State Retirement System were the administrator of a single plan. Also, Notes 1 and 9 to the financial statements state that the System is the administrator of an agent, multiple-employer system. Further, Note 9 states that Maine State Retirement System management's interpretation of the State of Maine statutes is that all assets accumulated for the payment of benefits may legally be used to pay benefits, including refunds of member contributions, to any plan members or beneficiaries, and that the System is therefore regarded as administering a single plan for reporting purposes. The State's legal counsel does not agree with the accumulated assets representation. In our opinion, there is more than one pension plan and additional disclosure is required to conform with generally accepted accounting principles.

In our opinion, based on our audit and the reports of other auditors, except for the effect on the financial statements of the omission and representation described in the first preceding paragraph and the effect of such adjustments, if any, as might have been determined to be necessary had records concerning capital leases been adequate (discussed in the second preceding paragraph), the general purpose financial statements referred to in the first paragraph (as included in the table of contents) present fairly, in all material respects, the financial position of the State of Maine, as of June 30, 2001, and the results of its operations and the cash flows of its proprietary fund types, nonexpendable trust funds and discretely presented component units, the changes in pension plan net assets, and the changes in fund balances and current funds revenues, expenditures, and other changes of the college and university funds for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 1 and 3 to the financial statements, the State of Maine reporting entity changed to include the Child Development Services System.

As discussed in Note 3 to the financial statements, the fund balance of the Expendable Trust Fund and the retained earnings and contributed capital of the Enterprise Fund have been restated.

Gail M. Chase, CIA
State Auditor

May 24, 2002

Notes to the General Purpose Financial Statements

For The Fiscal Year Ended June 30, 2001

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Maine have been prepared under guidelines established by generally accepted accounting principles (GAAP) as mandated by the Governmental Accounting Standards Board (GASB).

Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements.

A. REPORTING ENTITY

For financial reporting purposes, the State includes all funds, account groups, organizations, agencies, boards, commissions and authorities that make up the State's legal entity. It includes as component units those legally separate organizations for which the State is financially accountable or for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete.

GASB Statement No. 14, *The Financial Reporting Entity*, defines financial accountability. The State is financially accountable for those entities for which it appoints a voting majority of the governing board and either is able to impose its will on that entity or the entity may provide specific financial benefits to, or impose specific financial burdens on, the primary government. Entities for which the State does not appoint a voting majority of the governing board may be included if the organization is fiscally dependent on the primary government or if the nature and significance of its relationship with the primary government is such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

The State has included thirteen entities as component units in the reporting entity due to the significance of their operational and/or financial relationships with the State. Those agencies that meet the criteria for component units and have been included are: the Maine Governmental Facilities Authority (MGFA), the Maine Health and Higher Education Facilities Authority (MHHEFA), the Northern New England Passenger Rail Authority (NNEPRA), the Child Development Services System (CDS), the Finance Authority of Maine (FAME), the Loring Development Authority (LDA), the Maine Municipal Bond Bank (MMBB), the Maine Educational Loan Authority (MELA), the Maine State Housing Authority (MSHA), the Maine State Retirement System (MSRS), the Maine Maritime Academy (MMA), the Maine Technical College System (MTCS), and the University of Maine System (UMS). The financial information for these entities is blended within the State's financial statements or discretely presented in a separate column or in separate statements.

Blended Component Units - Blended component units are entities that are legally separate organizations that provide services entirely, or almost entirely, to the State or otherwise exclusively, or almost exclusively, benefit the State. Therefore, the State reports these organizations' balances and transactions as though they were part of the primary government. The MGFA has been blended within the financial statements of the primary government.

The MGFA was created in 1997, as a successor to the Maine Court Facilities Authority, for the purpose of assisting in the financing, acquisition, construction, improvement, reconstruction, and equipping of additions to structures designed for use as a court facility, State office or State activity space. The MGFA is included in the Special Revenue Fund type.

Discrete Component Units - Discrete component units are entities that are legally separate from the State but are either accountable to the State or related so closely to the State that exclusion would cause the State's financial statements to be misleading or incomplete. The column labeled "Component Units" emphasizes these organizations' separateness from the State's primary government. It includes the financial data of the following entities:

Governmental Types

The Maine Health and Higher Education Facilities Authority assists Maine health care institutions and institutions of higher education in undertaking projects involving the acquisition, construction, improvement, reconstruction, and equipping of health care and educational facilities and the refinancing of existing indebtedness. The Authority consists of 12 members, one of whom must be the Superintendent of Banking, *ex officio*; one of whom must be the Commissioner of Human Services, *ex officio*; one of whom must be the Commissioner of Education, *ex officio*; one of whom must be the Treasurer of State, *ex officio*; and eight of whom must be residents of the State appointed by the Governor. The Authority, pursuant to the Student Loan Corporations Act of 1983, may finance student loan programs of institutions of higher education.

The Northern New England Passenger Rail Authority, established on June 29, 1995 by the State of Maine Legislature, initiates, establishes and maintains regularly scheduled passenger rail service between points within Maine to points within and outside of Maine. The Governor appoints the five voting members of the Authority.

The Child Development Services System was established for the purpose of maintaining a coordinated service delivery system for the provision of Childfind activities, early intervention services, and free, appropriate public education services for eligible children with disabilities. CDS as a reporting entity includes a State-level intermediate educational unit and 16 regional intermediate educational units.

Proprietary Types

The Finance Authority of Maine, created in 1983, provides commercial financing and loan guarantees to Maine businesses and educational financing to Maine students and their parents. The Authority also provides financial and other services for the Adaptive Equipment Loan Program Fund Board, the Fund Insurance Review Board, the Agricultural Marketing Loan Fund Board, the Occupational Safety Program Fund Board, and the Small Business Enterprise Growth Fund Board. Additionally, the Authority administers the Maine College Savings Program Fund. The NextGen College Investing Plan is the primary program of the Maine College Savings Program Fund. The Governor appoints the 15 voting members of the Authority.

The Loring Development Authority, created in 1993 after the President of the United States accepted the recommendation of the Base Closure and Realignment Commission to close Loring Air Force Base, is entrusted with investigating the acquisition, development and management of the properties within the geographical boundaries of the old Loring Air Force Base. The Governor nominates the 13 members of the Board of Trustees of which the Maine Senate confirms 12.

The Maine Municipal Bond Bank is authorized to issue bonds providing funds to counties, cities, towns, school administrative districts, community school districts, or other quasi-municipal corporations within the State. The Governor appoints three residents of the State to the five-member Board of Commissioners.

The Maine Educational Loan Authority was created in 1988 to grant educational loans primarily using funds acquired through issuance of long-term bonds payable. The Governor appoints five of the Authority's seven commissioners. The Authority's fiscal year ends on December 31.

The Maine State Housing Authority is authorized to issue bonds for the purchase of notes and mortgages on single-family and multifamily residential units for the purpose of providing housing for persons and families of low income in the State. The Authority also acts as agent for the State in administering federal weatherization, energy conservation, fuel assistance and homeless grant programs and collecting and disbursing federal rent subsidies for low income housing. The Governor appoints five of the Authority's seven commissioners. The Authority's fiscal year ends on December 31.

The Maine State Retirement System is the administrator of an agent multiple-employer public employee retirement system. It provides pension, death, and disability benefits to its members, including State employees, some public school employees, and employees of approximately 250 local municipalities and other public entities in Maine. The Governor appoints four of the Board's seven voting members.

Colleges and Universities

Maine Maritime Academy is a college specializing in ocean and marine programs at the undergraduate and graduate levels. The operation of the Academy is subject to review by the federal government. State appropriations, student fees, and a subsidy from the Maritime Administration support the Academy.

The Maine Technical College System is Maine's primary provider of post-secondary technical education leading to a certificate, diploma, or associate degree. The combined financial statements of the system include the activity of seven colleges, the central administrative office, and the Maine Career Advantage.

The University of Maine System is the State University. In 1968 all existing units of the State college system (Orono, Portland, Augusta, and the Law School) were merged by the 103rd Legislature. The result was the creation of the consolidated University of Maine System with a single Board of Trustees. The System now consists of seven campuses and a central administrative office.

The State of Maine provides significant financial resources to these educational institutions.

The component unit financial information included in the reporting entity has been reformatted to conform to the accounting classifications used by the State. Condensed financial statement information for each component unit included in the component units column in the general purpose financial statements is presented in Note 13, Segment Information. Complete financial statements of the individual component units can be obtained directly from their respective administrative offices by writing to:

Related Organizations

Officials of the State's primary government appoint a voting majority of the governing boards of the Maine Port Authority, the Maine Public Utilities Financing Bank, the Maine School of Science and Mathematics, the Maine Science and Technology Foundation, the Maine Sludge and Residuals Utilization Research Foundation, the Maine Technology Institute, the Maine Turnpike Authority, and the Maine Veterans' Home. However, the primary government has no material accountability for these organizations beyond making the board appointments.

B. FUND ACCOUNTING

The State reports its financial position and results of operations in funds and account groups. Cash and other financial resources, all related liabilities and residual equities or balances, and changes therein, are recorded and segregated. A fund is an independent fiscal and accounting entity with a self-balancing set of accounts. Fund accounting segregates funds according to their intended purpose and is used to aid management in demonstrating compliance with finance-related legal and contractual provisions. Transactions between funds, if any, have not been eliminated.

The presentation of component units is not meant to be a consolidation, since transactions within the State entity have not been eliminated. However, appropriations and most grants to the component units are recorded as operating transfers to component units out of the applicable fund and as operating transfers from primary government into the component unit organization.

An account group is used to provide accounting control and accountability for the State's general long-term obligations. It is not considered a fund because it does not report expendable, available financial resources and related liabilities.

The financial activities of the State of Maine are classified in three fund categories, two account groups, and component units, as described below. The fund categories include Governmental Funds, Proprietary Funds, and Fiduciary Funds. The account groups are the General Long-Term Obligations Account Group and the General Fixed Assets Account Group.

Fund Types

Governmental Funds are used to account for the State's general activities.

The General Fund is the primary operating fund of the State. It is used to account for all governmental transactions that are not accounted for in other funds.

Special Revenue Funds account for specific revenue sources and the related current liabilities, other than Expendable Trusts, and include major capital projects that are legally restricted to expenditures for specified purposes.

Capital Projects Funds account for financial resources used to acquire or construct major capital assets other than those financed by Proprietary Funds or Special Revenue Funds. These resources are derived primarily from proceeds of general obligation bonds. The State also includes in this fund type proceeds from bond issues for uses other than construction of major capital facilities.

Proprietary Funds are used to account for ongoing activities similar to those in the private sector.

Enterprise Funds account for transactions related to resources received and used to finance self-supporting activities of the State. These activities offer products and services on a user-charge basis to the general public.

Internal Service Funds account for transactions related to the financing and sale of goods or services between State agencies. The costs associated with these goods or services are billed to the recipient agency as user charges.

Fiduciary Funds are used to account for assets held by the State, acting as either a trustee or an agent for individuals, organizations, or other funds.

Expendable Trust Funds account for those assets held in a trustee capacity where the principal and income may be expended in the course of the funds' designated operations.

Nonexpendable Trust Funds account for those assets held in a trustee capacity by the State for which only income derived from the trust principal may be expended for designated operations. The principal must be preserved intact.

Agency Funds account for assets the State holds on behalf of others. Agency Funds are custodial in nature and do not involve measurement of operations.

Account Groups

General Long-Term Obligations Account Group is used to establish control and accountability for long-term obligations of the State not accounted for in Proprietary Funds or Nonexpendable Trust Funds. This includes outstanding, long-term obligations related to general obligation bonds; Certificates of Participation and other financing arrangements; compensated employee absences; net pension obligation and other long-term obligations.

General Fixed Assets Account Group is used to establish control and accountability for all fixed assets of the State not accounted for in Proprietary Funds.

Component Units

Component units include three College and University Funds and other organizations that are legally separate from the State but are considered part of the reporting entity.

Current Funds account for unrestricted funds, over which the governing Boards retain full control in achieving the Institutions' purposes, and for restricted funds, which may be used only in accordance with externally restricted purposes. The funds do not show the results of operations or the net income or loss for the period.

Loan Funds, Endowment and Similar Funds account for assets for which the Institutions act in a fiduciary capacity.

Plant Funds account for institutional property acquisition, renewal, replacement, and debt service.

C. MEASUREMENT FOCUS AND BASIS OF ACCOUNTING

Governmental Funds and Expendable Trust Funds are accounted for using a flow of current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they become both measurable and available. "Available" means earned and collected or expected to be collected within the current period or soon enough thereafter (within 12 months for individual income taxes or within 60 days for all other revenues) to be used to pay liabilities of the current period. Property taxes are recognized as revenue in the year for which they are levied, provided the "available" criterion is met.

The State Tax Assessor levies taxes on properties located in the Unorganized Territories of Maine and on telecommunications personal properties statewide by April 1 of each year. Property taxes levied during the current fiscal year for the subsequent period are recorded as deferred revenue during the current year. Telecommunications taxes are due on August 15, and all other property taxes are due on October 1. Formal collection procedures begin on November 1. Unpaid property taxes become a lien on March 15 of the fiscal year for which they are levied.

Significant revenues susceptible to accrual include: income, sales and use, unemployment compensation, and other taxes; federal grants; federal reimbursements; and other reimbursements for use of materials and services. Revenues from other sources are recognized when received. Expenditures are recorded at the time fund liabilities are incurred. Principal and interest on long-term obligations are recorded as fund liabilities when due.

Proprietary Fund Types and Nonexpendable Trust Funds are accounted for on a flow of economic resources measurement focus and the accrual basis of accounting. With this measurement focus, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. This measurement focus emphasizes the determination of net income. For Proprietary Funds, the State follows all applicable Financial Accounting Standards Board (FASB) pronouncements issued on or prior to November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements.

Agency Fund assets and liabilities are reported using the modified accrual basis of accounting. They are custodial in nature and neither measure results of operations nor have a measurement focus.

The component units' College and University Funds aggregate the Institutions' separate financial statements and are accounted for on the accrual basis of accounting, with one exception. The Maine Maritime Academy does not record depreciation expense on physical plant and equipment, which is allowed by governmental accounting standards.

The Maine State Retirement System's financial statements are prepared using the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan. Investment purchases and sales are recorded as of their trade date.

D. CASH AND CASH EQUIVALENTS, AND INVESTMENTS

The State follows the practice of pooling cash and cash equivalents for a variety of State agencies and public sector entities. Cash equivalents consist of short-term, highly liquid investments that are both readily convertible to known amounts of cash and are near maturity. The balances pooled are reported at cost, which approximates fair value. Interest earned on pooled cash is allocated to the various funds, generally based on their average equity balances. Cash with Fiscal Agent in Governmental Funds represents cash that will be used for debt service on bonds. Cash with Fiscal Agent in Proprietary Funds represents proceeds of Certificates of Participation and other financing arrangements that have not been spent.

Short-term investments reported as Cash and Cash Equivalents on the balance sheet are comprised primarily of prime commercial paper, repurchase agreements, U.S. Treasury Bills, U.S. Treasury Notes, and other U.S. Agency Obligations with maturities of three months or less when purchased. Other investments of the State are carried at fair value. Donated investments are stated at fair value at the date of donation.

Certain component units participate in the cash pool and record their balances as cash and investments. Component units' funds have been removed from cash and investments of the primary government and shown as component unit cash and investments for purposes of note disclosure. Component units' investments are shown at fair value.

E. ASSETS HELD IN TRUST

These assets are held by the State in a fiduciary capacity, acting as either a trustee or an agent for individuals, organizations or other funds. The State also holds \$106 million of Workers' Compensation and Employment Security surety bonds which are not reflected on the Balance Sheet.

F. UNEMPLOYMENT DEPOSITS WITH UNITED STATES TREASURY

These deposits represent unemployment tax receipts deposited with the United States Treasury that are drawn down to pay unemployment benefits.

G. RESTRICTED DEPOSITS AND INVESTMENTS

Restricted deposits and investments represent funds that have been invested in Certificates of Deposit and other investments at various financial institutions within the State. The financial institutions lend these deposits and investments to local commercial and agricultural enterprises to foster economic growth in Maine. Also included in this category are cash and investments of the Maine Government Facilities Authority, a blended component unit that has been independently audited.

H. RECEIVABLES

Receivables consist primarily of amounts due to the State from taxpayers and service providers. Also included in receivables are amounts due but not yet remitted to the State from lottery sales by agents. Loans receivable for the primary government represent low interest financing arrangements for the construction and modernization of agricultural storage facilities and local commercial enterprises, as well as Department of Transportation loans to local governments. The receivables in the component units column are amounts that have arisen in the normal course of business. Receivables are stated net of estimated allowances for uncollectible amounts that are determined based upon past collection experience and aging of the accounts.

I. INTERFUND TRANSACTIONS

Numerous transactions are made between funds to finance operations, provide services, and acquire or construct assets. To the extent that certain transactions between funds were not completed as of June 30, 2001, interfund receivables or payables have been recorded. Receivables and payables resulting from transactions between funds are classified as "Due from Other Funds" or "Due to Other Funds" on the balance sheet.

The Bureau of Alcoholic Beverages and Lottery Operations is statutorily required to transfer all net earnings to the General Fund. For fiscal year 2001, these transfers totaled \$61.9 million.

Advances to and from other funds are long-term loans made by one fund to another. Receivables and payables resulting from these transactions between funds are classified as "Working Capital Advances Receivable" or "Working Capital Advances Payable" on the balance sheet. The advances are offset by reservations of fund balance indicating that the reserves do not constitute expendable financial resources.

Receivables and payables between the component units and the primary government are classified as "Due to/from Primary Government" or "Due to/from Component Units."

J. INVENTORIES

The costs of materials and supplies of the Governmental Funds are reported as expenditures when purchased. Unexpended balances of food stamps (stated at coupon value) and vaccines at fiscal year end are reported as inventory and deferred revenue in the Special Revenue Fund. Revenues and corresponding expenditures are recognized when the food stamps and vaccines are issued.

Inventories of materials and supplies in the Proprietary Funds are determined by physical counts and by perpetual inventory systems. Proprietary Fund inventories are stated at cost or average cost, except for those of the Bureau of Alcoholic Beverages, which are maintained on a current replacement cost basis. Although this basis is not in conformity with GAAP, it does not result in a material misstatement.

Inventories included in the component unit column are stated at the lower of cost (using the first-in, first-out method) or market.

K. FIXED ASSETS

For Governmental Funds, fixed asset acquisitions are recorded as expenditures in the acquiring fund. Buildings valued at \$1 million or more, equipment valued at \$3 thousand or more, and all land, regardless of value, are capitalized in the General Fixed Assets Account Group. They are capitalized at cost or, if not purchased, at fair value as of the date of acquisition. In assembling the GFAAG for the first time in 2001, fixed asset costs for buildings were not available; historical costs of these assets, valued at \$117 million, have been estimated using current replacement cost appraisals adjusted back to estimated dates of construction using consumer price index tables. Depreciation is not recorded on general fixed assets. Infrastructure assets, such as highway curbs, bridges, and lighting systems, are not capitalized. Fixed asset acquisitions of Proprietary Funds are accounted for in the acquiring fund and stated net of accumulated depreciation. Depreciation is recorded on a straight-line basis over the assets' estimated useful lives, which are 10-40 years for buildings and improvements, and 2-25 years for equipment. No interest has been capitalized on self-constructed assets, since non-capitalization of interest does not materially affect the financial statements.

Fixed assets of component units are capitalized upon purchase and depreciated over the estimated useful lives of the assets. Interest incurred during construction is capitalized. The estimated useful lives of fixed assets are 5-60 years for structures and improvements and 3-15 years for equipment, furniture, fixtures and vehicles. The Maine Maritime Academy does not record depreciation, which is allowed by governmental accounting standards.

L. TAX REFUNDS PAYABLE

Tax refunds payable primarily represent amounts owed to taxpayers because of overpayments of their 2000 calendar year tax liabilities. Tax refunds are accrued based on payments and estimates.

M. CLAIMS PAYABLE

Claims payable represent workers' compensation and other claims payable at June 30, 2001. These include actual claims submitted, as well as actuarially determined claims incurred but not reported. The actuarially determined claims liability is discounted and presented at net present value.

N. DEFERRED REVENUE

Amounts recorded as receivable that do not meet the "availability" criterion for recognition as revenue in the current period are classified as deferred revenue. Resources received by the government before it has a legal claim to them are also included as deferred revenue. In subsequent periods, when the revenue recognition criterion is met or when the government has a legal claim to the resources, the liability for deferred revenue is removed from the balance sheet and revenue is recognized. Deferred revenue reported in the General Fund is comprised of sales and income taxes. Deferred revenue in the Special Revenue Fund is primarily for food stamps and vaccines not yet issued, and for taxes assessed on public utilities in the State.

O. DUE FROM/TO OTHER GOVERNMENTS

At June 30, 2001, amounts Due from/to Other Governments represent amounts receivable from or payable to municipalities or the federal government. Due to Other Governments are primarily amounts owed to municipalities for Municipal Revenue Sharing and the federal government for Medicaid cost recoveries from providers. Municipal Revenue Sharing and Medicaid cost recoveries are recorded in the Special Revenue Fund. Due from Other Governments represents primarily federal grants receivable for Medicaid claims, other Human Services Programs, and federal grants receivable for transportation-related expenditures. Due from Other Governments in the component units column represents money due from other governments for grants, bond repayment and retirement benefits.

P. COMPENSATED EMPLOYEE ABSENCES

Under the terms of collective bargaining agreements and personnel administrative policies, employees are granted limited amounts of vacation, sick, and personal days, as well as compensatory time. Upon separation from State service, employees are eligible for compensation for accrued vacation, personal days, compensatory time, and (in some cases) sick leave. For Governmental Funds, vested or accumulated leave expected to be liquidated with current available financial resources is reported as an expenditure and fund liability. Other leave is reported in the General Long-Term Obligations Account Group. Compensated employee absence benefits in the Proprietary Funds are recorded as expenses and liabilities as they accrue.

In the discretely presented component units, employees' accumulated compensated absences are recorded as an expense and liability as the benefits accrue.

Q. OTHER ACCRUED LIABILITIES

Other liabilities in the Enterprise Fund consist primarily of lottery prizes payable.

R. LONG-TERM OBLIGATIONS

Primary Government

The State records Governmental Fund long-term obligations in the General Long-Term Obligations Account Group. This includes the State's general obligation bonds, Certificates of Participation and other financing arrangements, long-term liabilities for compensated employee absences, and the net pension obligation. Also included in the General Long-Term Obligations Account Group are bonds and notes issued by the Maine Governmental Facilities Authority, a blended component unit.

Long-term debt and other obligations of the Proprietary Funds, as well as the related interest payments, are recorded as liabilities in the appropriate funds.

Component Units

Loans, notes, and bonds payable for component units are for commercial financing, educational loans, and loans to counties, cities, towns, school administrative districts, other quasi-municipal corporations, multifamily low income residential units, and the construction or capital improvement of school facilities and health care facilities.

S. FUND BALANCES

The State reports fund balances as reserved where legally restricted for a specific future use. Otherwise, these balances are considered unreserved. The State has the following reservations:

Reserved for Continuing Appropriations - identifies appropriations and encumbrances that the Legislature has specifically authorized to be carried into the next fiscal year if unexpended. The State's use of encumbrance accounting is more fully described in Note 2 – Budgetary Process.

Reserved for Unemployment Benefits - identifies amounts reserved for payment of unemployment compensation.

Reserved for Nonexpendable Trusts - identifies the nonexpendable amount of the trust principal.

Reserved for Rainy Day Fund – identifies amounts reserved for potential operating deficits or other emergencies. The maximum amount this fund may carry, by law, is six percent of the total General Fund revenues received in the immediately preceding year.

Reserved for Pension Benefits – identifies amounts reserved by the Maine State Retirement System for the payment of pension benefits.

Reserved for Debt Service - identifies amounts reserved for payment of future debt service obligations.

Reserved for Capital Projects - identifies a legally segregated portion of funds available to finance the construction of major capital facilities.

Other Reservations - identifies fund balance reserved for other specified purposes including amounts for working capital needs, long-term loans to other funds, transfers to other funds, and contingency funds from which the Governor may allocate sums for various purposes.

Contributed Capital - identifies equity acquired through contributions from other funds.

T. TOTAL COLUMN - MEMORANDUM ONLY

Total columns included in certain statements are captioned “Memorandum Only” because they do not represent consolidated financial information and are presented for information only.

U. FUTURE ADOPTION OF ACCOUNTING PRONOUNCEMENTS

In June 1999, GASB issued Statement No. 34, *Basic Financial Statements and Management’s Discussion and Analysis for State and Local Governments*. In June 2001, GASB issued Statement No. 37, *Basic Financial Statements and Management’s Discussion and Analysis for State and Local Governments: Omnibus* and Statement No. 38 *Certain Financial Statement Note Disclosures*. These statements establish new financial reporting requirements for State and local governments. They mandate that the basic financial statements and required supplementary information (RSI) for general purpose financial statements consist of Management’s Discussion and Analysis, Basic Financial Statements and Required Supplementary Information. The provisions are effective for financial statements for periods beginning after June 15, 2001. The State will implement GASB 34, 37 and 38 for the year ending June 30, 2002.

In November 1999, GASB issued Statement No. 35, *Basic Financial Statements and Management’s Discussion and Analysis for Public Colleges and Universities*. An amendment to GASB Statement No. 34, this statement establishes new financial reporting requirements for public colleges and universities that are consistent with the requirements of GASB Statement No. 34. Because the University of Maine System, the Maine Technical College System and the Maine Maritime Academy are component units of the State of Maine, the provisions of this statement are effective no later than the year in which the State implements GASB Statement No. 34.

NOTE 2 - BUDGETARY PROCESS

In accordance with statute, the Governor presents a biennial budget for the General Fund and the Special Revenue Funds to the Legislature for enactment or revision. Effective November 27, 1995, a State Constitutional Amendment provided the Governor a “line item” veto of dollar amounts, allowing a dollar substitution for those amounts disapproved, as long as an appropriation or allocation is not increased (or a deappropriation or deallotment decreased) either in the specified line or in any other line in the legislative document. Another Constitutional Amendment requires the State to fund at least 90 percent of the annual cost of future mandates imposed on local governments; any exception requires a two-thirds vote of the elected members of the House and Senate.

Once passed and signed, the budget becomes the financial plan for the next biennium. It includes proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also includes anticipated revenues and any other means of financing expenditures. In 1995, the Revenue Forecasting Committee was established.

In fiscal year 1998, a law was passed that requires the State Budget Officer to use the revenue projections of the Revenue Forecasting Committee in preparing the General Fund and Highway Fund budgets.

Budgetary control is maintained at the program and line category level at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Budget Officer and the Governor must approve budget revisions during the year, reflecting program changes or intradepartmental administrative transfers. Except in specific instances, only the Legislature may transfer appropriations between departments. Increases in appropriation, allocation, or funding for new programs are presented to the Legislature as a supplemental budget. In order to provide sufficient funding for several programs during the year ended June 30, 2001, supplemental appropriations of \$403.8 million were required for the General Fund.

Encumbrance accounting, which requires that purchase orders, contracts, and other commitments be recorded to reserve a portion of an appropriation or allocation for expenditure, is employed as an extension of formal budgetary control. Appropriated and allocated balances are available for subsequent expenditure to the extent that encumbrances have been approved by the end of a fiscal year. Encumbrances outstanding at year end are reported as reservations of fund balances representing those portions of fund balances that are not available for allocation or expenditure or that are legally segregated for specific future uses. Unencumbered appropriations in the General Fund and in the Highway Fund lapse at year end unless, by law, they are carried forward to a subsequent year.

The State's budget is prepared primarily on a cash basis. Significant exceptions include sales, income, corporate and fuel taxes for which 60-day accruals are recorded at year end. A reconciliation of the General Fund and the Special Revenue Fund to the GAAP basis is presented in the following table.

Budget to GAAP Reconciliation

June 30, 2001

(Dollars in Thousands)

	<u>General Fund</u>	<u>Special Revenue Fund</u>
Fund Balances - Non-GAAP Budgetary Basis	\$ 365,562	\$ 415,610
Basis Differences		
Revenue Accruals/Adjustments:		
Taxes Receivable	175,594	19,677
Intergovernmental Receivables	-	41,832
Other Receivables	13,997	(14,000)
Due from Other Funds	1,444	539
Other Assets	10,995	(7,349)
Deferred Revenues	<u>(29,475)</u>	<u>(1,560)</u>
Total Revenue Accruals/Adjustments	<u>172,555</u>	<u>39,139</u>
Expenditure Accruals/Adjustments:		
Accounts Payable	(87,512)	(34,836)
Due to Component Units	(1,938)	(6,385)
Accrued Liabilities	(17,611)	(13,554)
Due to Other Funds	(11,467)	(5,604)
Tax Refunds Payable	<u>(108,018)</u>	<u>-</u>
Total Expenditure Accruals/Adjustments	<u>(226,546)</u>	<u>(60,379)</u>
Entity Differences		
Blended Component Unit included in the Special Revenue Fund on the GAAP basis but not on the budgetary basis	<u>-</u>	<u>32,264</u>
Fund Balances - GAAP Basis	<u>\$ 311,571</u>	<u>\$ 426,634</u>

NOTE 3 - FUND BALANCE AND RETAINED EARNINGS RESTATEMENTS

Fund balances/retained earnings as of June 30, 2000, have been restated:

Restatement of Fund Balances/Retained Earnings (Dollars in Thousands)

<u>Fund</u>	<u>Fund Balance/Retained Earnings as Previously Reported, June 30, 2000</u>	<u>Increase (Decrease) for Restatement</u>	<u>Fund Balance/Retained Earnings as Restated, July 1, 2000</u>
Capital Projects Fund	\$ 74,312	\$ 6,549	\$ 80,861
Enterprise Fund	(5,108)	13,107	7,999
Expendable Trust	587,596	(207,316)	380,280
Component Unit – Gov'tal	159,052	873	159,925

The Capital Projects Fund has been restated to adjust amounts accrued as due to component units in the prior period. The Enterprise Fund has been restated to record prior year depreciation of fixed assets acquired from Contributed Capital. Contributed Capital for the Enterprise Fund has been reduced to record that depreciation, and to record a \$16.8 million asset, contributed in a prior period, which was not previously reported. The Expendable Trust fund balance has been restated because the Deferred Compensation Program is no longer reflected on the financial statements of the State of Maine due to a change in the interpretation of Governmental Accounting Standards Board Statement Number 32, *Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans*. The Component Unit (governmental type) fund balance has been restated to include the Child Development Services System as a discretely presented component unit.

NOTE 4 - DEFICIT FUND BALANCES/RETAINED EARNINGS

Two Internal Service Funds showed deficit Retained Earnings for the fiscal year ended June 30, 2001. The Workers' Compensation Fund was at a deficit of \$71.5 million, which reflects accruals for actuarially determined claims payable. The Property Lease Fund was at a deficit of \$523 thousand, which reflects the recording of capital lease depreciation.

NOTE 5 - DEPOSITS AND INVESTMENTS

The deposit and investment policies of the State of Maine Office of the Treasurer are governed by Title 5 of the Maine Revised Statutes Annotated (M.R.S.A.). Per 5 M.R.S.A. § 135, the Treasurer of State may deposit State funds, including trust funds of the State, in any of the banking institutions (including trust companies, State or federal savings and loan associations, and mutual savings banks) organized under the laws of this State and any national bank or federal savings and loan association located in the State.

The Treasurer of State may invest funds that exceed current obligations, with the concurrence of the State Controller or the Commissioner of Administrative and Financial Services and the consent of the Governor. Approved investments include bonds, notes, certificates of indebtedness, other obligations of the United States that mature not more than 24 months from the date of investment; repurchase agreements secured by obligations of the United States that mature within the succeeding 24 months; prime commercial paper; tax-exempt obligations; banker's acceptances; and shares of an investment company registered under the Federal Investment Company Act of 1940, whose shares are registered under the United States Security Act of 1933, only if the investments of the company are limited to obligations of the United States or repurchase agreements secured by obligations of the United States. The Treasurer is authorized to participate in the securities loan market by

lending State-owned bonds, notes or certificates of indebtedness of the federal government when the loans are fully collateralized by treasury bills or cash. The State does not participate in the securities loan market. The State's investment types are more fully described in Notes 1D, E, F and G.

Investment policies of the permanent trust funds are governed by 5 M.R.S.A. § 138. The Treasurer of State, with the approval of the Commissioner of Administrative and Financial Services, the Superintendent of Financial Institutions and the Attorney General, shall invest the funds in securities that are legal investments in accordance with Title 9-B, M.R.S.A. The investments need not be segregated to the separate trust funds, but the identity of each separate trust fund must be maintained. The State may enter into custodial care and servicing contracts or agreements negotiated in accordance with the laws of this State for the handling of funds held in trust.

With assistance from the Finance Authority of Maine, the State Treasurer participates in a restricted deposit program to encourage banks to provide loans at two percent below market rates. The Treasurer may invest up to eight million dollars in lending institutions at a two percent lower-than-market rate provided the lenders pass the rate reduction on to the borrowers. Four million dollars of this program are earmarked for loans to agricultural enterprises, and the other four million dollars are designated for commercial entities.

No amounts exceeding 25% of the capital, surplus, and undivided profits of any trust company or national bank, or 25% of the reserve fund and undivided profits of a mutual savings bank or State or federal savings and loan association, shall be on deposit in any one institution at any one time. This restriction does not apply to deposits subject to immediate withdrawal to meet the payment of any bonded debt or interest or to pay current bills or expenses of the State. Also exempt are deposits secured by the pledge of certain securities as collateral or fully covered by insurance.

DEPOSITS

Deposits with financial institutions are classified by collateral risk into three categories. Category 1 is the amount of State deposits that are fully insured or collateralized with securities held by the State or its agent in the State's name. Category 2 is the amount of deposits that are collateralized with securities held by the pledging financial institution's trust department or agent in the State's name. Category 3 is the amount of deposits that are neither collateralized nor insured.

Deposits of the Reporting Entity at June 30, 2001 are:

Primary Government - Deposits					
June 30, 2001					
(Dollars in Thousands)					
	Category 1	Category 2	Category 3	Bank Balance	Carrying Amount
Cash and Cash Equivalents	\$ 182,746	\$ 10,956	\$ 6,100	\$ 199,802	\$ 123,120
Cash with Fiscal Agent	-	17,093	311	17,404	17,404
Restricted Deposits	<u>5,564</u>	<u>-</u>	<u>3,504</u>	<u>9,068</u>	<u>9,068</u>
Total	<u>\$ 188,310</u>	<u>\$ 28,049</u>	<u>\$ 9,915</u>	<u>\$ 226,274</u>	<u>\$ 149,592</u>

Deposits of the discretely presented component units are:

Component Unit - Deposits					
(Dollars in Thousands)					
	<u>Category 1</u>	<u>Category 2</u>	<u>Category 3</u>	<u>Bank Balance</u>	<u>Carrying Amount</u>
Cash and Cash Equivalents	\$ 103,160	\$ 103,106	\$ 42,889	\$ 249,155	\$ 241,075

INVESTMENTS

Investments are classified to indicate the level of risk assumed by the State. Category 1 consists of investments that are insured or registered or for which the securities are held by the State or its agent in the State's name. Category 2 are those investments that are uninsured and unregistered, with securities held by the counterparty's trust department or agent in the State's name. Category 3 includes uninsured and unregistered investments for which the securities are held by the counterparty or its trust department or agent, but not in the State's name.

Investments of the Primary Government at June 30, 2001 are:

COMPONENT UNITS

Generally, component unit investment policies authorize investments in obligations of U.S. Treasury and Agency Securities, repurchase agreements, corporate bonds, certificates of deposit and money market funds. Some component units may invest in stocks, bonds, fixed income securities, mutual funds, commingled mutual funds and index funds, guaranteed investment contracts, real estate and other investment securities.

The Maine Educational Loan Authority (MELA) had entered into an interest rate exchange agreement to manage its interest rate exposure on its variable rate education loans. The agreement calls for MELA to receive fixed rate interest payments in exchange for variable market-indexed interest payments. The amounts potentially subject to credit risk are the streams of payments under the agreement and not the notional amount of the contracts. This agreement involves not only the risk of default by the other party, but also the interest rate risk if positions are not matched. MELA does not obtain collateral from the counterparty to secure the amounts subject to credit risks. The notional principal amount of the interest rate swap agreement outstanding at December 31, 2000 was \$4.8 million. The termination date of the agreement is December 1, 2006.

Maine State Retirement System (The System) makes investments in a combination of equities, fixed income securities, mutual funds, commingled mutual and index funds, derivative financial instruments, and other investment securities established by the Trustee's investment policy. The System prohibits its investment managers from using leverage in its derivative financial instruments or from investing in speculative positions. The System has also entered into agreements for securities lending transactions, which are collateralized in an amount at least equal to 102 percent (105 percent for international securities) of the market value of the securities loaned.

Investments of the discretely presented component units are:

Totals	<u>\$ 7,497,871</u>	<u>\$ 475,277</u>	<u>\$ 108,515</u>	<u>\$8,081,663</u>

The State's internal investment pool consists primarily of commercial paper with maturities of up to 90 days and U.S. Government and Agency obligations with maturities of up to two years. Certain component units also invest in the pool; their participation comprises approximately ten percent of pool assets. The component units reported their participation as Cash and Cash Equivalents on their financial statements. The State has reclassified \$71 million of the component units' participation as investments on the State's financials.

NOTE 6 - RECEIVABLES

NOTE 9 - MAINE STATE RETIREMENT SYSTEM

PLAN DESCRIPTION

The Maine State Retirement System is the administrator of an agent, multiple-employer, defined benefit public employee retirement system established and administered under the Maine State Retirement System Laws, Title 5 M.R.S.A., C. 421, 423, and 425. The System is a component unit of the State. Financial information for the System is included in the discretely presented component unit column on the Combined Balance Sheet and in the Statement of Changes in Net Assets Available for Pension Benefits. Condensed financial statement information is presented in Note 13 Segment Information for Enterprise Funds and Component Units. The Maine State Retirement System issues a stand-alone financial report.

The System provides pension, death, and disability benefits to its members, which include employees of the State, public school employees who are defined by Maine law as teachers for whom the State is the employer for retirement contribution purposes, and employees of approximately 250 local municipalities and other public entities in Maine, each of which contracts for participation in the System under provisions of relevant statutes.

At June 30, 2001, the membership consisted of:

Active vested and nonvested members	51,908
Terminated vested participants	2,291
Retirees and benefit recipients	<u>29,566</u>
Total	<u>83,765</u>

The System's retirement programs provide retirement benefits based on members' average final compensation and creditable service. Vesting occurs upon the earning of ten years of service credit or the earning of one year of service credit immediately preceding retirement at or after normal retirement age. Normal retirement age is age 60 or 62, determined by whether the member had at least 10 years of creditable service on June 30, 1993 (effective October 1, 1999, the ten-year requirement was reduced to five years by legislative action). The monthly benefit is reduced by a statutorily prescribed factor for each year of age that a member is below her/his normal retirement age at retirement. The system also provides death and disability benefits, which are established by statute for State and public school employees, and by contract with other participating employers under applicable statutory provisions.

Upon termination of membership, members' accumulated employee contributions are refundable with interest, credited in accordance with statute. Withdrawal of accumulated contributions results in forfeiture of all benefits. The annual rate of interest credited to terminated members' accounts is set by the System's Board of Trustees and is currently 6.0 percent.

In the event that a participating entity withdraws from the System, its individual employee-members can terminate membership or remain contributing members. The participating entity remains liable for contributions sufficient to fund benefits for its already retired former employee-members; for its terminated vested members; and for those active employees, whether or not vested, who remain contributing System members.

Contributions from members and employers and earnings from investments fund retirement benefits. Employer contributions and investment earnings fund disability and death benefits. Member and employer contributions are a percentage of applicable member compensation. Member contribution rates are defined by law and depend on the terms of the plan under which a member is covered. Employer contribution rates are determined by annual actuarial valuations.

The total funds managed by the System are constitutionally restricted as held in trust for the payment of pension and related benefits to its members. The System's Board of Trustees, in its fiduciary capacity, establishes the System's investment policies and their overall implementation. The System maintains separate reserves and accounts for each participating entity and performs separate actuarial valuations for each participating entity's respective plan. The Maine State Retirement System management's interpretation of the State of Maine statutes is that all assets accumulated for the payment of benefits may legally be used to pay benefits, including refunds of member contributions, to any plan members or beneficiaries. The System is therefore regarded as administering a single plan for reporting purposes. The State's legal counsel does not concur with the accumulated assets representation. Additional disclosures would be necessary to report this as more than one plan in conformity with generally accepted accounting principles.

The System also provides group life insurance under a plan that is administered by a third party insurance company. Premiums paid by or on behalf of those covered are set and collected by the System. The insurance company makes benefit payments. The System remits payments to the insurance company in the amount of benefits paid out and additional payments representing administrative fees.

FUNDING POLICY

The Maine Constitution, Maine Statutes and the System’s funding policy provide for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate adequate assets to pay benefits when due. Level percentage of payroll employer contribution rates are determined using the entry age normal actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State and teacher plan over a closed 25-year period from June 30, 1998. For participating local districts, either the level percentage of payroll method or the level dollar method is used, depending on plan structure, status of the participating local district, nature of the unfunded liability (i.e., separate or pooled) and the amount of the unfunded liability. Amortization periods range from 2 years to 28 years.

The State of Maine is required to remit 25% of its budgetary surplus at the end of its fiscal year to the System, in order to reduce any unfunded pension liability for State employees and teachers. During the fiscal year ended June 30, 2001, however, the law was amended in a manner that resulted in no additional contribution from the State budgetary surplus.

Significant actuarial assumptions used to compute the contribution requirements are the same as those used to compute the standardized measure of the pension obligation.

The actuarially determined contribution rates in effect for 2001 for participating entities are:

<u>State:</u>	
Employees ¹	7.65-8.65%
Employer	14.81-43.90%
<u>Teachers:</u>	
Employees	7.65%
Employer	18.34%
<u>Participating Local Entities:</u>	
Employees	6.5-8.0%
Employer ¹	1.5-6.5%

¹ Contribution rates vary depending on specific terms of plan benefits for certain classes of employees or benefit plan options selected by a particular participating local entity. Withdrawn entities’ contributions are set in dollar amounts, not as rates.

ANNUAL PENSION COST AND NET PENSION OBLIGATION

The employer’s annual pension cost and net pension obligation to the System for the current year were:

Net Pension Obligation (Dollars in thousands)	
Annual required contribution	\$253,880
Interest on net pension obligation	5,939
Adjustment to annual required contribution	<u>(4,841)</u>
Annual pension cost	254,978
Contributions made	<u>253,880</u>
Increase (decrease) in net pension obligation	1,098
Net pension obligation beginning of year	<u>74,243</u>
Net pension obligation end of year	<u>\$ 75,341</u>

Analysis of Funding Progress
(Dollars in thousands)

<u>Year</u>	<u>Annual Pension Cost</u>	<u>Percentage Covered</u>	<u>Net Pension Obligation</u>
2001	\$ 254,978	99.57%	\$ 75,341
2000	241,189	100.85%	74,243
1999	255,451	107.54%	76,295

The annual required contribution for the current year was determined as part of the June 30, 2001 actuarial valuation using the entry age normal cost method based on a level percentage of covered payrolls. The actuarial assumptions included (a) 8% return on investments and (b) projected salary increases of 5.5% to 9.5% per year, including inflation of 5.5%. The assumptions include post retirement benefit increases of 4% per annum. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State and teacher plan over a closed 19-year period from June 30, 2000. For participating local districts, either the level percentage of payroll method or the level dollar method is used, depending on plan structure, status of the participating local district, nature of the unfunded liability, (i.e., separate or pooled) and the amount of the unfunded liability. Amortization periods range from 4 to 16 years.

COMPONENT UNIT PENSION DESCRIPTION

The Maine Municipal Bond Bank, Maine Maritime Academy, Maine State Retirement System, and University of Maine have defined benefit pension plans. All except the University of Maine System are participants in plans administered by the Maine State Retirement System. Employees of the Maine Technical College System and the Northern New England Passenger Rail Authority are considered to be State employees for retirement benefit purposes and are included in the pension disclosures of the State.

Employer contributions met actuarially determined contribution requirements.

OTHER PLANS

MTCS also has an optional program with the Teachers Insurance and Annuity Association - College Retirement Equities Fund (TIAA-CREF), which is a defined contribution plan, to which the MTCS contributes 12.88 percent of total salaries for participating employees or 6.04 percent for MEA employees.

UMS also has a defined contribution program with TIAA-CREF. The University contributes approximately 10 percent of base salary of participants. All full time employees are eligible, and part-time employees are eligible once they have achieved the equivalent of five years of continuous, full-time service. All eligible employees are required to participate in this Plan when they reach thirty years of age.

LDA, FAME and CDS have Simplified Employee Pension Plans. MSHA has a defined contribution plan created under the provisions of the Internal Revenue Code Section 401(a). MHHEFA has a discretionary contributory profit sharing plan and a defined contribution plan created under the provisions of the Internal Revenue Code Section 401(k).

NOTE 10 - OTHER POSTEMPLOYMENT BENEFITS

POST RETIREMENT HEALTH CARE BENEFITS

The State of Maine funds postretirement health care benefits for most retired State employees and legislators, as authorized by 5 M.R.S.A. § 285, and for a portion of the premiums for teachers, as authorized by 20-A M.R.S.A. § 13451. Pursuant to 5 M.R.S.A., § 285, most retired employees of the Maine Turnpike Authority, the Maine Technical College System, the Maine Maritime Academy, and the Maine State Retirement System are eligible to participate in the health plan but are not funded by the State. Specifically excluded (5 M.R.S.A., § 285 1-B) are members of the Maine Municipal Association, the Maine Teachers Association and employees of counties and municipalities and their instrumentalities.

The State pays 100 percent of post retirement health insurance premiums for retirees who were first employed before July 1, 1991. A pro rata portion, ranging from zero percent for retirees with less than five years participation to 100 percent for retirees with ten or more years of participation, is paid for eligible individuals first employed after July 1, 1991. Retirees eligible for Medicare are covered under supplemental insurance policies. The retiree must pay for Medicare Part B coverage to be eligible to participate in the State-funded Companion Plan. Coverage for retirees who are not eligible for Medicare includes basic hospitalization;

supplemental major medical and prescription drugs; and costs for treatment of mental health, alcoholism, and substance abuse.

Retiree health care benefits have been funded on a pay-as-you go basis. For retired State employees, the State estimated the total amount necessary to pay health insurance premiums. This amount is generated using a contribution rate (5.47 percent for July 1, 2000, through April 24, 2001, and 7.39 percent for April 25, 2001, through June 30, 2001), authorized by 5 MRSA § 286-A, multiplied by the value of the current employee payroll. The amounts contributed were reported as expenditures/expense in each of the various funds. For retired teachers, the State estimates the total annual amount necessary to pay its 30 percent share of health insurance premiums. This amount, less any accumulated funds remaining from prior years' estimates, is appropriated and reported as expenditures in the General Fund. Contributions resulting from both sources are accumulated in and reported as revenue of the Retiree Health Insurance Internal Service Fund. The State's share of the premium expense is paid from that fund when retiree payrolls are processed. The State's management proposed funding retiree healthcare benefits using rates, which have been developed actuarially, beginning in fiscal year 2001.

As of July 1, 2001, there were 7,039 retired eligible State employees and 6,027 retired teachers. In the 2001 fiscal year, the State paid into the Retiree Health Insurance Fund \$27.4 million for retired employees and \$4.3 million for retired teachers. Premium charges paid were \$20.5 million and \$5.0 million, respectively. Overall fund equity increased by \$11.7 million to \$36.2 million at June 30, 2001. The most recently available, State sponsored, actuarial study was issued for fiscal year 2000. The study estimated the amount of the liability for current and future retirees, as of July 1, 2000, was \$725.3 million. This includes benefits for 13,424 current retirees as well as 41,601 currently active employees expected to retire in the future. The report does not consider employees not yet hired as of July 1, 2000.

POST RETIREMENT LIFE INSURANCE BENEFITS

The Maine State Retirement System (MSRS) provides certain life insurance benefits for retirees who, as active employees, participated in the Group Life Insurance Program for a minimum of ten years. Payments of claims are made by the MSRS from a fund containing the life insurance premiums of active State employees and teachers, plus earnings on the investments of the fund. In addition to the cost of claims, the State pays a monthly retention fee to a life insurance company. For the fiscal year ended June 30, 2001, claims totaled \$1.7 million for retired State employees and \$1.1 million for retired teachers. The number of participants eligible to receive benefits at fiscal year end was 6,027 retired State employees and 4,451 retired teachers.

NOTE 11 - LONG-TERM OBLIGATIONS

Primary Government

The State records its liability for bonds in the General Long-Term Obligations Account Group (GLTOAG). The State has also included in the GLTOAG \$159.3 million in other financing arrangements to reflect revenue bonds issued by the Maine Governmental Facilities Authority, a blended component unit. Payment of the bonds is subject to, and dependent upon, biennial appropriations being made by the State Legislature. Debt issued by the Authority is not debt of the State or any political subdivision within the State; and the State is not obligated for such debt, nor is the full faith and credit of the State pledged for such debt. Other general long-term obligations recognized by the State are its compensated employee absences and its obligations under Certificates of Participation and other financing arrangements. Payments for these liabilities will be made from the Governmental Funds.

GENERAL OBLIGATION BONDS

Programs for which the State issues general obligation bonds include: adaptive equipment loan programs; environmental cleanup and protection; highway and transportation related projects; agricultural and small business job creation; and acquisition, construction, and renovation of major capital facilities including State parks and historic sites. General obligation bonds are secured by the full faith and credit of the State. Debt service requirements are provided by legislative appropriation from the State's general tax revenues and are repaid in annual installments beginning not more than one year after issuance.

Changes in general obligation bonds during the fiscal year are:

Primary Government - Changes in General Obligation Bonds

Total	<u>\$ 406,490</u>	<u>\$ 73,297</u>	<u>\$ 479,787</u>

AUTHORIZED UNISSUED BONDS

Any bonds not issued within five years of the date of ratification may not be issued after that date. Within two years after expiration of the five-year period, the Legislature may extend, by a majority vote, the five-year period for an additional five years or may deauthorize the bonds. If the Legislature fails to take action within those two years, the bond issue shall be considered to be deauthorized and no further bonds may be issued. At June 30, 2001, general obligations bonds authorized and unissued totaled \$93.3 million. The Maine Governmental Facilities Authority, a blended component unit, may not issue securities in excess of \$211 million outstanding at any one time except for the issuance of certain revenue refunding securities. The Legislature may increase this limit as necessary to meet the Authority's needs.

CERTIFICATES OF PARTICIPATION AND OTHER FINANCING ARRANGEMENTS

The State uses financing companies, Certificates of Participation (COP's), and lease/purchase agreements to finance the construction of certain State buildings and to purchase equipment and vehicles. Certificates of Participation are issued through a trustee, and the State is responsible for payments to the trustee that approximate the interest and principal payments made to the certificate holders. The State maintains custody and use of the assets; however, the trustee holds a lien as security until such time as the certificates are fully paid. Neither Certificates of Participation nor the other financing arrangements constitute a legal debt, liability, or contractual obligation in excess of amounts appropriated. The State's obligation to make minimum payments or any other obligation under agreements is subject to, and dependent upon, appropriations being made by the Legislature. The Legislature has no obligation to appropriate the money for future minimum payments or other obligations under any agreement.

OBLIGATIONS UNDER CAPITAL LEASES

The State of Maine has entered into long-term capital leases to buy certain fixed assets. Leases, which are in substance purchases, are classified as capital leases and the resulting assets and liabilities are recorded at lease inception. Assets acquired through capital leases are valued at the lower of fair market value or the present value of the minimum lease payments at the inception of the lease. The State accounts for lease commitments in the proprietary funds.

Leases that exist between the State and the Maine Governmental Facilities Authority (MGFA), a blended component unit, are not recorded as leases for financial reporting purposes. These leases are eliminated and the liabilities of the MGFA are included in the Special Revenue Fund. Capital lease commitments of the University of Maine System (UMS) are reported in the UMS Plant Funds. At June 30, 2001, property acquired under capital leases totaled \$34.1 million in the Internal Service Fund, with related accumulated depreciation of \$8.1 million.

The future minimum lease payments for capital leases reported in the Internal Service Fund are:

NOTE 12 - SELF-INSURANCE

A. RISK MANAGEMENT

The State maintains several types of insurance plans and accounts for them in two funds. The Self-Insurance Internal Service Fund provides insurance advice and services to State governmental agencies, and the State-Administered Fund offers similar services to quasi-governmental entities. Statute requires the Self-Insurance Fund to be replenished by appropriation if the fund balance drops below \$1 million. The State-Administered Fund balance has no similar provision; however, statutes prevent it from being used for any purpose other than providing insurance services.

Insurance plans offered include property, vehicle, boat and aircraft, tort, civil rights, employee bonds, police professional, and a variety of other insurance products. Not all departments elect to insure through the Risk Management Division. Specifically, the Department of Human Services and the Department of Transportation have elected not to purchase general liability insurance.

In many cases the State purchases excess insurance to limit the State's liability for insured events. For example, coverage for property damage is \$2.5 billion per occurrence. The State retains \$1 million of this risk per occurrence, with the remainder being covered by a private insurance carrier (excess insurance). Coverage, risk retention, and excess insurance amounts for major types of insurance are listed below:

<u>Type of Insurance</u>	<u>Coverage Per Occurrence</u>	<u>Risk Retention Per Occurrence</u>	<u>Excess Insurance Per Occurrence</u>
Property	\$2.5 billion	\$1 million	\$2.5 billion
Employee Bond - Food Stamps	16.5 million	.5 million	16 million
Ocean Marine Boat Liability	10 million	10,000	10 million
Loss of Software and Data	8 million	25,000	8 million
Boiler and Machinery	2 million	5,000	2 million
General Liability including			
Employment Practices	400,000	400,000	none
Police Professionals	400,000	400,000	none

The plan funds the cost of providing claims servicing and claims payment by charging a premium to each agency based on a review of past losses and estimated losses for the current period.

All risk-financing liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Claims liabilities represent the estimated cost of claims as of June 30, 2001. This cost of claims includes case reserves, the development of known claims and incurred-but-not-reported claims, and the direct administrative expenses for settling specific claims.

Claims liabilities are re-evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount.

At June 30, 2000, \$3.2 million was reported as the present value of the estimated claims payable for the State's self-insurance plan. The actuary calculated this based on a 5.5 percent yield on investments. The non-discounted amount was \$3.6 million. At June 30, 2001, the State has estimated the range of loss between \$3.0 and \$3.5 million.

Risk Management Fund Changes in Claims Payable

June 30, 2001

(Dollars in Thousands)

	<u>2001</u>	<u>2000</u>
Liability at beginning of year	\$3,219	\$3,519
Current year claims and changes in estimate	1,570	1,019
Claims payments	<u>1,570</u>	<u>1,319</u>
Liability at end of year	<u>\$3,219</u>	<u>\$3,219</u>

As of June 30, 2001, fund assets of \$15.4 million exceeded fund liabilities of \$4 million by \$11.4 million. The portion of this amount that may be reserved for catastrophic losses has not been determined.

In the past, general liability insurance coverage excluded lawsuits brought by employees. Therefore, the loss history used by the actuary to project claims did not include the effects of any such lawsuits. Effective July 1, 1999, the State added \$50,000 coverage per occurrence for the cost of defending the State in any such lawsuits. Effective July 1, 2000, the State increased coverage to include both defense and indemnification costs up to \$400,000. The effect of this change has not been incorporated into the estimate used to determine claims payable as of June 30, 2001.

The State, through the Risk Management Division, purchased insurance for four State Correctional facilities in an Owner Controlled Insurance Program (OCIP). The State, as owner, gets favorable premium rates compared with the contractors who typically purchase the coverage and include associated costs in their contract prices. Workers' compensation, tort, and property coverage for the projects will cost approximately \$1.6 million, which represents \$200,000 in savings over the lives of the projects. The entire premiums billed by OCIP insurers are paid by the State Risk Management Fund and billed to Maine's Department of Corrections.

B. UNEMPLOYMENT INSURANCE

The State is self-insured for unemployment compensation. As a direct reimbursement employer, the State recognizes all costs for unemployment compensation as claims are paid. These costs totaled \$563,000 for the fiscal year ended June 30, 2001.

C. WORKERS' COMPENSATION

Workers' compensation is accounted for in an Internal Service Fund. Interfund premiums are treated as quasi-external transactions. Each State agency is charged a premium based on the number of employees to be covered plus an added amount to reduce the unfunded liability. The Legislature, Legislative Council, and Law Library employees are self-insured for workers' compensation purposes. The State assumes the full risk of all claims filed for workers' compensation. Claims liabilities are actuarially determined based on estimates of the ultimate cost of claims, including future claim adjustment expenses that have been incurred but not reported and claims reported but not settled. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount. Claims liabilities are re-evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors.

Changes in the balance of claims and judgments liabilities during fiscal 2001 were:

Workers' Compensation Fund Changes in Claims Payable

June 30, 2001

(Dollars in Thousands)

	<u>2001</u>	<u>2000</u>
Liability at Beginning of Year	\$ 80,371	\$ 82,668
Current Year Claims and Changes in Estimates	2,861	10,252
Claims Payments	<u>7,506</u>	<u>12,549</u>
Liability at End of Year	<u>\$ 75,726</u>	<u>\$ 80,371</u>

Based on actuarial calculations as of June 30, 2001, the State is liable for unfunded claims, and incurred but not reported claims, of approximately \$92.3 million. The discounted amount is \$75.7 million and was calculated based on a 4.25 percent yield on investments.

D. DISABILITY

State law allows confidential employees who become temporarily disabled to receive 66.67 percent of their salary for up to 335 calendar days. There were a total of 1,013 confidential employees at June 30, 2001. The expenditure amount for this benefit cannot be determined.

NOTE 13 - SEGMENT INFORMATION-ENTERPRISE FUNDS AND COMPONENT UNITS

PRIMARY GOVERNMENT

The State has nine enterprise funds that have been created to provide various services to the general public. The purpose of each enterprise fund is described below:

The *Alcoholic Beverages Fund* was established to license and regulate the sale of alcoholic beverages. The net profit from the fund is transferred to the State's General Fund and is used for general government purposes.

The *Lottery Fund* was established to account for all operations of the Maine State Lottery. This includes the Tri-State Lotto Commission, established in 1985, and is a joint venture between the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including the price or prices of tickets, the number and size of prizes for winning tickets, and the licensing of agents.

The *Potato Marketing Improvement Fund* provides low interest loans to potato growers for the modernization of storage facilities and improvements in the handling of the product.

The *Seed Potato Board Fund* accounts for the growing of nuclear seed for sale to potato growers, for research in disease control, and for the development of new product varieties.

The *State Airport Fund* accounts for all operations and maintenance of the Maine State Airport. The State, through the Department of Transportation, entered into a lease/purchase agreement with the City of Augusta to operate and eventually own the airport.

The *Marine Ports Fund* is used to account for the operation and maintenance of port facilities within the jurisdiction of the Department of Transportation.

The *State Ferry Service Fund* accounts for the operation of ferry services between the mainland and various islands for the purpose of transporting vehicles, freight, and passengers to and from those islands.

The *Prison Industries Fund* accounts for a self-supporting program of job training through the employment of inmates in manufacturing and selling products.

The *Community Industrial Building Fund* is used to assist a local development corporation to construct a community industrial building by lending money when the project can reasonably be expected to create new employment. Preference is given to projects in economically deprived areas.

NOTE 14 - JOINT VENTURES

Joint ventures are independently constituted entities generally created by two or more governments for a specific purpose. The only material joint venture in which the State participates is the Tri-State Lotto Commission (Commission).

The Commission was established in 1985 pursuant to passage into law of the Tri-State Lotto Compact by the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including ticket prices, prizes, and the licensing of agents.

The Commission is composed of one member from each of the participating states. Each member State's commission appoints one of its members to serve on the Commission and each member holds office at the pleasure of his or her appointing authority. The Commission annually elects a chairman from among its members.

The Commission has designated that 50 percent of its operating revenue be aggregated in a common prize pool. A prize award liability is established when the winning ticket number is selected. If no winning ticket is selected, the available jackpot is carried over to the following drawing. The Tri-State Lotto Compact requires that prizes

not claimed within one year from the date of the drawing be forfeited. All expired unclaimed prizes are credited to future prize pools. The Commission funds its jackpots through annuity contracts purchased from insurance companies and zero-coupon U.S. Government Treasury Strips.

A proportional share of revenues and expenses are allocated to each State based on the amount of ticket sales made by each State. Exceptions are the facility's management fee, which is based on a contracted percentage of operating revenue that varies from State to State; Daily Number expenses that are allocated to each State based on Daily Number ticket sales; and certain other miscellaneous costs that are based on actual charges generated by each State.

The financial statements of the Tri-State Lotto Commission may be obtained from the Bureau of Alcoholic Beverages and Lottery Operations, 8 State House Station, Augusta, ME 04333-0008.

As of and for the fiscal year ended June 30, 2001, selected financial information was reported in the audited financial statements of the Tri-State Lotto Commission:

NOTE 15 - RELATED PARTY TRANSACTIONS

PRIMARY GOVERNMENT

Title 20 M.R.S.A. §11473 establishes the Maine College Savings Program Fund (the Fund), administered by the Finance Authority of Maine (FAME). The Fund holds all monies associated with the Maine College Savings Program doing business as the NextGen College Investing Plan (NextGen). NextGen is the primary program of the Fund and was established to encourage the investment of funds to be used for qualified higher education expenses at institutions of higher education. The program has been designed to comply with the requirements for treatment as a "Qualified State Tuition Program" under Section 529 of the Internal Revenue Code. By statute, the program assets and liabilities are held by the Treasurer of the State of Maine. FAME and the Treasurer of the State of Maine have entered into a management agreement for the Treasurer to act as a fiduciary of the Fund. The Treasurer is responsible for investment of the Fund and determining, with the advice of the Advisory Committee on College Savings, the proper allocation of the investments of the Fund. The NextGen College

Investing Plan had approximately \$544 million in net assets at June 30, 2001, which have been recorded in an Agency Fund on the financial statements of the State.

In 1999, the Legislature established the Maine Learning Technology Endowment to enable the full integration of appropriate learning technologies into teaching and learning for the State's elementary and secondary students. During fiscal year 2001, the State of Maine invested \$50 million with the Maine State Retirement System, a discretely presented component unit. At June 30, 2001, the value of this fund was approximately \$52.7 million. The investment and related liability, recorded in the MSRS financial statements, have been eliminated for purposes of including MSRS as a component unit of the State of Maine, as the State has recorded the assets in an Expendable Trust Fund in its financial statements.

General Obligation Bonds of the State include \$450,000 of self-liquidating bonds of the Maine Veterans' Home. The State issues the bonds, and the Maine Veterans' Home remits to the State the debt service as it comes due.

The State of Maine has entered into memoranda of understanding with the Wells National Estuarine Research Reserve Management Authority, a jointly governed organization, through the Bureau of Public Lands and the Bureau of Parks and Recreation. These agreements outline each entity's responsibilities in relation to the operation of the Reserve and the management of the property included within the boundaries of the Reserve. The Authority's responsibilities are generally to manage the Reserve consistent with the Wells National Estuarine Research Reserve Management Plan dated May 1991.

RELATED ORGANIZATIONS

The State provided appropriations to three related organizations. The Maine Science and Technology Foundation received an appropriation of \$1.8 million, the Maine School of Science and Mathematics received an appropriation of \$1.5 million, and the Maine Technology Institute received an appropriation of \$6.3 million.

The State receives transfers in the amount of the annual operating surplus from the Maine Turnpike Authority under the Sensible Transportation Act of 1991. The Legislature has defined operating surplus within the Maine Turnpike Authority statute to be the total operating revenues of the Authority after money has been set aside to pay reasonable operating expenses and to meet the requirements of any resolution authorizing bonds. The Authority, with the concurrence of the Maine Department of Transportation, has established the operating surplus at \$4.7 million annually. The payment of debt service costs in connection with the issuance of the Series 1996 Special Obligation Bonds is considered to constitute payment of the operating surplus for the year 2001.

COMPONENT UNITS

The University of Maine Foundation (Foundation) is an independent non-profit organization and, accordingly, its financial statements are not consolidated with those of the University. Total gifts and income received by the University from the Foundation during fiscal years ending June 30, 2001 and 2000 were approximately \$4.2 million and \$4.2 million, respectively. The reported fair market value of the Foundation's assets at June 30, 2001 and 2000 were approximately \$114.7 million and \$117.1 million, respectively.

The Finance Authority of Maine (FAME) administers several revolving loan funds on behalf of the State of Maine. During fiscal year 2001, the State expended approximately \$6 million to FAME for State revolving loan funds. FAME recorded these funds as a liability in Amounts Held Under State Revolving Loan Programs in their financial statements

Title 20-A M.R.S.A. Chapter 419-A establishes the Maine State Grant Program as a fund under the jurisdiction of the Finance Authority of Maine (FAME). All grant revenues under this fund must be distributed by FAME to students who meet the eligibility requirements for a grant under this chapter. During fiscal year 2001, FAME paid approximately \$6.2 million in grants to the University of Maine System (UMS) on behalf of eligible students. The UMS reflected these grants as grant revenues from the State of Maine in its financial statements.

NOTE 16 - COMMITMENTS AND CONTINGENCIES

FEDERAL GRANTS

The State receives significant financial assistance from the federal government. The receipt of grants is generally dependent upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of resources for allowable purposes. Grants are subject to the Federal Single Audit Act. Disallowances by federal officials as a result of these audits may become liabilities of the State. The amount of expenditures that may be disallowed by the grantor agencies cannot be determined at this time.

MUNICIPAL SOLID WASTE LANDFILLS

Title 38 M.R.S.A., §1310-F, establishes within the Department of Environmental Protection (DEP) a cost-sharing program for the closure and remediation of municipal solid waste landfills that pose an actual or potential hazard to the environment and public health. The State's obligation to provide cost sharing to municipalities is subject to the availability of funds approved for that purpose. State expenditures for both municipal landfill closure and remediation projects totaled \$1.2 million for fiscal year 2001.

During the 2001 fiscal year, \$1.1 million of State general funds were expended for municipal solid waste landfill closure projects, which completed work before January 1, 2000. After January 1, 2000, the State is no longer liable for the costs relating to the closure of municipal solid waste landfills. The Commissioner may make grants or payments up to 30% if they are incurred pursuant to an alternative closure schedule approved by DEP prior to January 1, 2000, and if they are specifically identified in a department order or license, schedule of compliance or consent agreement. No reimbursement applications for past closure costs are on file. No additional cost share eligible closures have been approved by DEP. Consequently, the DEP expects no further expenditures related to municipal landfill closures.

The State expended \$83 thousand of State general funds and \$18 thousand of general obligation bond funds for municipal solid waste landfill remediation projects during fiscal year 2001. Remediation funding, subject to the availability of funds, will continue for 90% of the cost of remediation for threats posed by a municipal landfill to wells or other structures constructed on or before December 31, 1999. The maximum reimbursement for remediation funding is 50% for structures constructed after that date. The DEP recognizes that, in the future, post closure investigation and remediation activities may be necessary at landfills that will require State funds. The DEP has estimated the amount of these potential costs to be approximately \$1.6 million, based on current site knowledge.

SAND AND SALT STORAGE PROGRAM

The State estimates the potential aggregate cost to comply with the environmental requirements associated with the sand and salt storage program to be \$12-14 million through the year 2005. This consists of approximately \$7-9 million for State-owned facilities and approximately \$5 million for the State's share, under a cost sharing arrangement, for municipal facilities.

POLLUTION ABATEMENT PROGRAM

Title 38 M.R.S.A. §411 establishes within DEP a cost-sharing program for pollution abatement projects. Subject to funding by the Legislature and the approval of the Commissioner, the State may contribute to the design, engineering and construction of municipal pollution abatement facilities. During the 2001 fiscal year, \$10.4 million of general obligation bond funds were expended for pollution abatement projects. As of June 30, 2001, amounts encumbered for pollution abatement projects totaled \$1.8 million; and general obligation bonds authorized for these projects, but not yet encumbered or expended, totaled \$4.1 million. At June 30, 2001, DEP estimated the total cost (federal, State, and local) of future projects to be \$320 million.

DESIGNATION AS A POTENTIALLY RESPONSIBLE PARTY BY THE ENVIRONMENTAL PROTECTION AGENCY

The State has been identified as a potentially responsible party at three hazardous waste clean-up sites in Maine. These sites are located in Plymouth, Casco and Ellsworth. The amount or range of potential liability has not been determined.

GROUND WATER OIL CLEAN-UP FUND

The Ground Water Oil Clean-up Fund is established in Title 38 MRSA §569-A. Fund activities include, but are not limited to, providing insurance to public and private entities for clean up of oil spills. The program is funded by a per barrel assessment on petroleum products imported into the State. Coverage is up to \$1 million per occurrence for both aboveground and underground storage tanks. Third party injury coverage may not exceed \$200,000 per claimant.

A report to the legislature dated December 15, 2000, submitted by the Maine Department of Environmental Protection (DEP), identified 356 long-term remediation sites as of August 2000 that are covered by the insurance program. The number of sites increased to 397 by December 2001. Since it is not possible for the DEP to estimate the cost of remediation, the State has not accrued a liability in the financial statements.

NURSING HOME LOANS

The Maine Health and Higher Education Facilities Authority (MHHEFA) has advanced approximately \$2.9 million from the operating fund as of June 30, 2001, to certain financially troubled institutions. The outstanding loans owed to the Authority total approximately \$39.9 million. These advances were made to assist these institutions in meeting debt service requirements. The Authority established a \$1.6 million reserve in its operating fund related to amounts that have been advanced or are expected to require an advance to troubled institutions.

CONSTRUCTION COMMITMENTS

A portion of the payment that is made to municipalities for General Purpose Aid to Local Schools is allocated for debt service. This portion represents the subsidy for debt service resulting from local outstanding indebtedness for school construction projects. As of June 30, 2001, outstanding commitments by municipalities for school bond issues that are eligible for State subsidy totaled \$739.9 million.

At June 30, 2001, the Department of Transportation had contractual commitments of approximately \$87.9 million for construction of various highway projects. The State's share of that amount is expected to be approximately \$16.8 million. Of these amounts, \$15.1 million has already been reported as accruals, with the State's share at \$4.9 million. Federal and State funds plus bond proceeds are expected to provide funding for these future expenditures.

At June 30, 2001, the State of Maine had contractual and guaranteed maximum price agreement commitments for construction projects of:

Northern Maine Juvenile Facility	\$7.7 million
Southern Maine Juvenile Facility	\$5.3 million
Maine State Prisons	\$15.8 million
State House	\$7.0 million

TOBACCO SETTLEMENTS

On November 23, 1998, Maine along with 45 other states and five jurisdictions agreed to an out-of-court settlement with certain Participating Tobacco Manufacturers (PM's) to recover smoking-related Medicaid costs. The PM's agreed to pay \$206 billion to the states and jurisdictions. In return, the states have agreed to relinquish claims to further damages resulting from Medicaid costs. Maine's percentage of the total settlement payment is 0.7693505%, which equals \$1.58 billion. Annual payments (2000 and thereafter) will fluctuate subject to various adjustments and litigation offsets and are contingent on the passage and enforcement of a State statute imposing economic conditions on the PM's. This settlement will result in an ongoing revenue stream to the State, which will continue into perpetuity.

As compensation, the PM's have also agreed to pay \$8.6 billion to certain states and jurisdictions for their contribution to the overall settlement. These payments are subject to the adjustments referred to above. Maine's share equals approximately \$114 million and will be received in ten annual payments beginning in 2008.

The State received \$47.8 million dollars from PM's during fiscal year 2001.

CONSTITUTIONAL OBLIGATIONS

Article 9, § 14-A, C, and D of the Maine State Constitution provides that the State may insure the payment of mortgage loans for industrial, manufacturing, fishing, agricultural and recreational enterprises; mortgage loans for the acquisition, construction, repair and remodeling of houses owned or to be owned by members of two tribes on several Indian reservations; and mortgage loans to resident Maine veterans of the Armed Forces of the United States, including loans to a business organization owned in whole or in part by a resident Maine veteran. The aggregate of these obligations, at any one time, may not exceed \$90 million, \$1 million, and \$4 million, respectively. At June 30, 2001, loans outstanding pursuant to these authorizations are \$20 million, less than \$1 million, and \$1.3 million, respectively. The State has not paid, nor does it expect to pay, any amounts as a result of these authorizations as of June 30, 2001.

Article 8, § 2, of the Maine State Constitution provides that the State may secure funds, through the issuance of bonds authorized by the Governor, for loans to Maine students attending institutions of higher education. The amount of bonds issued and outstanding shall not at any one time exceed \$4 million in the aggregate. The State has not paid, nor does it expect to pay, any amount as a result of this authorization as of June 30, 2001.

MORAL OBLIGATIONS

The State of Maine, through statute, enables certain Authorities to establish capital reserve funds. These funds may be used to secure a variety of financial undertakings including the issuance of bonds. The minimum amount of the capital reserve fund may be determined by statute or set by the Authority. The statutes may also limit the amount of debt that may be secured by the capital reserve funds, and allow the Authority to issue debt that is not secured by these funds. On or before December first of each year, the Authority is required to certify to the Governor the amount, if any, necessary to restore any capital reserve fund to its required minimum. If there is a shortfall, the Governor is required to pay first from the "Contingent Account" the amounts necessary for restoration. The Governor shall certify any remaining unpaid amounts to the Legislature, which is then required to appropriate and pay the remaining amounts to the Authority during the then-current State fiscal year. These moral obligations are not considered to be "full faith and credit" obligations of the State, and voter approval of the underlying bonds is not required. No capital reserve fund restorations have been made in the current or previous years.

The following summarizes information regarding outstanding Moral Obligations.

Moral Obligation Bonds

(Dollars in Thousands)

<u>Issuer</u>	<u>Bonds Outstanding</u>	<u>Required Debt Reserve</u>	<u>Obligation Debt Limit</u>	<u>Legal Citation</u>

NOTE 17 - LITIGATION

The State of Maine, its units and its employees are parties to numerous legal proceedings, many of which normally occur in governmental operations. In the opinion of the Attorney General and other legal counsel representing the State, in all of the cases listed, the State or its agencies or employees have valid defenses. The following cases have the potential for liability in excess of \$1 million. The Attorney General cannot predict in which of the cases there is a higher or lower probability of paying out the full amounts sought. Even if liability is found, the State should not expect to pay out the full amounts being sought against it in all of the cases. In any given case, however, the State could incur a large judgment.

Central Maine Medical Center v. DHS. Central Maine Medical Center has appealed its audit decisions for FY 1993 through 1997. The case is currently at the DHS administrative hearings unit level. Hearings have been held for FY 1993 and 1994, and the FY 1995 hearing is scheduled for June 2002. The Department claims CMMC owes the Department \$2 million; CMMC claims the Department owes it \$8-10 million, for all of the issues, for all of the fiscal years. The other hospitals, including Eastern Maine Medical, have also filed appeals for FY 1998 through FY 2000. Those appeals have not yet been set for hearing. The Attorney General considers this to be a serious matter.

Profit Recovery Group USA v. Janet Waldron. The damages in this case could potentially be in excess of \$1 million. In this lawsuit, which is pending in Kennebec County Superior Court, Plaintiff alleges breach of contract and quantum meruit claims. The lawsuit arises out of a contract between the Plaintiff and the State under which the Plaintiff was to audit the State's payments to vendors and look for overpayments. Plaintiff was to be paid a contingency fee based on overpayments if recovered. Plaintiff alleges that it identified two large overpayments for which it is owed a fee of \$597,000. Plaintiff also alleges that the State prevented Plaintiff from doing further work under the contract, which would have resulted in the identification of additional payments. The case is currently on a July trial list.

Marr v. DHS. This suit is brought in federal court on behalf of the estate of Logan Marr, who was in the custody of the State when she died in a foster home. The foster mother is currently awaiting trial for murder. The suit seeks substantial damages. No schedule has been set by the court. The Attorney General considers this to be a serious matter.

Berube v. AMHI. This suit, brought in State court, is on behalf of the estate of an AMHI patient who committed suicide. Presently, motions to dismiss are pending.

Tucker v. Department of Corrections. Mr. Tucker has brought suit against 14 employees for alleged transgressions at the Maine Youth Center.

In various lawsuits, Plaintiffs seek damages in excess of \$1 million against the State or against State officials, and various notices of claim also specify damages in excess of \$1 million where no lawsuit has been filed. In none of these lawsuits, in the view of the Attorney General, is there any reasonable possibility that the State's liability could reach or exceed \$1 million.

Numerous workers' compensation claims are now pending against various State agencies. Since most claims involve the possibility for significant long-term damages and since the test for demonstrating a causal relationship between the employment and the illness or injury is not as rigorous as in ordinary civil cases, these cases involve the possibility of significant liability for the State. Since possible damages include future medical costs and wage replacements for the employee (and in some cases spouse), it is difficult to estimate the total potential liability to the State.

In addition to the foregoing, various other suits are pending against the State, State agencies and State officials involving damages or other potential costs. Since the amounts sought are less than \$1 million, these suits have not been individually identified.

All other legal proceedings are not, in the opinion of management after consultation with the Attorney General, likely to have a material adverse effect on the financial position of the State.

NOTE 18 - SUBSEQUENT EVENTS

PRIMARY GOVERNMENT

On October 11, 2001, December 27, 2001, and April 2, 2002, the State issued \$500 thousand, \$10.1 million, and \$17 million respectively of Bond Anticipation Notes, with interest rates ranging from 2.25% to 4.00%. The BAN's will mature on June 26, 2002.

On May 1, 2002, the State entered into a \$3.9 million lease purchase agreement with GE Capital to purchase vehicles through its Central Fleet Management Internal Service Fund.

COMPONENT UNITS

On February 20, 2001 and March 20, 2001 the Maine State Housing Authority (MSHA) issued \$40 million of its 2001 Series A bonds and \$30 million of its 2001 Series B bonds respectively. The bonds carry interest rates ranging from 3.3% to 5.5% and maturities from 2011 – 2032. On April 17, 2001 and May 15, 2001 MSHA also redeemed, at par and at a premium, approximately \$15.1 million and \$33.9 million, respectively, of its Mortgage Purchase Program bonds with interest rates between 5.7% - 7.5% and maturities from 2001 – 2028.

As a result of legislation, members of the Maine Educational Loan Authority (MELA) conducted a study, performed by an independent third party, concerning whether changes to the structure and governance of MELA should be made. The final report, issued early in 2001, recommends that MELA continue to operate as a separate agency, continue the supplemental education loan program funded through tax-exempt bonds, and solicit proposals for an administrative services contract. Members of MELA do not expect the results of the study and any recommendations to significantly impact the loan program or the operations of MELA in the foreseeable future.

On July 6, 2001, the Maine Health and Higher Education Facilities Authority (MHHEFA) issued \$27.6 million of 2001 C Series Revenue Bonds from the Reserve Fund. The bonds mature in 2002 - 2031 and carry interest rates ranging from 3.25% - 5.125%. The bonds are secured by loans made to institutions within the State of Maine.

On August 23, 2001, the Maine Governmental Facilities Authority, a blended component unit of the State, issued \$36.5 million Bonds for the purpose of improvements to State facilities. The bonds mature from 2001 - 2022 and carry interest rates ranging from 3.75% to 5.375%.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

Basis of Presentation

For financial statement reporting purposes, the information provided on the required supplementary information schedules includes amounts for employees of participating local districts as well as combined amounts for State employees, teachers, judicial and legislative employees.

Actuarial Assumptions and Methods:

The information in the required supplemental schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation date, June 30, 2001, is as follows:

Funding Method

Costs are developed using the entry age normal cost method (based on a level percentage of covered payroll). Under this method the accrued liability and the present value of future normal costs are determined by summing the individual entry age results for each participant. The normal cost is then determined in aggregate by spreading the present value of future normal costs as a level percentage of expected future covered payroll. Entry age is defined as the first day service is credited under the plan.

Experience gains and losses, i.e., decreases or increases in liabilities when actual experience differs from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

Asset Valuation Method

For actuarial purposes, assets are valued by determining the total yield on the investments of the System using the full investment return (including capital gains), which is measured by the difference in the actuarial value of the assets at the beginning of the fiscal year and the market value of the assets at the end of the fiscal year. Prior year's unrecognized gains and losses are added to this amount to develop expected actuarial value. One third of the excess of the yield (using the full investment return) is added to the expected actuarial value to determine the actuarial valuation of assets.

Amortization

The unfunded actuarial liability is amortized on a level percentage of payroll over a 19 year closed period from June 30, 2000.

Significant actuarial assumptions employed by the actuary for funding purposes as of June 30, 2001 are as follows:

Investment Return – 8% per annum, compounded annually

Salary Increases – 5.5% to 9.5% per year (included inflation of 5.5%)

Mortality Rates – Active State employee members and active participating local entity members – UP 1994 Tables; Active teacher members – 85% of UP 1994 Tables; Non-disabled State employee retirees and non-disabled participating local entity retirees – GAM 1971 Tables; Non-disabled teacher retirees – GAM 1971 Tables set back two years; All current recipients of disability benefits – 1964 Commissioners Disability Table; All disability benefit recipients who begin to receive benefits in 2000 and thereafter – RPA 1994 Table for pre-1995 Disabilities.

Post Retirement Benefit Increases – 4% per annum

Group Life Plan:

The Group Life Insurance Program administered by the System provides for a life insurance benefit for active members equal to a member's annual base compensation as defined by statute. Upon retirement, life insurance coverage in the amount of the member's average final compensation is provided with a reduction of 15% per year until the greater of 40% of the average final compensation or \$2,500 is reached. To be covered in retirement, retirees must have participated in the Group Life Program for a minimum of ten years. Premiums are remitted to the System by the employer. The State pays a premium rate of \$0.30 per \$1,000 of coverage per month for state employees. Teachers and employees of participating local districts pay a premium rate of \$0.22 and \$0.46 per \$1,000 of coverage per month, respectively, some or all of which may be deducted from employees' compensation as per individual agreements with employees. Assumptions used to determine the actuarial liability are the same as for the pension plan. At June 30, 2001 and 2000, the net assets held in trust for group life insurance benefits were \$35.2 million and \$31.6 million, respectively. At June 30, 2001 and 2000, the plan had the following actuarially determined liabilities:

	(In millions)	
	<u>2001</u>	<u>2000</u>
Actuarial Liabilities:		
Active Members	\$ 36.4	\$ 52.7
Retired Members	<u>43.1</u>	<u>30.5</u>
Total	<u>\$ 79.5</u>	<u>\$ 83.2</u>

GENERAL FUND

The General Fund is the State's primary operating fund. Its purpose is to account for all financial resources obtained and used for general government operations, which are not required to be accounted for in another fund.

SPECIAL REVENUE FUNDS

Special Revenue Funds are used to account for revenue sources that are legally restricted to expenditures for specified purposes, including some major capital projects. These do not include expendable trusts or major capital projects financed by Proprietary Funds or proceeds from general obligation bonds.

Highway Fund – This fund is used primarily to account for motor fuel tax revenues, motor vehicle license and registration fees, and special State appropriations that are legally restricted to the construction and maintenance of State highways and bridges.

Federal Expenditures Fund – This fund is used to account for grants and other financial assistance received from the federal government, except for federal block grants, that are legally restricted to expenditures for purposes specified in the grant awards or agreements.

Other Special Revenue Fund – This fund is used to account for revenue sources that are legally restricted to expenditures for specified purposes, including some major capital projects that are not accounted for in the Highway, Federal Expenditures and Federal Block Grants funds.

Federal Block Grants Fund – This fund is used to account for grants and other financial assistance received from the federal government in the form of block grants, that are legally restricted to expenditures for purposes specified in the grant awards or agreements.

Government Facilities Authority Fund – This fund includes the operations of the Maine Government Facilities Authority, a blended component unit. The Authority was created to assist in the financing, acquisition, construction, improvement, reconstruction, and equipping of additions to structures designed for use as a court facility, State office or State activity space.

CAPITAL PROJECTS FUNDS

Capital Projects Funds are used to account for financial resources used to acquire fixed assets or construct major capital projects that are not financed by Proprietary Funds or Special Revenue Funds.

General Bond Fund – This fund accounts for the acquisition or construction of major capital facilities, other than highways and bridges that are financed primarily from proceeds of general obligation bonds. The State also includes proceeds from bond issues for purposes other than construction of major capital facilities in this fund.

Highway Bond Fund – This fund accounts for major highway and bridge construction projects that are financed primarily from proceeds of general obligation highway bonds.

ENTERPRISE FUNDS

Enterprise Funds are used to account for operations that are financed and operated in a manner similar to private business, where the State intends to finance or recover the costs of providing goods or services to the General Public on a continuing basis primarily through user charges. The State also uses these funds where periodic determination of net income is appropriate for accountability purposes.

Alcoholic Beverages Fund – This fund was established to license and regulate the sale of alcoholic beverages. The net profit from the fund is transferred to the State’s General Fund and is used for general government purposes.

Lottery Fund – This fund was established to account for all operations of the Maine State Lottery. This includes the Tri-State Lotto Commission, which was established in 1985 and is a joint venture between the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including the prices of tickets, the number and size of prizes for winning tickets, and the licensing of agents.

Potato Marketing Improvement Fund – This fund provides low interest loans to potato growers for the modernization of storage facilities and improvements in the handling of the product.

Seed Potato Board Fund – This fund accounts for the growing of nuclear seed for sale to potato growers, for research in disease control, and the development of new product varieties.

State Airport Fund – This fund accounts for all operations and maintenance of the Maine State Airport. The State, through the Department of Transportation, entered into a lease/purchase agreement with the City of Augusta to operate and eventually own the airport.

Marine Ports Fund – This fund is used to account for the operation and maintenance of port facilities within the jurisdiction of the Department of Transportation.

State Ferry Service Fund – This fund accounts for the operation of ferry services between the mainland and various islands for the purpose of transporting vehicles, freight, and passengers to and from those islands.

Prison Industries Fund – This fund accounts for a self-supporting program of job training through the employment of inmates in manufacturing and selling products.

Community Industrial Building Fund – This fund is used to assist a local development corporation to construct a community industrial building by lending money when the project can reasonably be expected to create new employment. Preference is given to projects in economically deprived areas.

INTERNAL SERVICE FUNDS

Internal Service Funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the government and to other government units, on a cost reimbursement basis.

Motor Transport Service Fund – This fund accounts for all the equipment and vehicle operations of the Department of Transportation.

Postal, Printing and Supply Fund – This fund accounts for the purchase of general office supplies, materials and photocopiers required by any State department or agency, the purchase of and contract for all postal and mailing services, duplicating needs, and the acquisition and disposition of State and federal surplus property. This fund is also used to administer the State's Procurement Card Program.

Information Services Fund – This fund accounts for the costs of providing information services in data processing and telecommunications and for coordinating data processing services including computer operations, programming and applications systems development, technical support and networking services.

Risk Management Fund – This fund accounts for resources generated and used to provide insurance advice and services for all forms of insurance except health and workers' compensation. This includes insurance for automobile, fire, liability and any other type of coverage that may be necessary to protect the State against financial loss.

Workers' Compensation Fund – This fund accounts for resources generated and used to provide workers' compensation advice and insurance services.

Central Fleet Management Fund – This fund accounts for the cost of administering a uniform program for the operation and maintenance of all State vehicles except those of the Department of Transportation and Public Safety.

Leased Space Fund – This fund accounts for State facilities leasing activities and maintains records of State agency property, leasing needs and all available space owned, leased and potentially available for lease.

Revenue Services Fund – This fund accounts for the resources generated and used to provide up-to-date information to facilitate compliance with Maine tax law and to help reduce common mistakes in filing tax forms.

Retiree Health Insurance Fund – This fund accounts for post retirement health care premiums and benefits for most retired state employees and Legislators, and for a portion of the premiums for teachers.

Employee Health Insurance Fund – This fund accounts for health care premiums and benefits for most state employees.

TRUST & AGENCY FUNDS

Trust and Agency Funds are used to account assets held by the State in a fiduciary capacity, acting as either a trustee or an agent for individuals, organizations or other funds.

Expendable Trust Funds account for assets held by the State in a trustee capacity where the principal and income may be expended in the course of the funds' designated operations.

Employment Security Fund - This fund accounts for unemployment insurance taxes from employers and the payment of unemployment benefits to eligible claimants.

Abandoned Property Fund - This fund accounts for unclaimed property receipts. All holders of property presumed abandoned must report these properties to the Treasurer annually. The Treasurer will honor claims indefinitely.

Learning Technology Fund – This fund accounts for funds dedicated by the Legislature and by other private and public sources for the advancement of learning technology for elementary and secondary students in Maine.

Baxter Park Trust Fund – This fund accounts for a gift to the State of Maine by former Governor Baxter, which allows for the principal and interest to be used to purchase public reserved lands. Interest income may also be used for operations of the Baxter State Park.

Other Expendable Trusts - The State accounts for other small Expendable Trust Funds, including a fund used to account for expendable earnings on nonexpendable trust balances.

Nonexpendable Trust Funds account for assets held by the State in a trustee capacity where income derived from the trust principal may be expended. The principal must be preserved intact.

Baxter Park Trust Fund – This fund accounts for a gift to the State of Maine by former Governor Baxter, calls for principal to be maintained intact and income to be used for operations.

Lands Reserved Trust Funds – These funds were established to account for revenue derived from the sale of timber from public lands and from appreciation on investments. The income is to be used for school purposes by townships when they become organized towns or plantations.

Other Trust Funds – These funds are comprised of numerous small Nonexpendable Trust Funds, the income from which may be used for specified purposes.

Agency Funds account for assets held by the State as agent for other funds, governmental units, organizations, or individuals.

Payroll Tax and Deductions Fund – This fund accounts for all payroll taxes and deductions withheld to pay the federal government, other State agencies, and payroll vendors.

Custodial Accounts Fund – This fund is used to account for assets held by the State acting as an agent for patients of State Mental Health facilities, inmates at State Correctional Institutions, recipients of State-supported elder and adult services, and child support enforcement services. Also included in this fund are insurance company and unemployment guaranty deposits, and assets held in Courts and Corrections restitution escrow accounts.

Treasurer's Agency Fund – This fund accounts for deposits of quasi-governmental units placed in the Treasurer's Cash Pool for investment purposes.

Other Agency Funds – These funds account for numerous small agency funds which have been combined for financial reporting purposes.

COMPONENT UNITS

Component Units are legally separate organizations for which the State is financially accountable or for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. They are presented here in three separate reporting groups: Governmental, Proprietary and College and University Fund Types.

Governmental Fund Types

Maine Health and Higher Education Facilities Authority (MHHEFA) – The Authority assists Maine health care institutions and institutions of higher education in undertaking projects involving the acquisition, construction, improvement, reconstruction, and equipping of health care and educational facilities and the refinancing of existing indebtedness. The Authority, pursuant to the Student Loan Corporations Act of 1983, also has the power to finance student loan programs of institutions of higher education.

Northern New England Passenger Rail Authority (NNEPRA) – The Authority initiates, establishes and maintains regularly scheduled passenger rail service between points within Maine to points within and outside of Maine.

Child Development Services System (CDS) – CDS maintains a coordinated service delivery system for the provision of childfind activities for children, from birth to under age six, early intervention services for eligible children, from birth to under age three, and free, appropriate and public education services for eligible children, from age three to under age six, who have a disability.

Proprietary Fund Types

Finance Authority of Maine (FAME) – The Authority provides commercial financing and loan guarantees to Maine businesses and educational financing to Maine students and their parents. The Authority also provides financial and other services for the Adaptive Equipment Loan Program Fund Board, the Fund Insurance Review Board, the Agricultural Marketing Loan Fund Board, the Occupational Safety Program Fund Board, and the Small Business Enterprise Growth Fund Board. Additionally, the Authority administers the Maine College Savings Program Fund. The NextGen College Investing Plan is the primary program of the Maine College Savings Program Fund.

Loring Development Authority (LDA) – The Authority is entrusted with investigating the acquisition, development and management of the properties within the geographical boundaries of the old Loring Air Force Base.

Maine Municipal Bond Bank (MMBB) – The Bond Bank is authorized to issue bonds providing funds to counties, cities, towns, school administrative districts, community school districts, or other quasi-municipal corporations within the State.

Maine Educational Loan Authority (MELA) – The Authority was created to grant educational loans primarily using funds acquired through issuance of long-term bonds payable. The Authority's fiscal year ends on December 31.

Maine State Housing Authority (MSHA) – The Authority is authorized to issue bonds for the purchase of notes and mortgages on single-family and multifamily residential units for the purpose of providing housing for persons and families of low income in the State. The Authority also acts as agent for the State in administering federal weatherization, energy conservation, fuel assistance and homeless grant programs, and collecting and disbursing federal rent subsidies for low income housing. The Authority’s fiscal year ends on December 31.

Maine State Retirement System (MSRS) – The System provides pension, death, and disability benefits to its members, including State employees, some public school employees, and employees of approximately 250 local municipalities and other public entities in Maine.

College and University Fund Types

Maine Maritime Academy (MMA) – The Academy is a college specializing in ocean and marine programs at the undergraduate and graduate levels. The operation of the Academy is subject to review by the federal government. State appropriations, student fees, and a subsidy from the Maritime Administration support the Academy.

Maine Technical College System (MTCS) – The System is Maine’s primary provider of post-secondary technical education leading to a certificate, diploma, or associate degree. The financial statements of the system include the activity of seven colleges, the central administrative office, and the Maine Career Advantage.

University of Maine System (UMS) – The State University consists of seven campuses and a central administrative office.

There are three College and University Funds.

Current Funds account for Unrestricted Funds, over which the governing Boards retain full control in achieving the Institutions’ purposes, and for Restricted Funds, which may be used only in accordance with externally restricted purposes. The funds do not show the results of operations or the net income or loss for the period.

Loan, Endowment and Similar Funds account for assets for which the Institutions act in a fiduciary capacity.

Plant Funds account for institutional property acquisition, renewal, replacement, and debt service.

STATISTICAL & ECONOMIC DATA

The accompanying statistical tables of the State of Maine reflect social and economic data to allow a broader understanding of the environment in which the State operates, as well as historical perspectives and financial trends to assess the fiscal capacity of State government. Statistical tables differ from financial statements because they usually cover more than two fiscal years and present certain non-accounting data.

1994	61,964	31,528	93,492	3,277,527	2.9%
1993	46,190	28,485	74,675	3,318,584	2.3%
1992	45,710	25,454	71,164	3,148,658	2.3%

Notes: (1) Includes Other Debt of the General and Highway Fund expected to be repaid through general governmental resources. Does not include debt of the Maine Government Facilities Authority.

TABLE VI

STATE OF MAINE
COMPUTATION OF LEGAL DEBT MARGIN

JUNE 30, 2001

Pursuant to Article IX, Section 14 of the Maine Constitution, the Legislature shall not create any debt or debts on behalf of the State, which shall exceed \$2,000,000 in the aggregate, except to suppress insurrection, to repel invasion, or for purposes of war, and except for temporary loans to be paid out of money raised by taxation during the fiscal year in which they are made. Whenever 2/3 of both Houses shall deem it necessary, by proper enactment ratified by a majority of the electors voting thereon at a general or special election, the Legislature may authorize the issuance of bonds on behalf of the State as approved by such action. Temporary loans to be paid out of moneys raised by taxation during any fiscal year shall not exceed in the aggregate during the fiscal year in question an amount greater than 10% of all the moneys appropriated, authorized and allocated by the Legislature from undedicated revenues to the General Fund and dedicated revenues to the Highway Fund for that fiscal year, exclusive of proceeds or expenditures from the sale of bonds, or greater than 1% of the total valuation of the State of Maine, whichever is the lesser.

There were no temporary loans outstanding at June 30, 2001, which were subject to the Constitutional limitations.

All other general long-term bonds outstanding at June 30, 2001 were issued pursuant to properly ratified legislation.

Notes: (1) Civilian labor force, employed, and unemployed estimates are by place of residence. Items may not add due to rounding. All data exclude members of the Armed Forces. MSA stands for Metropolitan Statistical Area.

(2) Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

(3) People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following: they were not employed during the survey week; they were available for work at that time; and they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

(4) The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force, and is expressed as a

(5) Kittery-York is the five-town Maine portion of the Portsmouth-Rochester PMSA which includes towns in both Maine and New Hampshire.
