EDWARD A. KARASS
STATE CONTROLLER

TERRY E. BRANN, CPA
DEPUTY STATE CONTROLLER

December 31, 2005

**To the Honorable John Elias Baldacci, Governor,
the Honorable Members of the Legislature, and
Citizens of the State of Maine**

We are pleased to present the State of Maine's Fiscal Year 2005 (FY2005) Comprehensive Annual Financial Report (CAFR) prepared in accordance with Generally Accepted Accounting Principles (GAAP). The annual CAFR, required by Title 5 M.R.S.A., § 1547 is compiled and published by the Office of the State Controller (OSC). The report is the primary means of reporting the State's financial activities. The objective of this report is to provide a clear picture of our government as a single, unified entity, as well as providing traditional fund based financial statements.

Responsibility

The OSC is responsible for the accuracy, fairness and completeness of the financial statements presented in this report. The statements have been prepared in accordance with GAAP. To the best of our knowledge and belief, the information presented is accurate in all material respects and includes all disclosures necessary to enable the reader to gain a reasonable understanding of Maine's financial position and activities.

Adherence to Generally Accepted Accounting Principles

As required by State statute, we have prepared the CAFR in accordance with GAAP applicable to State and local governments, as promulgated by the GASB. The State also voluntarily follows the recommendations of the Government Finance Officers Association of the United States and Canada (GFOA) for the contents of government financial reports.

Format of Report

This CAFR is presented in three sections: Introductory, Financial and Statistical. The Introductory Section contains this letter including an overview of current initiatives, the list of principal elected and appointed officials, and the State government organization chart. The Financial Section contains: the Independent Auditor's Report on the Basic Financial Statements; Management's Discussion and Analysis (MD&A), which provides an introduction, overview and analysis of the Basic Financial Statements; the Basic Financial Statements, which present the government-wide financial statements and fund financial statements for governmental funds, proprietary funds, fiduciary funds and similar component units, and component units, together with notes to the financial statements; Required Supplementary Information other than MD&A, which presents budgetary comparison schedules, schedules of pension funding progress, and information about infrastructure assets; and the supplemental financial data, which includes the combining financial statements and schedules.

OFFICE LOCATED ON 4TH FLOOR, BURTON M. CROSS BUILDING
PHONE: (207) 626-8420

FAX: (207) 626-8422

WWW.MAINE.GOV

This letter of transmittal is designed to complement MD&A where the financial analysis is now presented. The State's MD&A can be found immediately following the Independent Auditor's Report from the State Auditor. The Statistical Section contains selected trend information, and statistical data on financial, economic and demographic measures.

Internal Control Structure

The Office of the State Controller prepared these financial statements and assumes full responsibility for the completeness and reliability of the information presented in this report. To provide a reasonable basis for making these representations, the Office of the State Controller has established a comprehensive internal control framework that is designed to protect the State's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the State of Maine's financial statements in conformity with GAAP.

Because the cost of internal controls should not outweigh their benefits, the State's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement.

As a recipient of federal financial assistance for federal programs, the State is also responsible for ensuring that an adequate internal control structure is in place to ensure and document compliance with applicable laws and regulations related to these federal programs. The internal control structure is subject to periodic evaluation by management and by the State Department of Audit as part of the annual Single Audit.

Independent Auditors

Pursuant to Title 5 M.R.S.A. § 243, the State Auditor has performed an examination of the Basic Financial Statements in accordance with auditing standards generally accepted in the United States of America. The auditor's opinion is presented in the financial section of this report. The audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the Basic Financial Statements; assessing the accounting principles used and significant estimates made by management; and, evaluating the overall financial statement presentation. The State Auditor rendered an unqualified opinion on the Basic Financial Statements for this fiscal year.

Also, pursuant to § 243 the State Auditor has undertaken a Single Audit of the State as a whole, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, as required by federal law. The standards governing Single Audit engagements require the auditor to report not only on the fair presentation of the financial statements, but also on the government's internal controls and compliance with legal requirements involving the administration of federal awards. This statewide federal Single Audit Report, including the auditor's opinion in accordance with generally accepted government auditing standards, is published separately.

We express our appreciation to the staff of the State Auditor for their professionalism. The State Auditor is statutorily mandated to audit all accounts and other financial records of State Government or any department or agency of State Government, including the judiciary and the Executive Department of the Governor, except the Governor's Expense Account, and to report annually, and at such other times as the Legislature may require.

Management's Discussion and Analysis (MD&A)

GASB Statement No. 34 requires that management provide a narrative introduction, overview and analysis to accompany the Basic Financial Statements in the form of MD&A. This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it.

PROFILE OF THE GOVERNMENT

Reporting Entity

The Governor and Legislature govern all funds and accounts for every executive agency, board, commission, public trust, Authority and component unit. The State of Maine financial reporting entity reflected in the CAFR, which is more fully described in Note 2 to the Basic Financial Statements, includes these funds, agencies, organizations, boards, commissions, Authorities and major component units in accordance with GASB Statement 14. There are 12 major component units, one blended component unit, and two fiduciary component units included in the CAFR. The major component units are discretely presented in the financial statements; and the blended component unit is included as a separate fund in the fund financial statements. The fiduciary component units are presented in the fiduciary fund and similar component unit financial statements along with the other fiduciary activities of the State. The fiduciary activities are not included in the government-wide financial statements because the resources of these funds are not available to support the State's own programs.

The departments of the primary government record their daily financial operations in the State accounting system called the Maine Financial and Administrative Statewide Information System (MFASIS) operated by the Office of the State Controller.

Budgetary Control

The Governor presents a biennial budget for the General Fund and the Special Revenue Funds to the Legislature for enactment or revision. The State Constitution provides the Governor a "line item" veto, which allows an Executive dollar substitution for those amounts disapproved, as long as an appropriation or allocation is not increased (or a deappropriation or deallocation decreased) either in the specified line or in any other line in the legislative document.

Once passed and signed, the budget becomes the financial plan for the State for the next biennium. It includes proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also includes anticipated revenues and any other means of financing expenditures. In accordance with statute, the State Budget Officer must use the projections of the Revenue Forecasting Committee to prepare the General Fund and Highway Fund budgets.

The total General Fund appropriation for each fiscal year of the biennium in the Governor's budget submission to the Legislature may not exceed the General Fund appropriation of the previous fiscal year multiplied by one plus the average real personal income growth rate, as defined in Title 5 M.R.S.A. § 1665, subsection 1, plus the average forecasted inflation rate. "Average forecasted inflation rate" means the average forecasted change in the Consumer Price Index underlying the revenue projections developed by the Revenue Forecasting Committee. This appropriation limitation may be exceeded only by the amount of the additional costs or the lost federal revenue from the following exceptional circumstances: unfunded or under-funded new federal mandates; losses in federal revenues or other revenue sources; citizens' initiatives or referenda that require increased State spending; court orders or decrees that require additional State resources to comply with the orders or decrees; and sudden or significant increases in demand for existing State services that are not the result of legislative changes that increased eligibility or increased benefits. The Governor may designate exceptional circumstances that are not explicitly defined, but meet the intent of, this statute. "Exceptional circumstances" means an unforeseen condition or conditions over which the Governor and the Legislature have little or no control. Exceptional circumstances do not apply to new programs or program expansions that go beyond existing program criteria and operation.

The State maintains budgetary control at the account and line category levels. The head of each department and agency of State government must submit a work program to the Bureau of the Budget for the ensuing fiscal year. The work program is classified to show allotments requested for specific amounts for personal services, capital expenditures, and all other departmental expenses. These are the levels at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Controller authorizes all expenditures to be made from the amounts available on the basis of these allotments and not otherwise.

Budget revisions during the year, reflecting program changes or intradepartmental administrative transfers, require the approval of the State Budget Officer and the Governor. Except in specific instances, only the Legislature may transfer appropriations between departments. Agency requests for increases in appropriations, allocations, or funding for new programs are presented to the Legislature as a supplemental budget.

The State uses encumbrance accounting as an extension of formal budgetary control. This requires that purchase orders, contracts, and other commitments be recorded to reserve a portion of an appropriation or allocation for expenditure. Appropriated and allocated balances are available for subsequent expenditure to the extent that there are approved encumbrances at the end of a fiscal year. The State reports encumbrances outstanding at year-end as reservations of fund balances to identify those portions of fund balances that are not available for allocation or expenditure, or that are legally segregated for specific future uses. Unencumbered appropriations in the General Fund and in the Highway Fund are carried forward to a subsequent year only when authorized by law, otherwise the balances lapse at year-end.

Maine Budget Stabilization Fund

The Maine Budget Stabilization Fund, established in 2003 in Chapter 451, Public Laws 2003 to replace the Maine Rainy Day Fund, is a General Fund reserve account intended to be used when revenues are under budget and critical services must be preserved. The Governor may also allocate funds from the Budget Stabilization Fund for payment of death benefits for law enforcement officers, firefighters and emergency medical services persons.

Balances in the fund do not lapse; but carry forward each year. The money in the fund may be invested with any earnings credited to the fund except when the fund is at its statutory cap. In addition to interest earnings, the fund is capitalized at the close of each fiscal year. As the first priority before any other transfer, the State Controller is required to transfer 32% of the unappropriated surplus of the General Fund, when the fund is not at its statutory cap.

The statutory cap for the fund is 10% of the total General Fund revenue received in the immediately preceding fiscal year. At the close of the fiscal year, the cap is based on the revenue received in the fiscal year being closed. Based on fiscal year 2005 actual General Fund revenue, the statutory cap at the close of fiscal year 2005 and during fiscal year 2005 was \$279,084,505. At the close of fiscal year 2005, the balance of the Maine Budget Stabilization Fund was \$47,071,215. No reductions to the Maine Budget Stabilization Fund balance are required when it exceeds the balance of the statutory cap as a result of a decline of General Fund revenue.

ECONOMIC CONDITIONS AND OUTLOOK

The Maine economy recovered from the recession in 2004 and is now experiencing moderate and steady growth. The prime movers were an improved national economy and continued low interest rates. The Maine Coincident Economic Index (CEI – which roughly tracks Real Gross State Product) rose 2.3% for the year, the strongest performance since 2000, and a significant improvement over the 0.6% growth measured in 2003

Maine payroll employment increased by 6,900, or 1.1%, the best showing in four years. Maine's average unemployment rate in 2005 was 4.6%, down from 5% in the previous years, and still well below the national rate of 5.5%. As a result, personal income growth was also improved. Personal income growth in 2004 was 6%, 25th best in the country. Maine's ability to navigate through the recent recession better than many other states has resulted in Maine's per capita income ranking improving to 31st in the country in 2004.

Very low interest rates enabled a record setting year for national home sales and home refinancing activity again put billions into people's pockets, a boon to retailers. Maine total taxable retail sales increased by 6% in 2004, up from 5% growth in the previous year. The bulk of this improvement was due to the exceptional strength of the building supply store-type group (up 15.7%). In recent months rising interest rates and energy costs have slowed the growth in taxable sales to 3%.

The November 2005 Maine economic forecast calls for payroll employment growth of .8% in 2005 and .9% in 2006. The largest jobs gains over this period will be in education and health services, professional and business services, retail and leisure and hospitality. Construction employment is expected to shrink and manufacturing jobs will continue to decline, but at a slower rate than over the past few years.

Personal income is expected to grow a bit more slowly than in the recent past, with growth near 5.5% for this year and next. Wage and salary income growth will increase by an average of 5% for the period, with even stronger growth rates predicted for "other labor income," proprietors' income, and transfer payments

CURRENT DEVELOPMENTS AND INITIATIVES

Chapter 20, Public Laws of 2005 enacted into law the Administration's comprehensive government reorganization plan to consolidate and streamline administrative services across Maine State Government through the consolidation of information technology, statewide payroll, accounting and finance, human resources, and administrative hearings. The consolidation is, perhaps, the most sweeping reorganization of backbone services in Maine's recent history. The initiative will provide State government and the citizens of Maine with long-term benefits.

- The consolidation brings an enterprise-wide view to managing the State's internal service resources. This structure ensures that State government is positioned to provide more efficient support services to State agencies.
- The plan changes the service delivery model in a way that benefits agencies with limited resources, while providing savings from the economies of scale.
- The consolidation provides an operating model to ensure that resources are managed with accountability and maximum transparency for the overall good of Maine's citizens.
- The model provides an enhanced measure of internal control over all backbone service resources throughout State government, allowing issues to be identified earlier and addressed timely and effectively.
- The State benefits by having a group of professional employees with specialized skills that are transferable to serve any agency in State government.
- It creates a mechanism for the rapid deployment of resources where needed in case of an emergency, or to address problems.
- The reorganization eliminates the inter-agency competition for qualified staff resources while providing employees with greater opportunity for professional development and career advancement.
- The plan saves approximately \$10.7 million across all funds that comprise State government. The General Fund alone will provide annual net savings of approximately \$5.3 million into the future.

Significant property tax legislation was enacted in Chapter 2, Public Laws 2005 which provides property tax relief to the vast majority of Maine's citizens. The tax reform law limits spending at the municipal level of government as well as the State level. The law increases the State's share of education aid by \$250 million in the 2006 – 2007 biennia and increases according to a predetermined formula until the State meets its obligation of funding local education at 55%.

The State Controller and State Treasurer jointly introduced a proposed change to Maine Law related to the overall management of the Treasurer's Cash Pool to provide better accountability of internal transfers of cash among the various funds that comprise the cash pool. The language proposed was adopted by the Legislature in Chapter 386, Public Laws of 2005.

FINANCIAL INFORMATION

Cash Management

The State pools cash for a variety of State agencies and public sector entities. Interest earned on pooled cash is allocated to the various funds, generally based on their average equity balances. In accordance with statute, the Treasurer of State may deposit State funds in any of the banking institutions organized under the laws of this State, and any national bank or federal savings and loan association located in the State. All State money in any depository of State Government shall be to the credit of the State but the Treasurer of State shall not withdraw any of the funds except upon the authority of the State Controller.

The Treasurer of State may invest funds that exceed current obligations, with the concurrence of the State Controller or the Commissioner of Administrative and Financial Services, and the consent of the Governor. The list of approved pool investments includes: U.S. Treasury Bills, Notes, Bonds and Agency Securities, certain secured repurchase agreements, prime commercial paper, tax-exempt obligations, banker's acceptances, and certain secured shares of an investment company registered under the federal Investment Company Act of 1940.

Debt Administration

When issuing General Obligation Bonds, the State of Maine pledges its full faith and credit to repay the financial obligation. Unless certain tax revenue streams are specifically restricted, states typically pledge all of their tax-raising powers to secure the obligations. The major bond rating agencies regularly assess the capacity and willingness of the State to repay its general obligation debt. Moody's Investors Service, Standard & Poor's, and FitchRatings make their assessments, in large part, by examining four basic analytical areas:

- Economy
- Financial Performance and Flexibility
- Debt Burden
- Administration

The economic base is the most critical element in determining the rating. Growth and diversity in the demographics, tax base, and employment base of the State over the last decade are indicators of future growth prospects and debt repayment capabilities. Generally, States with higher income levels and diverse economic bases have superior debt repayment capabilities and are better protected from sudden shocks or unexpected volatility in the economy. Because a strong economy does not always ensure a State's ability to meet debt payments, the State's financial management and performance are also key factors.

Financial analysis involves several factors, including: accounting and reporting methods; revenue and expenditure patterns; annual operating and budgetary performance; leverage and equity positions; budget and financial planning; and contingency obligations. These factors present a clear indication of the financial strengths and weaknesses of the State. The rating agencies' analyses of these factors provide the framework for judging Maine's capacity to manage economic, political, and financial uncertainties. Following is a history of Maine's credit ratings from three of the major rating agencies, and a brief explanation of their meanings:

Standard & Poor's

“AAA” is the highest Issuer Credit Rating assigned by Standard & Poor's. An obligor rated “AAA” has EXTREMELY strong capacity to meet its financial commitments. An obligor rated “AA” has VERY strong capacity to meet its financial commitments. It differs from the highest rated obligors only in small degree. Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

<u>Year</u>	<u>Rating</u>
1995	AA+
1996	AA+
1997	AA+
1998	AA+
1999	AA+
2000	AA+
2001	AA+
2002	AA+
2003	AA+
2004	AA
2005	AA-

Moody's Investors Service

Moody's is one of the few major rating agencies that measures total expected credit loss over the life of the security, assessing both the likelihood that the issuer will default and the amount of loss after a default occurs. “Aaa” rated bonds are judged to be of the best quality. Generally referred to as "gilt edge," they carry the smallest degree of risk. “Aa” rated bonds are judged to be of high quality by all standards and together with the “Aaa” group they comprise what is generally known as high grade bonds. Moody's applies one of three numerical modifiers to each generic rating classification from “Aa” to “Caa.” The modifier 1 indicates that the issue ranks at the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates that the issue ranks at the lower end of its generic category.

<u>Year</u>	<u>Rating</u>
1995	Aa
1996	Aa
1997	Aa3*
1998	Aa2
1999	Aa2
2000	Aa2
2001	Aa2
2002	Aa2
2003	Aa2
2004	Aa2
2005	Aa3

** Refinement of Aa rating, not a downgrade*

FitchRatings

“AAA” indicates obligations that have the highest rating assigned by FitchRatings on its national rating scale. The capacity for timely repayment of principal and interest is considered extremely strong. “AA” indicates obligations for which capacity for timely repayment of principal and interest is very strong. Obligations rated “A” indicate that the capacity for timely repayment of principal and interest is strong relative to other obligors. However, adverse changes in business, economic or financial conditions are more likely to affect the capacity for timely repayment than for obligations in higher rated categories.

<u>Year</u>	<u>Rating</u>
1996	AA**
1997	AA
1998	AA
1999	AA
2000	AA+
2001	AA+
2002	AA+
2003	AA+
2004	AA+
2005	AA

*** Initial rating in 1996, not previously rated*

Various agencies and Authorities, the Maine Technical College System, and the University of Maine System issue revenue and/or lease-backed appropriation bonds. These obligations are supported solely by the revenues received by the issuing entities and the State is not obligated for such debt, nor is the full faith and credit of the State pledged for such debt. More detailed information about long-term obligations may be found in Note 11 to the financial statements.

Risk Management

In general, the State is “self-insured” for health and dental insurance, worker’s compensation, tort liability, vehicle liability, marine and aircraft, property losses, and retiree health insurance for State employees and teachers. The Risk Management Division’s activities include analysis of and control over insurance coverage and risk exposure. Risk Management funds the cost of providing claims servicing and claims payment by charging premiums to agencies based on a review of past losses and estimated losses for the current period.

OTHER INFORMATION

Acknowledgements and Conclusion

State government continues to have many accomplishments of which it can be proud. Consistent with the vision of Governor Baldacci to improve and enhance the fiscal administration of governmental operations, the Office of the State Controller continues to improve and refine its skills to meet the challenges of financial management in the 21st century. The Office provides assistance to many State agencies to help insure the integrity and accountability of the programs they deliver to Maine’s citizens. We strive to find solutions to the State’s financial challenges by partnering with financial and program managers ensuring that the best solutions are found to our many challenges.

This year we are mid-way through the implementation of an integrated financial management system for State government. The system integrates treasury functions, purchasing, general ledger accounting, cost allocation, fixed assets, cost and grant accounting, and financial reporting. The financial management system also provides the State with an integrated data analysis tool that will assist agencies to better manage and account for their resources. The system will be brought online July 1, 2006 as AdvantageME. In addition, the Office of the State Controller is in the midst of implementing an Employee Self Service system that will allow employees control over their personal information, benefit selection, and payroll deductions. The system will deliver the employee’s payroll advice to their desktop electronically. We expect to implement the Employee Self Service system on a statewide basis during January 2006. These new systems support the Administration’s comprehensive consolidation of backbone services by providing employees with the very best tools to increase their overall productivity and effectiveness.

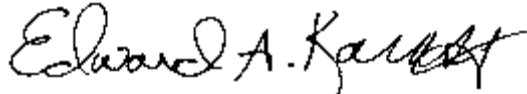

The State of Maine continues to face budgetary challenges as we approach FY 2007 as do many other States across the country resulting in many challenges.

- The pressures on revenues and the demand by citizens to maintain critical services are reducing staff availability throughout State government;
- Fiscal officers and their departments are being challenged with far reaching reorganization efforts in order to maintain critical services and fiscal control over operations; and,
- Once again, in the next biennium, we will be called upon to meet the challenges presented by limited resources and demands for services by our citizens.

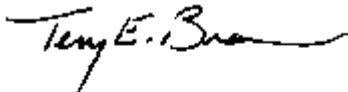

In an environment where economic resources are limited and agencies are coping with budget constraints, the challenge of maintaining effective internal controls is greater than ever. We will continue to partner with each department, at its highest levels, to ensure that the tools are available to help each agency assess its risks and target controls to manage those risks effectively and within its budgetary constraints whenever possible.

Each year the preparation of the CAFR requires the efforts of the finance people throughout the State from virtually all agencies, departments and component units. We sincerely appreciate the dedicated efforts of all of these individuals. I wish to express my appreciation to the Department of Audit for their help and cooperation. I am especially proud of the dedication and contributions of the staff of the Office of the State Controller, who each day makes a contribution to maintaining the public's trust in our financial operations. Their efforts culminate in the CAFR each year, and for the fourth consecutive year we have achieved an unqualified opinion from our auditors. Since the Baldacci Administration has taken Office, we have been able to reduce the time it takes to produce an audited CAFR by approximately six months.

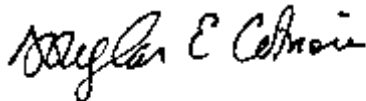

Sincerely,

Edward A. Karass, CGFM

INDEPENDENT AUDITOR'S REPORT

To the President of the Senate and the
Speaker of the House of Representatives

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Maine, as of and for the year ended June 30, 2005, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State of Maine's management. Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit the financial statements of the Child Development Services System, Finance Authority of Maine, Governor Baxter School for the Deaf, Loring Development Authority, Maine Educational Loan Authority, Maine Governmental Facilities Authority, Maine Health and Higher Educational Facilities Authority, Maine Maritime Academy, Maine Municipal Bond Bank, Maine Port Authority, Maine State Housing Authority, Maine State Retirement System, Maine Community College System, Northern New England Passenger Rail Authority, and University of Maine System. Those financial statements reflect total assets and revenues of the government-wide financial statements and total assets and revenues or additions of the fund financial statements as follows:

<u>Government-Wide Financial Statements:</u>	<u>Percent of Assets</u>	<u>Percent of Revenues</u>
Component Units	100%	100%
<u>Fund Financial Statements:</u>	<u>Percent of Assets</u>	<u>Percent of Revenues or Additions</u>
Proprietary Funds-Governmental Activities-		
Internal Service Funds	44%	2%
Fiduciary Funds- Private Purpose Trust Funds	27.5%	9.62%

Those financial statements were audited by other auditors whose reports thereon have been furnished to us and our opinion, insofar as it relates to the amounts included for those component units and funds, is based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

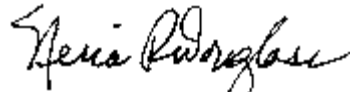

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Maine, as of June 30, 2005, and the respective changes in financial position and, where applicable, cash flows, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis, budgetary comparison schedules and related notes, information about infrastructure assets reported using the modified approach, and information on the schedules of funding progress and employer contributions for the State retirement plan and the Participating Local District plan are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Maine's basic financial statements. The supplementary information- combining statements and individual fund statements, as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. The combining statements and individual fund statements have been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and the statistical section, as listed in the table of contents, have not been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, accordingly, we express no opinion on them.

As discussed in Note 3 to the financial statements, the State reclassified certain activities in 2005 and also corrected the recording of a prior period liability. As discussed in Notes 1 and 3 to the financial statements, the State changed its policy for determining which items are treated as cash equivalents.

As discussed in Note 3 to the financial statements, the State has implemented Governmental Accounting Standards Board Statement #40, *Deposit and Investment Risk Disclosures – an amendment of GASB Statement No. 3*.

Neria R. Douglass, JD, CIA
State Auditor

December 9, 2005

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section of the State of Maine's annual financial report presents the State's discussion and analysis of financial performance during the year ended June 30, 2005. Please read it in conjunction with the transmittal letter at the front of this report and with the State's financial statements, which follow this section.

FINANCIAL HIGHLIGHTS

Government-wide:

- The State's net assets increased by 4.6 percent from the previous fiscal year. Net assets of Governmental Activities increased by \$203.7 million, while net assets of Business-type Activities decreased by \$45.9 million. The State's assets exceeded its liabilities by \$3.6 billion at the close of fiscal year 2005. Component units reported net assets of \$1.7 billion, an increase of \$89 million (roughly six percent) from the previous year.

Fund level:

- At the end of the fiscal year, the State's governmental funds reported combined ending fund balances of \$537.7 million, an increase of \$140 million from the previous year. The General Fund's total fund balance was \$46.4 million, an increase of \$48.6 million from the previous year.
- The proprietary funds reported net assets at year end of \$491.5 million, a decrease of \$105.9 million.

Long-term Debt:

- The State's liability for general obligation bonds increased by \$70.7 million during the fiscal year, which represents the difference between new issuances and payments of outstanding debt. During the year, the State issued \$137.5 million in bonds and made principal payments of \$66.8 million.

Additional information regarding the government-wide, fund level, and long-term debt activities can be found beginning on page 7.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is an introduction to the State of Maine's basic financial statements, which are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-wide Statements

The government-wide statements report information about the State as a whole using accounting methods similar to those used by private-sector companies. The Statement of Net Assets presents all of the State's assets and liabilities, with the difference between the two reported as *net assets*. Over time, increases and decreases in net assets are an indicator of whether the financial position is improving or deteriorating.

The Statement of Activities presents information showing how the State's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying events giving rise to the change occur, regardless of the timing of related cash flows. Therefore, revenues and expenses are reported in these statements for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused leave).

Both government-wide statements report three activities:

Governmental activities - Most basic services, such as health & human services, education, governmental support & operations, justice & protection, and transportation are included in this category. The Legislature, Judiciary and the general operations of the Executive departments fall within the Governmental Activities. Income taxes, sales and use taxes, and State and federal grants finance most of these activities.

Business-type activities - The State charges fees to customers to help cover all or most of the costs of certain services it provides. Operating costs not covered by customer fees are subsidized by the General Fund. Lottery tickets, transportation services, and the State's unemployment compensation services are examples of business-type activities.

Component units - Although legally separate, component units are important because the State is financially accountable for these entities. The State has "blended" one component unit, the Maine Governmental Facilities Authority (MGFA) with Governmental Activities as described above. Maine reports 14 other component units as discretely presented component units of the State, two of which are reported with the State's fiduciary funds. Complete financial statements of the individual component units may be obtained directly from their respective administrative offices as shown in Note 1 A to the financial statements.

Government-wide statements are reported utilizing an economic resources measurement focus and full accrual basis of accounting. The following summarizes the impact of the transition from modified accrual to full accrual accounting:

- Capital assets used in governmental activities are not reported on governmental fund statements but are included on government-wide statements
- Certain tax revenues that are earned, but not available, are reported as Governmental Activities, but are reported as deferred revenue on the governmental fund statements
- Other long-term assets that are not available to pay for current period expenditures are deferred in governmental fund statements, but not deferred on the government-wide statements
- Internal service funds are reported as Governmental Activities, but reported as proprietary funds in the fund financial statements
- Governmental fund long-term liabilities, such as certificates of participation, pension obligations, compensated absences, bonds and notes payable, and others appear as liabilities only in the government-wide statements
- Capital outlay spending results in capital assets on the government-wide statements, but is recorded as expenditures on the governmental fund statements
- Proceeds from bonds, notes and other long-term financing arrangements result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements
- Net asset balances are allocated as follows:

Net Assets Invested in Capital Assets, Net of Related Debt;

Restricted Net Assets are those with constraints placed on the use by external sources (creditors, grantors, contributors, or laws or regulations of governments) or imposed by law through constitutional provisions or enabling legislation; and

Unrestricted Net Assets are net assets that do not meet any of the above restrictions.

Fund Financial Statements

The fund financial statements provide more detailed information about the State's most significant funds. Funds are fiscal and accounting entities with self-balancing sets of accounts that the State uses to keep track of specific revenue sources and spending for particular purposes. The State's funds are divided into three categories – governmental, proprietary, and fiduciary – and use different measurement focuses and bases of accounting.

Governmental funds: Most of the basic services are included in governmental funds, which generally focus on how money flows into and out of those funds and the balances left at year-end that are available for future spending. The governmental fund statements provide a detailed short-term view that helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the programs of the State. The governmental fund statements focus primarily on the sources, uses, and balance of current financial resources and often have a budgetary orientation. These funds are reported using a flow of current financial resources measurement focus and the modified accrual basis of accounting. Because this information does not encompass the additional long-term focus of the government-wide statements, a separate reconciliation provides additional information that explains the relationship (or differences) between them. The governmental funds consist of the General Fund, special revenue, capital projects, and permanent funds.

Proprietary funds: When the State charges customers for the services it provides, whether to outside customers or to other agencies within the State, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) apply the accrual basis of accounting utilized by private sector businesses. Enterprise funds report activities that provide supplies and services to the general public. An example is the State Lottery Fund. Internal service funds report activities that provide supplies and services to the State's other programs and activities – such as the State's Postal, Printing & Supply Fund. Internal service funds are reported as Governmental Activities on the government-wide statements.

Fiduciary funds: The State is the trustee or fiduciary for assets that belong to others. The State is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets belong. These funds include pension and other employee benefit trusts administered by the Maine State Retirement System, the Maine Health and Higher Educational Facilities Authority, both discrete component units, private-purpose trusts, and agency funds. Fiduciary funds are reported using the accrual basis of accounting. The State excludes these activities from the government-wide financial statements because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in both the government-wide and fund financial statements.

Required Supplementary Information

The required supplementary information includes budgetary comparison schedules for the General Fund and major special revenue funds. Also included are notes and a reconciliation of fund balance from the budgetary basis to fund balance determined according to generally accepted accounting principles. This section also includes schedules of funding progress for certain pension trust funds and condition and maintenance data regarding certain portions of the State's infrastructure.

Other Supplementary Information

Other supplementary information includes combining financial statements for non-major governmental, proprietary, and fiduciary funds. These funds are added together, by fund type, and presented in single columns in the basic financial statements.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

The State's net assets increased by 4.6 percent to \$3.6 billion at June 30, 2005, as detailed in Tables A-1 and A-2.

Table A- 1: Condensed Statement of Net Assets

* *As restated*

Changes in Net Assets

The State's fiscal year 2005 revenues totaled \$6.5 billion. (See Table A-2) Taxes and operating grants and contributions accounted for most of the State's revenue by contributing 46.9 percent and 38.9 percent, respectively, of every dollar raised. The remainder came from charges for services and other miscellaneous sources.

The total cost of all programs and services totaled \$6.3 billion for the year 2005. (See Table A-2) These expenses (70.8 percent) are predominantly related to health & human services and education activities. The State's governmental support & operations activities accounted for 7.6 percent of total costs. Total net assets increased by \$157.7 million.

* As restated

Governmental Activities

Revenues for the State's Governmental Activities totaled \$6.1 billion while total expenses equaled \$5.9 billion. Therefore, the increase in net assets for Governmental Activities was \$203.7 million in 2005. This is due, primarily, to increases in employment and construction, which resulted in higher-than-expected revenues in the major tax lines. The users of the State's programs financed \$370.5 million of the cost. The federal and State governments subsidized certain programs with grants and contributions of \$2.5 billion. \$3.2 billion of the State's net costs were financed by taxes and other miscellaneous revenue.

Table A-3: Total Sources of Revenues for Governmental Activities for Fiscal Year 2005

Table A-4: Total Expenses for Governmental Activities for Fiscal Year 2005

Business-type Activities

Revenues for the State's Business-type Activities totaled \$406.9 million while expenses totaled \$352.5 million. The decrease in net assets for Business-type Activities was \$45.9 million in 2005. One major event, recorded as a special item, contributed to the decrease: in fiscal year 2004, the State of Maine entered into a contract with a vendor to manage and operate wholesale liquor distribution as the State's agent and recorded the transfer of \$50 million of proceeds from the sale of those operating rights from the Alcoholic Beverages enterprise fund to the General Fund in the current fiscal year.

Table A-5 presents the cost of State Business-type Activities: employment security, alcoholic beverages, lottery, airport, marine ports, ferry services, military equipment maintenance, Dirigo Health and other. The table also shows each activity's net cost (total cost less fees generated by the activities and intergovernmental aid provided for specific programs). The net cost shows the financial burden placed on the State's taxpayers by each of these functions.

Table A-5: Net Cost of Business-Type Activities
(Expressed in Thousands)

Category	Total Cost		Net (Cost) Revenue	
	2005	2004*	2005	2004*
Employment Security	\$ 113,642	\$ 118,965	\$ 10,182	\$ (6,905)
Alcoholic Beverages	7	61,958	12,575	27,129
Lottery	161,691	146,214	50,274	42,457
Airport	892	819	(754)	(672)
Marine Ports	1,829	1,415	(1,402)	99
Ferry Services	7,876	7,296	(3,827)	(3,854)
Military Equip. Maint.	50,908	24,639	(4,431)	2,704
Dirigo Health	13,587	821	(8,371)	(821)
Other	2,107	2,107	71	(229)
Total	<u>\$ 352,539</u>	<u>\$ 364,234</u>	<u>\$ 54,317</u>	<u>\$ 59,908</u>

*As restated.

The cost of all Business-type Activities this year was \$352.5 million. The users of the State's programs financed most of the cost. The State's net revenue from Business-type Activities was \$54.3 million. The State's Business-type Activities transferred \$100.2 million (net) to the Governmental Activities, which includes \$50.2 in statutorily required profit transfers and \$50 million of proceeds from the sale of operating rights from the Alcoholic Beverages enterprise fund.

FINANCIAL ANALYSIS OF THE STATE'S FUNDS

At the close of the fiscal year, the State reported fund balances of \$537.7 million in its governmental funds. The Other Special Revenue Fund, at \$259.9 million, comprises 48.3 percent of the total, while the General Fund, at 46.4 million, the Highway Fund, at \$83.1 million, and the Federal Fund, at \$31.2 million comprise slightly less than 30 percent of the total fund balances. Miscellaneous non-major governmental funds, in the aggregate, comprise 21 percent of the total. Total fund balances in the governmental funds increased by \$140 million. More than 34 percent of that increase occurred in the General Fund, while 25 percent occurred in the Other Special Revenue Fund and 23 percent in the Highway Fund. Proceeds from the sale of operating rights for the State's wholesale liquor distribution accounted for \$50 million, or 36 percent of the increase in total fund balances in the governmental funds.

Budgetary Highlights

For the 2005 fiscal year, the final legally adopted budgeted expenditures for the General Fund amounted to \$2.8 billion, an increase of about \$160.6 million from the original legally adopted budget of approximately \$2.7 billion. Actual expenditures on the budgetary basis were \$80 million less than those authorized in the final budget, resulting from a concerted effort to reduce spending, primarily in the broad categories of education and social services. Actual revenues exceeded final budget forecasts by \$28 million mainly due to higher than expected personal income tax and sales tax revenues.

On the modified accrual basis, General Fund revenues and other financing sources exceeded expenditures and other financing uses by \$48.6 million for the fiscal year. A legislatively authorized contract with a vendor to manage and operate wholesale liquor distribution as the State's agent contributed 50 million and the return of excess equity from the Retiree Health Fund contributed 68.4 million towards the excess. The General Fund ended the year with a \$46 million surplus.

During Fiscal Year 2005, the State of Maine, in accordance with the legislatively authorized budget, recorded the following non-routine, nonrecurring transfers, which affected the General Fund: \$9.6 million from the Highway Fund to the Other Special Revenue Fund for distribution to municipalities for highway-related purposes and \$9.6 million from the Other Special Revenue Fund to the General Fund to return amounts that would otherwise have been distributed to municipalities in the absence of the transfer from the Highway Fund.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

By the end of fiscal year 2005, the State had roughly \$3.5 billion in a broad range of capital assets, including land, infrastructure, improvements, buildings, equipment, vehicles and intangibles. During fiscal year 2005, the State acquired or constructed more than \$269 million of capital assets. The most significant impact on capital assets during the year resulted from continued construction and rehabilitation of roads and bridges, and major construction and renovation of State-owned facilities. More detailed information about the State's capital assets and significant construction commitments is presented in Notes 8 and 15 to the financial statements.

* *As Restated*

Modified Approach for Infrastructure

As allowed by GASB Statement No. 34, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets – highways and bridges. Under this alternative method, referred to as the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense. Utilization of this approach requires the State to: 1) maintain an asset management system that includes an up-to-date inventory of infrastructure assets; 2) perform condition assessments that use a measurement scale and document that the infrastructure assets are being preserved at or above the condition level established; and 3) estimate the annual amounts that must be expended to preserve and maintain the infrastructure at the condition level established by the State. As long as the State meets these requirements, any additions or improvements to infrastructure are capitalized and all other maintenance and preservation costs are expensed.

Highways and bridges are included in the State's infrastructure. There are 8,760 highway miles or 17,747 lane miles within the State. Bridges have a deck area of 11.4 million square feet among 2,967 total bridges. The State has established a policy to maintain its highways at an average condition assessment of 60. At June 30, 2005, the actual average condition was 79.3. Its policy for bridges is an average sufficiency rating condition assessment of 60. The actual average condition for bridges was 77 at June 30, 2005. Preservation costs for fiscal year 2005 totaled \$46 million compared to estimated preservation costs of \$31 million.

Transportation bonds, approved by referendum, are issued to fund improvements to highways and bridges. Of the amount authorized by Chapter 33, P&S 2003, \$22 million was spent during FY2005.

Additional information on infrastructure assets can be found in Required Supplementary Information (RSI).

Long-Term Debt

The State Constitution authorizes general obligation long-term borrowing, with 2/3 approval of the Legislature and ratification by a majority of the voters; and general obligation short-term notes, of which the principal may not exceed an amount greater than 10% of all moneys appropriated, authorized and allocated by the Legislature from undedicated revenues to the General Fund and dedicated revenues to the Highway Fund for that fiscal year, or greater than 1% of the total valuation of the State of Maine, whichever is the lesser.

At year-end, the State had \$1.1 billion in general obligation and other long-term debt outstanding. More detailed information about the State's long-term liabilities is presented in Note 11 to the financial statements.

Table A-7: Outstanding Long-Term Debt
(Expressed in Thousands)

	Governmental Activities		Business-type Activities		Total Primary Government	
	<u>2005</u>	<u>2004</u>	<u>2005</u>	<u>2004</u>	<u>2005</u>	<u>2004</u>
General Obligation Bonds	\$ 487,095	\$ 416,360	\$ -	\$ -	\$ 487,095	\$ 416,360
Other Long-Term Obligations	<u>575,708</u>	<u>451,939</u>	<u>383</u>	<u>277</u>	<u>576,091</u>	<u>452,216</u>
Total	<u>\$1,062,803</u>	<u>\$ 868,299</u>	<u>\$ 383</u>	<u>\$ 277</u>	<u>\$1,063,186</u>	<u>\$ 868,576</u>

During the year, the State reduced outstanding long-term obligations by \$66.8 million for outstanding general obligation bonds and \$250.8 million for other long-term debt. Also during fiscal year 2005, the State incurred \$513 million of additional long-term obligations.

Credit Ratings

Three of the major bond rating agencies regularly assess the State's credit rating. During fiscal year 2005, Moody's Investors Service rated the State at Aa3, Standard & Poor's rated it at AA-, and Fitch Ratings rated it at AA.

FACTORS BEARING ON THE FUTURE OF STATE AND NEXT YEAR'S BUDGETS

Maine continues to recover economically. Our State is home to many renowned institutions of higher education, both public and private, industries, vacation areas, and world famous retailers, keeping the economy relatively stable and an incubator for new ideas and growth. Unemployment has remained at or below the national average due to these stabilization factors. The State of Maine with an international reputation for recreational, cultural, historical and educational institutions remains a significant spoke of the New England economy. Maine's economy remains diversified.

Inflation continued to rise though the past year. The Consumer Price Index rose nearly 4% from July 2004 to July 2005; however, fuel and utilities prices rose nearly 16% and transportation 6%. This extended to September 2005 to include the oil price escalation due to Hurricane Katrina, with a huge 26.3% jump in fuel and utilities prices and a nearly 17.2% rise in other transportation prices. Though the oil price shock seems to be leveling, it will affect budgeting decisions throughout FY06.

Per capita income continues to rise in Maine faster than inflation. According to the latest statistics available, per capita net income rose 4.8% in FY05, ahead of the 4.7% rise nationally. However, Maine ranked 30th in the nation in growth for personal income. Unemployment has hovered at or below the national average throughout the year. Preliminary figures indicate that the rate in Maine stood at 4.9% in November of 2005 which is still below the national rate of 5.0%.

The General Fund Revenue estimate for the 2006 – 2007 Biennium provides approximately \$5.8 billion in resources to be available for general purpose spending. At the beginning of the budgeting process for the 2006-2007 Biennium, the Legislature's Office of Program and Fiscal Review estimated structural gap at approximately \$701.3 million between available revenues and costs to maintain current services. Maine is once again challenged to make significant adjustments to the spending expectations over the course of the 2006 and 2007 fiscal years.

CONTACTING THE STATE'S FINANCIAL MANAGEMENT

This financial report is designed to provide citizens, taxpayers, customers, investors and creditors with a general overview of the finances of the State and to demonstrate the State's accountability for the money it receives. GOVERNMENTAL FUND FINANCIAL STATEMENTS

MAJOR FUNDS

General Fund – This is the State's primary operating fund. Its purpose is to account for all financial resources obtained and used for general government operations, which are not required to be accounted for in another fund.

Highway Fund – This fund is used primarily to account for motor fuel tax revenues, motor vehicle license and registration fees, and special State appropriations that are legally restricted to the construction and maintenance of State highways and bridges.

Federal Fund – This fund is used to account for grants, block grants and other financial assistance received from the federal government, that are legally restricted to expenditures for purposes specified in the grant awards or agreements.

Other Special Revenue Fund – This fund is used to account for revenue sources that are legally restricted to expenditures for specified purposes, including some major capital projects that are not accounted for in the Highway and Federal Funds.

NON-MAJOR FUNDS

Other *Non-major Special Revenue Funds* are used to account for revenue sources that are legally restricted to expenditures for specified purposes, including some major capital projects and funds held in trust for public purposes.

Non-major governmental funds are presented, by fund type, beginning on page 107.

**STATE OF MAINE
RECONCILIATION OF THE BALANCE SHEET - GOVERNMENTAL FUNDS
TO THE STATEMENT OF NET ASSETS**

June 30, 2005
(Expressed in Thousands)

Total fund balances for governmental funds		\$ 537,735
Amounts reported for governmental activities in the Statement of Net Assets are different because:		
Capital assets used in governmental activities are not financial resources and therefore are not reported in the governmental funds.	3,541,580	
Less: Accumulated depreciation	(159,927)	3,381,653
Long-term liabilities are not due and payable in the current period. Therefore, long-term liabilities are not reported in the governmental fund statements. However, these amounts are included in the Statement of Net Assets. This is the net effect of these balances on the statement:		
Bonds Payable	(487,095)	
Interest Payable Related to Long-term Financing	(3,530)	
Certificates of Participation and Other Financing Arrangements	(23,235)	
Claims Payable	(107,305)	
Pledged Future Revenues	(21,896)	
Compensated Absences	(34,252)	
Pension Obligation	(34,236)	(711,549)
Certain revenues are earned but not available and therefore are not reported in the governmental fund statements.		108,728
Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the Statement of Net Assets.		(136,158)
Net assets of governmental activities		\$ 3,180,409

The accompanying notes are an integral part of the financial statements.

The accompanying notes are an integral part of the financial statements.

STATE OF MAINE
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES
IN FUND BALANCES - GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

June 30, 2005
(Expressed in Thousands)

Net change in fund balances - total governmental funds	\$	139,973
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds report capital outlay as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. In the current period, the amounts are:		
Capital outlay	246,458	
Depreciation expense	<u>(14,034)</u>	232,424
The net effect of various transactions involving capital assets (ie. sales, trade ins and contributions) is to increase net assets.		
		(112)
The issuance of long-term debt provides current financial resources to governmental funds which increases long-term debt in the Statement of Net Assets. Repayment of the principal of long-term debt consumes the current financial resources of governmental funds, but repayment reduces long-term debt in the Statement of Net Assets. This is the amount that proceeds exceed repayments:		
Bond proceeds	(137,525)	
Proceeds from other financing arrangements	(2,500)	
Repayment of bond principal	66,790	
Repayment of other financing debt	9,911	
Accrued interest	<u>(2,031)</u>	(65,355)
Certain expenditures are reported in the funds. However, they either increase or decrease long-term liabilities reported as expenditures on the Statement of Net Assets and have been eliminated from the Statement of Activities as follows:		
Pension obligation	11,824	
Pledged future revenues	(21,896)	
Claims payable	(83,135)	
Compensated absences	<u>(921)</u>	(94,128)
Certain revenues are earned but not available and therefore are not reported in the governmental fund statements.		
		42,522
Internal service funds are used by management to charge the costs of certain activities to individual funds. The net revenue (expense) of the internal service funds is included in governmental activities in the Statement of Activities.		
		(51,656)
Changes in net assets of governmental activities	<u>\$</u>	<u>203,668</u>

The accompanying notes are an integral part of the financial statements.

PROPRIETARY FUND FINANCIAL STATEMENTS

MAJOR FUNDS

Unemployment Compensation Fund - This fund accounts for unemployment insurance contributions from employers and the payment of unemployment benefits to eligible claimants.

Alcoholic Beverages Fund - This fund was established to license and regulate the sale of alcoholic beverages. During fiscal year 2004, the State entered into a ten-year contract with a vendor to manage and operate wholesale liquor distribution as the State's agent.

NON-MAJOR FUNDS

Other *Non-Major Enterprise Funds* are used to account for operations that are financed and operated in a manner similar to private business, where the State intends to finance or recover the costs of providing goods or services to the General Public on a continuing basis primarily through user charges. The State also uses these funds where periodic determination of net income is appropriate for accountability purposes.

Non-major enterprise funds are presented beginning on page 119.

Combining fund statements for the internal service funds, whose combined totals are presented on these statements, begin on page 127.

FIDUCIARY FUND

FINANCIAL STATEMENTS

Pension (and Other Employee Benefit) Trusts – accounts for funds held by the Maine State Retirement System (MSRS), a discrete component unit included with Fiduciary Funds per GASB Statement No. 34. MSRS provides pension, death, and disability benefits to its members, including State employees, some public school employees, and employees of approximately 270 local municipalities and other public entities in Maine.

Other Private-Purpose Trusts and Agency Funds are used to account for private-purpose assets held by the State in a fiduciary capacity, acting as either a trustee or an agent for individuals, organizations or other funds. Private-Purpose Trusts also include assets of Maine Health & Higher Educational Facilities Authority, a discrete component unit included with Fiduciary Funds per GASB Statement No. 34.

A listing of fiduciary funds and combining fund statements for private-purpose trusts and agency funds begin on page 135.

COMPONENT UNIT

FINANCIAL STATEMENTS

Child Development Services System maintains a coordinated service delivery system for the provision of Childfind activities, early intervention services, and free, appropriate public education services for eligible children with disabilities.

Finance Authority of Maine (FAME) – The Authority provides commercial financing and loan guarantees to Maine businesses and educational financing to Maine students and their parents; administers several revolving loan programs on behalf of the State; and administers the Maine College Savings Program Fund.

Governor Baxter School for the Deaf is a comprehensive educational organization that offers educational, residential, transitional, and outreach services to meet the needs of persons who are deaf or hard of hearing; their families, professionals, service providers, agencies and communities on a local, statewide, regional and national level.

The Loring Development Authority is responsible for the acquisition, development and management of the properties within the geographical area of the former Loring Air Force Base.

Maine Community College System is Maine’s primary provider of post-secondary technical education leading to a certificate, diploma, or associate degree. The financial statements of the system include the activity of seven colleges, the central administrative office, and the Maine Career Advantage.

Maine Educational Loan Authority was created to grant educational loans primarily using funds acquired through issuance of long-term bonds payable.

Maine Maritime Academy is a college specializing in ocean and marine programs at the undergraduate and graduate levels. The operation of the Academy is subject to review by the federal government.

The Maine Port Authority is responsible for acquiring, financing, constructing and operating port and railroad facilities within the State, to improve the global competitiveness of Maine businesses.

Maine Municipal Bond Bank is authorized to issue bonds providing funds to counties, cities, towns, school districts, or other quasi-municipal corporations within the State.

Maine State Housing Authority is authorized to issue bonds for the purchase of notes and mortgages on single- and multi-family residential units to provide housing for persons and families of low income in the State. The Authority also acts as agent for the State in administering federal weatherization, energy conservation, fuel assistance and homeless grant programs, and collecting and disbursing federal rent subsidies for low income housing.

Northern New England Passenger Rail Authority initiates, establishes and maintains regularly scheduled passenger rail service between points within Maine to points within and outside of Maine.

University of Maine System – The State University consists of seven campuses and a central administrative office.

The State has three other component units, which are not included in the discretely presented component unit financial statements. The Maine State Retirement System and Maine Health and Higher Educational Facilities Authority have been included in the State’s Fiduciary Fund Statements, and the Maine Governmental Facilities Authority has been blended with the State’s Internal Service Funds.

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Maine (the State) have been prepared under guidelines established by generally accepted accounting principles (GAAP) as mandated by the Governmental Accounting Standards Board (GASB).

Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements.

A. REPORTING ENTITY

For financial reporting purposes, the State of Maine's reporting entity includes all funds, organizations, agencies, boards, commissions and authorities. It includes as component units those legally separate organizations for which the State is financially accountable or for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete.

GASB Statement No. 14, *The Financial Reporting Entity*, as amended by GASB Statement No. 39, *Determining Whether Certain Organizations are Component Units*, defines financial accountability. The State is financially accountable for those entities for which it appoints a voting majority of the governing board and either is able to impose its will on that entity or the entity may provide specific financial benefits to, or impose specific financial burdens on, the primary government. Entities for which the State does not appoint a voting majority of the governing board may be included if the organization is fiscally dependent on the primary government or if the nature and significance of its relationship with the primary government is such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Blended Component Units - Blended component units are entities that are legally separate organizations that provide services entirely, or almost entirely, to the State or otherwise exclusively, or almost exclusively, benefit the State. Therefore, the State reports these organizations' balances and transactions as though they were part of the primary government. The Maine Governmental Facilities Authority (MGFA) has been blended within the financial statements of the primary government.

The MGFA was created in 1997, as a successor to the Maine Court Facilities Authority, for the purpose of assisting in the financing, acquisition, construction, improvement, reconstruction, and equipping of additions to structures designed for use as a court facility, State office or State activity space. The MGFA is included as an internal service fund in the State's financial statements.

Discrete Component Units - Discrete component units are entities that are legally separate from the State but are either accountable to the State or related so closely to the State that exclusion would cause the State's financial statements to be misleading or incomplete. The column labeled "Component Units" emphasizes these organizations' separateness from the State's primary government. Because of their nature, two of the discrete component units are reported in the fiduciary funds. Those component units are the Maine State Retirement System and the Maine Health & Higher Educational Facilities Authority. The State's discrete component units are:

The Child Development Services System was established for the purpose of maintaining a coordinated service delivery system for the provision of Childfind activities, early intervention services, and free, appropriate public education services for eligible children with disabilities. CDS as a reporting entity includes a State-level intermediate educational unit and 16 regional intermediate educational units.

The Finance Authority of Maine, created in 1983, provides commercial financing and loan guarantees to Maine businesses and educational financing to Maine students and their parents. The Authority also provides financial and other services for the Potato Marketing Improvement Fund Board, the Nutrient Management Fund Board, the Northern Maine Transmission Corporation, the Adaptive Equipment Loan Program Fund Board, the Fund Insurance Review Board, the Agricultural Marketing Loan Fund Board, the Occupational Safety Program Fund Board, and the Small Business Enterprise Growth Fund Board. Additionally, the Authority administers the Maine College Savings Program. Net assets of the program, NextGen College Investing Plan, are included in the State's fiduciary fund financial statements. The Governor appoints the 15 voting members of the Authority.

The Governor Baxter School for the Deaf is a comprehensive educational organization that offers educational, residential, transitional, and outreach programs while promoting deaf culture. The school offers services to meet the needs of infants, children and adults who are deaf or hard of hearing; their families, professionals, service providers, agencies and communities on a local, statewide, regional and national level. The combined financial statements of the School include the activity of the School and its component unit, the Maine Foundation for the Deaf.

The Loring Development Authority is entrusted with investigating the acquisition, development and management of the properties within the geographical boundaries of the former Loring Air Force Base. The United States Air Force transferred title to approximately 3,600 acres of land, associated facilities, infrastructure and personal property to the Authority. The Governor appoints the 13 voting members of the Board of Trustees, subject to confirmation by the Senate. At least 7 of the members must be residents of Aroostook County; at least 4 must not be residents of Aroostook County; and one shall be a Commissioner of a department of State Government, *ex officio*.

The Maine Community College System, formerly the Maine Technical College System, is Maine's primary provider of post-secondary technical education leading to a certificate, diploma, or associate degree. The combined financial statements of the System include the activity of seven colleges, the central administrative office, the Center for Career Development (including the Maine Career Advantage and Maine Quality Centers programs), and its component unit, Maine Community College Educational Foundations.

The Maine Educational Loan Authority was created in 1988 to grant educational loans primarily using funds acquired through issuance of long-term bonds payable. The Governor appoints five of the Authority's seven commissioners. The Authority's fiscal year ends on December 31.

Maine Health & Higher Educational Facilities Authority – MHHEFA assists Maine health care institutions and institutions of higher education in undertaking projects involving the acquisition, construction, improvement, reconstruction and equipping of health care and educational facilities and the refinancing of existing indebtedness. The Authority consists of 12 members, one of whom must be the Superintendent of Banking, *ex officio*; one of whom must be the Commissioner of Human Services, *ex officio*; one of whom must be the Commissioner of Education, *ex officio*; one of whom must be the Treasurer of State, *ex officio*; and eight of

whom must be residents of the State appointed by the Governor. The Authority, pursuant to the Student Loan Corporations Act of 1983, may finance student loan programs of institutions of higher education.

Maine Maritime Academy is a college specializing in ocean and marine programs at the undergraduate and graduate levels. The operation of the Academy is subject to review by the federal government. State appropriations, student fees, and a subsidy from the Maritime Administration support the Academy. The financial statements of the Academy include the activity of the college and of a wholly-owned subsidiary "Essence Limited", whose purpose is to maintain and charter certain large donated vessels owned by the Academy for use in its programs.

The Maine Municipal Bond Bank is authorized to issue bonds providing funds to counties, cities, towns, school administrative districts, community school districts, or other quasi-municipal corporations within the State. The Governor appoints three residents of the State to the five-member Board of Commissioners. The remaining two members include the Treasurer of State and Superintendent of Financial Institutions who serve as commissioners, *ex officio*.

The Maine Port Authority was established for the general purpose of acquiring, financing, constructing and operating port terminal facilities and railroad facilities within the State. Its mission is to improve the global competitiveness of Maine businesses by developing marine and rail facilities for the intermodal movement of people and cargo. The Governor appoints four of the five members of the Board of Directors. The fifth member is the Commissioner of Transportation.

The Maine State Housing Authority is authorized to issue bonds for the purchase of notes and mortgages on residential units, both single and multi-family, for the purpose of providing housing for persons and families of low income in the State. The Authority also acts as an agent for the State in administering federal weatherization, energy conservation, fuel assistance and homeless grant programs and collecting and disbursing federal rent subsidies for low income housing. The Governor appoints five of the Authority's seven commissioners. The Authority's fiscal year ends on December 31.

The Maine State Retirement System is the administrator of an agent, multiple-employer public employee retirement system. It provides pension, death, and disability benefits to its members, which include employees of the State, some public school employees, employees of approximately 270 local municipalities and

other public entities in Maine. The Governor appoints four of the Board's seven voting members.

The Northern New England Passenger Rail Authority, established on June 29, 1995 by the State of Maine Legislature, initiates, establishes and maintains regularly scheduled passenger rail service between points within Maine to points within and outside of Maine. The Governor appoints the five voting members of the Authority.

The University of Maine System is the State University. In 1968 all existing units of the State college system (Orono, Portland, Augusta, and the Law School) were merged by the 103rd Legislature. The result was the creation of the consolidated University of Maine System with a single Board of Trustees. The combined financial statements of the System include the activity of seven Universities, eleven centers, the central administrative office, and its component units, which include several foundations and alumni associations that raise funds on the System's behalf.

Complete financial statements of the individual component units can be obtained directly from their respective administrative offices by writing to:

Other Component Units

The following entities meet the criteria of component units but have not been included in the financial statements of the primary government. The amounts associated with these component units are not material to the State's financial statements: the Maine School of Science and Mathematics, the Maine Technology Institute, and the Maine Rural Development Authority.

Related Organizations

Officials of the State's primary government appoint a voting majority of the governing boards of the Maine Public Broadcasting Corporation, the Maine Turnpike Authority, and the Maine Veteran's Home. The primary government has no material accountability for these organizations beyond making the board appointments.

B. GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS**Government-Wide Financial Statements**

The Statement of Net Assets and Statement of Activities report information on all non-fiduciary activities of the primary government and its component units. Primary government activities are distinguished between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The *Statement of Net Assets* presents the reporting entity's non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are reported in three categories:

Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.

Restricted net assets result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constitutional provisions or enabling legislation.

Unrestricted net assets consist of net assets that do not meet the definition of the two preceding categories. Unrestricted net assets often are designated, to indicate that management does not consider them to be available for general operations. Unrestricted net assets often have constraints on resources that are imposed by management, but can be removed or modified.

The *Statement of Activities* demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are reported as general revenues.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with non-major funds being combined into a single column.

C. MEASUREMENT FOCUS, BASIS OF ACCOUNTING AND FINANCIAL STATEMENT PRESENTATION**Measurement Focus and Basis of Accounting**

The government-wide statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

As allowed by GASB Statement No. 20, the State's proprietary funds follow all GASB pronouncements and those Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins that were issued on or prior to November 30, 1989, except those that conflict with or contradict GASB pronouncements.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Governmental fund statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting.

Revenues are recognized in the governmental funds when they become susceptible to accrual, that is, when they become both measurable and available. "Available" means earned and collected or expected to be collected within the current period or soon enough thereafter to be used to pay liabilities of the current period. For this purpose, the State generally considers revenues as available if they are collected within 60 days of the end

of the fiscal year. Individual income, corporate income, and sales and use taxes are considered available if collected within 12 months of the end of the fiscal year.

Significant revenues susceptible to accrual include: income taxes, sales and use taxes, and other taxes; federal grants; federal reimbursements; and other reimbursements for use of materials and services. Revenues from other sources are recognized when received because they are generally not measurable until received in cash. Property taxes are recognized as revenue in the year for which they are levied, provided the "available" criterion is met.

The State Tax Assessor levies taxes on properties located in the unorganized territory of Maine by August 1 of each year, and on telecommunications personal properties statewide by May 30 of each year. Unorganized territory property taxes are due on October 1 and telecommunications personal property taxes are due on August 15. Formal collection procedures begin on November 1, and unpaid property taxes become a lien no later than March 15 of the fiscal year for which they are levied.

Expenditures are generally recorded when a liability is incurred. However, expenditures related to claims and judgments, debt service and compensated absences are recorded only when payment is due and payable.

Financial Statement Presentation

The State reports the following major governmental funds:

The *General Fund* is the State's primary operating fund. It accounts for all financial resources except those required to be accounted for in another fund.

The *Highway Fund* accounts for the regulation, construction and maintenance of State highways and bridges and is funded by motor fuel taxes, motor vehicle license and registration fees, special State appropriations, and other charges.

The *Federal Fund* accounts for grants and other financial assistance received from the federal government, including federal block grants, that are legally restricted to expenditures for purposes specified in the grant awards or agreements.

The *Other Special Revenue Fund* accounts for specific revenue sources that are legally restricted to expenditures for specified purposes, and the related current liabilities, including some major capital projects that are not accounted for in the Highway and Federal Funds.

The State reports the following major enterprise funds:

The *Maine Employment Security Fund* accounts for contributions received from employers and unemployment compensation benefits paid to eligible unemployed workers.

The *Alcoholic Beverages Fund* was established to license and regulate the sale of alcoholic beverages. During fiscal year 2004, the State of Maine entered into a 10 year contract with a vendor to manage and operate wholesale liquor distribution as the State's agent.

Additionally, the State reports the following fund types:

Governmental Fund Types:

Special Revenue Funds include operating fund activities financed by specific revenue sources that are legally restricted for specified purposes. Examples include learning technology, funds for acquisition of public reserved lands, and other activities.

Capital Projects Funds account for the acquisition or construction of major capital assets and other programs financed by proceeds from bond issues.

Permanent Trust Funds report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the government or its citizenry. An example is the Baxter State Park Fund.

Proprietary Fund Types:

Enterprise Funds report the activities for which fees are charged to external users for goods or services, such as lottery operations and transportation services, as well as the State's unemployment compensation program.

Internal Service Funds provide goods or services primarily to other agencies or funds of the State, rather than to the general public. These goods and services include printing and mailing services, supplies warehousing, information services, fleet management, risk management, health-related benefits, and financing for acquisition and construction of governmental facilities.

Fiduciary Fund Types:

Pension (and Other Employee Benefit) Trust Funds report those resources that are required to be held in trust for members and beneficiaries of the State's pension, death and disability benefit plans. These resources are managed by the Maine State Retirement System, which is presented with the State's fiduciary funds per GASB Statement No. 34.

Private Purpose Trust Funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments as well as component units which are fiduciary in nature. Examples include Abandoned Property, Public Reserved Lands, Permanent School funds, the NextGen College Investing Plan and MHHEFA.

Agency Funds report assets and liabilities for deposits and investments entrusted to the State as an agent for others. Examples include amounts held for payroll withholdings, inmate and student guardianship accounts.

D. FISCAL YEAR-ENDS

All funds and discretely presented component units are reported using fiscal years which end on June 30, except for the Maine Educational Loan Authority and the Maine State Housing Authority, which utilize December 31 year-ends.

E. ASSETS, LIABILITIES, AND NET ASSETS/FUND BALANCE**Equity in Treasurer's Cash Pool**

The State follows the practice of pooling cash and cash equivalents for a variety of State agencies and public sector entities. The pooled balances are reported at fair value. Interest earned on pooled cash is allocated to the various funds, generally based on their average equity balances. The Treasurer's Cash Pool has the general characteristics of a demand deposit account and is comprised primarily of prime commercial paper, repurchase agreements, U.S. Treasury Bills, U.S. Treasury Notes, and other U.S. Agency Obligations, certificates of deposit, and corporate bonds.

For those component units that participate in the cash pool, equity in the cash pool is shown at fair value.

Cash and Cash Equivalents

Cash equivalents consist of short-term, highly liquid investments that are both readily convertible to known amounts of cash and are near maturity. On the Statement of Cash Flows, the amount reported as "Cash and Cash

Equivalents" is equal to the total of the amounts reported on the Statement of Net Assets as "Equity in Treasurer's Cash Pool," "Cash and Cash Equivalents," "Cash with Fiscal Agent," "Restricted Equity in Treasurer's Cash Pool," and "Restricted Deposits and Investments."

Cash with Fiscal Agent

Cash with Fiscal Agent in the Governmental Funds represents cash that will be used for debt service on bonds, the unspent proceeds of bonds and Certificates of Participation, as well as unspent funds of the Maine Biological Research Board being held by the State.

Cash with Fiscal Agent in Proprietary Funds represents proceeds of Certificates of Participation and other financing arrangements that have not been spent.

Other investments of the State are carried at fair value. Donated investments are stated at fair value at the date of donation.

Investments Held on Behalf of Others

These assets include amounts held by the State in a fiduciary capacity, acting as either a trustee or an agent for individuals, organizations or other funds. Generally, these investments are reported at fair value or at amortized cost which approximates fair value. The State also holds \$175 million of Workers' Compensation and \$21 million of Maine Department of Labor surety bonds and letters of credit that are not reflected on the financial statements.

Restricted Deposits and Investments

Restricted deposits and investments include: unemployment tax receipts deposited with the United States Treasury that are drawn down to pay unemployment benefits; cash and investments of the Maine Governmental Facilities Authority, a blended component unit that has been independently audited; unspent bond proceeds, and funds that have been invested in Certificates of Deposit and other investments at various financial institutions within the State. The financial institutions lend these deposits and investments to local commercial and agricultural enterprises to foster economic growth in Maine.

Inventories

The costs of materials and supplies of the Governmental Funds are reported as expenditures when purchased. Undistributed vaccines and food commodities at fiscal year end are reported as inventory and deferred revenue in the Federal Fund. Revenues and corresponding expenditures are recognized when food stamps are used (EBT cards), and when vaccines and food commodities are issued. Inventories of materials and supplies in the Proprietary Funds are determined by physical counts and

by perpetual inventory systems. Proprietary Fund inventories are stated at cost or average cost.

Inventories included in the component unit column are stated at the lower of cost or market (using the first-in, first-out method).

Receivables

Receivables consist primarily of amounts due to the State from taxpayers and service providers. Also included in receivables are amounts due but not yet remitted to the State from lottery sales by agents. Loans receivable for the primary government represent low interest financing arrangements to construct and modernize agricultural storage facilities and local commercial enterprises, as well as Department of Transportation loans to local governments. Receivables in the component units column arise in the normal course of business. Receivables are stated net of estimated allowances for uncollectible amounts that are determined based upon past collection experience and aging of the accounts.

Interfund Transactions and Balances

Numerous transactions are made between funds to finance operations, provide services, and acquire or construct assets. To the extent that transactions between funds were not completed as of June 30, interfund receivables and payables have been recorded in the fund financial statements. Interfund receivables and payables have been eliminated from the Statement of Net Assets, except for the residual amounts due between governmental and business-type activities.

Long-term loans made by one fund to another are classified as "Working Capital Advances Receivable" and "Working Capital Advances Payable." In the fund financial statements, advances receivable are offset by reservations of fund balance indicating that the reserves do not constitute expendable financial resources.

Due from/to Primary Government/Component Units

Numerous transactions are made between the primary government and component units to finance operations, provide services, acquire or construct assets, or repay bonds. To the extent that transactions between funds were not completed as of June 30, "Due from Primary Government" and "Due to Component Unit" receivables and payables have been recorded.

Due from/to Other Governments

Due from/to Other Governments represents amounts receivable from or payable to municipalities or the federal government. Due from Other Governments represents primarily federal grants receivable for Medicaid claims, other health and human services programs, and federal grants receivable for

transportation-related expenditures. Due from Other Governments in the component units column represents amounts receivable for grants, bond repayment and retirement benefits. Due to Other Governments are primarily amounts owed to municipalities for Municipal Revenue Sharing and the federal government for Medicaid cost recoveries from providers.

Capital Assets

Capital assets, which include land, buildings, equipment and infrastructure assets (i.e., roads, bridges, ramps and similar items), are reported in the government-wide statements and applicable fund financial statements. Capital assets that are used for governmental activities are only reported in the government-wide statements. The State capitalizes governmental fund buildings valued at \$1 million or more and proprietary fund buildings valued at \$10 thousand or more. Governmental fund equipment is capitalized at \$10 thousand or more and proprietary fund equipment is capitalized \$3 thousand or more. All land, regardless of value, is capitalized. Capital assets are recorded at cost or, if not purchased, at fair value at date of acquisition. The historical cost for some capital assets is not available. The cost of these assets, at the date of acquisition, has been estimated. No interest has been capitalized on self-constructed assets, since non-capitalization of interest does not materially affect the financial statements.

In the government-wide statements, depreciation is reported on a straight-line basis over the assets' estimated useful lives, which are 10-40 years for buildings and improvements, and 2-25 years for equipment. The State uses the modified approach for reporting its significant infrastructure assets. As long as the State's infrastructure assets are maintained and preserved at pre-determined condition levels, maintenance costs are expensed and depreciation is not reported. This approach is discussed further in the Required Supplementary Information.

Fixed assets of component units are capitalized upon purchase and depreciated over their estimated useful lives. Interest incurred during construction is capitalized. The estimated useful lives of fixed assets are 5-60 years for structures and improvements and 3-15 years for equipment, furniture, fixtures and vehicles. Component units reflect infrastructure in improvements other than buildings and record depreciation expense on them.

Accounts Payable

Accounts payable represent the gross amount of expenditures or expenses that have been incurred as a result of normal operation, but for which no actual payment has yet been issued to vendors/providers. Incurred but not paid (IBNP) Medicaid claims

settlements, however, are actuarially estimated and recorded net of any receivables that may be due from related providers. The recorded net value of IBNP claims totals approximately \$194 million.

Tax Refunds Payable

The amount of collected or accrued tax revenues that will be refunded is estimated and accrued as a General Fund liability.

Claims Payable

Claims payable represent workers' compensation, retiree health, employee health, and other claims payable, including actual claims submitted and actuarially determined claims incurred but not reported. The actuarially determined claims liability is discounted and presented at net present value.

Compensated Employee Absences

In the government-wide statements and proprietary fund financial statements, compensated absences are recorded as expenses and liabilities as they accrue. In the governmental fund financial statements, vested or accumulated leave expected to be liquidated with current available financial resources is reported as an expenditure and fund liability. In the discretely presented component units, employees' accumulated compensated absences are recorded as an expense and liability as the benefits accrue.

Deferred Revenue

In the government-wide statements and proprietary fund financial statements, deferred revenue is recognized when cash, receivables, or other assets are received prior to their being earned. In the governmental fund statements, amounts recorded as receivable that do not meet the "availability" criterion for recognition as revenue in the current period are classified as deferred revenue. Resources received by the government before it has a legal claim to them are also included as deferred revenue. Deferred revenue reported in the General Fund is comprised of sales and income taxes. Deferred revenue in the Federal Fund is primarily for food commodities and vaccines not yet issued. Deferred revenue in the Alcoholic Beverages Fund is comprised of the proceeds from the sale of the State's liquor operations.

Pledged Future Revenues

In the Statement of Net Assets, the amount of bond proceeds received by a component unit for unspent GARVEE bond proceeds is called "Pledged Future Revenues." The offsetting receivables are classified as "Loans Receivable from Primary Government."

Long-Term Obligations

In the government-wide statements and proprietary fund financial statements, long-term debt and other long-term obligations are recorded as liabilities.

In the fund financial statements, governmental fund types recognize the face amount of debt issued as other financing sources.

Net Assets/Fund Balances

The difference between fund assets and liabilities is "Net Assets" on the government-wide, proprietary, and fiduciary fund statements, and "Fund Balances" on governmental fund statements.

Fund Balance Reservations

Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reserved fund balances reflect either: funds legally restricted for a specific future use or assets which, by their nature, are not available for expenditure. Unreserved fund balances reflect the balances available for appropriation for the general purposes of the fund.

The State reported the following fund balance reservations:

Continuing Appropriations - indicates appropriations and encumbrances that the Legislature has specifically authorized to be carried into the next fiscal year, if unexpended.

Debt Service - indicates amounts reserved for payment of future debt service obligations.

Budget Stabilization - indicates amounts reserved for use when revenues are under budget and critical services must be preserved.

Capital Projects - indicates a legally segregated portion of funds available to finance the construction of major capital facilities.

Permanent Trusts - indicates assets reserved for the purpose of the permanent fund.

Other - indicates fund balance reserved for other specified purposes including amounts for working capital needs, long-term loans to other funds, transfers to other funds, and contingency funds from which the Governor may allocate sums for various purposes.

F. REVENUES AND EXPENDITURES/EXPENSES

In the government-wide Statement of Activities, revenues and expenses are segregated by activity (governmental or business-type), then further by function (e.g., governmental support & operations, education, health & human services, etc). Additionally, revenues are classified between program and general revenues. Program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions. Internally dedicated resources are reported as general revenues, rather than as program revenue. General revenues include all taxes. Certain indirect costs are included in the program expenses reported for individual functions.

In the governmental fund financial statements, revenues are reported by source. For budgetary control purposes, revenues are further classified as either "dedicated" or "undedicated." Undedicated revenues are available to fund any activity accounted for in the fund. Dedicated revenues are, either by State law or by outside restriction (e.g., federal grants), available only for specified purposes. Unused dedicated revenues at year-end are recorded as reservations of fund balance. When both dedicated and undedicated funds are available for use, it is the State's policy to use dedicated resources first.

In the governmental fund financial statements, expenditures are reported by function. Capital outlay expenditures for real property or infrastructure (e.g. highways) are included with expenditures by function.

NOTE 2 – BUDGETING AND BUDGETARY CONTROL, AND LEGAL COMPLIANCE**Appropriation Limits**

The total General Fund appropriation for each fiscal year of the biennium in the Governor's budget submission to the Legislature may not exceed the General Fund appropriation of the previous fiscal year multiplied by one plus the average real personal income growth rate, as defined in Title 5 M.R.S.A. § 1665, subsection 1, plus the average forecasted inflation rate. "Average forecasted inflation rate" means the average forecasted change in the Consumer Price Index underlying the revenue projections developed by the Revenue Forecasting Committee.

This appropriation limitation may be exceeded only by the amount of the additional costs or the lost federal revenue from the following exceptional circumstances: unfunded or under-funded new federal mandates; losses in federal revenues or other revenue sources; citizens' initiatives or referenda that require increased State spending; court orders or decrees that require additional State resources to comply with the orders or decrees; and sudden or significant increases in demand for existing State services that are not the result of legislative changes that increased eligibility or increased benefits.

The Governor may designate exceptional circumstances that are not explicitly defined, but meet the intent of, this statute. "Exceptional circumstances" means an unforeseen condition or conditions over which the Governor and the Legislature have little or no control. Exceptional circumstances do not apply to new programs or program expansions that go beyond existing program criteria and operation.

Budget Stabilization Fund

The Maine Budget Stabilization Fund, established in 2003 in Chapter 451, Public Laws 2003 to replace the Maine Rainy Day Fund, is a General Fund reserve account intended to be used when revenues are under budget and critical services must be preserved. The Governor may also allocate funds from the Budget Stabilization Fund for payment of death benefits for law enforcement officers, firefighters and emergency medical services persons.

Balances in the fund do not lapse; but carry forward each year. The money in the fund may be invested with any earnings credited to the fund except when the fund is at its statutory cap. In addition to interest earnings, the fund is capitalized at the close of each fiscal year. As the first priority before any other transfer, the State Controller is required to transfer 32% of the unappropriated surplus of the General Fund, when the fund is not at its statutory cap. In accordance with statute, the State Controller made the required transfer for fiscal year 2005.

The statutory cap for the fund is 10% of the total General Fund revenue received in the immediately preceding fiscal year. At the close of the fiscal year, the cap is based on the revenue received in the fiscal year being closed. Based on fiscal year 2005 actual General Fund revenue, the statutory cap at the close of fiscal year 2005 and during fiscal year 2005 was \$279 million. At the close of fiscal year 2005, the balance of the Maine Budget Stabilization Fund was \$47 million.

No reductions to the Maine Budget Stabilization Fund balance are required when it exceeds the balance of the statutory cap as a result of a decline of General Fund revenue.

Budgetary Overexpenditures

Budgetary control is maintained at the program and line category level at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Budget Officer and the Governor must approve budget revisions during the year, reflecting program changes or intradepartmental administrative transfers.

Except in specific instances, only the Legislature may transfer appropriations between departments. Increases in appropriation, allocation, or funding for new programs are presented to the Legislature as a supplemental budget. For the year ended June 30, 2005, the legislature approved \$138.5 million of supplemental appropriations for the General Fund.

Actual expenditures did not exceed legislatively authorized appropriations at the Department level; therefore, the State complied with all related budget laws.

NOTE 3 - ACCOUNTING CHANGES AND RESTATEMENTS

Accounting Changes

During fiscal year 2005, the State implemented the Governmental Accounting Standards Board (GASB) Statement No. 40, Deposit and Investment Risk Disclosures, (an amendment of GASB Statement No. 3). This Statement establishes and modifies disclosure requirements related to investment risks: credit risk (including custodial credit risk and concentrations of credit risk), interest rate risk, and foreign currency risk. The Statement also establishes and modifies disclosure requirements for deposit risks: custodial credit risk and foreign currency risk.

Restatements – Primary Government

The beginning net assets for Governmental Activities in the Statement of Net Assets was reduced by \$23.4 million to correct an error in recorded capital assets; reduced by \$6.3 million to correct an error in reported claims payable; and increased by \$3.6 million to correct an error in reported federal revenue. Beginning net assets for the Federal Fund, a major governmental fund, were also increased by \$3.6 to correct the federal revenue error.

The Dirigo Health program, formerly reported as part of the Other Special Revenue Fund, a major governmental fund, was reclassified as a non-major enterprise fund. The effect of this change was to increase beginning net assets of the Dirigo Health Fund and Business-Type Activities by \$52.1 million. Beginning net assets for the Other Special Revenue Fund and Governmental Activities were reduced by like amounts.

The Alcoholic Beverages Fund was reclassified from a non-major enterprise fund to a major enterprise fund; thereby, increasing that fund’s beginning net assets by \$75 million. Beginning net assets of the non-major enterprise funds were reduced by \$75 million as a result.

Beginning balances were restated to correctly record capital assets that were not previously reported. The beginning net assets of the Maine Military Authority Fund, a non major enterprise fund, and Business-Type activities increased by \$1.3 million.

The NextGen College Investing plan, formerly reported as an Agency Fund, was reclassified as a Private Purpose Trust Fund. Beginning net assets of the Private Purpose Trust Funds were increased by \$2.6 billion due to the reclassification.

Cash/Cash Equivalents -Beginning of Year Cash/Cash Equivalents were restated on the Statement of Cash Flows for the Proprietary Funds to include investments reported in fiscal year 2004 due to a change in presentation.

Restatements – Component Units

The Maine Health and Higher Educational Facilities Authority, a discrete component unit that is fiduciary in nature, was previously reported in a separate column in the Statement of Fiduciary Net Assets and Statement of Changes in Fiduciary Net Assets. Balances associated with this fund were reclassified as part of the Private Purpose Trusts column on these statements, resulting in an increase in beginning nets assets of \$106.9 million.

The beginning net assets of the Loring Development Authority, a discretely presented component unit, were reduced by \$842 thousand to correctly report capital assets acquired from the United States Air Force.

NOTE 4 - DEFICIT FUND BALANCES/NET ASSETS

Two internal service funds showed deficit Net Assets for the fiscal year ended June 30, 2005. The Workers’ Compensation Fund reported a deficit of \$34.7 million, which reflects accruals for actuarially determined claims payable. The Leased Space Fund showed a deficit of \$3.8 million, which reflects the recording of capital lease depreciation. These deficits are expected to be funded by future service charges.

vendor to manage and operate wholesale liquor distribution as the State’s agent. The deficit reflects the deferral of license fees that will be amortized over that 10 year period.

The Alcoholic Beverages Enterprise Fund shows a deficit of \$112.5 million. During fiscal year 2004, the State of Maine entered into a 10 year contract with a

The Maine Military Authority Enterprise Fund shows a deficit of \$1.3 million. Expenses are recognized when incurred; however, related revenue is not earned until repair projects are satisfactorily completed. The deficit will be funded by future billings as projects are completed.

NOTE 5 - DEPOSITS AND INVESTMENTS

The deposit and investment policies of the State of Maine Office of the Treasurer are governed by Title 5 of the Maine Revised Statutes Annotated (M.R.S.A.). Per 5 M.R.S.A. § 135, the Treasurer may deposit State funds, including trust funds of the State, in any of the banking institutions (including trust companies, State or federal savings and loan associations, and mutual savings banks) organized under the laws of this State and any national bank or federal savings and loan association located in the State.

exempt obligations; corporate bonds rated “AAA” that mature within 36 months from the date of investment; banker’s acceptances; and “no-load” shares of an investment company registered under the Federal Investment Company Act of 1940, whose shares maintain a constant share price. Although authorized to do so, the Treasurer does not participate in the securities loan market.

The State follows the practice of pooling cash and cash equivalents for a variety of State agencies and public sector entities. The Treasurer may invest funds that exceed current obligations, with the concurrence of the State Controller or the Commissioner of Administrative and Financial Services and the consent of the Governor.

Investment policies of the permanent trusts are governed by 5 M.R.S.A. § 138. The Treasurer, with the approval of the Commissioner of Administrative and Financial Services, the Superintendent of Financial Institutions and the Attorney General, shall invest the funds in securities that are legal investments in accordance with Title 9-B, M.R.S.A. The investments need not be segregated to the separate trusts, but the identity of each trust must be maintained. The Treasurer may enter into custodial care and servicing contracts or agreements negotiated in accordance with the laws of this State for the handling of funds held in trust.

Approved investments include bonds, notes, certificates of indebtedness, other obligations of the United States that mature not more than 36 months from the date of investment; repurchase agreements secured by obligations of the United States that mature within the succeeding 12 months; prime commercial paper; tax-

No amounts exceeding 25% of the capital, surplus, and undivided profits of any trust company or national bank or 25% of the reserve fund and undivided profits of a mutual savings bank or State or federal savings and loan association, shall be on deposit in any one institution at any one time. This restriction does not apply to deposits subject to immediate withdrawal to meet the payment of any bonded debt or interest or to pay current bills or expenses of the State. Also exempt are deposits secured by the pledge of certain securities as collateral or fully covered by insurance.

With assistance from the Finance Authority of Maine, the Treasurer participates in a restricted deposit program to encourage banks to provide loans at two percent below market rates. The Treasurer may invest up to \$8 million in lending institutions at a two percent lower-than-market rate provided the lenders pass the rate reduction on to the borrowers. \$4 million of this program are earmarked for loans to agricultural enterprises, and the other \$4 million are designated for commercial entities.

The Primary Government's Deposits and Investments excluding component units that are fiduciary in nature at June 30, 2005 consisted of:

**Primary Government Deposits and Investments
(Expressed in Thousands)**

	Governmental Activities	Business-Type Activities	Private Purpose Trusts (1)	Agency Funds	Total
Equity in Treasurer's Cash Pool	\$ 470,077	\$ 41,459	\$ 764	\$ 5,613	\$ 517,913

(1) Maine Health & Higher Educational Facilities Authority, a component unit that is fiduciary in nature, has been excluded.

Interest Rate Risk – Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment. In general, the State holds securities to maturity.

All debt securities are reported at full-term.

The following table provides the segmented time distribution of the Primary Government's investments at June 30, 2005:

	Maturities in Years (Expressed in Thousands)						Fair Value
	<u>Less than 1</u>	<u>1-5</u>	<u>6-10</u>	<u>11-20</u>	<u>More than 20</u>	<u>No Maturity</u>

Credit Risk – Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. This credit risk is measured by the credit quality ratings of investments as described by nationally recognized statistical rating organizations. To the extent possible in the Treasurer’s Cash Pool, at least 30% of the portfolio shall be invested in U.S. Treasury, Federal

Agency or Federal Instrumentality securities, or Repurchase Agreements. The State limits credit risk in its trusts by ensuring that at least 85% of the debt securities are rated A or better.

The Primary Government’s total investments by credit quality rating as of June 30, 2005 is presented below:

	Standard & Poor’s Credit Rating (Expressed in Thousands)								Total
	<u>A1</u>	<u>A</u>	<u>AA</u>	<u>AA+</u>	<u>AAA</u>	<u>BB</u>	<u>BBB</u>	<u>Not Rated</u>

Total Primary Government	<u>\$ 266,425</u>	<u>\$ 3,407</u>	<u>\$ 1,541</u>	<u>\$ 2,646</u>	<u>\$ 173,209</u>	<u>\$ 50</u>	<u>\$ 1,517</u>	<u>\$ 88,073</u>	<u>\$ 536,868</u>

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of a government’s investment in a single issuer. The State limits concentration of credit risk in its trusts by requiring that no single stock represent more than 10 percent of the total portfolio. There is no concentration of credit risk policy for the Treasurer’s Cash Pool. At June 30, 2005, more than 5% of the cash pool’s investments were in FHLB and TD Banknorth. These investments are 11% and 14%, respectively, of the cash pool’s total investments.

Custodial Credit Risk - For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the State will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The State limits its custodial credit risk for the Treasurer’s Cash Pool by

maintaining a file of the most recent credit rating analysis reports performed for each approved financial institution. The State also requires that all securities be perfected in the name of the State and held in third party safekeeping by a state approved custodian. The State does not have a policy regarding custodial credit risk for its trusts. Of the cash pool’s \$11.3 million invested in non-negotiable certificates of deposit, \$5.6 million exceed the FDIC insured amounts for the institutions at which they were held. The Percival P. Baxter Trust is held by the counterparty’s trust department, but not in the State’s name. The fair value of the trust’s investments as of June 30, 2005 was \$56.6 million and was comprised of the following investments (in thousands):

U.S. Instrumentalities	\$ 6,554
US Treasury Notes	4,102
Corporate Notes and Bonds	4,744
Other fixed Income Securities	256
Equities	38,193
Cash and Equivalents	2,821
Other	11
Total	<u>\$ 56,681</u>

The State and certain vendors contract with a fiscal intermediary, Clareon, for electronic disbursements from the State to the vendors. During fiscal year 2005, these disbursements, on average, exceeded \$138 million per month. The funds in transit are not collateralized and are not held by the State Treasurer so, until the vendor receives payment, the State retains some liability.

MAINE STATE RETIREMENT SYSTEM

The Maine State Retirement System (The System) makes investments in a combination of equities, fixed income securities, mutual funds, commingled mutual and index funds, derivative financial instruments, and other investment securities established by the Trustee's investment policy. The System prohibits its investment managers from using leverage in its derivative financial instruments or from investing in speculative positions.

The System has also entered into agreements for securities lending transactions, which are collateralized in an amount at least equal to 102 percent (105 percent for international securities) of the market value of the securities loaned.

NEXTGEN COLLEGE INVESTING PLAN

The Maine College Savings Program Fund (the Fund) doing business as NextGen College Investing Plan (the Program), was established in accordance with Title 20 M.R.S.A. §11473, to encourage the investment of funds to be used for Qualified Higher Education Expenses at institutions of higher education. The Program is designed to comply with the requirements for treatment as a Qualified State Tuition Program under Section 529 of the Internal Revenue Code.

The statute authorizes the Finance Authority of Maine ("FAME") to administer the Program and act as administrator of the Fund. The Fund is held by the Treasurer of the State who invests it under the direction of and with the advice of a seven member Advisory Committee on College Savings, which is chaired by the Treasurer. FAME and the Treasurer have selected Merrill Lynch as the Program Manager.

The Program is reported as a private purpose trust fund in the financial statements of the State.

NextGen's investments are comprised of 52 different investment portfolios which are reported at fair value and total \$3.2 billion at June 30, 2005.

Custodial Credit Risk – NextGen, in accordance with its Program Description, primarily invests in open-end mutual funds, which according to GASB Statement No. 40, do not bear custodial credit risk; hence, the Program's exposure to custodial credit risk arising from its investment in mutual funds is considered to be insignificant.

The Program makes some investments in entities which are not mutual funds including a Guaranteed Investment Contract (GIC) issued by Transamerica Life Insurance Company in the Principal Plus Portfolio. Because an investment in a GIC represents a contractual investment rather than a security, it is not deemed to be subject to custodial credit risk.

The Program also invests in the Cash Allocation Account (the Account), a separate account that was established by FAME. All of the Account's investments are held in either the name of the Account or the Account's Agent's name, thereby minimizing the custodial credit risk.

Credit Risk - The Program has not established an investment policy that specifically limits its exposure to credit risk. The Program's investments in fixed income mutual funds, the Principal Plus Portfolio, and the Account may bear credit risk. The GIC underlying the Program's investment in the Principal Plus Portfolio has not been rated by any of the nationally recognized statistical rating organizations. The fair value of the GIC at June 30, 2005 was \$34.7 million.

The assets of the Account are invested in a portfolio of high-quality, short-term money-market securities consisting primarily of direct U.S. Government obligations, U.S. Government agency securities, obligations of domestic and foreign banks, U.S. dollar denominated commercial paper, and other short-term debt securities issued by U.S. and foreign entities repurchase agreements. In addition, the Account invests in certificates of deposit issued by Maine financial institutions in accordance with instructions of FAME and the Treasurer. All Maine CD's are FDIC insured or fully collateralized. The value of the Account at June 30, 2005 was \$141.3 million.

Concentration of Credit Risk – The Program has not established an investment policy that specifically limits its exposure to concentration of credit risk because the Program principally invests in mutual funds which have been excluded by GASB Statement No. 40 from its concentration of risk disclosures. The Account intends to invest no more than a maximum of 10 percent of its assets in Maine CDs even though it has no prescribed limit on such investments.

Interest Rate Risk – The Program has not established an investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The Program’s investments in fixed income mutual funds, the Principal Plus Portfolio, and the Account all invest in securities that are subject to interest rate risk.

Market values of the above-mentioned investments are presented below (in thousands):

	<u>Fair Value</u>
Principal Plus Portfolio	\$ 34,739
Cash Allocation Account	141,352
Fixed Income Securities	<u>659,666</u>
Total Fair Value	<u>\$ 835,757</u>

COMPONENT UNITS

Generally, component unit investment policies authorize investments in obligations of U.S. Treasury and Agency Securities, repurchase agreements, corporate bonds, certificates of deposit and money market funds. Some component units may invest in stocks, bonds, fixed income securities, mutual funds, commingled mutual funds and index funds, guaranteed investment contracts, real estate and other investment securities.

Certain component units also invest in the Treasurer’s Cash Pool and comprise approximately 11 percent of pool assets. The component units reported their participation as either Cash and Cash Equivalents or Investments on their financial statements. The State reclassified \$51.4 million of the component units’ participation to “Equity in Treasurer’s Cash Pool” on the State’s financial statements. In addition to the amounts reported, the State Treasurer’s Cash Pool includes \$17.1 million, consisting of Finance Authority of Maine component unit fiduciary funds that, because of GASB Statement No. 34 reporting criteria, are not shown in the accompanying financial statements.

NOTE 6 - RECEIVABLES

Receivable balances are segregated by type, classified as current and noncurrent, and presented in the fund financial statements net of allowance for uncollectibles.

The following tables disaggregate amounts considered to be uncollectible by fund and type of receivable as of the close of the fiscal year:

Primary Government – Receivables
(Expressed in Thousands)

	<u>Taxes</u>	<u>Accounts</u>	<u>Loans</u>	<u>Allowance for Uncollectibles</u>	<u>Net Receivables</u>
Governmental Funds:

University of Maine System	25,181	-	42,030	(2,602)	64,609

NOTE 7 - INTERFUND TRANSACTIONS

Interfund receivables and payables represent amounts owed to one State fund by another, for goods sold or services received, or for borrowings to eliminate negative balances in the Treasurer's Cash Pool.

Balances due within one year are recorded as Due to/Due from Other Funds. The balances of current interfund receivables and payables as of June 30, 2005 were:

Interfund Receivables (Expressed in Thousands)				
Due to Other Funds				
<u>Due from Other Funds</u>	<u>General</u>	<u>Highway</u>	<u>Federal Fund</u>	<u>Other Special Revenue</u>
General	\$ -	\$ -	\$ 6,319	
Highway	-	-	7,532	
Federal	16,483	15	134	843
Other Special Revenue	439	159	682	395
Employment Security		-	8	-
Non-Major Enterprise	3	8	3,081	1
Internal Service	<u>5,365</u>	<u>2,505</u>	<u>1,865</u>	<u>1,208</u>
Total	<u>\$22,290</u>	<u>\$2,687</u>	<u>\$19,621</u>	<u>\$2,447</u>
<u>Due from Other Funds</u>	<u>Employment Security</u>	<u>Non-Major Enterprise</u>	<u>Internal Service</u>	<u>Total</u>
General	\$ -	\$ 10,411	\$9,344	\$26,074
Highway	-		230	7,762
Federal	-		19,335	36,810
Other Special Revenue		33	986	2,694
Employment Security	-	-	-	8
Non-Major Enterprise			390	3,483
Internal Service	<u>-</u>	<u>453</u>	<u>5,727</u>	<u>17,123</u>
Total	<u>\$ -</u>	<u>\$10,897</u>	<u>\$36,012</u>	<u>\$93,954</u>

Not included in the table above are the following interfund loans/advances, which are not expected to be repaid within one year. Various funds owe a total of \$219 thousand to the General Fund for operating capital: Department of Defense, Veterans and Emergency

Management (a special revenue fund) \$108 thousand; and, Postal Printing & Supply (an internal service fund) \$111 thousand.

Transfers are made in accordance with statutory authority. Significant transfers are used to 1) move revenues from the fund that statute requires to collect them to the fund that statute requires to expend them, 2) move receipts restricted to debt service from the funds collecting the receipts to the funds required to pay debt service as principal and interest payments come due, 3) use unrestricted revenues collected in the General Fund to finance various programs accounted for in other funds in accordance with budgetary authorizations, 4) move profits from the Lottery Fund, and 5) transfer accumulated surpluses from other funds to the General Fund when authorized by statute.

During fiscal year 2005, the State of Maine, in accordance with the legislatively authorized budget, recorded the following non-routine, nonrecurring transfers: \$9.6 million from the Highway Fund to the Other Special Revenue Fund for distribution to municipalities for highway-related purposes and \$9.6 million from the Other Special Revenue Fund to the General Fund to return amounts that would otherwise have been distributed to municipalities in the absence of the transfer from the Highway Fund.

Interfund transfers for the year ended June 30, 2005, consisted of the following:

Interfund Transfers
(Expressed in Thousands)

<u>Transferred To</u>	<u>Transferred From</u>

Total Depreciation Expense – Governmental Activities	<u>\$29,256</u>

NOTE 9 - MAINE STATE RETIREMENT SYSTEM

PLAN DESCRIPTION

The Maine State Retirement System is the administrator of an agent, multiple-employer, defined benefit public employee retirement system established and administered under the Maine State Retirement System Laws, Title 5 M.R.S.A., C. 421, 423, and 425. The System is a component unit of the State. Financial information for the System is included in the Statement of Fiduciary Net Assets and in the Statement of Changes in Fiduciary Net Assets. Additional schedules and information are presented in the accompanying Required Supplementary Information (RSI). The Maine State Retirement System issues a stand-alone financial report which includes schedules of funding progress and employer contributions. That comprehensive annual financial report for June 30, 2005 may be obtained from the Maine State Retirement System, 46 State House Station, Augusta, ME 04333.

The System provides pension, death, and disability benefits to its members, which include employees of the State, public school employees who are defined by Maine law as teachers for whom the State is the employer for retirement benefit contribution purposes, and employees of approximately 270 local municipalities and other public entities in Maine, each of which contracts for participation in the System under provisions of relevant statutes.

At June 30, 2005, the membership consisted of:

Active vested and nonvested members	52,434
Terminated vested participants	6,248
Retirees and benefit recipients	<u>32,250</u>
Total	<u>90,932</u>

The System's retirement programs provide retirement benefits based on members' average final compensation and creditable service. Vesting occurs upon the earning of five years of service credit or the earning of one year of service credit immediately preceding retirement at or after normal retirement age. Normal retirement age is age 60 or 62, determined by whether the member had at least 10 years of creditable service on June 30, 1993 (effective October 1, 1999, the prior ten-year requirement was reduced to five years by legislative action). The monthly benefit is reduced by a statutorily prescribed factor for each year of age that a member is below her/his normal retirement age at retirement. The system also provides death and disability benefits, which are established by statute for State employee and teacher members, and by contract with other participating employers under applicable statutory provisions.

Upon termination of membership, members' accumulated employee contributions are refundable with interest, credited in accordance with statute. Withdrawal of accumulated contributions results in forfeiture of all

benefits and membership rights. The annual rate of interest credited to terminated members' accounts is set by the System's Board of Trustees and is currently 6.0 percent.

In the event that a participating entity withdraws from the System, its individual employee-members can terminate membership or remain contributing members. The participating entity remains liable for contributions sufficient to fund benefits for its already retired former employee-members; for its terminated vested members; and for those active employees, whether or not vested, who remain contributing System members.

Contributions from members and employers and earnings from investments fund retirement benefits. Employer contributions and investment earnings fund disability and death benefits. Member and employer contributions are a percentage of applicable member compensation. Member contribution rates are defined by law and depend on the terms of the plan under which a member is covered. Employer contribution rates are determined by annual actuarial valuations.

The total funds managed by the System are constitutionally restricted, as held in trust, for the payment of pension and related benefits to its members. The System's Board of Trustees, in its fiduciary capacity, establishes the System's investment policies and their overall implementation. The System maintains separate reserves and accounts for each participating entity and performs separate actuarial valuations for each participating entity's respective plan.

The Maine State Retirement System management's interpretation of the State of Maine statutes is that all assets accumulated for the payment of benefits may legally be used to pay benefits, including refunds of member contributions, to any plan members or beneficiaries. The System is therefore regarded as administering an agent multiple employer plan.

The System also provides group life insurance under a plan that is administered by a third party insurance company. Premiums paid by or on behalf of those covered, are set and collected by the System. The insurance company makes benefit payments. The System remits payments to the insurance company in the amount of benefits paid out and additional payments representing administrative fees.

FUNDING POLICY

The Maine Constitution, Maine Statutes and the System's funding policy provide for periodic employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are sufficient to accumulate adequate assets to pay benefits when due.

Level percentage of payroll employer contribution rates are determined using the entry age normal actuarial funding method. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State and teacher plan over a closed period that cannot be longer than 31 years from July 1, 1997 but may be, and at certain times has been, shorter than that period. In 2000, the amortization period was reduced to a 19-year period from June 30, 2000. In 2004, the Legislature relengthened the period to 25 years, the full extent of the then-remaining Constitutional years for the 2004-2005 biennium, and reshortened the period effective July 1, 2005 to the 13 years that will then remain in the earlier shortened period. In 2005, the State repealed the "sunset" provision, with the result that the period for reduction of these unfunded actuarial liabilities continues to the full extent permitted by the State constitution, or June 30, 2028. The unfunded actuarial accrual liability of the judicial plan is amortized over a period of which 12 years remained at June 30, 2005.

For participating local districts, either the level percentage of payroll method or the level dollar method is used, depending on plan structure, status of the participating local district, nature of the unfunded liability, and the amount of the unfunded liability. Amortization periods range from 4 years to 16 years.

In order to reduce any unfunded pension liability for State employees and teachers, the State is required to remit 32% of its General Fund unappropriated surplus to the System at year end. For fiscal 2005, this additional contribution was approximately \$13.1 million. The amount will be paid by the State after year end.

Significant actuarial assumptions used to compute the contribution requirements are the same as those used to compute the standardized measure of the pension obligation.

The actuarially determined contribution rates in effect for 2005 for participating entities are:

<u>State:</u>	
Employees ¹	7.65-8.65%
Employer ¹	13.39-38.18%
<u>Teachers:</u>	
Employees	7.65%
Employer	16.02%
<u>Participating Local Entities:</u>	
Employees ¹	3.0-8.0%
Employer ¹	1.5-6.5%

¹ Contribution rates vary depending on specific terms of plan benefits for certain classes of employees and/or, in the case of PLDs, in benefit plan options selected by a particular participating local entity. Withdrawn entities' contributions are set in dollar amounts, not as rates.

ANNUAL PENSION COST AND NET PENSION OBLIGATION

The State is one of several employers whose employees are System members. The State's net pension obligation shown at the end of the year includes the pension liability related to its employees. It does not include the pension liability related to participating local districts. The State's annual pension cost and net pension obligation to the System for the current year were:

Net Pension Obligation
(Expressed in Thousands)

Annual required contribution	\$261,698
Interest on net pension obligation	3,685
Adjustment to annual required contribution	<u>(2,509)</u>
Annual pension cost	262,874
Contributions made	<u>274,698</u>
Increase (decrease) in net pension obligation	(11,824)
Net pension obligation beginning of year	<u>46,060</u>
Net pension obligation end of year	<u>\$ 34,236</u>

Analysis of Funding Progress
(Expressed in Thousands)

<u>Year</u>	<u>Annual Pension Cost</u>	<u>Percentage Covered</u>	<u>Net Pension Obligation</u>
2005	\$262,874	104.50%	\$34,236
2004	253,282	107.98%	46,060
2003	253,370	103.88%	66,261

The annual required contribution for the current year was determined as part of the June 30, 2003 actuarial valuation using the entry age normal cost method based on a level percentage of covered payrolls. The actuarial assumptions included (a) 8% return on investments and (b) projected salary increases of 5.5% to 9.5% per year, including cost of living. The assumptions include post retirement benefit increases of 4% per annum. The System also uses the level percentage of payroll method to amortize the unfunded liability of the State and teacher plan over a 25 year period. For participating local districts, either the level percentage of payroll method or the level dollar method is used, depending on plan structure, status of the participating local district, nature of the unfunded liability, (i.e., separate or pooled) and the amount of the unfunded liability. Amortization periods range from 4 to 16 years.

COMPONENT UNIT PARTICIPANTS

The Maine Municipal Bond Bank, Maine Maritime Academy, and the Maine State Retirement System have defined benefit pension plans. All are participants in plans administered by the Maine State Retirement System. Employees of the Maine Community College System, Governor Baxter School for the Deaf, and the Northern New England Passenger Rail Authority are considered to be State employees for retirement benefit purposes and are included in the pension disclosures of the State.

Employer contributions met actuarially determined contribution requirements.

NOTE 10 - OTHER POSTEMPLOYMENT BENEFITS**POST RETIREMENT HEALTH CARE BENEFITS**

The State of Maine funds postretirement health care benefits for most retired State employees and legislators, as authorized by 5 M.R.S.A. § 285, and for a portion of the premiums for teachers, as authorized by 20-A M.R.S.A. § 13451. Pursuant to 5 M.R.S.A., § 285, most retired employees of the Maine Turnpike Authority, the Maine Community College System, the Maine Maritime Academy, the Maine State Retirement System, and the Governor Baxter School for the Deaf are eligible to participate in the health plan but are not funded by the State. Specifically excluded (5 M.R.S.A., § 285 1-B) are members of the Maine Municipal Association, the Maine Teachers Association and employees of counties and municipalities and their instrumentalities.

The State pays 100 percent of post retirement health insurance premiums for retirees who were first employed on or before July 1, 1991. A pro rata portion, ranging from zero percent for retirees with less than five years participation to 100 percent for retirees with ten or more years of participation, is paid for eligible individuals first employed after July 1, 1991. Retirees who are not eligible for Medicare retain coverage in the same group health plan as active employees. The retiree must pay for Medicare Part B coverage to be eligible to participate in the State-funded Companion Plan. Coverage for retirees who are not eligible for Medicare includes basic hospitalization; supplemental major medical and prescription drugs; and costs for treatment of mental health, alcoholism, and substance abuse. Effective August 1, 2003, the State contribution to retired teacher health premium was increased to 40 %.

The State had been in the process of changing funding of retiree health care benefits from a pay-as-you-go basis to an actuarial funding method. For retired State employees, the State estimated the total amount necessary to pay health insurance premiums. This amount is generated using a contribution rate, authorized by 5 MRSA § 286-A, multiplied by the value of the current employee payroll. The amounts contributed were reported as expenditures/expense in each of the various funds. For retired teachers, the State estimates the total annual amount necessary to pay its 40 percent share of health insurance premiums. This amount, less any accumulated funds remaining from prior years' estimates, is appropriated and reported as expenditures in

the General Fund. Contributions resulting from both sources are accumulated in and reported as revenue of the Retiree Health Insurance Internal Service Fund. The State's share of the premium expense is paid from that fund when retiree payrolls are processed. Due to budgetary constraints and difficulties accumulating sufficient resources to fund retiree health care benefits on an actuarial basis, Chapter 673 PL 2003 authorizes the State to manage the retiree health insurance fund on a cost-reimbursement basis beginning June 30, 2005.

As of June 30, 2005, there were 8,964 retired eligible State employees and 6,535 retired teachers. In fiscal year 2005, the State paid into the Retiree Health Insurance Fund \$63.6 million for retired employees and \$13.9 million for retired teachers. Premium charges paid were \$37 million and \$11.6 million, respectively. Overall, Net Assets decreased by \$82.8 million to \$7.6 million at June 30, 2005 as a result of refunding excess contributions back to originating funds or entities.

The most recent actuarial study, issued for the fiscal year ended June 30, 2003, estimated the liability for current and future retirees at \$1.2 billion. This includes 13,945 retirees and 42,528 active employees expected to retire in the future.

POST RETIREMENT LIFE INSURANCE BENEFITS

The Maine State Retirement System provides certain life insurance benefits for retirees who, as active employees, participated in the Group Life Insurance Program for a minimum of ten years. Payments of claims are made from a fund containing the life insurance premiums of active State employees and teachers, plus earnings on the investments of the fund. In addition to the cost of claims, the State pays a monthly retention fee to a life insurance company. For the fiscal year ended June 30, 2005, claims totaled \$1.9 million for retired State employees and \$1.5 million for retired teachers. The number of participants eligible to receive benefits at fiscal year end was 6,665 retired State employees and 5,188 retired teachers.

NOTE 11 - LONG-TERM OBLIGATIONS

Primary Government

The State records its liability for general obligation bonds in the Governmental Activities column on the Statement of Net Assets. Other long-term obligations recognized by the State include: revenue bonds issued by the Maine Governmental Facilities Authority, a blended component unit; obligations under Certificates of Participation and other financing arrangements; pledged future revenues for repayment of bonds issued by the MMBB on behalf of the Maine Department of Transportation; compensated employee absences; and the State's net pension obligation.

environmental cleanup and protection; highway and transportation related projects; agricultural and small business job creation; and acquisition, construction, and renovation of major capital facilities including State parks and historic sites. General obligation bonds are secured by the full faith and credit of the State. Debt service requirements are provided by legislative appropriation from the State's general tax revenues and are repaid in annual installments beginning not more than one year after issuance.

Changes in general obligation bonds of the primary government during fiscal year 2005 were:

GENERAL OBLIGATION BONDS

Programs for which the State issues general obligation bonds include: adaptive equipment loan programs;

AUTHORIZED UNISSUED BONDS

Any bonds not issued within five years of the date of ratification may not be issued after that date. Within two years after expiration of the five-year period, the Legislature may extend, by a majority vote, the five-year period for an additional five years or may deauthorize the bonds. If the Legislature fails to take action within those two years, the bond issue shall be considered to be deauthorized and no further bonds may be issued. At June 30, 2005, general obligations bonds authorized and unissued totaled \$71.5 million.

REVENUE BONDS OF THE MAINE GOVERNMENTAL FACILITIES AUTHORITY

The State has included \$189.6 million in other financing arrangements to reflect revenue bonds issued by the

Maine Governmental Facilities Authority, a blended component unit. Payment of the bonds is subject to, and dependent upon, biennial appropriations being made by the State Legislature. Debt issued by the Authority is not debt of the State or any political subdivision within the State; and the State is not obligated for such debt, nor is the full faith and credit of the State pledged for such debt. The Authority may not issue securities in excess of \$227.5 million outstanding, at any one time, except for the issuance of certain revenue refunding securities.

During the fiscal year ended June 30, 2005, the Authority issued the Series 2005 Bonds, which totaled \$54 million at an average interest rate of 4.65%. These bonds were used to in-substance defease \$51.5 million of Series 1999, 2000A and 2000B bonds with an average interest

rate of 5.58%. Net proceeds from the bonds totaled \$57.5 million, including bond premiums of approximately \$4.3 million, and after payment of \$976,000 of issuance costs.

Although the in-substance defeasance resulted in the recognition of a deferred accounting loss of \$3.3 million, the Authority reduced its aggregate debt service payments by \$2.8 million over the next 15 years and obtained an economic gain of \$2.7 million. Proceeds were used to purchase U.S. Government securities which will provide for all future debt service payments on the defeased bonds. At June 30, 2005, there were approximately \$81.5 million of MGFA in-substance defeased bonds outstanding.

CERTIFICATES OF PARTICIPATION AND OTHER FINANCING ARRANGEMENTS

The State uses financing companies, Certificates of Participation (COP's), and lease/purchase agreements to finance the construction of certain State buildings and to purchase equipment and vehicles, including school buses. Certificates of Participation are issued through a trustee, and the State is responsible for payments to the trustee that approximate the interest and principal payments made to the certificate holders. The State and school districts maintain custody and use of the assets;

however, the trustee holds a lien as security until such time as the certificates are fully paid.

Neither Certificates of Participation nor the other financing arrangements constitute a legal debt, liability, or contractual obligation in excess of amounts appropriated. The State's obligation to make minimum payments or any other obligation under agreements is subject to, and dependent upon, appropriations being made by the Legislature. The Legislature has no obligation to appropriate the money for future minimum payments or other obligations under any agreement.

OTHER LONG-TERM OBLIGATIONS

In general, expenditures and fund liabilities are not recorded in governmental funds for long-term obligations until amounts owed are "due and payable." Fund liabilities are recorded in the proprietary funds when obligations are incurred. In the Statement of Net Assets, the State has recorded long-term obligations for its compensated employee absences and net pension obligation.

The following schedule shows the changes in other long-term obligations for governmental and business-type activities for the fiscal year ended June 30, 2005:

Primary Government - Changes in Other Long-Term Obligations
(Expressed in Thousands)

	Balance July 1, 2004	Additions	Reductions	Balance June 30, 2005	Due Within One Year

2016 - 2020	-	-	-	55,295	8,096	63,391
2021 - 2025	-	-	-	<u>5,380</u>	<u>315</u>	<u>5,695</u>
Total	<u>\$ 23,234</u>	<u>\$ 1,758</u>	<u>\$ 24,992</u>	<u>\$ 203,201</u>	<u>\$ 67,481</u>	<u>\$ 270,682</u>

SHORT TERM OBLIGATIONS

The State of Maine issued and retired \$190 million in Tax Anticipation Notes and \$142.9 million in Bond Anticipation Notes during fiscal year 2005. At June 30, 2005 there were no outstanding Tax Anticipation Notes or Bond Anticipation Notes.

CONDUIT DEBT OBLIGATIONS

To enable local school districts to purchase learning technology at a lower cost than they would be able to negotiate independently, the State has entered into a series of lease agreements with Apple Computer. These leases are special limited obligations of the State, payable solely from and secured by a pledge of rentals to be received from participating school administrative units. The leases do not constitute a debt or pledge of the faith and credit of the State or any political subdivision thereof, and accordingly have not been reported in the accompanying financial statements.

At June 30, 2005, the lease agreements outstanding totaled \$2.5 million.

PLEGGED FUTURE REVENUES

On December 16th, 2004, the Maine Municipal Bond Bank (MMBB) issued \$48.4 million of GARVEE grant anticipation revenue bonds on behalf of the Maine Department of Transportation, to provide financing for construction of a new Waldo-Hancock bridge. Net proceeds from the bonds totaled \$49.4 million including bond premium of approximately \$.9 million. The bonds payable bear interest rates from 2.5% to 5.0%, and have maturities from 2005 to 2015. The State has committed to appropriate each year a portion of the State's future federal transportation funds, in amounts sufficient to cover the principal and interest requirements of MMBB's

debt for these bonds. The State's receipt of these funds is subject to continuing federal appropriations. MMBB has insured payments of principal and interest with a financial guaranty insurance policy. The Bonds do not constitute a debt or obligation of the State.

Total principal and interest requirements over the life of the bonds are \$60.2 million, with annual requirements of up to \$5.6 million. Federal transportation funds received by the State for the federal fiscal year preceding the issuance of the bonds totaled \$178 million. Total federal transportation funds received in federal fiscal year 2005 were \$175 million, and current year payments to MMBB were \$366,480 (0.2% of federal transportation funds received).

OBLIGATIONS UNDER CAPITAL LEASES

The State of Maine leases various assets under noncancelable leasing arrangements. Leases that constitute rental agreements are classified as operating leases; the resulting expenditures are recognized as incurred over the lease term. Leases, which are in substance purchases, are classified as capital leases.

In the government-wide and proprietary fund statements, assets and liabilities resulting from capital leases are recorded at lease inception at the lower of fair market value or the present value of the minimum lease payments. The principle portion of lease payments reduces the liability; the interest portion is expensed.

Most leases have cancellation clauses in the event that funding is not available. For reporting purposes, such cancellation clauses are not considered because the likelihood that they will be exercised is considered remote.

Some lease agreements include renewal or purchase options. The effect of such options is reflected in the minimum lease payments only if it is considered reasonably assured that an option will be exercised. Because the accounting treatment for installment purchase agreements is similar, such agreements are reported with capital leases.

Leases that exist between the State and the Maine Governmental Facilities Authority (MGFA), a blended component unit, are not recorded as leases in this report. In their separately issued financial statements, MGFA records a lease receivable from the State. Although payables and receivables technically exist between these parties, when combined for government-wide reporting, they are eliminated. A long-term liability exists on the government-wide statements for the bonds issued by MGFA to construct the assets associated with the leases. Future payments to MGFA are, therefore, not included in the schedule of lease commitments below. At June 30,

2005 capital assets include \$59.9 million of capitalized buildings in the internal service funds, net of related accumulated depreciation of \$23.8 million.

OBLIGATIONS UNDER OPERATING LEASES

The State is obligated under certain leases, accounted for as operating leases, in the proprietary funds. Operating leases do not give rise to property rights or lease obligations, and therefore assets and liabilities related to the lease agreements are not recorded in the State’s financial statements.

The following schedule includes the future minimum lease payments for capital leases reported in proprietary funds, and the future minimum rental payments required under operating leases that have initial or remaining noncancelable lease terms in excess of one year from June 30, 2005:

**Future Minimum Lease Payments
Capital and Operating Leases
(Expressed in Thousands)**

Fiscal Year	Capital Leases	Operating Leases
2006	\$ 5,833	\$ 981
2007	5,670	451
2008	5,437	363
2009	5,038	268
2010	4,618	229
2011-2015	16,989	310
2016-2020	6,402	24
2021-2025	439	-
2026-2030	59	-
Total Minimum Payments	50,485	<u>\$ 2,626</u>
Less: Amount Representing Interest	<u>10,580</u>	
Present Value of Future Minimum Payments	<u>\$ 39,905</u>	

MGFA revenue bonds will be liquidated by the MGFA Internal Service Fund, from revenues received through lease agreements with various governmental funds. The liability for pledged future revenues will be liquidated from the Federal Fund. The vast majority of COP’s and other financing arrangements will be liquidated by the internal service fund in which the leases are recorded, while relatively small amounts will be paid by the General Fund and Highway Fund. Claims payable that represent Medicaid claims will be paid from the General Fund and Federal Fund. Claims payable that represent workers’ compensation and retiree/employee health will be liquidated by the applicable governmental and internal service funds that account for the salaries and wages of the related employees.

Compensated absence liabilities will be liquidated by the applicable governmental and internal service funds that account for the salaries and wages of the related employees. The net pension obligations will be liquidated by the State’s governmental and internal service funds that contribute toward the pension funds, based on their respective required contribution rates. Other claims and judgments attributable to governmental activities will generally be liquidated by the General Fund and related special revenue funds.

Component Units

Bonds payable of the discretely presented component units are legal obligations of the component units and are not general obligations of the State. The following table

summarizes bonds outstanding for selected material balances of discretely presented component units, as reported in their separately issued financial statements, utilizing their respective fiscal year ends:

Component Unit Bonds Outstanding

(Expressed in Thousands)

<u>Component Unit</u>	<u>Interest Rates</u>	<u>Amount</u>	<u>Maturity Dates</u>
Finance Authority of Maine	1.0 – 2.92%	175,410	2003 - 2035
Maine Municipal Bond Bank	1.0 - 10.25%	1,105,738	1990 - 2034
Maine Educational Loan Authority	1.85 - 3.65%	72,682	2005 - 2032
Maine State Housing Authority	1.40 - 6.40%	1,329,010	2005 - 2038
University of Maine System	2.0 - 5.75%	147,468	2000 - 2034

Fiduciary Component Units Bonds Outstanding

(expressed in thousands)

Maine Health and Higher Educational Facilities Authority	4.5 - 7.3%	\$1,096,041	1988 - 2043
--	------------	-------------	-------------

On December 9, 2004, the Authority issued \$42.3 million Series 2004B bonds with an average interest rate of 4.4%, a portion of which was used to refund \$24.9 million of outstanding 1999 bonds with an average interest rate of 7.54%. Approximately \$700 thousand in issuance costs were paid. Total interest payments over the next 29 years were reduced by approximately \$5.9 million. Proceeds were used to purchase U.S. Government securities which will provide for all future debt service payments on the refunded bonds. At June 30, 2005, there were approximately \$77.6 million of advance refunded bonds remaining outstanding.

which was used to advance refund \$19 million of outstanding bonds. The refunding resulted in a deferred amount on refunding of \$2.5 million, of which the unamortized balance was \$1.8 million as of June 30, 2005. Total interest payments over the next 13 years were reduced by \$1 million, and an economic gain of \$0.8 million was obtained. At June 30, 2005, the entire \$19.0 million of advance refunded bonds remained outstanding.

On March 31, 2004, the University of Maine System issued 2004 Series A Revenue Bonds, \$21.3 million of

Debt service principal maturities for outstanding bonds of the discretely presented component units, from June 30, 2005 until maturity, are summarized in the following table:

Component Units Principal Maturities

(Expressed in Thousands)

<u>Fiscal Year Ending</u>	<u>FAME</u>	<u>MMBB</u>	<u>MELA</u>	<u>MSHA</u>	<u>UMS</u>	<u>MHHEFA*</u>

* MHHEFA is reported in fiduciary fund financial statements.

NOTE 12 - SELF-INSURANCE

A. RISK MANAGEMENT

The State maintains several types of insurance plans and accounts for them in two funds. The Risk Management Division provides insurance advice and services to State governmental agencies, and the State-Administered Fund offers similar services to quasi-governmental entities. Statute requires the Self-Insurance Fund to be replenished by appropriation if the fund balance drops below \$1 million. The State-Administered Fund balance has no similar provision; however, statutes prevent it from being used for any purpose other than providing insurance services.

Insurance plans offered include property, vehicle, boat and aircraft, tort, civil rights, employee bonds, police professionals, and a variety of other insurance products.

Not all departments elect to insure through the Risk Management Division; specifically, the Department of Transportation has elected not to purchase general liability insurance.

In some cases the State purchases excess insurance to limit the State’s liability for insured events. For example, coverage for property damage is \$250 million per occurrence. The State retains \$2 million of this risk per occurrence, with the remainder being covered by a private insurance carrier (excess insurance). Settlements have not exceeded insurance coverage in any of the past three fiscal years. Coverage, risk retention, and excess insurance amounts for major types of insurance are listed below:

<u>Type of Insurance</u>	<u>Coverage Per Occurrence</u>	<u>Risk Retention Per Occurrence</u>	<u>Excess Insurance Per Occurrence</u>
Property *	\$250 million	\$2 million	\$250 million
Ocean Marine Boat Liability *	10 million	10 thousand	10 million
Loss of Software and Data *	8 million	25 thousand	8 million
Boiler and Machinery*	3 million	2 million	3 million
General Liability Including			
Employment Practices	400 thousand	400 thousand	none
Police Professionals	400 thousand	400 thousand	none
Vehicular Liability	400 thousand	400 thousand	none
Bonding	500 thousand	500 thousand	none
Foster Parents	300 thousand	300 thousand	none
Inland Marine (various policies)	2 million	2 million	none

* These lines of insurance have commercial excess insurance covering losses above the risk retention amount up to the per occurrence amount listed. All other insurance programs are wholly self-insured.

The plan funds the cost of providing claims servicing and claims payment by charging a premium to each agency based on a review of past losses and estimated losses for the current period.

All risk-financing liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Claims liabilities represent the estimated cost of claims as of June 30, 2005. This cost of claims includes case reserves, the development of known claims and incurred-but-not-reported claims, and the direct administrative expenses for settling specific claims.

Claims liabilities are determined on an actuarial basis and are re-evaluated periodically to take into

consideration recently settled claims, the frequency of claims, and other economic and social factors. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount.

At June 30, 2004, the present value of the claims payable for the State’s self-insurance plan was estimated at \$3.5 million. At June 30, 2005, the State has estimated the present value of the loss at \$3.5 million. The actuary calculated this based on a 1.75 percent yield on investments.

Risk Management Fund
Changes in Claims Payable
(Expressed in Thousands)

	<u>2005</u>	<u>2004</u>
Liability at Beginning of Year	\$3,547	\$4,073
Current Year Claims and Changes in Estimates	1,415	449
Claims Payments	<u>1,415</u>	<u>975</u>
Liability at End of Year	<u>\$3,547</u>	<u>\$3,547</u>

As of June 30, 2005, fund assets of \$16.2 million exceeded fund liabilities of \$3.9 million by \$12.3 million. The portion of this amount that may be reserved for catastrophic losses has not been determined.

In the past, general liability insurance coverage excluded lawsuits brought by employees. Therefore, the loss history used by the actuary to project claims did not include the effects of any such lawsuits. Effective July 1, 1999, the State added \$50 thousand coverage per occurrence for the cost of defending the State in any such lawsuits. Effective July 1, 2000, the State increased coverage to include both defense and indemnification costs up to \$400 thousand. The effect of this change has not been incorporated into the estimate used to determine claims payable as of June 30, 2005.

B. UNEMPLOYMENT INSURANCE

The State is self-insured for unemployment compensation. As a direct reimbursement employer, the State recognizes all costs for unemployment compensation as claims are paid. These costs totaled \$980 thousand for the fiscal year ended June 30, 2005.

C. WORKERS' COMPENSATION

Workers' Compensation is accounted for in an Internal Service Fund. Interfund premiums are treated as quasi-external transactions. Each State agency is charged a premium based on the number of employees to be covered plus an added amount to reduce the unfunded liability. The Legislature, Legislative Council, and Law Library employees are self-insured for workers' compensation purposes. The State assumes the full risk of all claims filed for workers' compensation.

Claims liabilities are actuarially determined based on estimates of the ultimate cost of claims, including future claim adjustment expenses that have been incurred but not reported and claims reported but not settled. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result

in an exact amount. Claims liabilities are re-evaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. The balance of claims liabilities is based on an actuarial study as of June 30, 2005:

Workers' Compensation Fund
Changes in Claims Payable
(Expressed in Thousands)

	<u>2005</u>	<u>2004</u>
Liability at Beginning of Year	\$ 61,839	\$ 61,839
Current Year Claims and Changes in Estimates	1,329	9,616
Claims Payments	<u>9,825</u>	<u>9,616</u>
Liability at End of Year	<u>\$ 53,343</u>	<u>\$ 61,839</u>

Current year claims and changes in estimates include an \$8.5 million reduction in estimated outstanding claims. In prior periods, changes in the estimate of outstanding claims were not material and were reported as an increase or decrease to claims expense. The significant change in the current year estimate is partially due to a change in the June 30, 2004 estimate, which resulted in excess premiums being charged to user funds. These excess premiums have been reported as an operating transfer. Current year premium revenue and claims expense reflect actual operating activity for the fiscal year.

Based on the actuarial calculation as of June 30, 2005, the State is liable for unfunded claims, and incurred but not reported claims, of approximately \$67.1 million. The discounted amount is \$53.3 million and was calculated based on a 4.0 percent yield on investments.

D. EMPLOYEE HEALTH INSURANCE

The employee health and retiree health insurance programs are accounted for in two Internal Service Funds. The State became self insured for employee and retiree health care coverage on July 1, 2003. A stop loss agreement with Anthem Blue Cross and Blue Shield provides catastrophic coverage for individual claims exceeding \$350 thousand.

The State has retained an independent contractor for claims administration, utilization review, and case management services. Premiums are paid to the independent contractor based upon rates established with the technical assistance of the plan's consulting actuary.

There are two primary health plans available. HMO Choice is a point-of-service plan available to all active employees and retirees not eligible for Medicare. The Group Companion Plan is a supplement to Medicare Parts A & B and is available to Medicare eligible retirees. Total enrollment has averaged approximately 41,000 covered individuals. This total includes 30,300 active employees and dependents, 4,200 pre-Medicare retirees and dependents, and, 6,500 Medicare retirees and dependents.

Claims expenses are recorded when premiums are paid to the claims servicing contractor. At the end of the period, the total of these premium payments are compared with the actual claims paid and claims expense is adjusted for any overage or shortage with an offsetting receivable or liability recorded. For the period ending June 30, 2005, the State recorded a receivable of \$21.7 million for an overpayment of

health care premiums.

Expenses and liabilities for incurred but not reported claims, based on an actuarial analysis of claim lag pattern, have been recorded as liabilities in the amount of \$21.3 million. Changes in the Employee Health Insurance and Retiree Health Insurance claims liability for the fiscal year ending June 30, 2005 follows (in thousands):

	<u>Employee</u> <u>Health</u> <u>Fund</u>	<u>Retiree</u> <u>Health</u> <u>Fund</u>
Liability at Beginning of Year	\$ -	\$ -
Current Year Claims and Changes in Estimates	117,796	49,074
Claims Payments	<u>103,508</u>	<u>42,094</u>
Liability at End of Year	<u>\$ 14,288</u>	<u>\$ 6,980</u>

NOTE 13 - JOINT VENTURES

Joint ventures are independently constituted entities generally created by two or more governments for a specific purpose. The State of Maine participates in two separate joint venture arrangements; the Tri-State Lotto Commission (Commission) and the Multi-State Lottery Association (MUSL).

Tri-State Lotto Commission

The Commission was established in 1985 pursuant to passage into law of the Tri-State Lotto Compact by the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including ticket prices, prizes, and the licensing of agents.

The Commission is composed of one member from each of the participating states. Each member State's commission appoints one of its members to serve on the Commission and each member holds office at the pleasure of his or her appointing authority. The Commission annually elects a chairman from among its members.

The Commission has designated that 50 percent of its operating revenue be aggregated in a common prize pool. A prize award liability is established when the winning ticket number is selected. If no winning ticket is selected, the available jackpot is carried over to the following drawing. The Tri-State Lotto Compact requires that prizes not claimed within one year from the

date of the drawing be forfeited. All expired unclaimed prizes are credited to future prize pools. The Commission funds its jackpots through annuity contracts purchased from insurance companies and zero-coupon U.S. Government Treasury Strips.

A proportional share of revenues and expenses are allocated to each State based on the amount of ticket sales made by each State. Exceptions are the facility's management fee, which is based on a contracted percentage of operating revenue that varies from State to State; Daily Number expenses that are allocated to each State based on Daily Number ticket sales; and certain other miscellaneous costs that are based on actual charges generated by each State.

The Tri-State Lotto Commission financial report for fiscal year 2005, which may be obtained from the Bureau of Alcoholic Beverages and Lottery Operations, 8 State House Station, Augusta, ME 04333-0008, includes the following selected financial information:

Tri-State Lotto Commission
(Expressed in Thousands)

Current Assets	\$ 42,783
Noncurrent Assets	139,087
Total Assets	<u>\$ 181,870</u>

Allocation to Member States	21,374
Change in Unrealized Gain on Investments Held for Resale	4,460
Change in Net Assets	<u>\$ 4,460</u>

Multi-State Lottery Association

The Maine State Lottery became a member of the Multi-State Lottery Association (MUSL) in July 2004. The MUSL currently has 29 member State lotteries, including the District of Columbia and the United States Virgin Islands. The MUSL is managed by a Board of Directors, which is comprised of the lottery directors or their designee from each of the party States and authorized to initiate, promulgate, administer and carry out one or more lottery product offerings that will enhance the participating party lottery’s revenue.

Participating lotteries sell Powerball tickets, collect all revenues, and remit prize funds to the MUSL, net of lower tier prize awards. The operating costs of the Board are divided equally among all of the participating lotteries. Jackpot prizes that are payable in installments

are satisfied through investments purchased by the MUSL. The MUSL purchases US government obligations, which are held in irrevocable trusts established by the MUSL for the benefit of participating State lotteries. Each week the MUSL allocates 50 percent of sales to the prize pool. If no winning ticket is selected, the available jackpot is carried over to the following jackpot drawing.

The Multi-State Lottery Association’s financial report for fiscal year 2005, which may be obtained from the Bureau of Alcoholic Beverages and Lottery Operations, 8 State House Station, Augusta, ME 04333-0008, includes the following selected information:

NOTE 14 - RELATED PARTY TRANSACTIONS

PRIMARY GOVERNMENT

Title 20 M.R.S.A. § 11473 establishes the Maine College Savings Program Fund (the Fund), administered by the Finance Authority of Maine (FAME). The Fund holds all monies associated with the Maine College Savings Program doing business as the NextGen College Investing Plan (NextGen). NextGen is the primary

program of the Fund and was established to encourage the investment of funds to be used for qualified higher education expenses at institutions of higher education. The program has been designed to comply with the requirements for treatment as a “Qualified State Tuition Program” under Section 529 of the Internal Revenue Code.

By statute, the program assets and liabilities are held by the Treasurer of the State of Maine. FAME and the Treasurer of the State of Maine have entered into a management agreement for the Treasurer to act as a fiduciary of the Fund. The Treasurer is responsible for investment of the Fund and determining, with the advice of the Advisory Committee on College Savings, the proper allocation of the investments of the Fund. The NextGen College Investing Plan had approximately \$3.2 billion in net assets at June 30, 2005, which have been recorded in an Agency Fund on the financial statements of the State.

General Obligation Bonds of the State include \$60 thousand of self-liquidating bonds of the Maine Veterans' Home. The State issues the bonds, and the Maine Veterans' Home remits to the State the debt service as it comes due.

The State of Maine has entered into contracts for health care claims processing services with a local vendor through the State's competitive bidding process. The President and Chief Executive Officer of the company also served as Minority Floor Leader in the Maine House of Representatives until his retirement in November, 2004. During fiscal year 2005, the State of Maine paid \$14.1 million for services under these contracts; \$5.2 million from the General Fund, \$7.8 million from the Federal Fund and \$1.1 million from the Other Special Revenue Fund. At fiscal year end, no accounts payable balances existed for services provided under these contracts.

The State of Maine pays a local company as a provider for prescription drugs through the MaineCare program. The recently retired Minority Floor Leader in the Maine House of Representatives is a member of the Board of the controlling group for this single-partner LP. During fiscal year 2005, the State paid \$14.3 million to this company; \$5.7 million from the General Fund and \$8.6 million from the Federal Fund.

The State of Maine pays a local company as a provider for mental health and independent living services through the MaineCare program. The Executive Director of the company also serves as House Chair of the Joint Standing Committee on Appropriations and Financial Affairs in the Maine Legislature. During fiscal year 2005, the State paid \$10.7 million for these services; \$5.2 million from the General Fund and \$5.5 million from the Federal Fund.

The State of Maine has entered into memoranda of understanding with the Wells National Estuarine Research Reserve Management Authority, a jointly governed organization, through the Bureau of Public

Lands and the Bureau of Parks and Recreation. These agreements outline each entity's responsibilities in relation to the operation of the Reserve and the management of the property included within the boundaries of the Reserve. The Authority's responsibilities are generally to manage the Reserve consistent with the Wells National Estuarine Research Reserve Management Plan dated May 1991.

COMPONENT UNITS

The State provided appropriations and grant monies to the following discretely presented component units: University of Maine System, \$214.1 million; Child Development Services, \$27.0 million; Maine Community College System, \$50.6 million; Maine Municipal Bond Bank, \$13.5 million; Finance Authority of Maine, \$17.3 million; Maine Maritime Academy, \$7.5 million; Maine State Housing Authority, \$9.3 million; Loring Development Authority, \$1.4 million; and the Governor Baxter School for the Deaf, \$5.8 million.

The Finance Authority of Maine (FAME) administers several revolving loan funds on behalf of the State of Maine. FAME recorded these funds, which total \$31.2 million at June 30, 2005, as a liability in Amounts Held Under State Revolving Loan Programs in their financial statements. The state reports the asset as a receivable in the Special Revenue Fund. During fiscal year 2005, the State expended \$455 thousand to FAME for State revolving loan funds.

Title 20-A M.R.S.A. Chapter 419-A establishes the Maine State Grant Program as a fund under the jurisdiction of the Finance Authority of Maine. All grant revenues under this fund must be distributed by FAME to students who meet the eligibility requirements for a grant under this chapter. During fiscal year 2005, FAME paid approximately \$5.9 million in grants to the University of Maine System (UMS) on behalf of eligible students. The UMS reflected these as grant revenues from the State.

The State of Maine has contributed the use of land and buildings to the Governor Baxter School for the Deaf, a discretely presented component unit, for the operations of the School. The School does not recognize contribution revenue and the corresponding lease expense related to the contributed use of the property.

RELATED ORGANIZATIONS

The State receives transfers in the amount of the annual operating surplus from the Maine Turnpike Authority under the Sensible Transportation Act of 1991. The Legislature has defined operating surplus within the Maine Turnpike Authority statute to be the total operating revenues of the Authority after money has been set aside to pay reasonable operating expenses and to meet the requirements of any resolution authorizing

bonds. The Authority, with the concurrence of the Maine Department of Transportation, has established the operating surplus at \$4.7 million annually. The payment of debt service costs in connection with the issuance of the Series 1996 Special Obligation Bonds is considered to constitute payment of the operating surplus for the year 2005.

NOTE 15 - COMMITMENTS AND CONTINGENCIES**PRIMARY GOVERNMENT****LITIGATION**

The State of Maine, its units, and its employees are parties to numerous legal proceedings, many of which are the result of normal governmental operations. In the opinion of the Attorney General and other legal counsel representing the State, in all of the cases listed, the State or its agencies or employees have valid defenses. The following cases have the potential for liability in excess of \$1 million. Even if liability is found, the State should not expect to pay out the full amounts being sought against it in all of the cases. In any given case, however, the State could incur a large judgment.

Inland Hospital v. DHHS. This case was filed on August 12, 2005 in Superior Court, Kennebec County. The issue is whether DHHS correctly calculated Medicaid prospective payments to the hospital. The potential liability is \$1.3 million to \$1.4 million. The potential for expenditure regarding this matter is possible.

Callahan Mine Superfund Site. The U.S. EPA identified the State of Maine as a Potentially Responsible Party for a Superfund site – the Callahan Mine Site in Brooksville, Maine. The mining occurred pursuant to a lease from 1968 to 1972 in part on state-owned submerged land that had been drained. No court action has been filed by EPA at this time. If the State is found liable as a Responsible Party for the site, costs could exceed \$1 million just for the work conducted by EPA to date. The State has only agreed to conduct feasibility studies to date. Potential liability for remedial actions could exceed \$1 million, however feasibility studies have not yet been completed. The potential for expenditure regarding this matter is probable; however, the State cannot reasonably estimate the amount of potential loss.

Buchanan v. State of Maine. The case is in State court, and arises out of the shooting death of Michael Buchanan on February 25, 2002. He was shot by a Lincoln County deputy sheriff after he stabbed the deputy sheriff's partner. The theory of the liability against the State is that we failed to provide him with sufficient mental health services, which led him to engage in erratic and dangerous behavior, which caused him to be shot by the police. Claims are brought under section 1983 and the American Disabilities Act. Plaintiff's theory of the case is somewhat novel. A motion for summary judgment is pending. Potential for expenditure is possible, however, the State cannot reasonably estimate the amount of potential loss.

In various lawsuits, Plaintiffs seek damages in excess of \$1 million against the State or against State officials, and various notices of claim also specify damages in excess of \$1 million where no lawsuit has been filed. In none of these lawsuits, in the view of the Attorney General, is there any reasonable possibility that the State's liability could reach or exceed \$1 million. Therefore, these suits have not been individually identified.

Numerous workers' compensation claims are now pending against various State agencies. Since most claims involve the possibility for significant long-term damages, and since the test for demonstrating a causal relationship between the employment and the illness or injury is not as rigorous as in ordinary civil cases, these cases involve the possibility of significant liability for the State. Since possible damages include future medical costs and wage replacements for the employee (and in some cases spouse), it is difficult to estimate the total potential liability to the State.

All other legal proceedings are not, in the opinion of management after consultation with the Attorney General, likely to have a material adverse effect on the financial position of the State.

FEDERAL GRANTS

The State receives significant financial assistance from the federal government. The receipt of grants is generally dependent upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of resources for allowable purposes. Grants are subject to the Federal Single Audit Act. Disallowances by federal officials as a result of these audits may become liabilities of the State. The amount of expenditures that may be disallowed by the grantor agencies cannot be determined at this time.

In September 2005, the United States Department of Education (USDOE) estimated that it would disallow \$5.3 million of federal financial participation in the State's Migrant Education Program. The State has settled \$2.3 million of this disallowance by de-obligating federal grant award balances for federal fiscal years 2003 and 2004. The USDOE and the State are currently negotiating a mechanism to repay the remaining balance that may not require the use of existing financial resources. The State has not accrued a liability for the estimated disallowance at June 30, 2005.

MUNICIPAL SOLID WASTE LANDFILLS

Title 38 M.R.S.A., §1310-F, establishes within the Department of Environmental Protection (DEP) a cost-sharing program for the closure and remediation of municipal solid waste landfills that pose an actual or potential hazard to the environment and public health. The State's obligation to provide cost sharing to municipalities is subject to the availability of funds approved for that purpose. State expenditures for landfill remediation projects totaled \$65 thousand for fiscal year 2005.

During the 2005 fiscal year, no State general funds or bond funds were expended for municipal solid waste landfill closure projects, which completed work before January 1, 2000. After January 1, 2000, the State is no longer liable for the costs relating to the closure of municipal solid waste landfills except the Commissioner may make grants or payments up to 30%, if they are incurred pursuant to an alternative closure schedule approved by DEP prior to January 1, 2000, and if they are specifically identified in a department order or license, schedule of compliance or consent agreement. No reimbursement applications for past closure costs are on file. No additional cost share eligible closures have been approved by DEP. Consequently, the DEP expects no further expenditures for municipal landfill closures.

During the 2005 fiscal year, the State expended \$65 thousand of general obligation bond funds for municipal solid waste landfill remediation projects. Remediation funding, subject to the availability of funds, will continue

for 90% of the cost of remediation for threats posed by a municipal landfill to wells or other structures constructed on or before December 31, 1999. The maximum reimbursement for remediation funding is 50% for structures constructed after that date. Current outstanding remedial obligations total approximately \$235 thousand. Bonds have not been issued to cover these outstanding obligations.

The DEP recognizes that, in the future, some landfills will require State funds for post closure investigation and remediation activities. The DEP has estimated the amount of these potential future costs to be as high as \$5 million, based on current site knowledge and the increasing frequency of residential development near closed municipal landfills and the discovery of older abandoned dump sites now occupied by residential homes.

SAND AND SALT STORAGE PROGRAM

The State estimates the potential aggregate cost to comply with the environmental requirements associated with the sand and salt storage program to be \$18.9 million. This consists of approximately \$11.9 million for State-owned facilities and approximately \$7 million for the State's share, under a cost sharing arrangement, for municipal facilities.

POLLUTION ABATEMENT PROGRAM

Title 38 M.R.S.A. § 411 establishes within DEP a cost-sharing program for pollution abatement projects. Subject to funding by the Legislature and the approval of the Commissioner, the State may contribute to the design, engineering and construction of municipal pollution abatement facilities. During the 2005 fiscal year, \$6.95 million of general obligation bond funds were expended for pollution abatement projects. As of June 30, 2005, amounts encumbered for pollution abatement projects totaled \$1.49 million; and general obligation bonds authorized for these projects, but not yet encumbered or expended, totaled \$2.12 million. At June 30, 2005, DEP estimated the total cost (federal, State, and local) of future projects to be \$367 million.

DESIGNATION AS A POTENTIALLY RESPONSIBLE PARTY BY THE ENVIRONMENTAL PROTECTION AGENCY

The State has been identified as a potentially responsible party at four hazardous waste clean-up sites in Maine. These sites are located in Plymouth, Casco, Ellsworth and Brooksville. The amount or range of potential liability has not been determined.

GROUND WATER OIL CLEAN-UP FUND

The Ground Water Oil Clean-up Fund is established in Title 38 M.R.S.A. § 569-A. Fund activities include, but are not limited to, providing insurance to public and private entities for clean up of oil spills. The program is funded by a per barrel assessment on petroleum products imported into the State. Coverage is up to \$1 million per occurrence for both aboveground and underground storage tanks. Third party injury coverage may not exceed \$200 thousand per claimant.

A report to the legislature dated December 15, 2000, submitted by the Maine Department of Environmental Protection (DEP), identified 356 long-term remediation sites as of August 2000 that are covered by the insurance program. At June 30, 2005 there were 302 sites on the long-term remediation priority list. Since it is not possible for the DEP to estimate the cost of remediation, the State has not accrued a liability in the financial statements.

CONSTRUCTION COMMITMENTS

A portion of the payment that is made to municipalities for General Purpose Aid to Local Schools is allocated for debt service. Although the outstanding indebtedness for school construction projects is debt of the municipalities, the State subsidizes approximately 72% of the annual payments. As of June 30, 2005, outstanding commitments by municipalities for school bond issues that are eligible for State subsidy totaled \$788.0 million.

At June 30, 2005, the Department of Transportation had contractual commitments of approximately \$119.1 million for construction of various highway projects. The State's share of that amount is expected to be approximately \$22.4 million. This amount has already been accrued. Federal and State funds plus bond proceeds are expected to fund these future expenditures.

TOBACCO SETTLEMENTS

On November 23, 1998, Maine along with 45 other states and five jurisdictions agreed to an out-of-court settlement with certain Participating Tobacco Manufacturers (PM's) to recover smoking-related Medicaid costs. The PM's agreed to pay \$206 billion to the states and jurisdictions. In return, the states have agreed to relinquish claims to further damages resulting from Medicaid costs.

Maine's percentage of the total settlement payment is 0.7693505%, which equals \$1.58 billion. Annual payments will fluctuate subject to various adjustments and litigation offsets and are contingent on the passage and enforcement of a State statute imposing economic conditions on the PM's. This settlement will result in an ongoing revenue stream to the State, which will continue into perpetuity.

As compensation, the PM's have also agreed to pay \$8.6 billion to certain states and jurisdictions for their contribution to the overall settlement. These payments are subject to the adjustments referred to above.

Maine's share is approximately \$114 million and will be received in ten annual payments beginning in 2008.

BAXTER COMPENSATION AUTHORITY

Chapter 439 PL 2001 established the Baxter Compensation Authority to provide monetary compensation to former students of the Baxter School for the Deaf who, while students, were subjected to abuse by a State employee or by inaction of the State. The Authority is established by the provisions of Title 5 MRSA, Chapter 601 as a public instrumentality of the State, limiting any liabilities to its available resources.

The Authority was initially capitalized by the legislature with \$6 million, to settle cases and provide for its administrative expenses. In Chapter 673 PL 2003, the Legislature provided an additional \$6 million on a one-time basis to pay additional claims that may come forward. Chapter 3 PL 2005 further provides an additional transfer of up to \$8.1 million from the available unappropriated surplus of the General Fund at the close of fiscal year 2005. As of June 30, 2005, the Authority paid claims of \$10.5 million, and the State accrued an additional \$8.1 million in claims payable. The Authority has a statutory sunset of July 1, 2007.

DIRIGO HEALTH AGENCY

Chapter 469 PL 2003 established the Dirigo Health Agency to arrange for the provision of comprehensive, affordable health care coverage to eligible small employers, including the self-employed, their employees and dependents, and individuals on a voluntary basis (DirigoChoice).

Because DirigoChoice members had no prior claims history, the Dirigo Health Agency agreed to share claims costs that exceed an agreed upon level through an Experience Modification Program (EMP) with its carrier, Anthem Blue Cross Blue Shield (Anthem). The EMP is a form of experience rating not uncommon in start up association-like plans where the risk of the population is unknown. The EMP protects the DirigoChoice pool from adverse selection.

The Dirigo Health Agency prepays the EMP quarterly, based on enrollment assumptions. Because the Dirigo Health Agency assumes the most adverse outcome, the EMP liability cannot exceed the total prepayments. If the experience outcome is favorable in the DirigoChoice plan, Anthem returns all of the EMP to the Dirigo Healthy Agency. Terms of the outcome sharing are

detailed in the contractual agreement between the Dirigo Health Agency and Anthem.

Claims for calendar year 2005 will not be finalized until July 1, 2006, when a six month run-out period elapses. Due to limited claims and experience data for DirigoChoice members for 2005, the medical loss ratio and related amount that may be returned to the Dirigo Health Agency, if any, cannot be reasonably estimated. EMP payments for State fiscal year 2005 totaled \$3.2 million.

DISPROPORTIONATE SHARE PAYMENTS TO HOSPITALS
In State fiscal years 2004 and 2005, the Department of Health & Human Services funded the federal share of the Non-Categorical Childless Adult Medicaid Waiver with Disproportionate Share allotments. An undeterminable amount of the allotted funds may be required to fund Disproportionate Share payments to Acute Care Hospitals in the future.

UNION ARBITRATION AWARD
As the result of an arbitration award dated October 4, 2005, the State was ordered to increase the pay grade for Department of Health and Human Services (DHHS) Caseworkers. The increase in pay is retroactive to 1998 when the Maine State Employees Association (MSEA) formally requested a pay scale review. The MSEA has estimated that the settlement could exceed \$6 million. Due to changes in employment and position status for affected Caseworkers since 1998, DHHS estimates the negotiated settlement will be between \$2.1 and \$2.5 million. The State has accrued a liability for claims payable of \$2.3 million in the Entity-wide Statements at June 30, 2005.

DISCRETELY PRESENTED COMPONENT UNITS

NURSING HOME LOANS
The owners of certain financially troubled nursing homes, with the concurrence of The Maine Health and Higher Educational Facilities Authority (MHHEFA), started refinancing portions of MHHEFA's loans and advances with the U.S. Department of Housing and Urban Development (HUD). Management of MHHEFA expects that these refinancings will reduce annual debt service requirements, thereby eliminating its exposure in the Taxable Financing Reserve Fund and reducing its overall exposure.

Through June 30, 2005, HUD completed refinancings for nine institutions which, at the time they were refinanced, had combined bond-related loans and advances due MHHEFA of approximately \$44.3 million. As part of

the refinancing completed by HUD, MHHEFA agreed to issue 8% subordinated notes receivable to these nine institutions from its operating fund. These notes totaled \$6.7 million at June 30, 2005, record interest only to the extent that cash payments are received and are subordinate to all HUD loans. If these institutions fail to generate positive cash flow in future periods, it is likely that these notes will not be repaid.

The Authority advanced approximately \$2.2 million from the operating fund as of June 30, 2005 to other financially troubled institutions, with combined loan amounts due the Authority of approximately \$15.5 million at June 30, 2005, including loans of \$10.2 million reserved at June 30, 2005. These advances were primarily made to assist these institutions in meeting debt service requirements. The Authority established a \$2.1 million reserve in its operating fund related to amounts that have been advanced or are expected to require an advance to troubled institutions.

CONSTITUTIONAL OBLIGATIONS
Article 9, § 14-A, C, and D of the Maine State Constitution provides that the State may insure the payment of mortgage loans for industrial, manufacturing, fishing, agricultural and recreational enterprises; mortgage loans for the acquisition, construction, repair and remodeling of houses owned or to be owned by members of two tribes on several Indian reservations; and mortgage loans to resident Maine veterans of the Armed Forces of the United States, including loans to a business organization owned in whole or in part by resident Maine veterans. The aggregate of these obligations, at any one time, may not exceed \$90 million, \$1 million, and \$4 million, respectively. At June 30, 2005, loans outstanding pursuant to these authorizations are \$36.9 million, less than \$1 million, and less than \$1 million, respectively. The State has not paid, nor does it expect to pay, any amounts as a result of these authorizations as of June 30, 2005.

Article 8, § 2, of the Maine State Constitution provides that the State may secure funds, through the issuance of bonds authorized by the Governor, for loans to Maine students attending institutions of higher education. The amount of bonds issued and outstanding shall not at any one time exceed \$4 million in the aggregate. The State has not paid, nor does it expect to pay, any amount as a result of this authorization as of June 30, 2005.

MORAL OBLIGATIONS

The State of Maine, through statute, enables certain Authorities to establish capital reserve funds. These funds may be used to secure a variety of financial undertakings including the issuance of bonds. The minimum amount of the capital reserve fund may be determined by statute or set by the Authority. The statutes may also limit the amount of debt that may be secured by the capital reserve funds, and allow the Authority to issue debt that is not secured by these funds.

On or before December first of each year, the Authority is required to certify to the Governor the amount, if any, necessary to restore any capital reserve fund to its required minimum. If there is a shortfall, the Governor is

required to pay first from the “Contingent Account” the amounts necessary for restoration. The Governor shall certify any remaining unpaid amounts to the Legislature, which is then required to appropriate and pay the remaining amounts to the Authority during the then-current State fiscal year.

These moral obligations are not considered to be “full faith and credit” obligations of the State, and voter approval of the underlying bonds is not required. No capital reserve fund restorations have been made in the current or previous years.

The following summarizes information regarding outstanding Moral Obligations:

Moral Obligation Bonds
(Expressed in Thousands)

<u>Issuer</u>	<u>Bonds Outstanding</u>	<u>Required Debt Reserve</u>	<u>Obligation Debt Limit</u>	<u>Legal Citation</u>

Total	<u>\$3,609,909</u>	<u>\$ 349,331</u>		

** MHHEFA is reported in fiduciary fund financial statements.

** Under 10 MRSA §1053, FAME may issue up to \$330 million of bonds for the electric rate stabilization program. However, per 35-A MRSA §3156, as of July 31, 1998 no new approvals for bonds could be made under this program. Therefore, the moral obligation of the State is reported to be the amount of bonds currently outstanding.

NOTE 16 - SUBSEQUENT EVENTS

PRIMARY GOVERNMENT

On July 14, and October 11, 2005, the State issued \$13.7 million and \$9.2 million respectively of Bond Anticipation Notes. The BAN’s will mature on June 22, 2006.

On July 21, 2005 the State issued \$123.6 million of Tax Anticipation Notes which become due on June 30, 2006.

On November 1st, 2005, the State issued \$9.2 million of Certificates of Participation, with an interest rate of 3.59%, and maturity date in 2010, for the purpose of financing the upgrade of the State’s integrated financial processing and reporting system.

Several Maine hospitals, 21 out of a total of 39, were appealing some or all of the following issues: whether third party liability adjustments were made properly; whether the hospitals should have been re-based; whether the Department should have calculated the eligibility of the hospitals for disproportionate share payments (DSH); and, if the hospitals were eligible for DSH, whether the Department is obligated to make a DSH payment to eligible hospitals. The hospitals agreed to a discounted settlement of \$96.4 million, which was paid by the State in September, 2005. The hospitals have subsequently dismissed their claims.

Effective September, 2005, MGFA's debt limit increased \$35 million in order to provide more judicial financing in accordance with Title 4, MRSA, Section 1606. Pursuant to Title 4, MRSA, Section 1610-D, MGFA received authorization to issue up to \$9 million in debt in order to pay for specific capital improvements and repairs costs associated with state-owned facilities as designated by the Commissioner of Administrative and Financial Services.

COMPONENT UNITS

On March 1, 2005 the Maine State Housing Authority (MSHA) redeemed \$9.0 million of its 2004-A General Housing Draw Down bonds, with variable interest rates maturing in 2010. In January, February and March 2005, MSHA issued a total of \$35.0 million Series A and B General Housing Draw Down bonds at par, with variable interest rates maturing in 2010.

In January, February and March 2005, MSHA redeemed a total of \$52.7 million of various series of its Mortgage Purchase Program bonds at par. The bonds carried

interest rates from 3.65% to 6.125%, and maturities from 2005 to 2035. In March 2005, MSHA committed to redeem a further \$9.9 million of Mortgage Purchase Program bonds at par. On January 18, 2005, MSHA issued \$40.0 million of various series of its Mortgage Purchase Program bonds. These bonds carry interest rates ranging from 2.08% to 4.9%, with maturities from 2005 to 2039.

In accordance with the Higher Education Loan Purchase Program, the Finance Authority of Maine purchased FFELP student loan portfolios totaling approximately \$2.8 million and \$24.0 million in July 2005 and September 2005, respectively.

On November 3, 2005, the University of Maine System issued \$69.1 million of its 2005 Series A Revenue Bonds to advance refund a total of \$8.8 million of previously issued revenue bonds and to fund new capital projects. These bonds carry interest rates ranging from 3.5% to 5.0%, with maturities from 2006 to 2035.

NOTE 17 – SPECIAL ITEMS

In accordance with statutory authority, the State of Maine entered into a contract with a vendor to manage and operate wholesale liquor distribution as the State's agent during fiscal year 2004. Although considered a remote possibility, the contract provides for rescission by either party, which would result in a prorated return of the purchase price. The State recorded the transfer of \$50 million of proceeds from the license fee from the Alcoholic Beverages enterprise fund to the General Fund as a Special Item.

Chapter 673 PL 2003 required the State of Maine to manage the Retiree Health Insurance Fund (the Fund), an internal service fund, on a cost-reimbursement basis beginning June 30, 2005. Prior to the effective date, with agreement from the federal government, the State had been preparing to change to an actuarial funding basis. Likewise, the Fund had been allowed to accumulate significant resources to facilitate the funding change. Chapter 673 further required the State to calculate and return the amount of excess equity due each fund and ancillary group contributing to the Fund, after retaining a reasonable amount of working capital, no later than June 30, 2005. After retaining \$7 million in the Fund for working capital, the State returned \$105.7 million of excess equity available for distribution to all groups. Additionally, the State returned \$19.1 million to the federal government for its share of the equity

distribution. The returns of excess equity from the Fund to its participants, as well as the return of funds to the federal government have been recorded as Special Items in the financial statements for the fiscal year ended June 30, 2005.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION BUDGETARY REPORTING

Statutory/Budgetary Presentation

In accordance with statute, the Governor presents a biennial budget for the General Fund and special revenue funds to the Legislature for enactment or revision. Effective November 27, 1995, a State Constitutional Amendment provided the Governor a “line item” veto of dollar amounts, allowing a dollar substitution for those amounts disapproved, as long as an appropriation or allocation is not increased (or a deappropriation or deallocation decreased) either in the specified line or in any other line in the legislative document. Another Constitutional Amendment requires the State to fund at least 90 percent of the annual cost of future mandates imposed on local governments; any exception requires a two-thirds vote of the elected members of the House and Senate.

Once passed and signed, the budget becomes the financial plan for the next biennium. It includes proposed expenditures for all departments and agencies, interest and debt redemption charges, and expenditures for capital projects to be undertaken and executed during each fiscal year. The budget also includes anticipated revenues and any other means of financing expenditures. The State Budget Officer is required to use the revenue projections of the Revenue Forecasting Committee in preparing the General Fund and Highway Fund budgets.

Exceptional circumstances do not apply to new programs or program expansions that go beyond existing program criteria and operation.

Budgetary control is maintained at the program and line category level at which appropriations and allocations are approved by the Legislature, principally through a quarterly allotment system. The State Budget Officer and the Governor must approve budget revisions during the year, reflecting program changes or intradepartmental administrative transfers. Except in specific instances, only the Legislature may transfer appropriations between departments. Increases in appropriation, allocation, or funding for new programs are presented to the Legislature as a supplemental budget. For the year ended June 30, 2005, the legislature approved \$138.5 million of supplemental appropriations for the General Fund.

Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of funds are recorded to reserve a portion of the applicable appropriation or allocation, is employed in governmental fund types. For financial statement purposes, encumbrances outstanding at June 30 are shown as reservations of fund balance. Unencumbered appropriations in the General Fund and Highway Fund lapse at June 30 unless, by law, they are carried forward to a subsequent year. Amounts carried forward are shown as reservations of fund balance.

The State’s budget is prepared primarily on a cash basis. Sales, income, corporate and fuel taxes include a modified accrual basis adjustment to recognize revenues that are expected to be collected within 60 days of the end of the fiscal year.

The Budgetary Comparison Schedule is presented as Required Supplementary Information (RSI) in this report. Actual amounts in this schedule are presented on a budgetary basis. Because this basis differs from accounting principles generally accepted in the United States of America (GAAP), a reconciliation between the budgetary and GAAP basis is presented in the RSI.

The various funds and programs within funds utilize a number of different budgetary control processes. Annual legislative appropriations and revenue estimates are provided for most “operating” funds.

The original executive budget and original legislative appropriations provide general purpose (unrestricted) revenue estimates in order to demonstrate compliance with constitutional provisions. Revenues restricted by law or outside grantors to a specific program are estimated at a level of detail consistent with controlling related expenditure accounts.

For programs financed from restricted revenues, spending authorization is generally contingent upon recognition of the related revenue. Reductions of spending authority occur if revenues fall short of estimates. If revenues exceed the estimate, supplemental appropriations are required before the additional resources can be spent.

The budgetary comparison schedule presented for the General Fund, the Highway Fund, the Federal Fund, and the Other Special Revenue Fund presents the original and final appropriated budgets for fiscal year 2004-2005, as well as the actual resource inflows, outflows and fund balances stated on the budgetary basis.

The original budget and related estimated revenues represent the spending authority enacted into law by the appropriation bills as of June 23, 2004, and includes encumbrances carried forward from the prior year.

Generally accepted accounting principles (GAAP) require that the final legal budget be reflected in the “final budget” column. Therefore updated revenue estimates available for appropriations as of June 13, 2005, rather than the amounts shown in the original budget, are reported.

The final appropriations budget represents original and supplemental appropriations, carry-forwards, approved transfers, and executive order reductions. Expenditures, transfers out, other financing uses, and encumbrances are combined and classified by policy area rather than being reported by character and function as shown in the GAAP statements. This policy area classification is used to better reflect organizational responsibility and to be more consistent with the budget process.

Compliance at the Legal Level of Budgetary Control

The following schedules depict budgeted to actual expenditures at the Department level, which is the legal level of budgetary control for all governmental funds.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION PENSION INFORMATION

Basis of Presentation

For financial statement reporting purposes, the information provided on the required supplementary information schedules includes amounts for employees of participating local districts as well as combined amounts for State employees, teachers, judicial and legislative employees.

Actuarial Assumptions and Methods:

The information in the required supplemental schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation date, June 30, 2005 is as follows:

Funding Method

Costs are developed using the entry age normal cost method (based on a level percentage of covered payroll), except for the costs of the legislative plan, where the aggregate method is used. Under this method the accrued liability and the present value of future normal costs are determined by summing the individual entry age results for each participant. The normal cost is then determined in aggregate by spreading the present value of future normal costs as a level percentage of expected future covered payroll. Entry age is defined as the first day service is credited under the plan.

Experience gains and losses, i.e., decreases or increases in liabilities and/or in assets when actual experience differs from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

Asset Valuation Method

Assets are valued for funding purposes using a three-year moving average. Under this method, the year-end actuarial asset value equals 1/3 of the current fiscal year-end fair value, as reported in the financial statements, plus 2/3 of the "expected market value." For purposes of this calculation, the "expected market value" is the preceding fiscal year's actuarial asset value, adjusted for the current fiscal year's cash flows with interest accumulated at the actuarial assumed rate of return on investments.

Amortization

The unfunded actuarial liability is amortized on a level percentage of payroll over the amortization period then in effect under statutory and constitutional requirements, which is over a 19 year closed period from June 30, 2000. In 2004, the Legislature relengthened the period to 25 years, the full extent of the then-remaining Constitutional years for the 2004-2005 biennium, and reshortened the period effective July 1, 2005 to the 13 years that will then remain in the earlier shortened period. In 2005, the State repealed the "sunset" provision, with the result that the period for reduction of these unfunded actuarial liabilities continues to the full extent permitted by the State constitution, or June 30, 2028. The unfunded actuarial accrual liability of the judicial plan is amortized over a period of which 12 years remained at June 30, 2005.

The IUUAL of PLDs are amortized over periods established for each PLD separately. During fiscal year 2005 and 2004, various PLD's contributed approximately \$6,800 and \$9.4 million to decrease their initial unpooled unfunded actuarial liability, respectively.

Significant actuarial assumptions employed by the actuary for funding purposes as of June 30, 2005 are as follows:

Investment Return – 8% per annum, compounded annually

Salary Increases – 5.5% to 9.5% per year (including inflation of 5%)

Mortality Rates – Active State employee members and active participating local district members, non-disabled State employee retirees and non-disabled participating local district members with retirement dates on or after July 1, 1998 – UP 1994 Tables; Active teacher members and non-disabled teacher retirees with retirement dates on or after July 1, 1998 – 85% of UP 1994 Tables; Non-disabled State employee retirees and non-disabled participating local district retirees with retirement dates before July 1, 1998 – GAM 1971 Tables; Non-disabled teacher retirees with retirement dates before July 1, 1998 – GAM 1971 Tables set back two years; All recipients of disability benefits with retirement dates on or after July 1, 1998 – 1964 Commissioners Disability Table; All recipients of disability benefits with retirement dates before July 1, 1998 – RPA 1994 Table for pre-1995 Disabilities.

Post Retirement Benefit Increases – 4% per annum

Group Life Plan:

The Group Life Insurance Program administered by the System provides for a life insurance benefit for active members equal to a member's annual base compensation as defined by statute. Upon retirement, life insurance coverage in the amount of the member's average final compensation is provided with a reduction of 15% per year until the greater of 40% of the average final compensation or \$2,500 is reached. To be covered in retirement, retirees must have participated in the Group Life Program for a minimum of ten years. Premiums are remitted to the System by the employer. The State pays a premium rate of \$0.30 per \$1,000 of coverage per month for active state employees. Teachers and employees of participating local districts pay a premium rate of \$0.22 and \$0.46 per \$1,000 of coverage per month, respectively, some or all of which may be deducted from employees' compensation as per individual agreements with employees. Assumptions used to determine the actuarial liability are the same as for the pension plan. At June 30, 2005 and 2004, the net assets held in trust for group life insurance benefits were \$41.8 million and \$40.0 million, respectively. At June 30, 2005 and 2004, the plan had the following actuarially determined liabilities:

	(In millions)	
	<u>2005</u>	<u>2004</u>
Actuarial Liabilities:		
Active Members	\$ 58.9	\$ 49.2
Retired Members	<u>68.1</u>	<u>42.5</u>
Total	<u>\$ 127.0</u>	<u>\$ 91.7</u>

**Required Supplementary Information –
Information about Infrastructure Assets Reported Using the Modified Approach**

As allowed by GASB Statement No. 34, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this process, the State does not record depreciation expense nor are amounts capitalized in connection with improvements to these assets, unless the improvements expand the capacity or efficiency of an asset. Assets accounted for under the modified approach include 8,760 highway miles or 17,747 lane miles of roads and 2,967 bridges having a total deck area of 11.4 million square feet that the State is responsible to maintain.

In order to utilize the modified approach, the State is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure.
- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the State.
- Document that the assets are being preserved at, or above, the established condition level.

Roads and bridges maintained by the Department of Transportation are accounted for using the modified approach.

Highways

Measurement Scale for Highways

The Maine Department of Transportation (MDOT) uses six indicators to determine the condition of highway adequacy. The six indicators and their relative point weighting are listed in the table below.

Data Element	Point Rating (%)	Description
Pavement Condition Rating (PCR)	45	PCR is defined as the composite condition of the pavement on a roadway only, and is compiled from the severity and extent of pavement distresses such as cracking, rutting and patching. It is the key indicator used to determine the optimum time to treat a particular section of road. Points decrease as PCR decreases.
Safety	20	Statewide crash rates are used to allocate points. Locations with high rates get fewer points.
Backlog (Built v Unbuilt roadway)	15	A “Built” road is one that has been constructed to a modern standard, usually post 1950. This includes adequate drainage, base, and pavement to carry the traffic load, and adequate sight distance and width to meet current safety standards. “Unbuilt” (backlog) is defined as a roadway section that has not been built to modern standards. Yes or No (15 or 0).
Annual Average Daily Traffic divided by the hourly highway capacity (AADT/C)	10	This ratio measures how intensely a highway is utilized. As a highway facility’s AADT/C ratio increases, the average speed of vehicles on that facility tends to decrease. This decrease in average speed is evidence of reduced mobility. As congestion increases, points decrease (0-10).
Posted Speed	5	Lower speeds equal fewer points.
Paved Shoulder	5	In general, roadways with paved shoulders perform at a higher level and last longer than those without shoulders or with only gravel shoulders. Yes or No (5 or 0).
	100	

Bridges

MDOT uses four separate factors to obtain a numerical value used to indicate the ability of bridges to remain in service at the current level of usage. The numeric value is a percentage ranging from 0% to represent an entirely insufficient or deficient bridge, and 100% to represent an entirely sufficient bridge. The four indicators and their relative point weighting are listed in the table below. The composite numeric value is based on the sufficiency rating formula in the Recording and Coding Guide for Structure Inventory and Appraisal of the Nation's Bridges.

Data Element	Point Rating (%)	Description
Structural Adequacy and Safety	55	This category considers inventory rating, superstructure, substructure and culverts.
Serviceability and Functional Obsolescence	30	Serviceability and functional obsolescence that addresses the number of lanes, average daily traffic, roadway width, bridge width, deck condition, under clearances, waterway adequacy, alignment, and defense highway designation.
Essentiality for Public Use	15	This considers detour length, average daily traffic, and defense highway designation.
Special Reductions	(13)	The sufficiency rating also includes consideration of special reductions for detour length, safety features, and type of structure.

Assessed Conditions

The following table shows adequacy ratings for maintenance levels from Excellent to Poor.

Adequacy Rating	Total
Excellent	80-100
Good	70-80
Fair	60-70
Poor	0-60

MDOT intends to maintain highways and bridges at an adequacy rating of 60 or higher. The following table shows adequacy ratings achieved by MDOT.

Fiscal Year	Highways	Bridges
2005	79.3	77.0
2004	78.2	77.0
2003	77.6	76.0

Budgeted and Estimated Costs to Maintain

The following table presents the State's preservation costs for the past five fiscal years. It also shows the estimate of spending necessary to preserve and maintain the roads and bridges at, or above, a sufficiency rating of 60 for both highways and bridges (in millions). DOT did not collect estimated information in this format, prior to FY 2003.

Fiscal Year	Estimated Spending	Actual Spending
2006	\$ 52	\$ -
2005	31	46.1
2004	30	35.3
2003	36	34.3
2002	-	41.4
2001	-	29.4

Transportation Bonds

Transportation bonds, approved by referendum, are issued to fund improvements to highways and bridges. Of the amount authorized by Chapter 33, P&S 2003, \$22 million was spent during FY2005.

NON-MAJOR GOVERNMENTAL FUNDS

Special Revenue Funds

Learning Technology Fund – This fund accounts for funds dedicated by the Legislature and by other private and public sources for the advancement of learning technology for elementary and secondary students in Maine.

Baxter Park Fund – This fund accounts for a gift to the State of Maine by former Governor Baxter, which

allows for the principal and interest to be used to purchase public reserved lands. Interest income may also be used for operations of the Baxter State Park.

Revenue on Permanent Funds Fund – This fund accounts for expendable earnings on permanent fund balances.

Capital Projects Funds

General Bond Fund – This fund accounts for the acquisition or construction of major capital facilities, other than highways and bridges that are financed primarily from proceeds of general obligation bonds.

The State also includes proceeds from bond issues for purposes other than construction of major capital facilities in this fund.

Permanent Funds

Baxter Park Trust Fund – This fund accounts for a gift to the State of Maine by former Governor Baxter, calling for principal to be maintained intact and income to be used for park operations.

Other Trust Funds – These funds are comprised of numerous small Permanent Funds, the income from which may be used for specified purposes.

NON-MAJOR ENTERPRISE FUNDS

Lottery Fund – This fund was established to account for all operations of the Maine State Lottery. This includes the Tri-State Lotto Commission and the Multi-State Lottery Association. The Tri-State Lotto Commission was established in 1985 and is a joint venture between the States of Maine, New Hampshire, and Vermont. The Commission is authorized and empowered to promulgate rules and regulations regarding the conduct of lottery games, including the prices of tickets, the number and size of prizes for winning tickets, and the licensing of agents. The Multi-State Lottery Association was established in July 2004 and is authorized to initiate, promulgate, administer and carry out one or more lottery product offerings.

Maine Military Authority Fund – This fund was created for the purpose of operating the Maine Readiness Sustainment Maintenance Center. The Center maintains, rebuilds, repairs, stores and manufactures equipment for the United States Departments of Defense, Army, Air Force, Navy and Treasury.

Seed Potato Board Fund – This fund accounts for the growing of nuclear seed for sale to potato growers, for research in disease control, and the development of new product varieties.

State Airport Fund – This fund accounts for all operations and maintenance of the Maine State Airport. The State, through the Department of Transportation, entered into a lease/purchase agreement with the City of Augusta to operate and eventually own the airport.

Marine Ports Fund – This fund is used to account for the operation and maintenance of port facilities within the jurisdiction of the Department of Transportation.

State Ferry Service Fund – This fund accounts for the operation of ferry services between the mainland and various islands for the purpose of transporting vehicles, freight, and passengers to and from those islands.

Prison Industries Fund – This fund accounts for a self-supporting program of job training through the employment of inmates in manufacturing and selling products.

Community Industrial Building Fund – This fund is used to assist a local development corporation to construct a community industrial building by lending money when the project can reasonably be expected to create new employment. Preference is given to projects in economically deprived areas.

Dirigo Health Agency - This fund was created to arrange for the provision of comprehensive, affordable health care coverage to eligible small employers, including the self-employed, their employees and dependents, and individuals on a voluntary basis.

INTERNAL SERVICE FUNDS

Motor Transport Service Fund – This fund accounts for all the equipment and vehicle operations of the Department of Transportation.

Postal, Printing and Supply Fund – This fund accounts for the purchase of general office supplies, materials and photocopiers required by any State department or agency, the purchase of and contract for all postal and mailing services, duplicating needs, and the acquisition and disposition of State and federal surplus property. This fund is also used to administer the State’s Procurement Card Program.

Information Services Fund – This fund accounts for the costs of providing information services in data processing and telecommunications and for coordinating data processing services including computer operations, programming and applications systems development, technical support and networking services.

Risk Management Fund – This fund accounts for resources generated and used to provide insurance advice and services for all forms of insurance except health and workers’ compensation. This includes insurance for automobile, fire, liability and any other type of coverage that may be necessary to protect the State against financial loss.

Workers’ Compensation Fund – This fund accounts for resources generated and used to provide workers’ compensation advice and insurance services.

Central Fleet Management Fund – This fund accounts for the cost of administering a uniform program for the operation and maintenance of all State vehicles except those of the Department of Transportation and Public Safety.

Leased Space Fund – This fund accounts for State facilities leasing activities and maintains records of State agency property, leasing needs and all available space owned, leased and potentially available for lease.

Revenue Services Fund – This fund accounts for the resources generated and used to provide up-to-date information to facilitate compliance with Maine tax law and to help reduce common mistakes in filing tax forms.

Retiree Health Insurance Fund – This fund accounts for post retirement health care premiums and benefits for most retired state employees and Legislators, and for a portion of the premiums for teachers.

Employee Health Insurance Fund – This fund accounts for health care premiums and benefits for most state employees.

Statewide Radio & Network System Fund – This fund accounts for resources generated and used to acquire, expand, upgrade and replace a statewide radio and network system for use by State agencies.

Governmental Facilities Authority Fund – This fund includes the operations of the Maine Governmental Facilities Authority, a blended component unit. The Authority was created to assist in the financing, equipping, improvement, reconstruction, acquisition, and construction of additions to structures designed for use as a court facility, State office or State activity space.

PRIVATE PURPOSE TRUSTS & AGENCY FUNDS

Private Purpose Trust Funds

Abandoned Property Fund - This fund accounts for unclaimed property receipts. All holders of property presumed abandoned must report these properties to the Treasurer annually. The Treasurer will honor claims indefinitely.

Revenue on Private Purpose Trusts Fund – This fund accounts for expendable earnings on private purpose trust fund balances.

Lands Reserved Trust Funds – These funds were established to account for revenue derived from the sale of timber from public lands and from appreciation on investments. The income is to be used for school purposes by townships when they become organized towns or plantations.

Permanent School Fund – This fund is comprised of numerous small private purpose trusts, the income from which may be used for specified purposes.

NextGen College Investing Plan – is the Maine College Savings Program. The program was established under Chapter 417-E of Title 20-A, to encourage the investment of funds to be used for

Qualified Higher Education Expenses at institutions of higher education. The plan consists of the investments made by participants in the State's Qualified State Tuition Program under Section 529 of the Internal Revenue Code.

The State presents discretely reported component units that are fiduciary in nature in the Statement of Fiduciary Net Assets and Statement of Changes in Fiduciary Net Assets. In accordance with GAAP, this external entity is excluded from the government-wide financial statements.

Maine Health & Higher Educational Facilities Authority – MHHEFA assists Maine health care institutions and institutions of higher education in undertaking projects involving the acquisition, construction, improvement, reconstruction and equipping of health care and educational facilities and the refinancing of existing indebtedness. The Authority, pursuant to the Student Loan Corporations Act of 1983, may finance student loan programs of institutions of higher education

Agency Funds

Payroll Withholding Fund – This fund accounts for all payroll taxes and deductions withheld to pay the federal government, other State agencies, and payroll vendors.

Private Trusts Fund – This fund is used to account for assets held by the State acting as an agent for patients of State Mental Health facilities, inmates at State Correctional Institutions, recipients of State-supported elder and adult services, and child support enforcement services. Also included in this fund are insurance company and unemployment guaranty

deposits, and assets held in Courts and Corrections restitution escrow accounts.

Other Agency Funds – These funds account for numerous small agency funds which have been combined for financial reporting purposes.

Treasurer's Agency Fund – This fund accounts for deposits of quasi-governmental units placed in the Treasurer's Cash Pool for investment purposes.

2000	82,280	24,359	106,639	4,155,963	2.6%
1999	79,615	25,022	104,637	3,933,125	2.7%
1998	76,426	25,111	101,537	3,661,399	2.8%
1997	87,917	27,486	115,403	3,603,961	3.2%
1996	76,807	26,828	103,635	3,706,418	2.8%

Notes: (1) Includes Other Debt of the General and Highway Fund expected to be repaid through general governmental resources. Does not include debt of the Maine Governmental Facilities Authority.

(2) 2003 expenditures depict a statutory realignment of agencies among policy areas and the effect of a prior year restatement which totaled \$8,495 for accrued expenditures.

TABLE VI

**STATE OF MAINE
COMPUTATION OF LEGAL DEBT MARGIN**

JUNE 30, 2005

Pursuant to Article IX, Section 14 of the Maine Constitution, the Legislature shall not create any debt or debts on behalf of the State, which shall exceed \$2,000,000 in the aggregate, except to suppress insurrection, to repel invasion, or for purposes of war, and except for temporary loans to be paid out of money raised by taxation during the fiscal year in which they are made. Whenever 2/3 of both Houses shall deem it necessary, by proper enactment ratified by a majority of the electors voting thereon at a general or special election, the Legislature may authorize the issuance of bonds on behalf of the State as approved by such action. Temporary loans to be paid out of moneys raised by taxation during any fiscal year shall not exceed in the aggregate during the fiscal year in question an amount greater than 10% of all the moneys appropriated, authorized and allocated by the Legislature from undedicated revenues to the General Fund and dedicated revenues to the Highway Fund for that fiscal year, exclusive of proceeds or expenditures from the sale of bonds, or greater than 1% of the total valuation of the State of Maine, whichever is the lesser.

There were no temporary loans outstanding at June 30, 2005, which were subject to the Constitutional limitations.

All other general long-term bonds outstanding at June 30, 2005 were issued pursuant to properly ratified legislation.

Notes: (1) Civilian labor force, employed, and unemployed estimates are by place of residence. Year-ago estimates are revised. Items may not add due to rounding. All data exclude members of the Armed Forces.

(2) Total employment includes nonfarm wage and salary workers, agricultural workers, unpaid family workers, domestics, the self employed, and workers involved in labor disputes.

(3) People are classified as unemployed, regardless of their eligibility for unemployment benefits or public assistance, if they meet all of the following criteria: they were not employed during the survey week; they were available for work at that time; and they made specific efforts to find employment some time during the prior four weeks. Persons laid off from their former jobs and awaiting recall and those expecting to report to a job within 30 days need not be looking for work to be counted as unemployed.

(4) The unemployment rate is calculated by dividing the total number of unemployed by the total civilian labor force, and is expressed as a percent.

(5) Bangor, Lewiston-Auburn; Portland-South Portland-Biddeford; Portsmouth, NH-ME; and Rochester-Dover, NH-ME are Metropolitan Statistical Areas. Augusta, Brunswick, Rockland, Sanford, and Waterville are Micropolitan Statistical Areas.

(6) Maine portion of the area which includes towns in both Maine and New Hampshire.
