

COVID-19 HEALTH AND SAFETY FACT SHEET FOR IN-PERSON VOTING

To ensure the health and safety of our voters and poll workers during in-person voting for 2020 amidst the Coronavirus (COVID-19) pandemic, the Miami-Dade County Elections Department is following the Florida Department of Health and Centers for Disease Control and Prevention guidelines.

We encourage voters to consider Voting-by-Mail this election cycle, to vote from the comfort and safety of their homes. In-person voting will continue to be offered, both through Early Voting and on Election Day, for those who prefer these voting methods. We are taking all possible precautions to keep you safe and ask that you assist us as well.

The Miami-Dade Elections Department will do the following:

Provide all poll workers with face shields, masks and disposable gloves.

Regularly wipe down common touch points with disinfectant.

Offer hand sanitizer to all voters upon entering and exiting the voting location.

Mark the ground with stickers to ensure voters can adhere to social distancing protocols.

Provide access to bathrooms that have soap and water available for hand washing.

What we are asking from our voters:

You are required to wear facial covering to enter the voting location.

Please use the hand sanitizer that is provided upon entering and exiting.

Review your sample ballot in advance of coming to vote. You can even mark it and bring it with you. Knowing your selections in advance of arriving will speed up the process and allow you to exit the facility faster.

Bring a valid [ID](#).
