

## Smarter, safer hospitals

Improve patient care, enhance productivity and reduce infection risk with Smart solutions from Microshare

Microshare technology, deployed in hospitals and healthcare facilities across the world, provide the data to optimize operations and increase the safety and satisfaction of patients, visitors and staff.

Our EverSmart suite of solutions automates labor-intensive routines, ranging from cleaning to service requests, as well as the never-ending search for mobile equipment such as wheelchairs, beds, and infusion devices. Additionally, our EverSmart Clean deployments have successfully reduced rates of Hospital Associated Infections (HAI) in numerous clinical settings.

## EverSmart Clean

**EverSmart Clean** provides valuable insights into cleaning requirements and frequency by utilizing activity data and user feedback. This innovative solution offers real-time insights on the cleanliness of a space, enabling effective and efficient cleaning practices.

## EverSmart Air

**Indoor air quality** sensors that monitor temperature, humidity, CO2 and other metrics to assist in slowing the spread of bacteria and improve building health.

## EverSmart Alert/Fridge Temperature

Monitor your **fridge temperature** and receive an EverSmart Alert before your inventory is compromised, ensuring timely action to maintain optimal conditions.

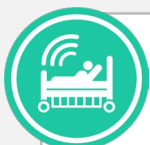

## EverSmart Alert/QuikServ

**QuikServ** began as AlertComm during the pandemic has become a healthcare staple: A simple, one button device to alert staff of the need for deep cleaning. .

## Feedback Stations

**Patient feedback stations** are implemented to enhance patient satisfaction and mitigate risks through group sourcing. These stations aim to address issues such as leaks and supply shortages, ensuring a smoother and more efficient healthcare environment. **Simple-request feedback stations** facilitates quicker turnover of exam rooms, optimizing workflow and minimizing waiting times.

## Asset Zoning

**Asset Zoning** offers instant location tracking for wheelchairs, beds, blood pressure machines, and other valuable equipment. This innovative solution brings numerous benefits in terms of productivity, morale, efficiency, and inventory control.
