

Project Leadership Services

Certified Project Leadership guidance and support

From idea to roll-out, Meridian has 20+ years and the experience of 100+ ERP projects, leading the world's top run organizations to ERP implementation success

Do your important ERP projects have the governance, set up, and leadership to reach the finish line?

Meridian's Project Leadership Services help customers succeed at all stages of the transformation journey. Guiding and answering questions like:

- ✓ What is right governance and reporting structure to **stay on track and keep key stakeholders informed**?
- ✓ Do we have an **actionable and realistic plan** to reach our goals?
- ✓ How best should risk be **managed and mitigated**?
- ✓ How will the solution **change our organization** and what training and knowledge do we need?
- ✓ What is the best way to implement the solution **without disrupting day-to-day operations**?

Be confident your ERP projects will succeed by having a dedicated expert on your team.

Services
Partner

Stay informed, on-track, and head off risk and issues, by having Meridian be your trusted partner on that journey

Project Leadership Services

How we help?

- Prepare your organization for the upcoming change and transformation
- Provide independent and unbiased advice and guidance on the best path forward
- Keep key stakeholders informed and engaged
- Identify and help avoid major risks and pitfalls
- Provide experienced and expert level certified project leadership to get the job done
- Ensure you are ready for post go-live support

Core Capabilities

- Assessment and deployment strategies
- Right-sized project management
- Full project ownership or specialized focus areas including Finance, HR, Payroll, and Budgeting
- Resource management
- Readiness and Go-Live checklists
- Troubled project recovery
- Vendor management
- Project audits and rescue

Experience Counts

Working with us you would be in good company!

UNITED NATIONS

Meridian Partners has played in the big leagues as projects go. The Meridian team helped the UN plan and execute on an estimated one-billion-dollar global modernization program.

The expert level team analyzed the detailed strategy and plans then provided actionable steps and guidance to UN leadership to improve program performance, mitigate or avoid the identified risks.

This included delivering, to top UN leadership led by the Assistant Secretary general overseeing the program, a comprehensive briefing and review of implementation strategies, including deliverables, schedule, cost estimates, testing and quality checks, resource management, change management, training, risk plans, critical assumptions, and more.

After the team was requested to support key subprojects needed some help to get back on track or needed hands-on subject matter expertise to help the UN reach the finish line. **From start-to-finish Meridian was there!**
